# Division of Medicaid and Children's Health Operations

June 23, 2014

Charles M. Palmer, Director Department of Human Services Hoover State Office Building 1305 East Walnut, 5<sup>th</sup> Floor Des Moines, Iowa 50319-0119

Dear Mr. Palmer:

The Centers for Medicare & Medicaid Services (CMS), Kansas City Regional Office, has completed its review of Iowa State Plan Amendment (SPA) Transmittal Number 14-009. This SPA is the Phase III expansion of Iowa's serious and persistent mental illness (SPMI) health home program for Medicaid eligible individuals as authorized under Section 2703 of the Patient Protection and Affordable Care Act. The Phase III expansion into the following remaining counties: Adair, Adams, Allamakee, Appanoose, Audubon, Boone, Bremer, Buena Vista, Butler, Carroll, Cass, Cherokee, Chickasaw, Clarke, Clay, Clayton, Crawford, Dallas, Davis, Decatur, Des Moines, Dickinson, Emmet, Fayette, Franklin, Fremont, Greene, Guthrie, Hamilton, Hardin, Henry, Howard, Ida, Jasper, Jefferson, Keokuk, Lee, Louisa, Lucas, Lyon, Madison, Mahaska, Marion, Marshall, Monona, Monroe, Montgomery, O'Brien, Osceola, Page, Palo Alto, Plymouth, Poweshiek, Ringgold, Sac, Shelby, Sioux, Story, Tama, Taylor, Union, Van Buren, Wapello, Washington, Wayne, and Winneshiek. This Phase III expansion which is effective July 1, 2014, is the final phase of the state's SPMI health home program and completes Iowa's statewide implementation of this program.

The state's payment rate to reflect activities associated with member outreach prior to engagement in the program is limited to a three month period of time and can only be paid once per Medicaid eligible individual.

This SPA was approved June 19, 2014, with an effective date of July 1, 2014. Enclosed is a copy of the CMS 179 form, as well as, the approved pages for incorporation into the lowa state plan.

In accordance with the statutory provisions at Section 1945(c)(1) of the Social Security Act, for payments made to health home providers under this amendment, during the first eight fiscal quarters that the SPA is in effect, July 1, 2014 through June 30, 2016, the federal medical assistance percentage (FMAP) rate applicable to such payments shall be equal to 90 percent. The FMAP rate for payments made to health home providers will return to the state's published FMAP rate on July 1, 2016.

# Page 2 – Charles M. Palmer

If you have any questions regarding this state plan amendment, please contact Sandra Levels at <a href="mailto:Sandra.Levels@cms.hhs.gov">Sandra.Levels@cms.hhs.gov</a> or (816) 426-5925.

Sincerely,

//s//

James G. Scott Associate Regional Administrator for Medicaid and Children's Health Operations

# **Executive Summary**

Summary description including goals and objectives:

A health home model focused on adults and children with SPMI.

The State is developing a team of health care professional to integrate medical, social, and behavioral health care needs for individuals with a serious mental illness (SMI) or a serious emotional disturbance (SED).

The team approach includes a lead entity and qualified integrated health home providers (IHH). Health home services will be a whole-person treatment approach and coordinated between multiple delivery systems. The State will pay the lead entity a per member per month (PMPM) for enrolled SPMI members.

HIT will link services, provide feedback and facilitate communication among team members. Electronic sharing of health data among behavioral and physical health providers in a HIPPA-compliant manner enables tight coordination with the broader physical health delivery system. Online profiles are able to include medical, behavioral and pharmacy history.

**Anticipated Outcomes:** 

Improved quality of care.

Improved health status.

Increased community tenure and reduction in hospital readmissions.

Increased access to primary care, with a reduction in inappropriate use of emergency room and urgent care.

Reduction in preventable hospitalizations.

Improved measured functional status

Improved evidence-based prescribing and medication adherence.

Improvement in identifying substance use/abuse and engagement in treatment.

Reduction in lifestyle-related risk factors.

Improved experience of care (member satisfaction).

