Mail Stop S2-01-16
7500 Security Boulevard
Baltimore, Maryland 21244-1850

RE: TennCare II, STC 45, Quarterly Progress Report

Dear Ms. Woodard:

Enclosed please find the Draft Annual Report for Demonstration Year 15 (July 1, 2016, through June 30, 2017). This report is being submitted in accordance with STC 45 of the TennCare Demonstration.

Please let us know if you have comments or questions.

Sincerely,

[redacted]

Aaron Butler
Director of Policy

cc: Trina D. Roberts, Acting Associate Regional Administrator, Atlanta Regional Office
Kenni Howard, Tennessee Coordinator, Atlanta Regional Office

Draft Annual Report

TennCare II

No. 11-W-00151/4

Demonstration Year (DY) 15

(7/1/2016 – 6/30/2017)

Executive Summary

During Demonstration Year (DY) 15, the Division of TennCare continued to pursue its mission of improving lives through high-quality, cost-effective care.

Major events for the TennCare program in DY 15 included:

- Renewal of the TennCare Demonstration.
- Successful implementation of the Employment and Community First CHOICES program, which provides services to individuals with intellectual and other types of developmental disabilities.
- Initiation and development of the "systems integration services" portion of the Tennessee Eligibility Determination System (TEDS) project in collaboration with Deloitte Consulting, LLP.
- Substantial progress on Tennessee's Health Care Innovation Initiative, including implementation of the State's Patient-Centered Medical Home (PCMH) and Tennessee Health Link programs.

Enrollees' satisfaction with care received from TennCare continued to be strong during the reporting period. Data gathered in the annual Beneficiary Survey, which is conducted by the Boyd Center for Business and Economic Research at the University of Tennessee, revealed that the level of beneficiary satisfaction had reached 92 percent, which marked the eighth straight year in which enrollee satisfaction exceeded 90 percent.

The performance of TennCare's MCOs remained strong. The 2016 HEDIS/CAHPS report identified several areas of health care effectiveness in which the MCOs outperformed both their own results from the previous year as well as the average results achieved by Medicaid programs nationwide. Improvement was evident in such notable categories as controlling high blood pressure, breast cancer screening, and follow-up care for children prescribed ADHD medication.

Evaluation findings to date indicate that the TennCare Demonstration is achieving its objectives, including providing broad access to care, ensuring the delivery of high-quality care, and promoting cost-effective use of resources.

A Note to the Reader

Special Term and Condition (STC) 45 of the TennCare Demonstration requires that the State submit a Draft Annual Report documenting accomplishments, project status, quantitative and case study findings, utilization data, evaluation findings from the demonstration period to date, beneficiary survey results, and policy and administrative difficulties and solutions in the operation of the demonstration.

This report is organized accordingly:

Section I:	Accomplishments
Section II:	Project Status
Section III:	Quantitative and Case Study Findings (in which the Beneficiary Survey is addressed)
Section IV:	Utilization Data
Section V:	Evaluation Findings from the Demonstration Period to Date
Section VI:	Policy and Administrative Issues and Solutions

Several other STCs mention items that are to be addressed in the Annual Report. These items have been included in the Attachments that follow the narrative section. The Attachments are as follows:

- Attachment A ("Operational Procedures Regarding Reserve Slots in CHOICES 2") is required by STC 31.d.iv.(A).
- Attachment B ("Operational Procedures Regarding Reserve Slots in ECF CHOICES") is required by STC 32.d.iv.(A).
- Attachment C ("Compliance Measures for HCBS Regulations") is required by STC 42.b.
- Attachment D ("Special Terms and Conditions Report") is an annualized version of a report that TennCare prepares quarterly.
- Attachment E ("The Impact of TennCare: A Survey of Recipients 2016") is a report resulting from the Beneficiary Survey referenced in STC 45.
- Attachment F presents the annual HEDIS/CAHPS report.
- Attachment G ("Quality Improvement Strategy") is required by STC 42.c.

STC numbers in this report refer to those in effect at the conclusion of DY 15.

The period covered by the report is the Demonstration Year, which, in this case, was the period from July 1, 2016, through June 30, 2017. Events and activities that occurred after June 30, 2017, are not included in this report but will be included in next year's Draft Annual Report.

I. Accomplishments

Selected Statistical Successes. TennCare's accomplishments during DY 15 were reflected in a variety of statistics from the year:

- Enrollment. The size of the TennCare population at the conclusion of DY 15 was 1,500,599.

- Enrollee Satisfaction. According to an annual survey conducted by the University of Tennessee's Center for Business and Economic Research, the percentage of respondents expressing satisfaction with services received from TennCare during 2016 was 92 percent. DY 15 was the eighth straight year that enrollee satisfaction exceeded 90 percent. (See "Beneficiary Survey" in Section III for additional details.)

- Financial Performance. During this demonstration year, TennCare continued to succeed in demonstrating budget neutrality. TennCare's medical inflation trend has remained well below trends for other Medicaid agencies and commercial plans for years. According to data obtained in 2016, TennCare's medical inflation rate was 3.3 percent, as compared with a national Medicaid rate of 6.9 percent, and a commercial rate of 6.5 percent. More information is available at http://www.tn.gov/assets/entities/hcfa/attachments/HCFAbudgetFY18.pdf.

- CHOICES Rebalancing. CHOICES is TennCare's program of managed long-term services and supports (LTSS) for individuals who are elderly or who have physical disabilities. According to TennCare's most recent submission of CHOICES data to CMS, the number of individuals receiving Home and Community-Based Services (HCBS) on the last day of DY 15 was 12,381, which represents a 155 percent increase over the number of individuals receiving HCBS the day before CHOICES was implemented.

- Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Outreach. TennCare's contract with the Tennessee Department of Health (TDH) to educate families on EPSDT benefits produced significant results during DY 15. TDH made contact with 570,297 people and distributed 424,811 sets of educational materials.

- Accuracy of Encounter Data. TennCare's use of the Edifecs software system for encounter data allows non-compliant encounter claims to be rejected individually instead of as part of a batch. As a result, of more than 70 million encounter claims received by TennCare during DY 15, 99.75 percent were compliant with State standards (including HIPAA) upon initial submission.

Renewal of the TennCare Demonstration. Unlike traditional fee-for-service Medicaid programs, TennCare is a demonstration project. Certain federal statutes and regulations have been waived so that TennCare can "demonstrate" a principle: that a managed care approach to health care can enable the state to deliver high-quality care to all enrollees without spending more than would have been spent had the state continued its Medicaid program. One limitation imposed on demonstration projects is that they may operate only for finite periods of time (referred to as "approval periods") before having to be renewed.

TennCare submitted a renewal application to CMS on December 22, 2015. The application sought to extend the TennCare Demonstration through June 30, 2021, and requested no substantive changes to

the waivers, expenditure authorities, and STCs governing the demonstration project. CMS, however, identified a number of topics it wished to discuss, including supplemental pool payments to Tennessee hospitals; the methodology by which the TennCare program remains "budget-neutral" (i.e., does not spend more than would have been spent in the absence of the TennCare Demonstration); evaluation of the demonstration project; and the period of time enrollees have to transfer from one TennCare health plan to another without having to show cause.

Because the approval period for the TennCare Demonstration was scheduled to conclude on June 30, 2016, the State and CMS agreed to a series of temporary short-term extensions before CMS ultimately approved the State's renewal application on December 16, 2016. Notable elements of the approval included the following:

- Continuation of TennCare's managed care service delivery system, with minor modifications;
- Continuation of TennCare's current eligibility levels and benefits package;
- Revisions to the amounts and distribution methodologies associated with the supplemental payment pools for hospitals (to be phased in over multiple years); and
- Concentration of evaluation efforts on two of TennCare's programs of long-term services and supports (CHOICES and Employment and Community First CHOICES).

On January 12, 2017, TennCare sent CMS written acknowledgement of the approval, as well as a request that technical corrections be made to the Waiver List, Expenditure Authorities, and Special Terms and Conditions that had accompanied CMS's approval letter. As of the end of DY 15, CMS was still reviewing the proposed corrections.

Successful Implementation of Employment and Community First CHOICES. Designed and implemented in partnership with people with intellectual and developmental disabilities, their families, advocates, providers, and other stakeholders, Employment and Community First CHOICES is the first managed LTSS program in the nation that is focused on promoting and supporting integrated, competitive employment and independent community living as the first and preferred option for people with intellectual and other types of developmental disabilities.

The need for ECF CHOICES arose from a variety of challenges impacting the service delivery system for individuals with intellectual and developmental disabilities, including the disproportionately high cost in Tennessee of providing HCBS to individuals with intellectual disabilities; a substantial waiting list for such services; a lack of HCBS options for individuals with developmental disabilities other than intellectual disabilities; and a significant gap between the number of people with intellectual disabilities who want to work and those who are actually working.

ECF CHOICES was designed to address these issues in a number of ways. ECF CHOICES offers three different benefit packages:

- Essential Family Supports for families caring for a loved one with an intellectual or developmental disability;
- Essential Supports for Employment and Independent Living for adults with an intellectual or developmental disability who are transitioning out of school or who need support to achieve employment and independent living goals; and

- Comprehensive Supports for Employment and Community Living for adults with an intellectual or developmental disability who have more intense needs and require more comprehensive supports to achieve their employment and community living goals.

This tiered benefit structure, which is based on the needs of people supported and their families, with appropriate cost caps and expenditure controls, helped TennCare begin serving people with intellectual disabilities in Tennessee more cost-effectively, allowing more Tennesseans who need these services to receive them. This includes people with intellectual disabilities on a waiting list for services and people with other kinds of developmental disabilities. In addition, the unique array of employment services and supports in ECF CHOICES helps to create a pathway to employment, even for individuals with significant disabilities, resulting in improved employment, better health and quality of life outcomes, and reduced reliance on public benefits. An employment-informed choice process further helps to ensure that people do not dismiss employment as a real option because they lack complete information and a vision of how employment could be possible for them.

After intensive preparations by TennCare (including working extensively with stakeholders, securing federal approval, building provider networks, amending managed care contracts, and making systems changes), the Tennessee General Assembly approved funding to serve up to 1,700 people in the first year of the program. Implementation of ECF CHOICES began on July 1, 2016, and—by the conclusion of DY 15—1,384 individuals had been successfully enrolled in the program. TennCare monitored the rollout of the program carefully and determined that provider networks were more than adequate, thereby ensuring that enrollees received ECF CHOICES benefits in a timely and appropriate manner.

Additional information about HCBS furnished to TennCare enrollees—through the CHOICES program and the ECF CHOICES program alike—appears in the Attachments to this report. Attachment A comprises the operational procedures by which the TennCare reserves slots in CHOICES 2 for certain individuals being discharged from a Nursing Facility (NF) or an acute care setting. Attachment B comprises the operational procedures by which slots are reserved in ECF CHOICES for individuals being discharged from a NF, an Intermediate Care Facility for Individuals with Intellectual Disabilities, or an acute care setting. Attachment C details the steps taken by TennCare to ensure compliance with federal regulations governing the provision of HCBS.

Payment Reform. In February 2013, Tennessee Governor Bill Haslam launched Tennessee's Health Care Innovation Initiative to change the way that health care is paid for in Tennessee. The State is moving from paying for volume to paying for value by rewarding health care providers for furnishing high-quality and efficient treatment of medical conditions and for helping maintain people's health over time.

The Tennessee Health Care Innovation Initiative is led by the Division of TennCare's Strategic Planning and Innovation Group. Although the initiative's goals transcend Medicaid, there is much emphasis on Medicaid leading by example. The initiative consists of strategies to reform Tennessee's health care payment and delivery system in three main domains: Primary Care Transformation, Episodes of Care, and Long-Term Services and Supports (LTSS).

Tennessee's **Primary Care Transformation strategy** supports primary care providers in promoting the delivery of preventive services and managing chronic illnesses over time. Three notable facets of this strategy are—

- **Patient-Centered Medical Home (PCMH):** PCMH is a comprehensive care delivery model designed to improve the quality of primary care services for TennCare members, the capabilities

and practice standards of primary care providers, and the overall value of health care delivered to the TennCare population. Following much stakeholder input and design work, the PCMH program was launched by TennCare on January 2, 2017. Participating providers receive training and technical assistance, quarterly reports with actionable data, and access to the state's care coordination tool. These providers are compensated with ongoing financial support and an opportunity for an annual outcome payment based on quality and efficiency performance. As of the launch date, 29 practices and approximately 250,000 TennCare members were participating in the PCMH program, with additional practices to be added in subsequent years.

