**Enrollment and Uninsured Data**

**Part 1: Number of Children Enrolled in CHIP**

This table is pre-filled with your SEDS data for the two most recent federal fiscal years (FFY). If the information is inaccurate, adjust your data in SEDS (go to line 7: "Unduplicated Number Ever Enrolled" in your fourth quarter SEDS report) and then refresh this page. If you're adjusting data in SEDS, allow one business day for the CARTS data below to update.

1. If you had more than a 3% percent change from last year, what are some possible reasons why your enrollment numbers changed?

Due to the COVID PHE, we are seeing more families and children qualify under other Medicaid categories. Also, to meet the requirements of FCCRA, we have not been terminating coverage of beneficiaries that are no longer eligible.

**Part 2: Number of Uninsured Children in Your State**

This table is pre-filled with data on uninsured children (age 18 and under) who are below 200% of the Federal Poverty Level (FPL) based on annual estimates from the American Community Survey. Due to the impacts of the COVID-19 PHE on collection of ACS data, the 2020 children's uninsurance rates are currently unavailable. Please skip to Question 3.

1. What are some reasons why the number and/or percent of uninsured children has changed?

2. Are there any reasons why the American Community Survey estimates wouldn't be a precise representation of the actual number of uninsured children in your state?

   ○ Yes

   ○ No

3. Do you have any alternate data source(s) or methodology for measuring the number and/or percent of uninsured children in your state?

   ○ Yes

   ○ No

4. Is there anything else you'd like to add about your enrollment and uninsured data?

   No

Program Outreach

1.
Have you changed your outreach methods in the last federal fiscal year?

- Yes
- No

2.
Are you targeting specific populations in your outreach efforts?
For example: minorities, immigrants, or children living in rural areas.

- Yes
- No
3. What methods have been most effective in reaching low-income, uninsured children?

For example: TV, school outreach, or word of mouth.

We provide brochures to schools each year and to other entities if requested. These brochures and word of mouth are the main methods of outreach.

4. Is there anything else you'd like to add about your outreach efforts?

We do not measure the effectiveness of outreach activities in any quantifiable method.

**Eligibility, Enrollment, and Operations**

**Substitution of Coverage**

Substitution of coverage (also known as crowd-out) occurs when someone with private insurance drops their private coverage and substitutes it with publicly funded insurance such as CHIP.
1. Do you track the number of CHIP enrollees who have access to private insurance?

- Yes
- No
- N/A

2. Do you match prospective CHIP enrollees to a database that details private insurance status?

- Yes
- No
- N/A

5. Is there anything else you'd like to add about substitution of coverage that wasn't already covered? Did you run into any limitations when collecting data?

N/A
Eligibility, Enrollment, and Operations

Renewal, Denials, and Retention

Part 1: Eligibility Renewal and Retention

1.

Does your state provide presumptive eligibility, allowing children to access CHIP services pending a final determination of eligibility?

This question should only be answered in respect to Separate CHIP.

- [ ] Yes
- [ ] No
- [ ] N/A
2. In an effort to retain children in CHIP, do you conduct follow-up communication with families through caseworkers and outreach workers?

- Yes
- No

3. Do you send renewal reminder notices to families?

- Yes
- No

4. What else have you done to simplify the eligibility renewal process for families?

N/A

5. Which retention strategies have you found to be most effective?

No evaluation has been completed.

6. How do you measure the effectiveness of your retention strategies? What data sources and methodology do you use to track retention?

We have not measured the effectiveness of retention strategies.
7. Is there anything else you’d like to add that wasn't already covered?

N/A

**Part 2: CHIP Eligibility Denials (Not Redetermination)**

1. **How many applicants were denied CHIP coverage in FFY 2021?**

   Don't include applicants being considered for redetermination - this data will be collected in Part 3.

2. **How many applicants were denied CHIP coverage for procedural reasons?**

   For example: They were denied because of an incomplete application, missing documentation, or a missing enrollment fee.
3. How many applicants were denied CHIP coverage for eligibility reasons?

For example: They were denied because their income was too high or too low, they were determined eligible for Medicaid instead, or they had other coverage available.

3a. How many applicants were denied CHIP (Title XXI) coverage and determined eligible for Medicaid (Title XIX) instead?

4. How many applicants were denied CHIP coverage for other reasons?

5. Did you have any limitations in collecting this data?

Data is not available for this section.

### Part 3: Redetermination in CHIP

Redetermination is the process of redetermining whether a child is eligible to renew in CHIP (Title XXI) every 12 months. This section doesn't apply to any mid-year changes in circumstances that may affect eligibility (for example: income, relocation, or aging out of the program).

1. How many children were eligible for redetermination in CHIP in FFY 2021?
2.
Of the eligible children, how many were then screened for redetermination?