# **Health Homes Population Criteria and Enrollment**

## **Population Criteria**

The State elects to offer Health Homes services to individuals with:

Two or more chronic conditions

**Specify the conditions included:** 

- Mental Health Condition
- Substance Abuse Disorder
- **Asthma**
- **Diabetes**
- Heart Disease
- BMI over 25

Other Chronic Conditions	
One chronic condition and the risk of developing another	
Specify the conditions included:	
Mental Health Condition Substance Abuse Disorder Asthma Diabetes Heart Disease BMI over 25	
Other Chronic Conditions	
Specify the criteria for at risk of developing another chronic condition:	
<b>☑</b> One or more serious and persistent mental health condition	
Specify the criteria for a serious and persistent mental health condition: Members with Serious Mental Illness SMI) or Serious Emotional Disturbance SED)are eligible.	
SMI is defined as; Psychotic Disorders, Schizophrenia, Schizoaffective disorder, Major Depression, Bipolar Disorder, Delusional Disorder Obsessive-Compulsive Disorder.	
Exceptions considered through a prior authorization process, for the categories above when the behavioral health cond chronic functional impairment is present as per the definition below.	ition is
SED is a diagnosable mental, behavioral or emotional disorder of sufficient duration to meet diagnostic criteria specific the most current Diagnostic and Statistical Manual of mental disorders published by the American Psychiatric Associat most recent International Classification of Diseases equivalent that result in functional impairment. SED may co-occur substance use disorders, learning disorders, or intellectual disorders that may be a focus of clinical attention.	tion or its
Functional Impairment (FI) is: difficulties that substantially interfere with or limit the achievement of or maintaining one or more developmentally apsocial, behavioral, cognitive, communicative or adaptive skills and substantially interfere with or limits functioning in school or community activities, difficulties of episodic, recurrent and continuous duration.  does not include difficulties resulting from temporary and expected responses to stressful events in a person environment For children 3 yrs or younger, the Diagnostic Classification of Mental Health and Developmental Disorders of Infancy Childhood-Revised (DC: 0-3R) may be used as the diagnostic tool. For children 4 yrs and older, the Diagnostic Intervision Children (DISC) may be used as an alternative to the most current DSM.  FI will be determined through an assessment provided by the integrated health home that serves children	family, ent.  and Early
Geographic Limitations	
Health Homes services will be available statewide	
If no, specify the geographic limitations:	

By county

Specify which counties:

Effective 7/1/2013 Phase I:Dubuque, Polk, Linn, Warren and Woodbury counties

Effective 4/1/2014 Phase II: Benton, Black Hawk, Buchanan, Calhoun, Cedar, Cerro Gordo, Clinton, Delaware, Floyd, Grundy, Hancock, Harrison, Humboldt, Iowa, Jackson, Johnson, Jones, Kossuth, Mills, Mitchell, Muscatine, Pocahontas, Pottawattamie, Scott, Webster, Winnebago, Worth, and Wright.

Effective 7/1/2014 Phase III: Adair, Adams, Allamakee, Appanoose, Audubon, Boone, Bremer, Buena Vista, Butler, Carroll, Cass, Cherokee, Chickasaw, Clarke, Clay, Clayton, Crawford, Dallas, Davis, Decatur, Des Moines, Dickinson, Emmet, Fayette, Franklin, Fremont, Greene, Guthrie, Hamilton, Hardin, Henry, Howard, Ida, Jasper, Jefferson, Keokuk, Lee, Louisa, Lucas, Lyon, Madison, Mahaska, Marion, Marshall, Monona, Monroe, Montgomery, O'Brien, Osceola, Page, Palo Alto, Plymouth, Poweshiek, Ringgold, Sac, Shelby, Sioux, Story, Tama, Taylor, Union, Van Buren, Wapello, Washington, Wayne, and Winneshiek

Phase III, effective 7/1/2014, is the final phase of the SPMI HH and completes the statewide implementation.

	Describe the area(s):	
llm	ent of Participants	
cipa alth	ation in a Health Homes is voluntary. Indicate the method the State will use to en Home:	roll eligible Medicaid individuals i
•	Opt-In to Health Homes provider	
	Describe the process used:	

Automatic Assignment with Opt-Out of Health Homes provider

Describe the process used:

A passive enrollment or opt-out model will be used for the program, in which identified eligible members for integrated SPMI health home will be notified of the program via U.S. mail notification and through conversations with the IHH providers. Each identified member must be attributed to a qualified integrated health home to be a health home member. The notification sent to members will identify that the individual is enrolled in a SPMI Integrated health home, briefly describe health home services, and describe the individual's option to opt out of the health home program at any time. If the individual is already enrolled in a health home for members with chronic conditions, the member will choose between the chronic condition Health Home and the SPMI Integrated Health Home. A member cannot be in more than one health home at the same time.

Members in the SPMI Health Home will have state plan services coordinated through the Integrated Health Home provider. If a member receives Case Management through a waiver to the State Plan and also qualifies for the SPMI Health Home, the member can choose between the SPMI Health Home or the Targeted Case Management Service provided through the waiver.