- **Tennessee Health Link:** This component of the primary care transformation strategy, which was implemented on a statewide basis on December 1, 2016, consists of a health home program for individuals with serious and persistent mental health conditions. Providers in Tennessee Health Link coordinate health care services for TennCare members with the most significant behavioral health needs. The program is designed to produce improved member outcomes, greater provider accountability and flexibility in the delivery of care, and improved cost control for the State. From the launch date until May 2017, approximately 60,000 TennCare members were enrolled in the program. TennCare continues to monitor enrollment and provider engagement with members and regularly solicits feedback on the implementation of the program.
- **Care Coordination Tool:** Providers in the PCMH and Tennessee Health Link programs have access to the third element of the primary care transformation strategy: the Care Coordination Tool. The State's Care Coordination Tool went live at the end of January 2017. The Care Coordination Tool allows participating primary care providers and behavioral health providers to see their attributed patient panel, view patient risk scores, and track the completeness of quality measures for their patients. The tool also alerts providers when their patients are admitted or transferred to—or discharged from—a hospital, including instances in which emergency room care is accessed. Physicians, nurses, coordinators, and other providers at participating practices received four weeks of user training on the tool in February 2017.

The second strategy of Tennessee's payment reform initiative is **Episodes of Care**. This strategy focuses on acute or specialist-driven health care delivered during a specified time period to treat physical or behavioral conditions such as an acute diabetes exacerbation or valve repair and replacement. Each episode has a principal accountable provider (sometimes referred to as the "quarterback") who is in the best position to influence the cost and quality of the episode. Episodes of care are implemented in groups or—in the terminology of the program—"waves."

Each episode is designed with significant input from stakeholders, including Tennessee providers, payers, administrators, and employers. The program organizes Technical Advisory Groups (TAGs) composed of experts in the field to provide clinical feedback on each episode's design. Episode TAG meetings are held in the spring and fall. The fall 2016 TAG meetings addressed Wave 6, which includes episodes for outpatient skin and soft tissue infection, neonatal (multiple), HIV, diabetes acute exacerbation, and pancreatitis. The spring 2017 TAG meetings addressed Wave 7, comprising femur/pelvic fracture; knee arthroscopy; non-operative shoulder injury; non-operative wrist injury; non-operative knee injury; non-operative ankle injury; spinal fusion; spinal decompression without spinal fusion; and back/neck.

Annual Feedback Sessions are another opportunity for stakeholders to provide input on existing episodes of care. On July 19, 2016, TennCare staff hosted an event in which providers from across Tennessee convened to discuss strengths and areas of opportunity in the design of episodes in Wave 1 (perinatal, total joint replacement (hip and knee), and asthma acute exacerbation) and Wave 2 (chronic

obstructive pulmonary disease acute exacerbation; screening and surveillance colonoscopy; outpatient and non-acute inpatient cholecystectomy; acute percutaneous coronary intervention (PCI), and non-acute PCI). The meetings were held simultaneously in six cities across Tennessee (Chattanooga, Jackson, Johnson City, Knoxville, Nashville, and Memphis) and were connected via videoconference to facilitate attendee participation.

Evidence of the effectiveness of the episodes of care program arrived during the second quarter of DY 15. Within the first year of financial accountability for Wave 1, doctors and hospitals reduced costs while maintaining quality of care. Implementation of these three episodes resulted in a reduction in costs of 3.4 percent in perinatal, 8.8 percent in acute asthma exacerbation, and 6.7 percent in total joint replacement. Overall, the cost of services in these three types of episodes was $6.3 million less than the previous year, even though medical costs were projected to increase by 5.5 percent nationally. Conservatively assuming a 3 percent increase would have taken place in the absence of the initiative, the Wave 1 episodes reduced costs by $11.1 million; these savings were achieved while maintaining overall quality of care.

Tennessee's payment reform strategy for **Long-Term Services and Supports** comprises quality- and acuity-based payment and delivery system reform for Nursing Facility (NF) services and Home and Community-Based Services (HCBS). One subset of NF services addressed during DY 15 was enhanced respiratory care services. Effective January 1, 2017, TennCare adjusted value-based rates of reimbursement for enhanced respiratory care services provided by qualified and contracted NFs. These adjustments reflected NFs' quality performance between April and September 2016. After implementing the new, value-based reimbursement approach on July 1, 2016, TennCare saw a marked increase in ventilator liberation, as was the goal of the quality improvement initiative. All but two facilities increased their ventilator weaning rates, including the weaning of multiple patients who had been ventilator-dependent for more than 700 days.

In addition, in the last quarter of DY 15, TennCare worked with the Tennessee Health Care Association to develop a new quality- and acuity-adjusted reimbursement methodology for NFs. As part of TennCare's ongoing commitment to transparency, before publishing the draft methodology, TennCare sought broad stakeholder input, hearing directly from residents receiving NF services and their family members, as well as from staff of NFs participating in the State's Quality Improvement in Long-Term Services and Supports (QuILTSS) initiative. Each of the Medicaid NFs in the state and their Resident/Family Councils were invited to complete online survey tools to provide feedback regarding quality-related components of the new rule. Facility representatives also had the opportunity to discuss their experience with the QuILTSS initiative and ways in which the program could be improved, not only to aid the initiative's goal of improving quality of care and quality of life for NF residents, but also to minimize administrative burden on facilities. A detailed summary of the feedback received by TennCare is available at http://tn.gov/assets/entities/tenncare/attachments/QuILTSSResidentAndStakeholderRulesSurvey.pdf

II. Project Status

Demonstration Amendment 31. Amendment 31 was a contingency plan—based on amendments from prior years—to address the budgetary challenges that would have arisen if the Tennessee General Assembly did not pass or renew a one-year hospital assessment fee. Amendment 31 outlined several significant benefit limits to be imposed on non-exempt adults, including—

- A combined annual limit of eight days per person for inpatient hospital and inpatient psychiatric hospital services;
- An annual limit on non-emergency outpatient hospital visits of eight occasions per person;
- A combined annual limit on health care practitioners' office visits of eight occasions per person;
- An annual limit on lab and X-ray services of eight occasions per person; and
- Elimination of coverage for occupational therapy, speech therapy, and physical therapy.

TennCare held a public notice and comment period on Amendment 31 from February 23 through March 24, 2017. Two sets of comments were received, each of which expressed opposition to the elimination of rehabilitative therapy. As was the case in previous years, however, the General Assembly renewed the hospital assessment fee by the conclusion of the legislative session, thereby eliminating any funding gap and, as a result, the need for Amendment 31 to be submitted to CMS.

Technical Change to the TennCare Demonstration. In the final month of DY 15, TennCare initiated a public notice and comment period concerning a proposed modification to the State's 1115 demonstration project. Attachment C of the TennCare Demonstration specifies limitations for private duty nursing services. The requested change would modify these limitations by making private duty nursing services available to adults aged 21 and older who are ventilator-dependent with a progressive neuromuscular disorder or spinal cord injury, and who are ventilated using noninvasive positive pressure ventilation by mask or mouthpiece for at least 12 hours each day in order to avoid or delay tracheostomy. By the conclusion of DY 15, TennCare had received no comments on the proposal.

Incentives for Providers to Use Electronic Health Records. The Electronic Health Record (EHR) Incentive Program is a partnership between federal and state governments that grew out of the Health Information Technology for Economic and Clinical Health (HITECH) Act of 2009. The purpose of the program is to provide financial incentives to Medicaid providers[1] to replace outdated, often paper-based approaches to medical record-keeping with electronic systems that meet rigorous certification criteria and that can improve health care delivery and quality. The federal government provides 100 percent of the funding for the incentive payments and 90 percent of the funding for administrative costs.

Tennessee's EHR program remained robust during DY 15 by continuing to distribute payments to some providers while educating others on the advantages of participation. Highlights from the year included the following:

- Total first-year payments to providers who had adopted, implemented, or upgraded to certified EHR technology capable of meeting CMS' "meaningful use" standards or who had achieved meaningful use of certified EHR technology for a period of 90 consecutive days exceeded $180 million by June 30, 2017.
- Total second-year payments to providers who had received first-year payments and who subsequently achieved meaningful use for a subsequent period of 90 consecutive days surpassed $56 million by the conclusion of DY 15.

[1] CMS allows two types of providers to participate in the Medicaid EHR Incentive Program: medical professionals (medical and osteopathic physicians, nurse practitioners, certified nurse midwives, dentists, and physician assistants who meet certain criteria) and hospitals (acute care hospitals, critical access hospitals, and children's hospitals).

- Total third-year, fourth-year, fifth-year, and sixth-year payments to providers who had demonstrated ongoing meaningful use of EHR technology grew by more than 32 percent during the year, growing from approximately $28,400,000 as of June 30, 2016, to more than $37,600,000 as of June 30, 2017.
- Nearly 1,800 Tennessee providers received incentive payments during DY 15.

These achievements would not have been possible without TennCare's multilayered approach to proactive outreach and communication to providers throughout the state. Various facets of this outreach effort included meetings, technical assistance calls, site visits, a dedicated section of the TennCare website, and newsletters.

Population Health. "Population Health" (PH) is the model of targeted health care interventions employed by TennCare, key benefits of which include—

- Selection of a much larger portion of the TennCare population than had been possible under previous models of health care intervention;
- Identification of risky behaviors likely to lead to disease in the future (such as poor eating habits, physical inactivity, and drug use);
- Assistance to enrollees in discontinuing such activities; and
- Interventions to assist enrollees who already have a complex chronic condition.

The PH program replaced the much more limited "Disease Management" model, which had typically served about 250,000 individuals. By contrast, the conclusion of DY 15 saw 1,334,854 TennCare enrollees—89 percent of the enrollee population—receiving PH services. Of the pregnant women enrolled in PH, more than 10,000 were assigned either to the "Maternity Program" (9,026 individuals) or the "High Risk Pregnancy Management" program (1,407 individuals).

Special Terms and Conditions. A summary of activities that occurred with respect to the Special Terms and Conditions is presented in Attachment D.

Enrollment information. STC 46.b. requires that the State include enrollment reporting by Eligibility Group and by Type for the TennCare population. Table 1 summarizes that information.

Table 1
Enrollment Counts for DY 15

State Plan and Demonstration Populations	Total No. of TennCare Enrollees			
	Jul - Sep 2016	Oct - Dec 2016	Jan - Mar 2017	Apr - Jun 2017
EG1 Disabled, Type 1 State Plan eligible	146,317	147,754	143,490	141,777
EG9 H-Disabled, Type 2 Demonstration Population	242	252	249	260
EG2 Over 65, Type 1 State Plan eligible	182	203	294	353
EG10 H-Over 65, Type 2 Demonstration Population	48	43	45	87

State Plan and Demonstration Populations	Total No. of TennCare Enrollees			
	Jul - Sep 2016	Oct - Dec 2016	Jan - Mar 2017	Apr - Jun 2017
EG3 Children, Type 1 State Plan eligible	793,980	801,365	799,933	766,701
EG4 Adults, Type 1 State Plan eligible	477,014	455,487	447,730	432,394
EG5 Duals, Type 1 State Plan eligibles and EG11 H-Duals 65, Type 2 Demonstration Population	151,725	153,409	152,740	149,395
EG6E Expan Adult, Type 3 Demonstration Population	734	710	521	364
EG7E Expan Child, Type 3 Demonstration Population	53	45	15	14
EG8, Med Exp Child, Type 2 Demonstration Population, Optional Targeted Low Income Children funded by Title XIX	0	0	0	0
Med Exp Child, Title XXI Demonstration Population	18,157	15,356	12,654	7,236
EG12E Carryover, Type 3, Demonstration Population	2,624	2,393	2,200	2,018
TOTAL	1,591,076	1,577,017	1,559,871	1,500,599

III. Quantitative and Case Study Findings

Beneficiary Survey. Every year since 1993, the Boyd Center for Business and Economic Research (BCBER) at the University of Tennessee in Knoxville has conducted a survey of Tennessee citizens—TennCare enrollees, individuals with private insurance, and uninsured individuals alike—to assess their opinions about health care. Respondents provide feedback on a range of topics, including demographics (age, household income, family size, etc.), perceptions of quality of care received, and behavior relevant to health care (the type of provider from whom an individual is most likely to seek initial care, the frequency with which care is sought, etc.).

During DY 15, BCBER published a summary of the results of the most recent survey titled "The Impact of TennCare: A Survey of Recipients, 2016," and TennCare submitted the document to CMS on September 29, 2016. Although the findings of a single survey must be viewed in context of long-term trends, several results from the report are noteworthy:

- Satisfaction with TennCare remained high. Ninety-two percent of respondents covered by TennCare expressed satisfaction with the quality of care they had received, making 2016 the eighth straight year in which survey respondents reported satisfaction levels exceeding 90 percent.
- More Tennesseans had health insurance. The percentage of respondents classifying themselves as uninsured fell to 5.5 percent, the lowest level in the 24-year history of the survey. When

considered in terms of age, the reported uninsured rate was 6.6 percent for individuals who are age 18 or older, and 1.8 percent for individuals under age 18.

