

Section 1115 Demonstrations: Oregon Health Plan 2

Public Comments

Title	Description	Created At
Non-discrimination in provider access	Medicaid recipients in OHP standard must be guaranteed equal access to providers. The state agency has allowed managed care to discriminate against OHP standard recipients by requiring them to go to specific providers who are not in their local area, even though OHP plus clients had access to local providers. The terms and conditions should require equal access to local providers without regard to the particular OHP benefits package.	2012-05-23 18:39
The OHP prioritized list is inconsistent with the prevention, person centered, and healthy outcomes goals of this waiver.	The OHP prioritized list should be eliminated. Covered services should be based on preventions and healthy outcomes, eliminating coverage only for the types of services that would not be covered by private insurance.	2012-05-22 17:45
If the deal is done, why the charade of public comment" If the deal isn't really done, why was it annouced?	New requirements in the ACA page 844 calls for a "meaningful level of public input" proposed? costs? & steps being made to comply with the law. Remember, I am a taxpayer, paying (not willingly I might add) so you work for me!!!	2012-05-12 08:35