Working with a broad array of community-based agencies and providers the lead entity will use outreach efforts to identify

	potential enfonces based on program enteria.	
	<b>▼</b> The State provides assurance that it will clearly communicate the opt-out option to all individuals assigned to a	
	Health Home under an opt-out process and submit to CMS a copy of any letter or other communication used t inform such individuals of their right to choose.	0
	Other	
	Describe:	
		^
		_
The S	State provides assurance that eligible individuals will be given a free choice of Health Homes providers. State provides assurance that it will not prevent individuals who are dually eligible for Medicare and Medicaid from iving Health Homes services.	1
	State provides assurance that hospitals participating under the State Plan or a waiver of such plan will be instructed	l t
eme	blish procedures for referring eligible individuals with chronic conditions who seek or need treatment in a hospital regency department to designated Health Homes providers.	_
	State provides assurance that it will have the systems in place so that only one 8-quarter period of enhanced FMAP in Health Homes enrollee will be claimed. Enhanced FMAP may only be claimed for the first eight quarters after the	
effec	ctive date of a Health Homes State Plan Amendment that makes Health Home Services available to a new population as people in a particular geographic area or people with a particular chronic condition.	
	State assures that there will be no duplication of services and payment for similar services provided under other	
Med	licaid authorities.

# **Supports for Health Homes Providers**

Describe the methods by which the State will support providers of Health Homes services in addressing the following components:

- 1. Provide quality-driven, cost-effective, culturally appropriate, and person- and family-centered Health Homes services,
- 2. Coordinate and provide access to high-quality health care services informed by evidence-based clinical practice guidelines.
- 3. Coordinate and provide access to preventive and health promotion services, including prevention of mental illness and substance use disorders,
- 4. Coordinate and provide access to mental health and substance abuse services,
- 5. Coordinate and provide access to comprehensive care management, care coordination, and transitional care across settings. Transitional care includes appropriate follow-up from inpatient to other settings, such as participation in discharge planning and facilitating transfer from a pediatric to an adult system of health care,
- 6. Coordinate and provide access to chronic disease management, including self-management support to individuals and their families,
- 7. Coordinate and provide access to individual and family supports, including referral to community, social support, and recovery services,
- 8. Coordinate and provide access to long-term care supports and services,
- 9. Develop a person-centered care plan for each individual that coordinates and integrates all of his or her clinical and non -clinical health-care related needs and services:
- 10. Demonstrate a capacity to use health information technology to link services, facilitate communication among team members and between the health team and individual and family caregivers, and provide feedback to practices, as feasible and appropriate:
- 11. Establish a continuous quality improvement program, and collect and report on data that permits an evaluation of increased coordination of care and chronic disease management on individual-level clinical outcomes, experience of care outcomes, and quality of care outcomes at the population level.

# **Description:**

The State will support Health Homes in achieving the 11 components listed above by designing a program that aligns provider standards and a payment method that ensures quality providers enter the program, that they have a clear understanding of the expectations and that there is an appropriate reimbursement structure to ensure sustainability for the providers. The state expects providers to grow into the role of a successful Health Home and has built in requirements that the lead entity both train and facilitate best practices among the network of IHH providers. The Lead entity is expected to build capacity among the IHH providers by meeting the following requirements:

Identification of providers who meet the standards of participation to as an Integrated Health Home

Assessment of the IHH and physical health provider capacity to provide integrated care

Educate and support providers to deliver integrated care

Provide oversight and technical support for IHH providers to coordinate with primary care physical providers participating in the Iowa Medicaid program;

Provide infrastructure and tools to Behavioral Health IHH providers and primary care physical providers for coordination;

Providing tools for IHH providers to assess and customize care management based on the physical/behavioral health risk level of recipient;

Performing data analytics on personal, medical and pharmacy data to identify patterns of care, as well as track, and close gaps in care:

Providing outcomes tools and measurement protocols to assess IHH concept effectiveness;

Providing clinical guidelines and other decision support tools.

Repository for member data including claims, laboratory, and Continuing Care Document (CCD) data whenever possible

Support providers to share data including CCD or other data from electronic medical records (EMR)

Develop and offer learning activities which will support providers of Integrated Health Home services

#### **Provider Infrastructure**

# Describe the infrastructure of provider arrangements for Health Homes Services.

The Team of Health Care Professionals includes a lead entity and a network of qualified IHH providers. The IHH providers will be qualified and designated by the lead entity through a provider agreement.