- TennCare families rarely sought initial medical care at hospitals. Ninety-six percent of heads of households with TennCare reported seeking initial medical care for themselves at a doctor's office or clinic, and 98 percent reported doing so for their children. Furthermore, only 3 percent of heads of households with TennCare reported seeking initial medical care for themselves at hospitals, and only 2 percent reported doing so for their children.

In summary, the report notes, "TennCare continues to receive positive feedback from its recipients, with 92 percent reporting satisfaction with the program, indicating TennCare is providing medical care in a satisfactory manner and meeting the expectations of those it serves." The report is presented in Attachment E and may be viewed online at http://cber.haslam.utk.edu/tncare/tncare16.pdf.

HEDIS/CAHPS Report. The annual report of HEDIS/CAHPS data—titled "Comparative Analysis of Audited Results from TennCare MCOs"—was released in August 2016. The full name for HEDIS is "Healthcare Effectiveness Data Information Set," and the full name for CAHPS is "Consumer Assessment of Health Plans Surveys." This report, which is presented in Attachment F and posted on the TennCare website at http://www.tn.gov/assets/entities/tenncare/attachments/hedis16.pdf, provides data that enables the State to compare the performance of its MCOs against national norms and benchmarks and to compare performance among MCOs.

Improved statewide performance was noted for an array of child health measures, with many also exceeding the HEDIS 2015 Medicaid National Average. Higher success rates were achieved in all of the following categories:

- Weight Assessment and Counseling for Nutrition and Physical Activity for Children and Adolescents (BMI percentile: 3-11 years)
- Immunizations for Adolescents (both "meningococcal" and "combination 1")
- Appropriate Testing for Children with Pharyngitis
- Medication Management for People With Asthma (all child sub-categories)
- Asthma Medical Ratio (all child sub-categories)
- Appropriate Treatment for Children with Upper Respiratory Infection
- Follow-Up Care for Children Prescribed ADHD Medication

Improvement was also evident in a variety of health categories applicable to adults, including Avoidance of Antibiotic Treatment in Adults with Acute Bronchitis, Pharmacotherapy Management of COPD Exacerbation (systemic corticosteroid), Medication Management for People with Asthma (three out of four adult sub-categories), Asthma Medical Ratio (all adult sub-categories), and Controlling High Blood Pressure. Categories related to women's health were generally an area of opportunity: performance rose in the area of Breast Cancer Screening but fell in the measures of Cervical Cancer Screening, Chlamydia Screening in Women, and Human Papillomavirus Vaccine for Female Adolescents.

HEDIS 2016 was the seventh year of statewide reporting of behavioral health measures following the integration of medical and behavioral health services among TennCare's health plans. Results superior to those in 2015 were achieved in the behavioral health categories of Antidepressant Medication Management (Effective Continuation Phase Treatment) and Follow-Up Care for Children Prescribed ADHD Medication. In several categories in which improvement was not seen relative to 2015 (Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications;

Diabetes Monitoring for People With Diabetes and Schizophrenia; and Cardiovascular Monitoring for People With Cardiovascular Disease and Schizophrenia), performance nonetheless exceeded the 2015 Medicaid National Average.

IV. Utilization Data

Utilization information is taken from encounter data submitted by the Managed Care Organizations. It is maintained on a rolling basis reflecting a one-quarter lag.

Key indicators tracked by TennCare and the measures for each indicator for FYs 2015-2017 are presented in Table 2.

Table 2
Key Indicators Tracked by TennCare, FYs 2015-2017

METRIC	FY 2015	FY 2016	FY 2017
Member Months (FTE)	**1,363,619**	**1,499,252**	**1,506,504**
COST INDICATORS			
PMPM – Physician	**$93**	**$86**	**$89**
PMPM – Facilities	**$118**	**$122**	**$123**
PMPM – Rx (before rebate)	**$65**	**$69**	**$69**
UTILIZATION MEASURES			
Hospital Days/1000	**562**	**584**	**573**
Hospital Admissions (excluding mental health events)/1000	**112**	**110**	**108**
ER Visits/1000	**928**	**951**	**916**

All utilization measures are calculated per 1,000 Full Time Equivalent (FTE) members.

V. Evaluation Findings from the Demonstration Period to Date

For approximately the first half of DY 15, TennCare's evaluation efforts were governed by the Evaluation Plan approved by CMS on March 31, 2008, the performance measures of which had been updated annually. The performance measures were grouped into the following eight main objectives:

Objective 1: Use a managed care approach to provide services to Medicaid state plan and demonstration enrollees at a cost that does not exceed what would have been spent in a Medicaid fee-for-service program.
State's Summary of Progress: Budget neutrality was successfully maintained (and reported in the Quarterly Progress Reports) during DY 15.

Objective 2: Assure appropriate access to care for enrollees.
Objective 3: Provide quality care to enrollees.
Objective 4: Assure enrollees' satisfaction with services.
Objective 5: Improve health care for program enrollees.
State's Summary of Progress: Progress on these objectives was summarized in the document titled *2016 Quality Assessment and Performance Improvement Strategy* that was submitted to CMS on October 18, 2016, and that comprises Attachment F to this report.

Objective 6: Assure that participating health plans maintain stability and viability, while meeting all contract and program requirements.
State's Summary of Progress: The State used two performance measures for this objective.

- Performance Measure 6.1—By 2017, 100 percent of the TennCare MCOs will have demonstrated compliance with statutory and/or contractual claims processing timeliness standards in at least 10 out of 12 months in a calendar year.
    - Baseline Measure—In Calendar Year 2012, 100 percent of MCOs demonstrated compliance in at least 10 out of 12 months.
    - 2014 Measure—In Calendar Year 2013, 100 percent of MCOs demonstrated compliance in at least 10 out of 12 months.
    - 2015 Measure—In Calendar Year 2014, 100 percent of MCOs demonstrated compliance in at least 10 out of 12 months.
    - 2016 Measure—In Calendar Year 2015, 100 percent of MCOs demonstrated compliance in at least 10 out of 12 months.
    - 2017 Measure—In Calendar Year 2016, 100 percent of MCOs demonstrated compliance in at least 10 out of 12 months.
- Performance Measure 6.2—By 2017, the MCOs will report a compliance rate of 95 percent for all contractual claims payment accuracy reports. *Note: MCOs are determined compliant for each of the report types if statistical sampling determines a claims payment accuracy rate of at least 97 percent.*
    - Baseline Measure—In Fiscal Year 2013, the MCOs reported a compliance rate of 99 percent.
    - 2014 Measure—In Fiscal Year 2014, the MCOs reported a compliance rate of 97.8 percent.
    - 2015 Measure—In Fiscal Year 2015, the MCOs reported a compliance rate of 93.2 percent.
    - 2016 Measure—In Fiscal Year 2016, the MCOs reported a compliance rate of 94.7 percent.
    - 2017 Measure—In Fiscal Year 2017, the MCOs reported a compliance rate of 97.2 percent.

In addition, the MCOs' compliance with statutory net worth requirements and company action level requirements is monitored regularly and addressed in each Quarterly Progress Report filed during the Demonstration Year.

Objective 7: Provide appropriate, and cost-effective home and community-based services that will improve the quality of life for persons who qualify for nursing facility care, as well as for persons who do

not qualify for nursing facility care but who are "at risk" of institutional placement and that will help to rebalance long-term services and supports expenditures.

State's Summary of Progress: The number of TennCare enrollees receiving HCBS in CHOICES 2 (for individuals who meet the nursing facility Level of Care criteria) or in CHOICES 3 (for individuals who do not meet nursing facility Level of Care criteria but are at risk of institutionalization) is reported in each Quarterly Progress Report. In addition, the State's most recent submission of CHOICES data included several indicators of the extent to which rebalancing of LTSS expenditures is occurring. HCBS expenditures grew from approximately $100 million in the twelve-month period preceding CHOICES implementation to almost $246 million in the twelve-month period concluding on June 30, 2016. In the same time period, HCBS expenditures as a percentage of total long-term care expenditures more than doubled, increasing from 9.75 percent to 19.99 percent.

Objective 8: Provide appropriate, cost-effective home and community-based services to individuals with I/DD who meet the nursing facility level of care and need specialized services for I/DD, or are at risk of meeting the nursing facility level of care, to help promote and support integrated competitive employment and integrated community living that will result in improved employment, health and quality of life outcomes.

State's Summary of Progress: TennCare implemented Employment and Community First CHOICES on July 1, 2016. By the conclusion of DY 15, the number of individuals enrolled in the program and receiving services was 1,384.

When CMS approved the State's application to extend the TennCare Demonstration on December 16, 2016, the State began developing an evaluation design for the new approval period. On April 17, 2017, the State submitted to CMS its proposed evaluation design for the current approval period of the TennCare Demonstration (December 16, 2016, through June 30, 2021). When DY 15 concluded, the State and CMS were working to finalize the evaluation design.

VI. Policy and Administrative Issues and Solutions

Tennessee Eligibility Determination System. Tennessee Eligibility Determination System (or "TEDS") is the name of the system that will be used by the State to process applications and identify persons who are eligible for TennCare and CoverKids (the State's separate CHIP program).

TennCare initiated the TEDS project in 2012. After partnering initially with the Northrop Grumman Corporation, the State ultimately adopted a new approach to the undertaking. Three separate contracts were procured to address the functions of technical advisory services, strategic program management office (SPMO) services, and systems integration services. During DY 14, TennCare awarded and implemented two of the three contracts: a technical advisory services contract with KPMG, LLP went into effect on September 1, 2015, and an SPMO services contract with Public Consulting Group, Inc. took effect on November 1, 2015.

In the first quarter of DY 15, the systems integration services contract was awarded to Deloitte Consulting, LLP, and implementation began on October 1, 2016. Deloitte is responsible for designing, developing, implementing, maintaining, and operating a rules-based Medicaid eligibility determination system that will make eligibility determinations and redeterminations automatically; receive application

data; interface with federal data sources (such as the Federally Facilitated Marketplace and the Internal Revenue Service); and mail notices and letters to enrollees.

TennCare and Deloitte began their collaboration with a series of meetings, initially to define in detail the requirements for the eligibility determination system, and then to address the design of the system. These sessions progressed so quickly and productively that the initial project timeline accelerated. As originally conceived, implementation of TEDS was to occur in two phases: one for eligibility determinations based on modified adjusted gross income (or "MAGI"), and one for eligibility determinations not based on MAGI. TennCare and Deloitte subsequently decided that the two phases could be consolidated into a single launch, planned for late 2018.

As of the end of DY 15, Deloitte was scheduled to present formal design documents to TennCare in July 2017 and to commence system development and testing in the fall.

***Wilson v. Gordon* Suit.** *Wilson v. Gordon* is a class action lawsuit filed against TennCare by the Tennessee Justice Center, the Southern Poverty Law Center, and the National Health Law Program. The suit alleges federal noncompliance in the Medicaid application and appeals process TennCare has been using since implementation of the Affordable Care Act.

Two separate courts have heard arguments in the case. One is the U.S. District Court for the Middle District of Tennessee, where Plaintiffs originally filed suit in July 2014. The District Court granted class action status to the case and issued a preliminary injunction requiring the State to provide an opportunity for a fair hearing on any delayed adjudications of applications for TennCare coverage. TennCare took immediate action to comply with these rulings but also filed an appeal of the preliminary injunction with a second court, the U.S. Court of Appeals for the Sixth Circuit in Cincinnati.

In May 2016, a three-judge panel for the Sixth Circuit affirmed the District Court's decision to issue a preliminary injunction. The State responded to the ruling by filing a petition for rehearing en banc, which—if granted—would have allowed the State's appeal to be heard by all of the Sixth Circuit judges instead of by a small panel. On August 1, 2016, however, the petition was denied.

With the State's appeal and petition to the Sixth Circuit having both been adjudicated, activity related to the *Wilson* suit resumed in District Court. On September 16, 2016, the State filed a Motion to Decertify the Class and Dismiss the Case. The basis of the motion was that processes used by TennCare and CMS for Medicaid applications and application appeals in Tennessee had evolved substantially. The State argued that there were no remaining members in the Plaintiff class originally certified by the District Court, and that any eligibility issues arising thereafter were completely different from the issues that originally prompted the *Wilson* suit.

By order of the District Court on March 31, 2017, a trial was scheduled for December 12, 2017. In addition, oral argument on the State's Motion was heard on April 27, 2017, with supplemental briefing occurring in May. By the end of DY 15, a decision on the State's Motion had not been rendered by the District Court.

Quality Improvement Strategy. As required by federal law[2] and the State's Demonstration agreement with CMS,[3] TennCare has developed a strategy for evaluating and improving the quality and accessibility

[2] 42 U.S.C. § 1396u-2(c)(1)(A)

of care offered to enrollees through the managed care network. TennCare submitted a new iteration of the strategy—titled *2016 Quality Assessment and Performance Improvement Strategy*—to CMS on October 18, 2016.