3.
How many children were retained in CHIP after redetermination?
4.

How many children were disenrolled in CHIP after the redetermination process?

This number should be equal to the total of 4a, 4b, and 4c below.

**Computed:**

4a.

**How many children were disenrolled for procedural reasons?**

This could be due to an incomplete application, missing documentation, or a missing enrollment fee.

4b.

**How many children were disenrolled for eligibility reasons?**

This could be due to income that was too high or too low, eligibility in Medicaid (Title XIX) instead, or access to private coverage.
4c.

How many children were disenrolled for other reasons?

5. Did you have any limitations in collecting this data?

Data is not available for this section.

**Computed:**

4a.

How many children were disenrolled for procedural reasons?

This could be due to an incomplete application, missing documentation, or a missing enrollment fee.

4b.

How many children were disenrolled for eligibility reasons?

This could be due to an income that was too high and/or eligibility in CHIP instead.
4c. How many children were disenrolled for other reasons?

5. Did you have any limitations in collecting this data?

Data is not available for this section.

#### Part 5: Tracking a CHIP cohort (Title XXI) over 18 months

Tracking a cohort of children enrolled in CHIP (Title XXI) will indicate how long a specific group of children stays enrolled over an 18-month period. This information is required by Section 402(a) of CHIPRA.

To track your cohort, identify a group of children ages 0 to 16 years who are newly enrolled in CHIP and/or Medicaid as of January through March 2020 (the second quarter of FFY 2020). Children in this cohort must be 16 years and 0 months or younger when they enroll to ensure they don't age out of the program by the end of the 18-month tracking period.

You'll identify a new cohort every two years. This last year you reported on the number of children at the start of the cohort (Jan - Mar 2020) and six months later (July - Sept 2020). This year you'll report on the same cohort at 12 months (Jan - Mar 2021) and 18 months later (July - Sept 2021). If data is unknown or unavailable, leave it blank - don’t enter a zero unless the data is known to be zero.
Helpful hints on age groups

Children should be in age groups based on their age at the start of the cohort, when they're identified as newly enrolled in January, February, or March of 2020. For example, if a child is four years old when they're newly enrolled, they should continue to be reported in the "ages 1-5" group at 6 months, 12 months, and 18 months later.

The oldest children in the cohort must be no older than 16 years (and 0 months) to ensure they don't age out of the program at the end of the 18-month tracking period. That means children in the "ages 13-16" group who are newly enrolled in January 2020 must be born after January 2004. Similarly, children who are newly enrolled in February 2020 must be born after February 2004, and children newly enrolled in March 2020 must be born after March 2004.

1. How does your state define "newly enrolled" for this cohort?

- Newly enrolled in CHIP: Children in this cohort weren't enrolled in CHIP (Title XXI) during the previous month. For example: Newly enrolled children in January 2020 weren't enrolled in CHIP in December 2019.

- Newly enrolled in CHIP and Medicaid: Children in this cohort weren't enrolled in CHIP (Title XXI) or Medicaid (Title XIX) during the previous month. For example: Newly enrolled children in January 2020 weren't enrolled in CHIP or Medicaid in December 2019.

2. Do you have data for individual age groups?

If not, you'll report the total number for all age groups (0-16 years) instead.

- Yes

- No

You completed this section in your 2020 CARTS Report. Please refer to that report to assist in filling out this section if needed.

3.

How many children were newly enrolled in CHIP between January and March 2020?

20. Is there anything else you'd like to add about your data?

**Part 6: Tracking a Medicaid (Title XIX) cohort over 18 months**

Tracking a cohort of children enrolled in Medicaid (Title XIX) will indicate how long a specific group of children stays enrolled over an 18-month period. This information is required by Section 402(a) of CHIPRA.

To track your cohort, identify a group of children ages 0 to 16 years, who are newly enrolled in Medicaid and/or CHIP as of January through March 2020 (the second quarter of FFY 2020). Children in this cohort must be 16 years and 0 months or younger when they enroll to ensure they don't age out of the program by the end of the 18-month tracking period.

You'll identify a new cohort every two years. This last year you reported the number of children identified at the start of the cohort (Jan-Mar 2020) and six months later (July-Sept 2020). This year you'll report numbers for the same cohort at 12 months (Jan-Mar 2021) and 18 months later (July-Sept 2021). If data is unknown or unavailable, leave it blank - don't enter a zero unless the data is known to be zero.
Helpful hints on age groups

Children should be in age groups based on their age at the start of the cohort, when they're identified as newly enrolled in January, February, or March of 2021. For example, if a child is four years old when they're newly enrolled, they should continue to be reported in the "ages 1-5" group at 6 months, 12 months, and 18 months later.