#### **Provider Standards**

# The State's minimum requirements and expectations for Health Homes providers are as follows:

- 1. Lead entity standards:
- a. Meet the Provider Qualifications and Standards of a lead entity described in this State Plan.
- b. have capacity to evaluate and select IHH providers, including:

Identification of providers who meet the standards of participation to form an Integrated Health Home

Assessment of the IHH and physical health provider's capacity to provide integrated care

Educate and support providers to deliver integrated care

Provide oversight and technical support for IHH providers to coordinate with primary care physical providers participating in the Iowa Medicaid program;

Provide infrastructure and tools to Behavioral Health IHH providers and primary care physical providers for coordination;

c. Have capacity to provide clinical and care coordination support to IHH providers, including:

Confirmation of screening and identification of members eligible for IHH Services;

Provide oversight and support of IHH providers to develop care plans and identify care management interventions for IHH enrollees:

Providing or contracting for care coordination, including face to face meetings, as necessary to ensure implementation of care plan and appropriate receipt of services;

Gathering and sharing member-level information regarding health care utilization, gaps in care, and medications;

Monitor and intervene for IHH members who are high need with complex treatment plans.

Facilitate shared treatment planning meetings for members with complex situations

d. Have capacity to develop provider information technology infrastructure and provide program tools, including:

Providing tools for IHH providers to assess and customize care management based on the physical/behavioral health risk level of recipient;

Performing data analytics on personal, medical and pharmacy data to identify patterns of care, as well as track, and close gaps in care;

Providing outcomes tools and measurement protocols to assess IHH concept effectiveness;

Providing clinical guidelines and other decision support tools.

Repository for member data including claims, laboratory, and Continuing Care Document (CCD) data whenever possible Support providers to share data including CCD or other data from electronic medical records (EMR)

e. Have capacity to develop and offer learning activities which will support providers of Integrated Health Home services in addressing the following areas:

Providing quality-driven, cost-effective, culturally appropriate, and person- and family-driven health home services;

High-quality health care services informed by evidence-based clinical practice guidelines;

Preventive and health promotion services, including prevention of mental illness and substance use disorders;

Comprehensive care management, care coordination, and transitional care across settings (transitional care includes appropriate follow-up from inpatient to other settings, such as participation in discharge planning and facilitating transfer from a pediatric to an adult system of health care);

Chronic disease management, including self-management support to members and their families;

Demonstrating a capacity to use health information technology to link services, facilitate communication among team members and between the health home team and individual and family caregivers, and provide feedback to practices, as feasible and appropriate, and;

Establishing a continuous quality improvement program, and collect and report on data that permits an evaluation of increased coordination of care and chronic disease management on individual-level clinical outcomes, experience of care outcomes, and quality of care outcomes at the population level.

- 2. Initial IHH Provider Standards:
- a. Meet the Provider Qualifications and Standards of a Integrated Health Home Provider described in this State Plan.
- b. Provider must be able to provide community-based mental health services to the target population.
- c. Have capacity to meet the following qualifications:

Meet staff requirements: Adult IHH - Nurse care manager, care coordinator and trained peer support specialist as need per population. Child IHH - Nurse care manager, Care coordinator and family support specialist positions are required for child IHH teams

Advocate in the community on behalf of their integrated health home members as needed

Have strong, engaged organizational leadership whom are personally committed to and capable of a) leading the practice through the transformation process and sustaining transformed practice processes as demonstrated through the application process, and b) agreeing to participate in learning activities including in-person sessions and regularly scheduled phone calls;

Meet the State's minimum access requirements as follows: assurance of enhanced member and member caretaker (in the case of a child) access, including coverage 24 hours per day, 7 days per week;

Have capacity to complete status reports to document member's housing, legal, employment status, education, custody, etc.; Agree to participate in or convene regular, ongoing and documented IHH network meetings to plan and discuss implementation of goals and objectives for practice transformation with ongoing consideration of the unique practice needs for adult members with SMI and child members with SED and their families;

Agree to participate in CMS and state-required evaluation activities;

Agree to submit reports required by the State (e.g., describe IHH activities, efforts and progress in implementing IHH services); Maintain compliance with all of the terms and conditions as an IHH provider or face termination as a provider of IHH services; Commit to use of an interoperable patient registry or EHR, within a timeline approved by the lead entity, to input information such as annual metabolic screening results, contribute and use clinical information, track and measure care of members, automate care reminders, and produce exception reports for care planning;

Demonstrate ability and confirm willingness to participate in the technology infrastructure for the IHH program, including:

- i. Completing web-based member enrollment, disenrollment, enrollee authorizations for information sharing, and health risk questionnaires for all members;
- ii. Establishing a plan and timeline to be approved by the lead entity, to share continuity of care (CCD) records with the state and its lead entity partner after each visit;
- iii. Utilizing member-level information, member profiles, and care coordination plans for high risk individuals;
- iv. Incorporating tools and evidenced-based guidelines designed for identifying care opportunities across the age and diagnostic continuum, integrating clinical practices, and coordinating care with other providers.