In addition to laying out the measures of quality assurance already in place, the report outlines TennCare's goals and objectives relative to quality and access for the year to follow. Furthermore, a variety of best practices (such as the Population Health program) and challenges (like lack of member engagement) are detailed in the concluding section of the report, as is the positive impact of the State Innovation Model (SIM) grant awarded to Tennessee by the Centers for Medicare and Medicaid Innovation. The document is included as Attachment G of this report.

Public Forum on the TennCare Demonstration. In compliance with the federal regulation at 42 CFR § 431.420(c) and STC 10 of the TennCare Demonstration, the State hosted a public forum in Nashville on December 15, 2016. The purpose of the forum was to provide members of the public an opportunity to comment on the progress of the TennCare Demonstration project, which has delivered Medicaid services to eligible Tennesseans under a managed care model since 1994.

The December 15 open meeting was not the only avenue through which feedback could be offered. Notice of the forum, which appeared on the TennCare website, included an email address and a physical address to which comments could be sent. Although the State received no comments through any of these pathways, additional opportunities to assess the TennCare Demonstration will be available, as TennCare is required to convene a forum on this subject each year for the foreseeable future.

ATTACHMENT A

OPERATIONAL PROCEDURES REGARDING RESERVE SLOTS IN CHOICES GROUP 2

Required by STC #31.d.iv.(A)

Operational Procedures for
CHOICES Group 2 Reserve Capacity

Pursuant to STC #31.d.iv. (A), ("**Reserve Capacity**") of the Special Terms and Conditions set forth in the current TennCare Section 1115 Demonstration Waiver, the State will reserve a specified number of slots in CHOICES Group 2 for:

- Individuals being discharged from a Nursing Facility (NF); and
- Individuals being discharged from an acute care setting who are in imminent risk of being placed in a NF setting absent the provision of Home and Community-Based Services (HCBS).

Once all other available (i.e., unreserved) slots have been filled, individuals who meet specified criteria (including new applicants seeking to establish Medicaid eligibility in an institutional category as well as current SSI-eligible individuals seeking enrollment into CHOICES Group 2) may be enrolled into reserved slots in accordance with the following procedures:

- The Area Agency on Aging and Disability (AAAD) or the Managed Care Organization (MCO), as applicable, must complete and submit a Reserve Capacity Enrollment Justification form to the TennCare Division of Long-Term Services and Supports (LTSS), along with supporting documentation.

- The Reserve Capacity Enrollment Justification form will require confirmation of the NF or hospital, as applicable, from which the person is being discharged, and in the case of a hospital discharge, a written explanation of the applicant's circumstances that warrant the immediate provision of NF services unless HCBS are immediately available. This explanation will include such factors as:
  - The reason for the acute care stay
  - The current medical status of the individual
  - Specific types of assistance needed by the individual upon discharge (medical as well as functional)
  - A description of the applicant's natural support system as it relates to discharge needs.

- The TennCare Division of LTSS will review the form and supporting documentation in order to determine whether the person meets specified criteria for enrollment into a reserved slot.

- If documentation is sufficient to demonstrate that the individual meets specified criteria for a reserved slot, TennCare will notify the submitting entity and proceed with the enrollment process, including determination of categorical/financial eligibility (for new Medicaid applicants) and application of federal post-eligibility provisions.

- If documentation is not sufficient to demonstrate that the individual meets specified criteria for a Reserve Capacity slot, TennCare will notify the submitting entity and place the person on a waiting list for Group 2 once unreserved capacity is available. TennCare shall provide notice of the determination to the applicant, which will include the right to request a fair hearing regarding any valid factual dispute pertaining to the State's decision.

ATTACHMENT B

OPERATIONAL PROCEDURES REGARDING
RESERVE SLOTS IN ECF CHOICES

Required by STC #32.d.iv.(A)

Operational Procedures for
Employment and Community First CHOICES
Reserve Capacity

Pursuant to STC #32.d.iv.(A) ("**Reserve Capacity**") of the Special Terms and Conditions set forth in the current TennCare Section 1115 Demonstration Waiver, the State will reserve a specified number of slots in Employment and Community First (ECF) CHOICES for:

- Individuals with an intellectual disability who have an aging caregiver, as defined in State law;
- Individuals in emergent circumstances as defined in TennCare rule;
- Individuals with multiple complex health conditions as defined in TennCare rule;
- Individuals with significant medical or behavioral needs who require services available in ECF CHOICES to sustain current family living arrangements; and
- Individuals requiring planned transition to community living due to the caregiver's poor and declining health.

These groups were identified in partnership with stakeholders including:

- The Arc of Tennessee;
- The Tennessee Council on Developmental Disabilities;
- The Tennessee Disability Coalition;
- Disability Rights Tennessee (Protection and Advocacy); and
- The Statewide Independent Living Council of Tennessee.

TennCare shall reserve 250 slots within the ECF CHOICES Groups 4, 5, 6 Enrollment Target. These slots are available only as specified below.

Reserve capacity groups established at the program's outset include:

Individuals with an intellectual disability who have an aging caregiver, as defined in State law
Pursuant to State law (TCA § 33-5-112), individuals who have an intellectual disability and have aging caregivers (currently defined by Tennessee statute as caregivers age 75 or older) will be eligible for enrollment into Employment and Community First CHOICES, subject to Medicaid and program eligibility criteria.

Individuals in emergent circumstances as defined in TennCare rule
An emergent situation will be defined as one that meets one or more of the criteria below and for which enrollment into ECF CHOICES is the most appropriate course, as determined through an interagency committee review process, including both TennCare and the Department of Intellectual and Developmental Disabilities (DIDD). The review will include consideration of other options, including the relative costs of such options. Discharge from another service system (DCS, DMHSAS, etc.) shall not be deemed an emergent situation unless other emergent criteria are met and unless diligent and timely efforts to plan and prepare for discharge and to facilitate transition to community living without long-term services and supports available in ECF CHOICES have been made, and it is determined through the interagency committee review process that enrollment in ECF CHOICES is the most appropriate way to provide needed supports.

Emergent criteria shall be as follows:

- The person's primary caregiver is recently deceased, and there is no other caregiver available to provide needed long-term supports.
- The person's primary caregiver is permanently incapacitated, and there is no other caregiver available to provide needed long-term supports.
- There is clear evidence of serious abuse, neglect, or exploitation in the current living arrangement; the person must move from the living arrangement to prevent further abuse, neglect or exploitation; and there is no alternative living arrangement available.
- Enrollment into ECF CHOICES is necessary in order to facilitate transition out of a long-term care institution, i.e., a NF or a private or public ICF/IID into a more integrated community-based setting.
- The person is being discharged from an acute care setting and is at imminent risk of being placed in a NF setting absent the provision of HCBS or has applied for admission to a NF and been determined via the PASRR process to be inappropriate for NF placement. TennCare may require confirmation of the NF or hospital discharge and, in the case of hospital discharge, written explanation of the applicant's circumstances that warrant the immediate provision of NF services unless HCBS are immediately available.
- The person is an adult age 21 or older enrolled in ECF CHOICES Group 4 (Essential Family Supports), ECF CHOICES Group 5 (Essential Supports for Employment and Independent Living), or the Section 1915(c) Self-Determination Waiver and has recently experienced a significant change in needs or circumstances. TennCare has determined via a Safety Determination that the person can no longer be safely served within the array of benefits available in ECF CHOICES Group 4 (Essential Family Supports) or 5 (Essential Supports for Employment and Independent Living) or the Self-Determination Waiver, as applicable, the person meets NF Level of Care, and must be transitioned to ECF CHOICES Group 6 (Comprehensive Supports for Employment and Community Living) in order to sustain community living in the most integrated setting.
- The health, safety, or welfare of the person or others is in immediate and ongoing risk of serious harm or danger; other interventions including Behavioral Health Crisis Prevention, Intervention and Stabilization services, where applicable, have been tried but were not successful in minimizing the risk of serious harm to the person or others without additional services available in ECF CHOICES; and the situation cannot be resolved absent the provision of such services available in ECF CHOICES.

Individuals with multiple complex health conditions as defined in TennCare rule

Reserve capacity will be established for a limited number of individuals who have multiple complex chronic or acquired health conditions that present significant barriers or challenges to employment and community integration, and who are in urgent need of supports in order to maintain the current living arrangement and delay or prevent the need for more expensive services, and for which enrollment into ECF CHOICES is the most appropriate way to provide needed supports, as determined through an interagency committee review process, including both TennCare and DIDD. The review will include consideration of other options, including the relative costs of such options.

Additional reserve capacity groups identified in partnership with stakeholders since the program's implementation include:

Individuals with significant medical or behavioral needs who require such supports to sustain current family living arrangements

Reserve capacity will be established for a limited number of individuals living at home with family who have significant medical or behavioral support needs that family caregivers are struggling to meet, and the sustainability of the current living arrangement is at significant risk. Services available through ECF CHOICES would help to support and sustain the current living arrangement and the continuation of natural caregiving supports, delaying the need for more expensive services.

Individuals requiring planned transition to community living due to the caregiver's poor and declining health

Reserve capacity will be established for a limited number of adults age 21 and older living at home with family whose primary caregiver is in poor and declining health, placing the long-term sustainability of the current living arrangement at significant risk. Planned transition to community living in the most independent and integrated setting appropriate is needed in order to avoid a potential crisis situation in the near future.

Operational Procedures:

Unlike reserve capacity slots established for CHOICES Group 2 participants, reserve capacity slots in ECF CHOICES will be used as persons meeting specified criteria are identified and determined eligible to enroll.

Except for individuals with an intellectual disability who have an aging caregiver, as defined in State law, review and selection of persons who meet criteria for reserve capacity slots will be determined by an interagency review committee, including both TennCare and DIDD. A Potential Applicant for ECF CHOICES may apply for enrollment into a reserve capacity slot only if determined through the interagency committee review process that applicable reserve capacity criteria are met, and that enrollment into ECF CHOICES is the most appropriate way to provide needed supports. Such review shall include consideration of other options, including the relative costs of such options.

TennCare will require confirmation that an Applicant meets applicable reserve capacity criteria. Except for individuals with an intellectual disability who have an aging caregiver, as defined in State law, documentation shall be provided via a form developed by TennCare, along with medical evidence that is submitted by the MCO or DIDD, as applicable, to the interagency review committee.

Only Applicants determined by the interagency review committee to meet specified reserve capacity criteria (including new Applicants seeking to establish eligibility in the ECF CHOICES 217-Like Group or the Interim ECF CHOICES At-Risk Group as well as current SSI-eligible individuals seeking enrollment into ECF CHOICES) may be enrolled into reserve capacity slots.

Once all reserve capacity slots set aside for a particular purpose have been filled, persons who meet such criteria shall not proceed with the enrollment process, but shall remain on the Referral List for ECF CHOICES, unless they qualify to enroll in an open priority group.

If a Potential Applicant does not meet criteria for a reserve capacity slot, the Potential Applicant shall not proceed with the enrollment process, but shall remain on the referral list for ECF CHOICES.

For purposes of transparency, reserve capacity criteria, including the operational procedures pertaining thereto, are set forth in TennCare Rule 1200-13-01.

ATTACHMENT C

COMPLIANCE MEASURES FOR HCBS REGULATIONS

Required by STC #42.b.

