END STAGE RENAL DISEASE (ESRD) DEMONSTRATION

Introduction:

The End Stage Renal Disease (ESRD) 1115 demonstration waiver will allow Indiana to provide Medicare-enrolled individuals with ESRD, who are otherwise ineligible for Medicaid, with supplemental wrap-around coverage including supplemental coverage for kidney transplant services.

The goals of this approved demonstration are to:

- Increase overall coverage of low-income individuals with a diagnosis of ESRD; and
- Ensure access to comprehensive coverage for low-income individuals with a diagnosis of ESRD and primary coverage through Medicare.

Questions that will be addressed are:

1. How many enrollees are on the kidney transplant list during enrollment?
2. How many enrollees received a kidney transplant during enrollment?
3. How many enrollees expired due to ESRD during enrollment?

Indiana's HIP 1.0 demonstration began in 1994 to supplement state plan benefits for Medicaid eligible children and otherwise eligible adults who are not aged, blind or disabled. HIP 1.0 was scheduled to expire at the end of 2013, but was extended for an additional year through December 31, 2014.

In May 2014, CMS approved an amendment to include former spend down enrollees diagnosed with End Stage Renal Disease (ESRD) as a HIP 1.0 demonstration population. ESRD enrollees are Medicare beneficiaries in need of supplemental health care coverage. By providing coverage through HIP, beneficiaries were able to access kidney transplant and related services that they might not be able to afford without the additional supplemental benefits.

In January 2015, CMS approved the Healthy Indiana Plan 2.0 (HIP 2.0) demonstration whereby former HIP 1.0 enrollees transitioned into the HIP 2.0 demonstration; the ESRD enrollees were the only population remaining in the HIP 1.0 demonstration. The HIP 1.0 demonstration with only the ESRD enrollees operated on a temporary extension until its approval on July 28, 2016 and renamed the End Stage Renal Disease (ESRD) Demonstration

This demonstration will continue to provide coverage for individuals with ESRD that are not currently eligible under the Medicaid state plan. The demonstration originally covered approximately 350 individuals with ESRD, who would otherwise be unable to access kidney transplant services. Corrections made with data processing showed there were 694 enrollees in Population 1. With this demonstration extension, Indiana expects to achieve program objectives.