Conduct interventions as indicated based on the member's level of risk;

Provide letters of support from at least one area hospital and two area primary care practices that agree to collaborate with the IHH on care coordination and hospital/ER notification.

## 3. Ongoing IHH Provider Qualifications:

#### Each IHH must also:

- a. Within 3 months of IHH service implementation, have worked with the lead entity partner to develop capacity to receive members redirected from emergency departments, engage in planning transitions in care with area hospitals, and to follow-up on hospital discharges, including Psychiatric Medical Institutions for Children (PMIC);
- b. Within 6 months of IHH service implementation, establish evidence of bi-directional and integrated primary care /behavioral health services through use of a contract, memoranda of agreement or other written agreements approved by the State;
- c. Within 12 months of IHH service implementation, develop quality improvement plans to address gaps and opportunities for improvement identified during and after the application process;
- d. Participate in ongoing process improvement on clinical indicators overall cost effectiveness specified by and reported to the state;
- e. Demonstrate continuing development of fundamental health home functionality at 6 months and 12 months through an assessment process to be applied by the state.
- f. Integrated health home provider will have demonstrated capacity to address the following components, as outlined in SMDL #10-024.

Provide quality-driven, cost-effective, culturally appropriate, and person- and family-centered health home services;

Coordinate and provide access to high-quality health care services informed by evidence-based clinical practice guidelines;

Coordinate and provide access to preventive and health promotion services

Coordinate and provide access to mental health and substance abuse services;

Coordinate and provide access to comprehensive care management, care coordination, and

transitional care and medication reconciliation across settings. Transitional care includes appropriate follow-up from inpatient care/PMIC/group care to other settings, such as participation in discharge planning and facilitating transfer from a pediatric to an adult system of health care;

Coordinate and provide access to chronic disease management, including self-management support to individuals and their families;

Coordinate and provide access to individual and family supports, including education and referral to community, social support, and recovery and resiliency services;

Coordinate and provide access to long-term care supports and services;

Develop a person-centered care plan for each individual that coordinates and integrates all of his or her clinical and non-clinical

health-care related needs and services, in collaboration with the lead entity.

The current capitation rate will be reduced.

Demonstrate a capacity to use health information technology to link services, facilitate communication among team members and between the health team and individual and family caregivers, and provide feedback to practices, as feasible and appropriate; and Establish a continuous quality improvement program, and collect and report on data that permits an evaluation of increased coordination of care and chronic disease management on individual-level clinical outcomes, experience of care outcomes, and quality of care outcomes at the population level.

#### **■** Per Member, Per Month Rates

Provide a comprehensive description of the rate-setting policies the State will use to establish Health Homes provider reimbursement fee for service or PMPM rates. Explain how the methodology is consistent with the goals of efficiency, economy and quality of care. Within your description, please explain: the reimbursable unit(s) of service, the cost assumptions and other relevant factors used to determine the payment amounts, the minimum level of activities that the State agency requires for providers to receive payment per the defined unit, and the State's standards and process required for service documentation.

HH services, as described in the six service definitions may or may not require face-to-face interaction.

#### Minimum Criteria:

A.The member meets the eligibility requirements as identified by the lead entity and documented in the member's electronic health record (EHR).

B.The member has full Medicaid benefits at the time the PMPM payment is made.

C.The member has enrolled with the IHH provider.

D.The HH provider is in good standing with IME and is operating in adherence with all HH provider standards E. The minimum service required to merit a PMPM payment is that the person has received care management monitoring for treatment gaps defined as HH Services in this state plan. The health home must document HH services that were provided for the member.

Claims analysis identified a total count of eligible HH members. Using industry standards for staffing and relevant IA pilot programs, clinical staffing ratios were determined. The development of the PMPM considers the marketplace value of professional staff to provide the six health home services.

The IME shall pay the Lead Entity based on the member needs. Adults and children shall be grouped into three categories. Category one is for those members whom the IHH providers are in the process of engaging into the program (member outreach rate). This will be the lowest rate provided for members to the health home and is limited to three months. Category two is for those members needing IHH services who are actively engaged in the IHH program. Category three is for those actively engaged members needing IHH with more intense community service case management (CM). The payment rate may vary between adult and child and with or without the intense community service CM. The rate is developed according to the actual cost of providing each component of the service for the adult population with and without intense community service CM and the child population with and without intense community service CM. No other payments for these services shall be made.