COMPLIANCE WITH HCBS REGULATIONS

Regulation	Topic	Actions
42 CFR 440.180(a)	Description and requirements for HCBS	1. Attachments D and G of the approved TennCare Demonstration and the State Rules for TennCare Long-Term Care Programs (1200-13-01) define the HCBS benefits that are available through the CHOICES and ECF CHOICES programs and delineate when services may be provided to a CHOICES or ECF CHOICES member. Where appropriate, service definitions identify "services not included" as specified in (c)(3) of the regulation. TennCare Rules are available for review at http://share.tn.gov/sos/rules/1200/1200-13/1200-13-01.20161229.pdf 2. Contractor Risk Agreement between the Division of TennCare and each Managed Care Organization delineates HCBS available to CHOICES and ECF CHOICES enrollees, the scope of such services, and contractor requirements for the authorization and initiation of such services. The Contractor Risk Agreement also sets forth reporting requirements by which TennCare monitors the Managed Care Organizations' compliance and penalties to remediate non-compliance. A sample contract is available for review at http://www.tn.gov/assets/entities/tenncare/Attachments/MCOStatewideContract.pdf 3. Provider Agreements between the Managed Care Organizations and network providers delineate the type and scope of services that each provider may provide and requirements for qualified staff.
42 CFR 441.301(c); (1) (2) (3) (4) (5) (6)	Contents of request for a waiver: (1) Person-centered planning process (2) Person-centered service plan (3) Review of the person-centered service plan (4) Home and community-based settings (5) Settings that are not home and community-based (6) Home and community-	1. Contractor Risk Agreement between the Division of TennCare and each Managed Care Organization delineates requirements for the person-centered planning process. A sample contract is available for review at the link provided above. 2. Contractor Risk Agreement between the Division of TennCare and each Managed Care Organization delineates requirements for the person-centered service plan. The Contractor Risk Agreement also sets forth reporting requirements by which TennCare monitors the Managed Care Organizations' compliance and

Regulation	Topic	Actions
	based settings: compliance and transition	penalties to remediate non-compliance. 3. The Division of TennCare conducts routine audits of enrollee records to ensure compliance with the person-centered planning requirements. Penalties to remediate non-compliance are delineated in the Contractor Risk Agreement. Additional quality monitoring and improvement strategies for person-centered planning are set forth in the integrated Quality Improvement Strategy, a copy of which in Attachment G to this report. 4. [Applicable to (4)-(6) of the Regulation] Tennessee's required Statewide Transition Plan (STP) received final approval from CMS on April 13, 2016. The STP delineates the State's process for assuring compliance with the HCBS settings rule, including the method for assuring Medicaid-reimbursed HCBS are provided in compliant settings; the process for determining settings that are not home and community-based in nature; and the transition process, which encompasses transition to compliance, as well as transition of individuals from a non-compliant setting to a compliant setting of their choice, when applicable. This plan is available for review at http://www.tn.gov/tenncare/topic/transition-plan-documents-for-new-federal-home-and-community-based-services. The State's progress in implementing the STP and achieving full compliance is detailed in the document entitled *Statewide Transition Plan and Heightened Scrutiny Milestone Tracking Quarterly Report*, which reflects transition status as of June 30, 2016, and which was previously submitted to CMS.
42 CFR 441.302; (a) (c) (d) (g) (j)	State assurances: (a) Health and Welfare (c) Evaluation of need (d) Alternatives (g) Institutionalization absent waiver (j) Day treatment or partial hospitalization	1. The State Rules for TennCare Long-Term Care Programs (1200-13-01) define the standards for HCBS providers. These Rules are available for review at http://share.tn.gov/sos/rules/1200/1200-13/1200-13-01.20161229.pdf 2. Contractor Risk Agreement between the Division of TennCare and each Managed Care Organization includes a. Critical Incident reporting requirements; b. Mandatory elements for all provider agreements;

Regulation	Topic	Actions
		c. Credentialing requirements to ensure a network of qualified providers; d. Requirements pertaining to initial and annual Level of Care assessments; e. Mandatory elements of a CHOICES or ECF CHOICES assessment, person-centered service plan, and risk agreement, as applicable; and f. Maximum timelines for the assessment, development of the person-centered service plan, and service initiation for potential and new CHOICES or ECF CHOICES members. 3. Provider Agreements between the Managed Care Organizations and network providers include critical incident reporting requirements. 4. Cost neutrality calculations ensure that an individual's needs can be met safely and effectively at a cost that is less than or equal to care provided in a NF. If the individual's needs cannot safely and effectively be met with HCBS at a cost that is less than or equal the same Level of Care in a NF, the individual is eligible for—and may elect to receive services in—a NF. 5. Level of Care is confirmed for each CHOICES and ECF CHOICES member through standard PAE processes, requirements for supporting medical documentation, and annual recertification to assure no changes in the Level of Care. 6. Freedom of Choice education appears in materials used by the single point of entry, and in the Freedom of Choice election form (applicable for CHOICES), member handbook, and TennCare website. 7. Please refer to the integrated Quality Improvement Strategy in Attachment G for a list of measures used to verify the State Assurances.
42 CFR 441.303; (a) (c) (d) (e)	Supporting documentation required: (a) Description of safeguards (c) Description of agency plan for evaluation (d) Description of plan to inform enrollees (e) Description of post-eligibility treatment of income	1. The Single Point of Entry or the Managed Care Organization facilitates CHOICES or ECF CHOICES Level of Care assessments through the completion of a PAE. TennCare determines Level of Care. On an annual basis, each PAE in use by a Medicaid participant must be recertified by the Managed Care Organization to verify that the individual still meets Level of Care. 2. Please refer to the integrated Quality Improvement Strategy in Attachment G for a list

Regulation	Topic	Actions
		of measures used to verify the State Assurances. These data are reported to CMS annually. 3. The State Rules for the Department of Health, Division of Healthcare Facilities delineate specific licensure requirements for nursing facilities, assisted care living facilities, and Adult Care Homes-Level 2. http://share.tn.gov/sos/rules/1200/1200-08/1200-08.htm The State Rules for the Department of Mental Health and Substance Abuse Services delineate specific licensure requirements for Community Living Supports, as defined in the three-page document following this table. 4. Post-eligibility treatment of income is delineated in State Rules for TennCare Technical and Financial Eligibility (1200-13-20). These Rules are available for review at http://share.tn.gov/sos/rules/1200/1200-13/1200-13-20.20161213.pdf.
42 CFR 441.310	Limits on Federal financial participation	1. The Contractor Risk Agreement between the Division of TennCare and the Managed Care Organizations allows the Managed Care Organizations to contract only with licensed facilities that are eligible to participate in Medicaid. 2. Managed Care Organizations may not provide reimbursement for Room and Board, as is delineated in State Rules for TennCare Long-Term Care Programs (1200-13-01-.02). 3. CHOICES services do not include prevocational, educational, or supported employment services. Where appropriate, ECF CHOICES service definitions specify that services may not be provided under the ECF CHOICES program if such benefits would be available either under special education and related services as defined in section 602 of the Education of the Handicapped Act (20 U.S.C. 1401) or under vocational rehabilitation services available to the individual through a program funded under section 110 of the Rehabilitation Act of 1973 (29 U.S.C. 730).

Licensure and Quality Oversight of Community Living Supports and Community Living Supports-Family Model Providers

Providers of Community Living Supports (CLS) and Community Living Supports-Family Model (CLS-FM) are licensed by the Department of Intellectual and Developmental Disabilities (DIDD) pursuant to statutory requirements set forth in Tennessee Code Annotated, Title 33, and in Chapter 0940-05 of the Rules of the Department of Mental Health and Substance Abuse Services, including:

0940-05-24 MINIMUM PROGRAM REQUIREMENTS FOR MENTAL RETARDATION RESIDENTIAL HABILITATION FACILITIES

0940-05-28 MINIMUM PROGRAM REQUIREMENTS FOR MENTAL RETARDATION SEMI-INDEPENDENT LIVING FACILITIES

0940-05-32 MINIMUM PROGRAM REQUIREMENTS FOR MENTAL RETARDATION SUPPORTED LIVING SERVICES FACILITIES

0940-05-26 MINIMUM PROGRAM REQUIREMENTS FOR MENTAL RETARDATION PLACEMENT SERVICES FACILITIES

The specific type of licensure will depend on the level of services/reimbursement for individuals supported in the home, as well as certain factors that are explicit in the statutory and regulatory requirements. For example:

- CLS1 is provided to CHOICES members who are primarily independent or who have family members and other (i.e., non-CHOICES) paid or unpaid supports, but need limited intermittent CLS supports to live safely in a community housing situation—generally less than 21 hours per week—and do not need overnight staff or direct support staff to live on-site for supervision purposes. A primary staff member or other support staff must be on-call on a twenty four (24) hour per day basis when assistance is needed.

    - *The CLS1 provider is licensed by the Department of Intellectual and Developmental Disabilities (DIDD) as Mental Retardation Semi-Independent Living Services Facility in accordance with licensure regulations.*

- CLS2 is provided to CHOICES members who require minimal to moderate support on an ongoing basis, but can be left alone for several hours at a time and do not need overnight staff or direct support staff to live on-site for supervision purposes. A primary staff member or other support staff must be on-call on a twenty four (24) hour per day basis.

    - *The CLS2 provider is also licensed by the Department of Intellectual and Developmental Disabilities (DIDD) as Mental Retardation Semi-Independent Living Services Facility in accordance with licensure regulations.*

    This is the licensure type for Semi-Independent Living services currently provided under the State's Section 1915(c) waiver authority for individuals with intellectual and developmental disabilities. CLS 1 and CLS 2 benefits are comparable to the Semi-Independent Living benefit

currently provided under the State's Section 1915(c) waiver authority to individuals with intellectual and developmental disabilities.

- CLS3 is provided to CHOICES members with higher acuity of need who are likely to require supports and or supervision twenty four (24) hours per day due to the following reasons: advanced dementia or significant cognitive disability that impacts the member's ability to make decisions, perform activities of daily living or instrumental activities of daily living, including behaviors which place the member or others at risk; significant physical disabilities that require frequent intermittent hands-on assistance with activities of daily living including toileting, transfers, and mobility; complex health conditions and compromised health status requiring medication assistance and daily nurse oversight and monitoring and/or daily skilled nursing services as needed for routine, ongoing health care tasks, such as blood sugar monitoring and management, oral suctioning, tube feeding, bowel care, etc. Individuals authorized to receive CLS3 must have the appropriate level of professional and support staffing based on their needs, including up to 24/7 when appropriate.

    - *The CLS3 provider is licensed as a Mental Retardation Supported Living or Residential Habilitation Facilities provider by the Department of Intellectual and Developmental Disabilities (DIDD) in accordance with licensure requirements.*

    This is the licensure type for Supported Living and Residential Habilitation services, including Medical Residential services, currently provided under the State's Section 1915(c) waiver authority for individuals with intellectual and developmental disabilities.

- The levels of support for Community Living Supports-Family Model are the same, but all are delivered in an adult foster home setting where the person lives in the home of a family who is the paid caregiver.

    - *The CLS-FM provider is licensed by the Department of Intellectual and Developmental Disabilities (DIDD) as Mental Retardation Placement Services Facility.*

    This is the licensure type for providers of Family Model Residential Services currently provided under the State's Section 1915(c) waiver authority for individuals with intellectual and developmental disabilities.

CLS and CLS-FM benefits in the Employment and Community First CHOICES program use the same licensure types.

It is important to understand that licensure standards establish the minimum standards that facilities must meet in order to be licensed. These include background checks of all staff.

Additional program and quality requirements are set forth in TennCare rules, MCO contracts, and provider agreements.

In addition to annual licensure surveys, TennCare contracts with the Department of Intellectual and Developmental Disabilities (DIDD), the operating agency for the state's three Section 1915(c) waivers for individuals with intellectual disabilities, to conduct quality monitoring surveys of providers of CLS and CLS-FM services. TennCare has built on a well-developed quality strategy that has been hailed by the

Centers for Medicare and Medicaid Services in recent evidentiary reviews of the 1915(c) waivers as a "model of best practices" to establish performance measures and processes for discovery, remediation, and ongoing data analysis and quality improvement regarding CLS services. In addition to providing data specific to the quality of these services offered in the CHOICES and ECF CHOICES programs, this ensures that TennCare has a comprehensive perspective of quality performance and strategies for quality improvement across the LTSS system as a whole.

In addition to annual licensure surveys and annual quality monitoring surveys, MCO Care or Support Coordinators are required to conduct periodic onsite visits of each person receiving CLS or CLS-FM services, including specific monitoring specified by TennCare, to ensure that services are being provided appropriately and that the members' needs are met.

TennCare contracts with Area Agencies on Agency and Disability to ensure the availability of Ombudsman services for individuals receiving CLS and CLS-FM services. This includes periodic in-person assessment of the quality of services being received, as well as the member's satisfaction with the services and with quality of life, using a standardized assessment tool.

Finally, TennCare participates in National Core Indicators to assess quality of life, community integration, and person-centered services for CHOICES and ECF CHOICES members. NCI also uses a standardized assessment tool to monitor quality of services and quality outcomes for seniors and adults with disabilities and individuals with I/DD receiving HCBS, including those in CLS and CLS-FM settings.

ATTACHMENT D

SPECIAL TERMS AND CONDITIONS REPORT

STC Activity Report—DY 15

TennCare maintained compliance with all Special Terms and Conditions during Demonstration Year 15. Specific actions and deliverables are detailed below.

STCs #6 and #7: The State contemplated—and held a public notice and comment period—on one demonstration amendment. Amendment 31 outlined program reductions that would be necessary if the Tennessee General Assembly did not renew a one-year hospital assessment fee. Once the fee was renewed, however, the State removed Amendment 31 from consideration and did not submit the proposal to CMS.

STC #8: The State's application to renew the TennCare Demonstration was approved by CMS on December 16, 2016.

STC #10: On November 14, 2016, the State notified the public of its intention to host a public forum in which comments on the progress of the TennCare Demonstration would be accepted. The State held the forum on December 15, 2016, and included a summary of the forum (including the fact that no comments were received there) in the Quarterly Report submitted to CMS on February 28, 2017.

STC #15: Public notice concerning Demonstration Amendment 31 was provided to Tennessee newspapers and posted on TennCare's website on February 23, 2017. As noted in the summary for STCs #6 and #7 above, Amendment 31 was never submitted to CMS. In addition, on June 13, 2017, the State provided public notice via Tennessee newspapers and the TennCare website of intent to request a technical change to Attachment C of the TennCare Demonstration. This proposal would modify the limitations on private duty nursing services.

