The state should complete this Title Page at the beginning of a demonstration and submit as the title page of all SUD Monitoring Reports. The content of this table should stay consistent over time.

Reduced utilization of emergency departments and inpatient hospital settings for treatment where the utilization is preventable or medically inappropriate through improved access to other continuum of care services;</i> <i>5. 2. Executive Summary

The executive summary should be reported in the fillable box below. It is intended for summary-level information only. The recommended word count is 500 or less.

In DY1Q3 (January 2020 – March 2020), the state focused on two implementation areas: 1) evaluation design and 2) new Medicaid-covered services.

Nebraska was able to engage with an entity to support the development of the draft evaluation design and made significant progress towards submission of the draft within the agreed upon timetable. More information on the evaluation topic is included in Section 12.1 of this report.

While the SUD demonstration STCs require that the state submit state plan amendments for the coverage of Medically-monitored Inpatient Withdrawal Management and Opioid Treatment Program within 24 months of demonstration approval, Nebraska had the opportunity to accelerate the addition of these services and therefore continued to prioritize SPA development in DY1Q3. More information on the SPAs is included in Section 2.2.2.

Towards the latter part of Q3, work on the SUD demonstration was significantly impacted by the need to allocate resources towards addressing the COVID-19. This reprioritization did impact areas such as updating the monitoring protocol.