The actual rate is posted at (http://dhs.iowa.gov/ime/providers/integrated-home-health) effective for services provided on or after July 1, 2014 and will be reviewed annually, and updated as needed based on evaluation and effectiveness of the program.

	Provide a comprehensive description of incentive payment policies that the State will use to reimburse in addition the unit base rates. Explain how the methodology is consistent with the goals of efficiency, economy and quality care. Within your description, please explain: the incentives that will be reimbursed through the methodology, he supplemental incentive payments are tied to the base rate activities, the criteria used to determine a provider eligibility to receive the payment, the methodology used to determine the incentive payment amounts, and the frequency and timing through which the Medicaid agency will distribute the payments to providers.

# **Submission - Categories of Individuals and Populations Provided Health Homes Services**

The State will make Health Homes services available to the following categories of Medicaid participants:

# **W** Categorically Needy eligibility groups

# **Health Homes Services (1 of 2)**

#### Category of Individuals CN individuals

#### **Service Definitions**

Provide the State's definitions of the following Health Homes services and the specific activities performed under each service:

# **Comprehensive Care Management**

#### **Definition:**

- Outreach activities to members to engage in comprehensive care management.
- Comprehensive whole person screening conducted for all members using medical and behavioral claims data, medical provider records and patient reporting within 90 days of enrolling.
- Assessment-driven whole person member profile development provided to inform local IHH provider.
- At least monthly reporting of member gaps in care and predicted risks based on medical and behavioral claims data matched to Standard of Care Guidelines
- Predictive modeling reports generated through Medicaid data mining, identifying whole person risk information to be shared with IHH providers
- Regular report distribution to the local IHH provider teams using secure provider portal
- Oversight of care management plans that address the needs of the whole person. Care management plan based on information pulled from multiple sources.
- Organize, authorize and administer joint treatment planning with local providers, members, families and other social supports to address total health needs of members
- Administration of online provider tools, including Health and Wellness Questionnaire to assess initial risk level, and Care Coordination Plan
- Information technology functionality developed to allow online receipt of standardized Continuity of Care Document (CCD) for SPMI population
- Continuous claims-based monitoring of care to ensure evidence-based guidelines are being addressed with members /families
- Serve as communication hub facilitating the timely sharing of information across providers 24 hours/day, 7 days/week
- Serve as active team member, monitoring and intervening on progress of member treatment goals using holistic clinical expertise

# Describe how health information technology will be used to link this service in a comprehensive approach across the care continuum:

The lead entity will provide technology support for comprehensive care management, using the following:

- a secure portal with program and member level information;
- an enrollment feature with status and authorization release forms;
- -predictive modeling and reporting tool to identify the population at risk including risks for hospital admission, gaps in care, and other claims-based data;
- -a health and wellness screening questionnaire;
- -a care coordination plan:
- -a member profile which summarizes key information about the members medications, health care services, recent

claims, and gaps in care;

- -ability to exchange and display continuity of care documents sourced from providers' electronic health records to facilitate timely sharing of clinical information among treating providers;
- a data warehouse for ongoing monitoring and analysis of program activity, provider engagement, and outcomes;
- a member website is also supported by the lead entity which provides program information on the Integrated Health Home, program elements such as peer support, self-management and empowerment, member success stories and a health library of conditions, tests, symptoms, and medications.

Nurse Care Coordinators at the IHH or the Lead Entity will perform Care Coordination. MD/DO and Psychiatrists at the Lead Entity may also support Care Coordination activities by attending joint treatment meetings and provide consultation as needed.

## **Health Promotion**

#### **Definition:**

- Promoting members' health and ensuring that all personal health goals are included in person-centered care management plans;
- Promotion of substance abuse prevention, smoking prevention and cessation, nutritional counseling, obesity reduction and increased physical activity;
- Providing health education to members and family members about preventing and managing chronic conditions using evidence –based sources
- Providing self-management support and development of self-management plans and/or relapse prevention plans so that members can attain personal health goals; and
- Promoting self-direction and skill development in the area of independent administering of medication and medication adherence.
- Coordinate multiple systems for children with SED as part of a child and family-driven team process.
- Provide prevention education to members and family members about health screening, childhood developmental assessments and immunizations standards;
- Wraparound planning process: identification, development and implementation of strengths-based individualized care plans addressing the needs of the whole child and family

# Describe how health information technology will be used to link this service in a comprehensive approach across the care continuum:

The care coordination plan will be used to plan, communicate and document individualized goals, interventions, and track status.