STC #29: TennCare's "Cost-Effective Alternatives" policy—BEN 08-001—outlines services TennCare MCOs may provide as cost-effective alternatives to covered Medicaid services. The document is available on the TennCare website at http://www.tn.gov/assets/entities/tenncare/attachments/ben08001.pdf.

STC 29 requires the State to demonstrate annually that the use of CEAs is cost-effective and reimbursed in accordance with federal managed care regulations. With respect to this requirement, the State offers the following assurance:

With the exception of TennCare Select, all TennCare MCOs have entered a full risk agreement and are paid on a capitated basis. Incentives for risk MCOs are aligned in such a way that there is no logical reason an at-risk MCO would pay for a non-covered service unless it is determined to be a cost-effective alternative to a covered service.

All TennCare MCO Contracts require compliance with applicable policies and regulations—including the Special Terms and Conditions of the TennCare Demonstration—regarding utilization and payment of cost-effective alternative services. Further, in accordance with terms of the TennCare Select contract, the State is in receipt of a report demonstrating the use of TennCare-approved alternative services and their cost-effectiveness.

The MCO Contracts require and contain capitation payment rates that have been reviewed and certified by actuaries and have been determined to be actuarially sound.

STC #31.d.iv.(A): Each Quarterly Progress Report submitted during DY 15 provided data on enrollment in all three CHOICES groups, enrollment targets for CHOICES 2 and 3, and the number of reserve capacity slots being held for CHOICES Group 2. The operational procedures for determining individuals for whom CHOICES Group 2 reserve capacity slots are to be held are included as Attachment A. The State originally submitted these procedures to CMS on February 2, 2010, and has subsequently included the procedures as an attachment to each Draft Annual Report.

STC #31.d.ii: On May 1, 2017, the State submitted to CMS an enrollment target range for CHOICES Group 2. The range was 9,115 – 10,500.

STC #32.d.ii: On May 1, 2017, the State submitted to CMS enrollment target ranges for all three ECF CHOICES benefit groups. The range identified for Essential Family Supports (ECF CHOICES Group 4) was 500 – 800; the range identified for Essential Supports for Employment and Independent Living (ECF CHOICES Group 5) was 1,000 – 1,600; and the range identified for Comprehensive Supports for Employment and Community Living (ECF CHOICES Group 6) was 200 – 300.

STC #39: The State requested approval by CMS of Statewide MCO Contract Amendment 5 and TennCare Select Contract Amendment 40 on October 25, 2016. In addition, the State requested approval by CMS of Statewide MCO Contract Amendment 6 and TennCare Select Contract Amendment 41 on June 16, 2017.

STC #42.b: A description of the steps taken to ensure compliance with the HCBS regulations identified in this STC is included as Attachment B. The State reviews—and, as needed, updates—this description each year and includes a copy with each Draft Annual Report. In accordance with the 2014 HCBS settings rule, the State submitted a statewide transition plan to CMS on February 1, 2016, and—based on CMS feedback—an amended version of the document on March 23, 2016. CMS approved the State's transition plan on April 13, 2016.

STC #42.c: The State submitted the document titled *2016 Quality Assessment and Performance Improvement Strategy* to CMS on October 18, 2016.

STC #42.d.iv: The State addressed data and trends of the designated CHOICES data elements in each of the Quarterly Progress Reports and the Draft Annual Report. Electronic copies of the CHOICES point-in-time data and annual aggregate data were submitted to CMS on September 28, 2016, and June 30, 2017. An electronic copy of the ECF CHOICES baseline data was submitted to CMS on June 30, 2017.

STC #43: The State participated in formal Monthly Calls with CMS on July 28, 2016; August 23, 2016; September 22, 2016; and March 2, 2017. All other Monthly Calls were cancelled at CMS's request.

STC #44: The State submitted Quarterly Progress Reports to CMS on August 31, 2016; November 30, 2016; February 28, 2017; and May 30, 2017.

STC #45: The State submitted a Draft Annual Report to CMS on October 28, 2016. In addition, the State submitted the annual report concerning Title XXI Medicaid Expansion Children to CMS on December 21, 2016.

STC #46.b: Enrollment information was reported to CMS by Eligibility Group and Type in the Quarterly Progress Reports and the Draft Annual Report.

STC #49: Member months were reported to CMS by Eligibility Group and Type in each Quarterly Progress Report.

STCs #67 and #68: On April 17, 2017, the State submitted to CMS a proposed evaluation design for the current approval period of the TennCare Demonstration (December 16, 2016, through June 30, 2021). The focus of the proposed evaluation design submitted to CMS on April 17, 2017, was the CHOICES program, the ECF CHOICES program, and the state plan and demonstration populations enrolled in those programs.

CONTENTS

The Impact of TennCare: A Survey of Recipients, 2016

Method

The Boyd Center for Business and Economic Research at the University of Tennessee, under contract with the Department of Finance and Administration of the State of Tennessee, conducted a survey of Tennessee residents to ascertain their insurance status and use of medical facilities and their level of satisfaction with the TennCare program. A target sample size of 5,000 households allows us to obtain accurate estimates for subpopulations. The Boyd Center prepared the survey instrument in cooperation with personnel from the Bureau of TennCare.

The University of Tennessee Social Work Office of Research and Public Service conducted the survey by randomly selecting potential respondents from a land line and cell phone set of numbers and contacting those families between May and July 2016. Up to five calls were made to each residence, at staggered times, to minimize non-response bias. The design chosen was a "Household Sample," and the interview was conducted with the head of the household. When Hispanic households without an English speaker were reached, a person fluent in Spanish would call the household at a later time to conduct the survey.

Approximately 62.0 percent and 57.2 percent of those who answered their land line phone or cell phone, respectively, qualified and agreed to participate in the survey.[1] The large sample size allowed for the weighting of responses by income and age to provide unbiased estimates for the entire population. For all statewide estimates, a correction factor was used to adjust for the degree to which the sample over- or under-represented Tennesseans grouped by household income and head of household age.[2] (Table 1)

This is a follow-up to previous surveys of 5,000 Tennessee households conducted annually since 1993, the last year of Medicaid before Tennessee adopted TennCare. Throughout this report, we make comparisons to findings from earlier surveys.

[1] In the land line phone sample, there were 4,249 completed surveys and 3,654 refusals. In the cell phone sample, there were 769 completed surveys, and 1,047 refusals.

[2] Starting with the 2016 report, the 5-year American Community Survey (ACS) conducted by the U.S. Census is used to adjust the sample by household income and head of household age. The ACS is a nationwide survey designed to provide reliable and timely estimates of the demographic, social, economic and housing characteristics of the US population. From 2010 to 2015, the sample was adjusted by household income and head of household age using the 3-year ACS. Approximately 1/10th of the drop in the uninsured population is due to using more accurate population statistics from the 5-year ACS. Prior to 2010, the sample was adjusted by household income using the 2000 Census.

TABLE 1: Head of Household Age and Household Income

Age-Householders	Proportion in 2016 Survey (Percent)	Proportion in ACS* (Percent)	Deviation (Percent)
Under 25	2.2	4.4	2.2
25-44	31.2	33.1	1.9
45-64	48.7	39.4	-9.3
65+	17.9	23.2	5.3

Household Income Level	Proportion in 2016 Survey (Percent)[3]	Proportion in ACS* (Percent)	Deviation (Percent)
Less than $10,000	5.5	8.7	3.2
$10,000 to $14,999	5.9	6.4	0.5
$15,000 to $19,999	5.7	6.5	0.8
$20,000 to $29,999	10.1	12.3	2.2
$30,000 to $39,999	9.1	11.3	2.2
$40,000 to $49,999	8.5	9.5	1.0
$50,000 to $59,999	8.7	8.2	-0.5
$60,000 to $99,999	20.1	20.8	0.7
$100,000 to $149,999	11.2	10.0	-1.2
$150,000 and over	7.1	6.3	-0.8

*Census Bureau, 2009-2014 American Community Survey 5-year Estimates.

Estimates for Insurance Status

Estimates for the number of Tennesseans who are uninsured are presented below (Table 2 and Figure 1). These statewide estimates are extrapolated from the weighted sample. The estimated population of uninsured represents 5.5 percent of the 6,600,299 Tennessee residents.[4] The number of uninsured in 2016 continues a downward trend in the rate of uninsured people in Tennessee that began in 2013. The uninsured rate for children is 1.8 percent, which is slightly higher than last year's rate of 1.5 percent (Table 2a) but is not statistically different. The estimate of the number of uninsured children in 2016 is 27,226, which is about half the estimated 55,319 uninsured children in 2013. The uninsured rate for adults decreased from the 2015 rate of 8.2 percent (Table 2a) to 6.6 percent in 2016, which is approximately 218,500 fewer uninsured adults since 2013 and a drop of approximately 67,000 since our last survey.

[3] Amounts do not total 100 percent because 8.1 percent either did not know or declined to answer.
[4] Population estimates are found using United States Census Bureau, 2009-2014 ACS. In prior years (1993 to 2008), population figures were gathered from the "Interim State Population Projections," also prepared by the United States Census Bureau.

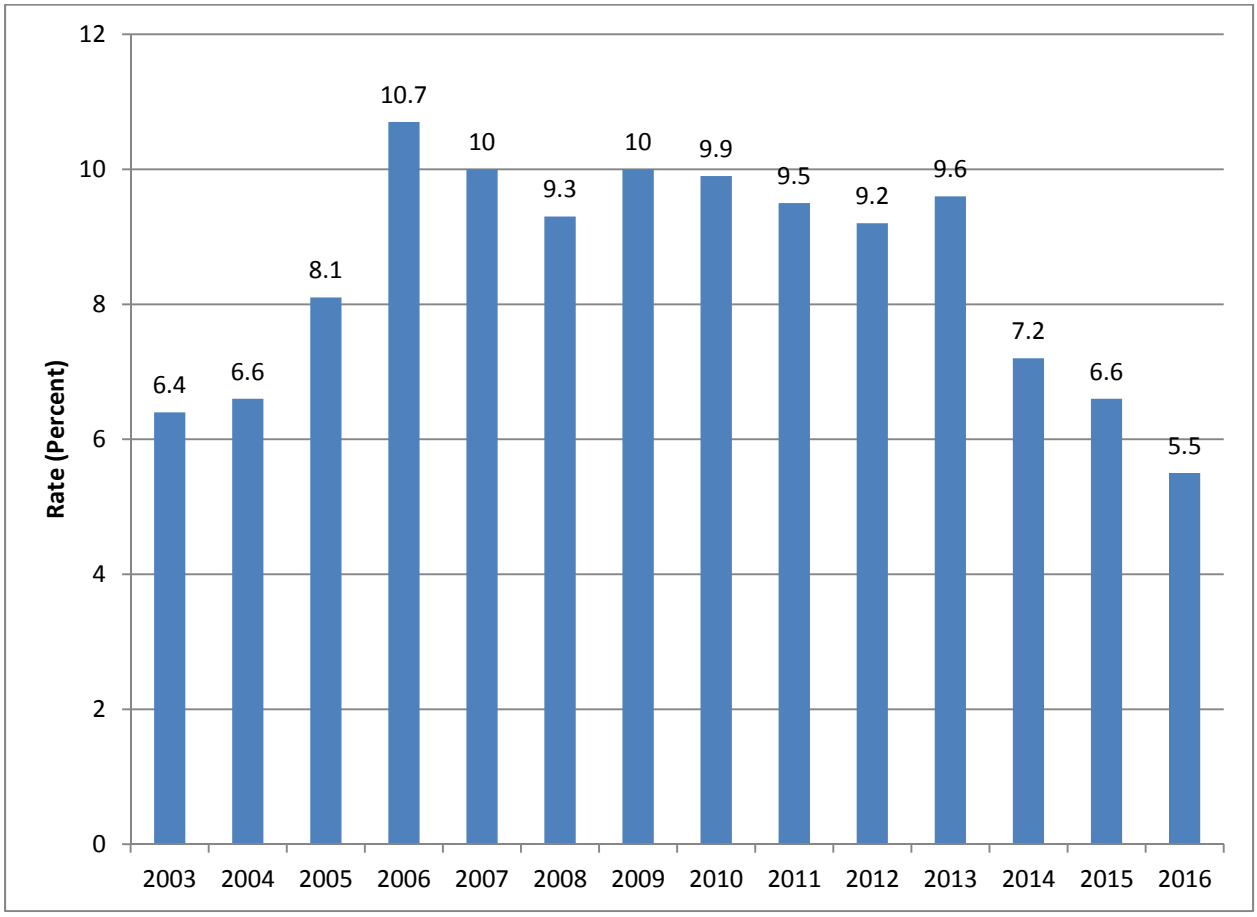
FIGURE 1: Rate of Uninsured Populations (2003-2016)



Reasons for Failure to Obtain Medical Insurance

Affordability is the predominate reason why people fail to obtain insurance with eight of 10 of all respondents citing “cannot afford” as a major reason why they did not obtain health insurance. On the other hand, there is a notable 5 percent drop from last year in those that cite it as a major or minor reason for their lack of coverage (Table 3). Respondents in the less than $20,000 income bracket are most likely to cite affordability as a major reason for their uninsured status (86 percent). There was a 9 percent drop from 78 percent to 69 percent among families in the $20,000 to $39,999 income bracket reporting that affordability was a major barrier to obtaining insurance coverage (Table 4). Those reporting that they “do not need” insurance increased considerably, from 19 percent to 30 percent. About one in four respondents reported that they just did not get around to obtaining coverage.