The oldest children in the cohort must be no older than 16 years (and 0 months) to ensure they don't age out of the program at the end of the 18-month tracking period. That means children in the "ages 13-16" group who are newly enrolled in January 2021 must be born after January 2004. Similarly, children who are newly enrolled in February 2021 must be born after February 2004, and children newly enrolled in March 2021 must be born after March 2004.

1.

How does your state define "newly enrolled" for this cohort?

- Newly enrolled in Medicaid: Children in this cohort weren't enrolled in Medicaid (Title XIX) during the previous month. For example: Newly enrolled children in January 2020 weren't enrolled in Medicaid in December 2019.

- Newly enrolled in CHIP and Medicaid: Children in this cohort weren't enrolled in CHIP (Title XXI) or Medicaid (Title XIX) during the previous month. For example: Newly enrolled children in January 2020 weren't enrolled in CHIP or Medicaid in December 2019.

2.

Do you have data for individual age groups?

If not, you'll report the total number for all age groups (0-16 years) instead.

4. What safeguards and procedures are in place for the prevention, investigation, and referral of fraud and abuse cases?

The program integrity unit works cases based on reasonable suspicion. This can be done by receiving tips from email, phone, other agencies, or by our own data analytics. If reasonable suspicion of fraud, waste, and abuse exists, the Unit will request a referral to Medicaid Fraud Control Unit (MFCU) by using a referral document approved through our memorandum of understanding with MFCU. Upon acceptance of the referral, DSS and MFCU work together to resolve the case by making a recovery of at risk dollars, provider education, or prosecution.

Dental Benefits

Tell us about the children receiving dental benefits in your Separate CHIP program. Include children who are receiving full benefits and those who are only receiving supplemental dental benefits. Include the unduplicated number of children enrolled in all types of delivery systems (Managed Care, PCCM, and Fee for Service).

Note on age groups

Children should be in age groups based on their age on September 30th, the end of the federal fiscal year (FFY). For example, if a child turns three years old on September 15th, the child should be included in the "ages 3-5" group. Even if the child received dental services on September 1st while they were still two years old, all dental services should be counted as their age at the end of the FFY.

CAHPS Survey Results

Children's Health Insurance Program Reauthorization Act (CHIPRA) requires that all CHIP programs submit survey results from the Consumer Assessment of Healthcare Providers and Systems (CAHPS). The survey assesses your CHIP program quality and customer satisfaction. For the 2021 CARTS report, we highly encourage states to report all raw CAHPS data to the Agency for Healthcare Research and Quality (AHRQ) CAHPS Database instead of reporting a summary of the data via CARTS. For 2022, the only option for reporting CAHPS results will be through the submission of raw data to AHRQ.

1. Did you collect the CAHPS survey?

- Yes
- No

Part 2: You collected the CAHPS survey

Since you collected the CAHPS survey, please complete Part 2.
1. Upload a summary report of your CAHPS survey results.

This is optional if you already submitted CAHPS raw data to the AHRQ CAHPS database. Submit results only for the CHIP population, not for both Medicaid (Title XIX) and CHIP (Title XXI) together. Your data should represent children enrolled in all types of delivery systems (Managed Care, PCCM, and Fee for Service).

Health Services Initiative (HSI) Programs

All states with approved HSI program(s) should complete this section. States can use up to 10% of their fiscal year allotment to develop Health Services Initiatives (HSI) that provide direct services and other public health initiatives for low-income children. [See Section 2105(a)(1)(D)(ii) of the Social Security Act.] States can only develop HSI programs after funding other costs to administer their CHIP State Plan, as defined in regulations at 42 CFR 457.10.

1.

Does your state operate Health Service Initiatives using CHIP (Title XXI) funds?

Even if you're not currently operating the HSI program, if it's in your current approved CHIP State Plan, please answer "yes."

☐ Yes

☐ No
State Plan Goals and Objectives

Part 1: Tell us about your goals and objectives

Tell us about the progress you've made on your performance goals in the past year. The objectives and goals you add to this section should match those reflected in your CHIP State Plan, Section 9. Submit a CHIP State Plan Amendment (SPA) if any of them are different. Objective 1 is required. We've provided examples for other objectives, but you can edit them so they match the objectives in your CHIP State Plan. You can add additional objectives and goals to fit what's in your CHIP State Plan.
1. Briefly describe your goal for this objective.

For example: In an effort to reduce the number of uninsured children, our goal is to enroll 90% of eligible children in the CHIP program.

Achieve a measurable reduction in the number of uninsured children in South Dakota beginning in July 1, 1998.

2.

What type of goal is it?

- [ ] New goal
- [x] Continuing goal
- [ ] Discontinued goal
Define the numerator you're measuring

3. Which population are you measuring in the numerator?
For example: The number of children enrolled in CHIP in the last federal fiscal year.