-When available, Continuity of Care Documents will be useful in tracking treatment progress and coordination with providers.

#### **Description**

Peer Support or Family Support Specialist, may assist with the following transitional services:

- Engage member and/or caretaker as an alternative to emergency room or hospital care
- Participate in development of crisis plans
- Monitor for potential crisis escalation/need for intervention
- Follow up phone calls and face to face visits with members/families after discharge from the emergency room or hospital

Nurse Care Coordinators or Care Coordinators at the IHH or the Lead Entity will perform Transitional services. MD/DO and Psychiatrists at the Lead Entity may also support transitional activities by providing consultation as needed and participating in development of crisis plans.

# Individual and family support, which includes authorized representatives

#### **Definition:**

- Providing assistance to members in accessing needed self-help and peer/family support services;
- Advocacy for members and families;
- Family support services for members and their families
- Assisting members to identify and develop social support networks;
- Assistance with medication and treatment management and adherence;
- Identifying community resources that will help members and their families reduce barriers to their highest level of health and success;
- Linkage and support for community resources, insurance assistance, waiver services

• Connection to peer advocacy groups, family support networks, wellness centers, NAMI and family psychoeducational programs

Describe how health information technology will be used to link this service in a comprehensive approach across the care continuum:

An IHH member web site is available to all IHH enrollees, potential enrollees, their families and supports. The member web site contains evidence-based health information about medical and behavioral conditions, medications, and treatment options as well as resources and links for national and local support programs and resources.

06/20/2014

- Identifying community resources that will help members and their families reduce barriers to their highest level of health and success;
- Linkage and support for community resources, insurance assistance, waiver services
- Connection to peer advocacy groups, family support networks, wellness centers, NAMI and family psychoeducational programs

Nurse Care Coordinators or Care Coordinators at the IHH or the Lead Entity will perform individual and family support services.

## Referral to community and social support services, if relevant

#### **Definition:**

- Provide resource referrals or coordinate to the following, as needed:
- Primary care providers and specialists;
- Wellness programs, including tobacco cessation, fitness, nutrition or weight management programs, and exercise facilities or classes;
- Specialized support groups (i.e. cancer or diabetes support groups, NAMI psychoeducation);
- School supports
- Substance treatment links in addition to treatment supporting recovery with links to support groups, recovery coaches, and 12-step programs;
- Housing services;
- Transportation services
- Programs that assist members in their social integration and social skill building;
- Faith-based organizations;
- Employment and educational programs or training; Volunteer opportunities

# Describe how health information technology will be used to link this service in a comprehensive approach across the care continuum.

The care coordination plan will be used to plan and manage referrals for community and social support services. Evidence-based care guidelines are also provided for use by Health Home teams and providers.

The IHH member web site is available to all IHH enrollees, their families and supports as well as providers and Health Home teams. It contains links for information about community and national support services and resources.

# Health Homes Monitoring, Quality Measurement and Evaluation

## **Monitoring**

Describe the State's methodology for tracking avoidable hospital readmissions, including data sources and measurement specifications:

Data sources will be claims data. (Measure calculations may be impacted by Medicare data availability)

The State will track the number of acute inpatient stays during the measurement year that were followed by an acute

readmission for any diagnosis within 30 days and the predicted probability of an acute readmission. CMS measure specifications will be used.

Describe the State's methodology for calculating cost savings that result from improved coordination of care and chronic disease management achieved through the Health Homes program, including data sources and measurement specifications.

Medicaid claims data. The lead entity will calculate two types of control groups for the Medicaid enrollees who join a Health Home. First, enrollees in the Health Home will be their own controls through a pre- and post-program comparison. This analysis will compare the PMPM costs for the year prior to entering the program to the PMPM costs for the first six months, first year and first 18 months of the program. We will continue to calculate the PMPM costs every six months. Also, as a component of the within-member analysis, and using a customized risk stratification tool, we will evaluate each member's utilization and cost-based risk at baseline and monitor the trend month-over-month and attempt to correlate with specific coordination of care and care management interventions. Finally, we will attempt to match each enrollee who has been in the Health Home for at least one year with an enrollee that is not in a Health Home but has been enrolled in Medicaid for one year. By controlling for factors such as age, gender, type of SMI condition and medical co-morbidities in the match we are able to lessen the bias that may exist between the two groups. However, we will also use propensity scoring as a means for adjusting for selection bias in studies of changes in PMPM cost as a function of enrollment in the program.

Describe how the State will use health information technology in providing Health Homes services and to improve service delivery and coordination across the care continuum (including the use of wireless patient technology to improve coordination and management of care and patient adherence to recommendations made by their provider).