TABLE 3: Reasons for Not Having Insurance (1998–2016) (Percent)

Reason	Cannot Afford			Did Not Get to It			Do Not Need		
Year	Major Reason	Minor Reason	Not a Reason	Major Reason	Minor Reason	Not a Reason	Major Reason	Minor Reason	Not a Reason
1998	73	10	17	12	17	72	13	13	74

TABLE 4: "Cannot Afford" Major Reasons for No Insurance: By Income (2011–2016) (Percent)

Household Income	2011	2012	2013	2014	2015	2016
Less than $20,000	90	90	87	90	89	86
$20,000 - $39,999	87	89	82	82	78	69
$40,000 and above	88	81	74	82	66	79

Evaluations of Medical Care and Insurance Coverage

Tennessee residents' perception about the quality of care received remains consistent with their perceptions during the last decade. Overall, 78 percent of all heads of households and 74 percent of heads of households on TennCare rated the quality of care as "good" or "excellent," a recent high for TennCare families (Table 5). The quality of care rating for all heads of households has remained extremely stable since 2013. Over the past 10 years, the percentage of families on TennCare reporting "good" or "excellent" care has ranged from a low of 64 percent in 2006 to a high of 76 percent in 2009. Importantly, the rating by all heads of households has been the same since 2013, reflecting strong stability in their perceptions about their quality of care.

Heads of households rate the quality of care received by children consistently high. In 2016, 88 percent of all heads of households and 87 percent of TennCare households rated their children's quality of care as "excellent" or "good" (Table 6). These percentages have remained stable in recent years, although the 1 percent of TennCare families with children who rated the quality of care "poor" is at an all-time low.

TABLE 5: Quality of Medical Care Received by Heads of Households (2006–2016) (Percent)

All Heads of Households	**2006**	**2007**	**2008**	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**	**2015**	**2016**

Poor	6	2	6	3	6	2	6	6	3	4	1

Satisfaction with Quality of Care Received from TennCare

TennCare recipients continue to show high levels of satisfaction with the TennCare program as a whole (Table 7), with 92 percent indicating they were "very satisfied" or "somewhat satisfied."[6] The satisfaction level has stayed within a narrow range since 2009, fluctuating between 92 percent and 95 percent.

TABLE 7: Percent Indicating Satisfaction with TennCare (2002–2016) (Percent)

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
85	83	90	93	87	90	89	92	94	95	93	95	93	95	92

[5] This subgroup includes all households in which at least one child is enrolled in TennCare, even if the head of the household is not enrolled.

[6] A three-point scale was used, and respondents could indicate "very satisfied," "somewhat satisfied," or "not satisfied."

Behavior Relevant to Medical Care

Each respondent was asked a series of questions regarding his or her behavior when initially seeking medical care (Table 8). There was no substantial change in the behavior among all heads of households from the previous year. For both TennCare and all heads of household, 96 percent initially sought care at a doctor's office or clinic. The 3 percent of TennCare recipients who initially sought care at a hospital is at an all-time low and down from 10 percent in 2012 (Table 8). When it comes to initial care choices for children, 98 percent of all households and TennCare households sought initial care at a doctor's office or a clinic, which is consistent with past years (Table 9).

TennCare recipients continue to report seeing physicians on a more frequent basis than the average Tennessee household (Table 10). Approximately 14 percent of all households report seeing a doctor at least weekly or monthly compared to 36 percent of TennCare heads of households. While the rate of TennCare households seeing a doctor at least weekly or monthly increased from 29 percent in 2015, the current rate of 36 percent is consistent with the past decade which ranged from a high of 40 percent in 2008 to last year's low of 29 percent.

These same trends between the general population and TennCare households are observed among children, with 15 percent of TennCare households taking their children to visit a doctor at least weekly or monthly compared to only 9 percent of all households (Table 11). While the frequency of doctor visits remains higher for children of TennCare heads of households compared to that of the population as a whole, the current year's rate of 15 percent who saw a doctor at least monthly remains well below the recent high of 20 percent in 2013 and 19 percent in 2014.

[7] This subgroup includes the children of heads of household enrolled in TennCare.

[8] This subgroup includes the children of heads of household enrolled in TennCare.

Appointments

The reported time required to obtain an appointment is comparable to previous years' findings. The percent of TennCare recipients obtaining a doctor's appointment within a week remained steady at 69 percent, and 41 percent obtained an appointment within one day (Table 12). TennCare recipients wait on average about an hour to see their physicians once they reach the office (Table 13). The average travel time to a physician's office is 24 minutes in 2016. Wait and travel times are in line with prior survey years.

TABLE 12: Time between Attempt to Make Appointment and First Availability of Appointment: TennCare Heads of Household (2007–2016) (Percent)

TennCare Plans

The largest number of TennCare survey household members (44 percent) report being signed up with Volunteer State Health Plan (BlueCare). UnitedHealthcare accounts for 30 percent, followed by Amerigroup with 19 percent and TennCare Select with 3 percent. Although there are no other active TennCare plans, 4 percent indicate they are represented by some plan other than these four listed.

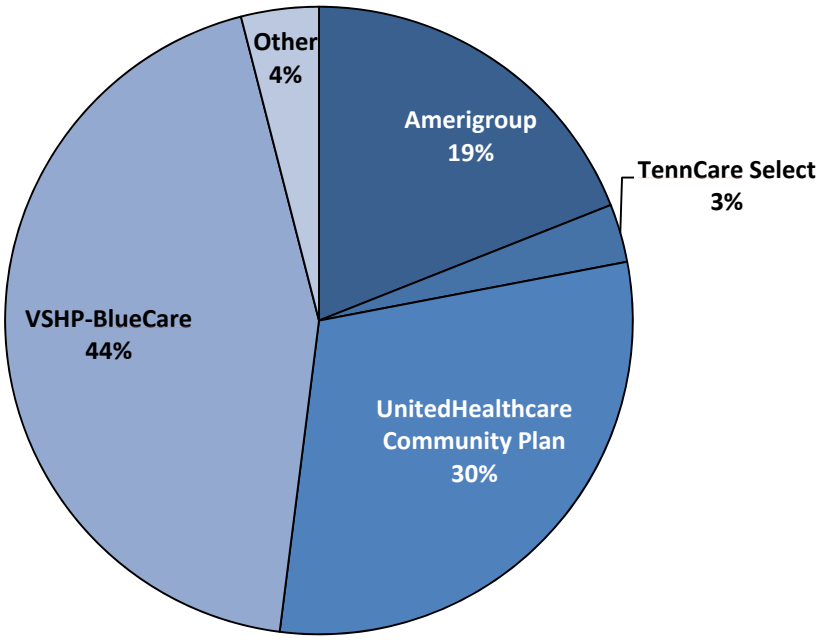
FIGURE 2: Reported TennCare Plan (2016)



Only four out of five TennCare heads of households know the name of the managed care organization (MCO) they are assigned to, and two-thirds of them report receiving an enrollment card (Table 15). These rates are not remarkably different from last year. There was a notable decrease in the number of people who reported receiving information about filing appeals (76 percent, down 6 percentage points) and receiving a list of rights and responsibilities (81 percent, down 4 percentage points).

Postal mail remains the preferred method for receiving information about TennCare, with 78 percent reporting it was the best way (Table 16). Approximately 9 percent prefer to receive communication electronically by email or through online resources.

Six percent of respondents indicated that either they or someone else in their family had changed plans within the preceding 12 months. Of that total, 71 percent requested the change. The two most commonly cited reasons for changing plans was "limited choice of doctors and hospitals" and "location of providers."

In the past 12 months, 8 percent of TennCare families used a non-emergency care provider that did not participate in their plan, with six out of 10 of this population using non-participating providers 1 to 2 times (Figure 3). For the 8 percent who used a non-participating provider, the most common type used

[9]Before 2012, survey respondents were asked whether they had received "information on filing grievances." The term "appeals" is much more widely used in the TennCare program than the term "grievances." Therefore, the question was changed in 2012 to ask whether respondents had received "information on filing appeals."

by TennCare families was a general medical care/family doctor (49 percent) followed by a non-surgical specialist (32 percent) (Table 17 and Figure 4). Approximately 36 percent of survey responders who sought care from a non-TennCare provider stated that they did so because the service was not covered under TennCare, while only 5 percent stated that they were dissatisfied with the quality of service from the TennCare provider (Table 18). Over half of the respondents reported that TennCare helped them find a provider that participated in the TennCare plan.

FIGURE 3: Number of Times Sought Non-Emergency Care at a Non-Participating Provider in Past 12 Months (Percent)

	2016
Dissatisfaction with quality of service from TennCare provider	5
Service was not covered by TennCare	36
No TennCare provider in the area	11
Could not get timely appointment with TennCare provider	5
When I made the appointment or received care, I mistakenly thought the provider participated in my TennCare health care plan	20
Not Sure	23

Conclusion

Tennessee's 5.5 percent rate of uninsured in 2016 is the lowest uninsured rate in the entire 24-year history of the TennCare survey, and the rate has continued to decline since 2013. The number of uninsured children has remained steady since last year at less than 2 percent. The decrease in uninsured adults represents almost 67,000 Tennesseans.

An interesting finding in this year's study is a small, but notable, 5 percent decrease in the percentage of people who cite affordability as a reason for not obtaining health insurance (90 percent in 2015 to 85 percent in 2016). There is also a profound increase in the uninsured respondents reporting that they do not need health insurance (19 percent in 2015 to 30 percent in 2016).

TennCare enrollees are now equally likely (96 percent) as all households to seek initial care at a doctor's office or clinic, and there was a decrease, from 6 percent to 3 percent, among TennCare heads of households who first sought treatment at a hospital. There continues to be a trend in both TennCare heads of households and their children to have more doctor visits than the general population. However, the number of children receiving at least monthly visits to a doctor was lower in 2015 and 2016 than it had been in the preceding few years.

Overall, TennCare continues to receive positive feedback from its recipients, with 92 percent reporting satisfaction with the program, indicating TennCare is providing medical care in a satisfactory manner and meeting the expectations of those it serves.

Executive Summary

Medicaid managed care organizations (MCOs) are required to report a full Healthcare Effectiveness Data and Information Set (HEDIS) as a part of the accreditation mandates in Tennessee. The HEDIS requirement is an integral part of the accreditation process of the National Committee for Quality Assurance (NCQA). In 2006, Tennessee became the first state in the nation requiring all MCOs to become accredited by NCQA, an independent, not-for-profit organization that assesses and scores MCO performance on important dimensions of care and service in a broad range of health issues.

By 2016, more than 90% of health plans in America were using the HEDIS tool because its standardized measures of MCO performance allow comparisons to national averages and benchmarks as well as between a state's MCOs, and over time. The Consumer Assessment of Healthcare Providers and Systems (CAHPS) set of standardized surveys is included in HEDIS to measure members' satisfaction with their care. This *2016 HEDIS/CAHPS Report* summarizes the results for the MCOs contracting with TennCare, the Medicaid program of the Tennessee Division of Health Care Finance and Administration.

For an overview of the performance of Tennessee's MCOs, a calculated weighted average of the scores of all those reporting is provided alongside national averages in the Statewide Performance section. MCO-specific measures are presented in the Individual Plan Performance section for cross-comparison with color-coding for national and state benchmark comparison where available/applicable. Weighted average performances of Tennessee's MCOs on certain measures are presented in the HEDIS Trending Since 2006 section. Beginning in January 2015, there were 400,000 TennCare enrollees transitioning to new MCOs. The transition occurred over several months and may have influenced measure results, resulting in downward trend for some measures. Subsequently, trending should be made with caution.

Appendix A contains a comprehensive table of plan-specific results for HEDIS 2016 Utilization Measures and HEDIS 2015 national benchmarks. The table in Appendix B contains the HEDIS 2015 National Medicaid Means and Percentiles for reference to these benchmarks, and the table in Appendix C reveals populations reported by MCOs in member months by age and sex for HEDIS 2016. Appendix D presents the reporting options for each measure, whether administrative, hybrid or both.