The number of children enrolled in CHIP in the last federal fiscal year.

4.
Numerator (total number)

6381

Define the denominator you're measuring

5. Which population are you measuring in the denominator?
For example: The total number of eligible children in the last federal fiscal year.

The total number of children eligible for CHIP in the last federal fiscal year.

6.

7. What is the date range of your data?

**Start**

mm/yyyy

10 / 2020

**End**

mm/yyyy

09 / 2021

8. Which data source did you use?

- Eligibility or enrollment data
- Survey data
- Another data source

9. How did your progress towards your goal last year compare to your previous year's progress?

The percentage of children covered increased.
10. What are you doing to continually make progress towards your goal?

South Dakota is working towards implementing a new eligibility and enrollment system. This system will provide functionality such as an online application, customer portal, mobile application, online change reporting, and increased electronic interfaces. We believe this will make information more accessible, ease the difficulty of applying for coverage, and reduce churn associated with procedural denials/closures (e.g. information verified electronically reduces the number of adverse actions for failure to provide information). The new system is anticipated to be completed in early 2023.

11. Anything else you'd like to tell us about this goal?

Denominator data came from a survey performed in 2015.

12. Do you have any supporting documentation?

1. What is the next objective listed in your CHIP State Plan?

You can edit the suggested objective so it matches what's in your CHIP State Plan.

Improve access to quality primary and preventative health care services under Medicaid for approved SCHIP eligible, new Medicaid eligible and previously non-enrolled children on July 1, 1998.
1. Briefly describe your goal for this objective.

For example: In an effort to increase access to care, our goal is to increase the number of children who have visited a primary care physician by 5%.

Enroll 95% of all newly approved CHIP-NM children in the South Dakota medical assistance primary care case management program within 1 month of enrollment, beginning July 1, 2000. Ensure each new enrollee receives covered services, cost sharing and EPSDT information at the time that their eligibility is approved. Include CHIP-NM eligible children in the quality measurement mechanisms that are used for Medicaid and M-SCHIP including measures of immunization, well child care, adolescent well care, satisfaction and other measures of health care quality. Measures will come from the HCFA 416 report, the Department of Health Immunization tracking system, and the evaluation process used in South Dakota's PRIME managed care program operated under 1915(b) waiver authority. This evaluation process also uses client and provider surveys independent evaluations and clinical studies to report cost effectiveness and quality to CMS for waiver renewal purposes, and annual SCHIP reporting requirements. South Dakota will request the managed care waiver be incorporated into its Medicaid and SCHIP state plans.

2.

What type of goal is it?

- New goal
- Continuing goal
- Discontinued goal
Define the numerator you're measuring

3. Which population are you measuring in the numerator?

For example: The number of children enrolled in CHIP who visited a primary care physician in the last federal fiscal year.

The total number of CHIP-NM children enrolled in the primary care provider or health home program within 1 month of enrollment that enrolled in the last calendar year.

8.
Which data source did you use?

- Eligibility or enrollment data
- Survey data
- Another data source
9. How did your progress towards your goal last year compare to your previous year's progress?

The percent enrolled within 30 days was lower for this data period. The process for adding children to the PCCM program has not changed nor have there been any issues or delays in the process.

10. What are you doing to continually make progress towards your goal?

Per standard operating procedure newly approved CHIP-NM recipients are enrolled in the PCCM program within 10 days. In rare instances enrollment in the program may occur outside of this 10 day period. Each CHIP recipient receives a Recipient Handbook that provides this information. The CHIP population is included in the same quality measurements as the Medicaid population.

Table 3: Federal and State Shares

CHIP is funded by federal and state budgets. The federal share of funding is calculated by multiplying your state’s Federal Medical Assistance Percentage (eFMAP) by your total program costs (the sum of your benefit and administrative costs). The remaining amount of your total program costs is covered by your state share of funding. This table is auto-calculated using the data you entered above. The federal and state shares for FFY 2023 will be calculated once the eFMAP rate for 2023 becomes available. In the meantime, these values will be blank.

Challenges and Accomplishments

1. How has your state's political and fiscal environment affected your ability to provide healthcare to low-income children and families?

2. What's the greatest challenge your CHIP program has faced in FFY 2021?

The COVID-19 public health emergency.

3. What are some of the greatest accomplishments your CHIP program has experienced in FFY 2021?

Utilization of telemedicine.
4. What changes have you made to your CHIP program in FFY 2021 or plan to make in FFY 2022? Why have you decided to make these changes?

We've received approval of CHIP State Plan Amendment SD 20-0004 to add assurances to the plan regarding behavioral health services in FFY 2022. We do not anticipate any changes to the CHIP State Plan in 2022.

5. Is there anything else you’d like to add about your state's challenges and accomplishments?