The lead entity will provide IT infrastructure and program tools to the IHHs in order to facilitate collaboration. These capabilities include, but are not limited to; patient screening and risk stratification, and a web-based profile that integrates Medicaid claims, patient self-reported information, and clinical documentation. The lead entity will be responsible for sharing health utilization and claims data with the IHH provider network to facilitate care coordination and prescription monitoring for members receiving HH services. A member website will be available to IHH enrollees, their families and supports. It will contain evidence-based information on conditions, health promotion and wellness information, and links to resources.

Iowa eHealth is is implementing a state-wide Health Information Network (HIN). IME will support the effort to make the exchange available to HH providers. The lead entity technology infrastructure for health information exchange will be utilized while the IHIN is developing.

As part of the minimum requirements of an eligible provider to operate as a health home, the following relate to HIT:

- Commitment to use an interoperable patient registry or EHR to input information such as annual metabolic screening results, contribute and use clinical information, track and measure care of members, automate care reminders, and produce exception reports for care planning;
- •Demonstrate ability and confirm willingness to participate in the technology infrastructure of the IHH, including: Completing web-based health risk questionnaires; Establishing a plan and timeline to share Continuity of Care (CCD) records with the lead entity after each visit;
  - Utilizing member profiles and other care coordination tools;
  - Guiding IHH members in accessing and using the member website;
- Incorporating tools and care guidelines designed for integrating clinical practice and coordinating care with other providers.

# **Quality Measurement**

	applicable quality measures as a condition of receiving payment from the State.
1	The State provides assurance that it will identify measureable goals for its Health Homes model and intervention
	and also identify quality measures related to each goal to measure its success in achieving the goals.

☑ The State provides assurance that it will require that all Health Homes providers report to the State on all

States utilizing a health team provider arrangement must describe how they will align the quality measure reporting requirements within section 3502 of the Affordable Care Act and section 1945(g) of the Social Security Act. Describe how the State will do this:

## **Evaluations**

**☑** The State provides assurance that it will report to CMS information submitted by Health Homes providers to inform the evaluation and Reports to Congress as described in Section 2703(b) of the Affordable Care Act and as described by CMS.

Describe how the State will collect information from Health Homes providers for purposes of determining the effect of the program on reducing the following:

program on reducing the following:			
Hospital Admissions			
Measure:			
Hospital Admissions

Claims Frequency of Data Collection:			
Monthly			
Quarterly			
Annually	1		

Describe how the State will collect information for purpose of informing the evaluations, which will ultimately determine the nature, extent and use of the program, as it pertains to the following:

# Hospital Admission Rates

Continuously

The State will consolidate data from Medicaid claims and encounter data for the participating health home sites to assess hospital admission rates, by service. The State will track pre/post hospital admission rates among health home participants. Rates will be compared for health home participants and individuals not using health home services. (Measure calculations may be impacted by Medicare data availability)

The State will monitor each health home practice in regard to chronic disease management (SMI/SED) with a special focus on comprehensive care management.

Audits will assess: a) documented self-management with all beneficiaries identified as high risk, b) Development of symptom response plans

#### Coordination of Care for Individuals with Chronic Conditions

Provision of care coordination services for members with the chronic conditions specified within this State Plan Amendment will be assessed via the following measures: a) Care Coordinator contact during hospitalization, b) health home telephonic or face-to-face enrollee follow-up within 2 days after hospitalization discharge, c) health home active care coordination for members with chronic conditions d) Health home monitoring of self-reported physical health conditions and indicators of risk (e.g. housing problems, social isolation) e) Availability of bi-directional and integrated primary care /behavioral health services.

## Assessment of Program Implementation

The State will monitor implementation through processes developed by the State Medicaid Agency and the lead entity. An evaluation that details the process of implementation, as well as the challenges experienced and adaptations that were made during the implementation will be undertaken.

#### Processes and Lessons Learned

The State Medicaid Agency and the lead entity will develop tools to capture feedback from the health homes to document and understand any operational barriers to implementing health home services.

# Assessment of Quality Improvements and Clinical Outcomes

The State will utilize quality process and outcome measures described in the prior section to assess quality improvements and clinical outcomes.

Estimates of Cost Savings		
<b>■ The State will use the same method as that described in the Moni</b>	toring section.	
If no, describe how cost-savings will be estimated.		

Transmittal Number: IA-14-009 Supersedes Transmittal Number: IA-14-003 Approved Effective Date: Jul 1, 2014 Approval Date: June 19, 2014

# PRA Disclosure Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1148. The time required to complete this information collection is estimated to average 80 per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.
