END STAGE RENAL DISEASE (ESRD) DEMONSTRATION

Introduction:

The End Stage Renal Disease (ESRD) 1115 demonstration waiver will allow Indiana to provide Medicare-enrolled individuals with ESRD, who are otherwise ineligible for Medicaid, with supplemental wrap-around coverage including supplemental coverage for kidney transplant services.

The goals of this approved demonstration are to:

- Increase overall coverage of low-income individuals with a diagnosis of ESRD; and
- Ensure access to comprehensive coverage for low-income individuals with a diagnosis of ESRD and primary coverage through Medicare.

Questions that will be addressed are:

1. How many enrollees are on the kidney transplant list during enrollment?
2. How many enrollees received a kidney transplant during enrollment?
3. How many enrollees no longer have Medicare coverage?
4. How many enrollees expired due to ESRD during enrollment?

Question #3 was originally submitted as “How many enrollees no longer have a diagnosis of ESRD?” After further review of the waiver requirements and Medicare coverage requirements, this question was changed to “How many enrollees no longer have Medicare coverage?”

Question #4 was originally submitted as “How many enrollees expired due to ESRD during enrollment? The question was modified due to the goals of the waiver being to increase coverage for low-income individuals with a diagnosis of ESRD and primary coverage through Medicare and to ensure access to comprehensive coverage. The goals of the Waiver do not include preventing the enrollees from expiring.

Indiana’s HIP 1.0 demonstration began in 1994 to supplement state plan benefits for Medicaid eligible children and otherwise eligible adults who are not aged, blind or disabled. HIP 1.0 was scheduled to expire at the end of 2013, but was extended for an additional year through December 31, 2014.

In May 2014, CMS approved an amendment to include former spend down enrollees diagnosed with End Stage Renal Disease (ESRD) as a HIP 1.0 demonstration population. ESRD enrollees are Medicare beneficiaries in need of supplemental health care coverage. By providing coverage through HIP, beneficiaries were able to access kidney transplant and related services that they might not be able to afford without the additional supplemental benefits.

In January 2015, CMS approved the Healthy Indiana Plan 2.0 (HIP 2.0) demonstration whereby former HIP 1.0 enrollees transitioned into the HIP 2.0 demonstration; the ESRD enrollees were the only population remaining in the HIP 1.0 demonstration. The HIP 1.0 demonstration with only the ESRD enrollees operated on a temporary extension until its approval on July 28, 2016 and renamed the End Stage Renal Disease (ESRD) Demonstration

This demonstration will continue to provide coverage for individuals with ESRD that are not currently eligible under the Medicaid state plan. The demonstration originally covered approximately 350 individuals with ESRD, who would otherwise be unable to access kidney transplant services. Corrections made with data processing showed there were 694 enrollees in Population 1. With this demonstration extension, Indiana expects to achieve program objectives.

Identify all significant developments/issues/problems with financial accounting, budget neutrality, and CMS-64 reporting for the current quarter. Identify the state’s actions to address these issues.
The State is reviewing its internal controls related to budget neutrality and CMS64 reporting. The State is working to re-tool our reporting logic to assure compliance with the Special Terms and Conditions set forth in the 1115 demonstration waiver.
Below, please find the OMPP Finance process to achieve control objectives of accurate, timely and complete reporting in compliance with the Special Terms and Conditions:
<ul style="list-style-type: none"> • Budget neutrality submissions will be developed utilizing CMS64 data. • Budget neutrality and CMS64 reporting will be reconciled quarterly prior to submitting reports to CMS. • Federal Funding Director/OMPP Controller will be the final approver on all budget neutrality submissions.
Reconciliation documentation will be maintained to support quarterly submissions.

A summary of the types of complaints or problems consumers identified about the program in the current quarter. Include any trends discovered, the resolution of complaints, and any actions taken or to be taken to prevent other occurrences.
Each Division of Family Resources (DFR) region has a mailbox that providers can contact for specific issues that they feel the Regional Management may be able to assist with resolution.
The north central Indiana region mailbox received a few that complaints from dialysis centers that their claims were being denied as a result of a change in the Medicaid Management Information System (MMIS). DFR referred the issues to the appropriate entity to provide assistance for resolution.

In south west Indiana, members to report that they are unable to afford the ESRD liability so the program is not benefitting them. These members feel they should have full Medicaid coverage due to this condition. OMPP is reaching out to DFR to determine how to resolve this issue. DFR reports that the sumery remains unchanged.