Background

HEDIS Measures—Domains of Care

HEDIS is an important tool designed to ensure the public has the information needed to reliably compare the performance of managed healthcare plans. Standardized methodologies incorporating statistically valid samples of members ensure the integrity of measure reporting and help purchasers make more reliable, relevant comparisons between health plans. HEDIS measures are subject to a NCQA HEDIS Compliance Audit that must be conducted by an NCQA-certified HEDIS Compliance Auditor under the auspices of an NCQA-licensed organization. This ensures the integrity of the HEDIS collection and calculation process at each MCO through an overall information systems capabilities assessment, followed by an evaluation of the ability to comply with HEDIS specifications.

The HEDIS rates presented in this report refer to data collected during the review period of the previous calendar year (CY), from January 1 to December 31. For HEDIS 2016 results, CY2015 was the review period. Similarly, comparative data presented in this report from the HEDIS 2015 Medicaid Means and Percentiles reflect data procured during CY2014.

HEDIS 2016 assesses care across body systems, access to and satisfaction with healthcare services and specific utilization through a total of 88 measures (Commercial, Medicare and Medicaid) across seven domains of care:

- Effectiveness of Care
- Access/Availability of Care
- Utilization and Risk-Adjusted Utilization
- Relative Resource Use
- Experience of Care (CAHPS Survey Results)
- Health Plan Descriptive Information
- Measures Collected Using Electronic Clinical Data Systems

The following brief descriptions of selected HEDIS measures were extracted from NCQA's *HEDIS 2016 Volume 2: Technical Specifications*, which includes additional information related to each measure. The measures presented in this report reflect data submitted from the following domains of care: Effectiveness of Care, Access/Availability of Care, Utilization, and Risk-Adjusted Utilization, and Experience of Care.

Effectiveness of Care Measures

The measures in the Effectiveness of Care domain assess the quality of clinical care delivered within an MCO. Measures in this domain address how well the MCO delivers widely accepted preventive services and recommended screening for common diseases. The domain also includes some measures for

overuse and patient safety and addresses four major aspects of clinical care:

1. How well the MCO delivers preventive services and keeps members healthy
2. Whether members are offered the most up-to-date treatments for acute episodes of illness and get better
3. How well the MCO delivers care and assistance with coping to members with chronic diseases
4. Whether members can get appropriate tests

Starting with HEDIS 2008 reporting, Effectiveness of Care measures were grouped into more specific clinical categories, which have slightly changed:

- Prevention and Screening
- Respiratory Conditions
- Cardiovascular Conditions
- Diabetes
- Musculoskeletal Conditions
- Behavioral Health
- Medication Management
- Overuse/Appropriateness
- Measures collected by the CAHPS Health Plan Survey

Only certain measures from these categories are presented in this report, which does not include the additional category in this domain specific to Medicare. For some measures, eligible members cannot have more than one gap in continuous enrollment of up to 45 days during the measurement year (MY). Select Utilization Measures are included in Appendix A.

Prevention and Screening

Immunization measures follow guidelines for immunizations from the Centers for Disease Control and Prevention and the Advisory Committee on Immunization Practices. HEDIS implements changes (e.g., new recommendations) after three years, to account for the measures' look-back period and to allow the industry time to adapt to new guidelines.

Adult BMI Assessment (ABA)

ABA measures the percentage of members 18 to 74 years of age who had an outpatient visit and whose body mass index (BMI) was documented during the MY or the year prior to the MY.

NOTE: For HEDIS 2016, the age criteria for BMI and BMI percentile numerator was revised from 21 years in references to 20 years.

Weight Assessment and Counseling for Nutrition and Physical Activity for Children/ Adolescents (WCC)

WCC measures the percentage of members 3 to 17 years of age who had an outpatient visit with a primary care practitioner (PCP) or obstetrician-gynecologist (OB-GYN) and who had evidence of BMI percentile documentation, counseling for nutrition and counseling for physical activity during the MY.

Note: Because BMI norms for youth vary with age and gender, this measure evaluated whether BMI percentile is assessed rather than an absolute BMI value. For HEDIS 2016, the physical activity requirement was revised to add that notation of safety guidance without specific mention of physical activity recommendations does not meet criteria.

Childhood Immunization Status (CIS)

CIS assesses the percentage of children who became two years of age and who, on or before two years of age, had four diphtheria, tetanus, acellular pertussis (DTaP); three polio (IPV); one measles, mumps, and rubella (MMR); three *Haemophilus* influenza type B (HiB); three hepatitis B (HepB); one chicken pox/varicella zoster (VZV); four pneumococcal conjugate (PCV); one hepatitis A (HepA); two or three rotavirus (RV); and two influenza (Flu) vaccines. The measure calculates a rate for each vaccine and nine separate combination rates numbered 2 to 10 as shown in **Table CIS**.

Table CIS. Combination Vaccinations for Childhood Immunization Status (CIS)

#	DTaP	IPV	MMR	HiB	HepB	VZV	PCV	HepA	RV	Flu
2	✓	✓	✓	✓	✓	✓				
3	✓	✓	✓	✓	✓	✓	✓			
4	✓	✓	✓	✓	✓	✓	✓	✓		
5	✓	✓	✓	✓	✓	✓	✓		✓	
6	✓	✓	✓	✓	✓	✓	✓			✓
7	✓	✓	✓	✓	✓	✓	✓	✓	✓	
8	✓	✓	✓	✓	✓	✓	✓	✓		✓
9	✓	✓	✓	✓	✓	✓	✓		✓	✓
10	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

Immunizations for Adolescents (IMA)

IMA measures the percentage of adolescents 13 years of age who had one dose of meningococcal vaccine and one tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap) or one tetanus, diphtheria toxoids vaccine (Td) by the 13th birthday, calculating a rate for each vaccine and one combination (Meningococcal, Tdap/Td).

Human Papillomavirus Vaccine for Female Adolescents (HPV)

This measure assesses the percentage of female adolescents 13 years of age who received three doses of human papillomavirus vaccine (HPV) by the 13th birthday.

Lead Screening in Children (LSC)

LSC assesses the percentage of children two years of age who had one or more capillary or venous lead blood tests for lead poisoning on or before the second birthday.

Breast Cancer Screening (BCS)

BCS looks at whether female members are being screened for breast cancer, measuring the percentage of women 50 to 74 years of age who had a mammogram to screen for breast cancer between October 1 two years prior to the MY, and through December 31 of the MY.

NOTE: This measure does not include biopsies, breast ultrasounds or MRIs because they are not appropriate methods for primary breast cancer screening. HEDIS 2016 added new value sets to identify bilateral mastectomy.

Cervical Cancer Screening (CCS)

CCS measures the percentage of women 21 to 64 years of age who were appropriately screened for cervical cancer using either of the following criteria:

- Women age 21–64 who had cervical cytology performed every three years
- Women age 30–64 who had cervical cytology/HPV co-testing performed every five years

Chlamydia Screening in Women (CHL)

CHL assesses the percentage of women 16 to 24 years of age who were identified as sexually active and who had at least one test for chlamydia during the MY. This measure calculates a total rate as well as two age stratifications:

- Women age 16–20
- Women age 21–24

Respiratory Conditions

Appropriate Testing for Children With Pharyngitis (CWP)

CWP measures the percentage of children 3 to 18 years of age who were diagnosed with pharyngitis, prescribed an antibiotic at an outpatient visit, and received a group A streptococcus (strep) test for the episode. A higher rate represents better performance (i.e., appropriate testing).

Note: For HEDIS 2016, the description and ages were changed from "2–18 years of age" to "3–18 years of age".

Use of Spirometry Testing in the Assessment and Diagnosis of COPD (SPR)

SPR reports the percentage of members 40 years of age and older with a new diagnosis or newly active chronic obstructive pulmonary disease (COPD) who received appropriate spirometry testing to confirm the diagnosis.

Pharmacotherapy Management of COPD Exacerbation (PCE)

PCE assesses the percentage of COPD exacerbation for members 40 years of age and older who had an acute inpatient (IP) discharge or emergency department (ED) visit on or between January 1 and November 30 of the MY and who were dispensed appropriate medications. Two rates are reported:

- Dispensed a systemic corticosteroid (or there was evidence of an active prescription) within 14 days of the event
- Dispensed a bronchodilator (or there was evidence of an active prescription) within 30 days of the event

Note: The eligible population for this measure is based on acute IP discharges and ED visits, not on members. The denominator may include multiple events for the same individual.

Medication Management for People With Asthma (MMA)

MMA records the percentage of members 5 to 64 years of age during the MY who were identified as having persistent asthma and were dispensed appropriate medications that they remained on during the treatment period.

Two rates are reported for the percentage of members who remained on an asthma controller medication:

- For at least 50% of their treatment period
- For at least 75% of their treatment period

For MMA, a total rate and four age stratifications are reported:

- 5–11 years
- 12–18 years
- 19–50 years
- 51–64 years

NOTE: The previous measure Use of Appropriate Medications for People With Asthma (ASM) was omitted, age stratifications added to MMA and explanatory tables for ASM replaced as MMA for HEDIS 2016. Also, clarifications were added defining oral medication dispensing events.

Asthma Medication Ratio (AMR)

AMR assesses the percentage of members 5 to 64 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medications of 0.50 or greater during the MY. This measure calculates a total rate as well as four age stratifications:

- 5–11 years
- 12–18 years
- 19–50 years
- 51–64 years

Cardiovascular Conditions

Controlling High Blood Pressure (CBP)

CBP reports the percentage of members 18 to 85 years of age who had a diagnosis of hypertension (HTN) and whose blood pressure (BP) was adequately controlled during the MY, a single rate based on a sum of the following criteria groups by age:

- Members 18–59 years whose BP was <140/90 mm Hg
- Members 60–85 years with a diagnosis of diabetes whose BP was <140/90 mm Hg
- Members 60–85 years without a diagnosis of diabetes whose BP was <150/90 mm Hg

Persistence of Beta-Blocker Treatment After a Heart Attack (PBH)

PBH examines the use of beta-blockers as a way to prevent a second heart attack by measuring the percentage of members 18 years of age and older during the MY who were hospitalized and discharged from July 1 of the year prior to the MY to June 30 of the MY with a diagnosis of acute myocardial infarction (AMI) and who received persistent beta-blocker treatment for six months after discharge.

Statin Therapy for Patients With Cardiovascular Disease (SPC)

SPC reports the percentage of members identified as having clinical atherosclerotic CVD and who met the following criteria:

- *Received Statin Therapy*—Members who were dispensed at least one high or moderate-intensity statin medication during the MY
- *Statin Adherence 80%*—Members who remained on a high or moderate-intensity statin medication for at least 80% of the treatment period

For SPC, a total rate and two gender and age (during the MY) stratifications are reported:

- Males 21–75 years
- Females 40–75 years

Diabetes

Comprehensive Diabetes Care (CDC)

The CDC composite of seven rates measures an MCO's performance on clinical management in aspects of diabetic care through the percentage of a single sample of diabetic members (type 1 and type 2) 18 to 75 years of age who met the criteria by having the following during the MY:

- Hemoglobin A1c (HbA1c) blood test
- Poorly controlled diabetes (HbA1c >9.0%)
  Note: a lower rate indicates better performance (i.e., low rates of poor control indicate better care)
- Controlled diabetes (most recent HbA1c <8.0%)
- Controlled diabetes (most recent HbA1c <7.0%) for a selected population
- Eye exam (retinal)
- Medical attention for nephropathy
- Controlled blood pressure (<140/90 mm Hg)

Statin Therapy for Patients With Diabetes (SPD)

SPD reports the percentage of members 40 to 75 years of age who do not have atherosclerotic CVD and met the following criteria reported as two rates:

- *Received Statin Therapy*—Members who were dispensed at least one statin medication of any intensity during the MY
- *Statin Adherence 80%*—Members who remained on a statin medication of any intensity for at least 80% of the treatment period

Musculoskeletal Conditions

Disease-Modifying Anti-Rheumatic Drug Therapy for Rheumatoid Arthritis (ART)

ART assesses whether members who were diagnosed with rheumatoid arthritis (RA) were prescribed a disease-modifying anti-rheumatic drug (DMARD) to attenuate the damaging progression, reduce inflammation and improve functional status. The rate is the percentage of members diagnosed with RA, and not HIV or pregnancy, who were dispensed at least one ambulatory prescription for a DMARD during the MY.

Behavioral Health

Antidepressant Medication Management (AMM)

AMM measures the percentage of members 18 years of age and older who had a diagnosis of major depression, who were initiated and remained on an antidepressant medication treatment. Two rates are reported:

- *Effective Acute Phase Treatment*—The percentage who remained on medication for a three-month adequate acute phase trial (at least 84 days/12 weeks)
- *Effective Continuation Phase Treatment*—The percentage who completed continuous medication treatment (remained on medication for at least 180 days/6 months)

Follow-Up Care for Children Prescribed ADHD Medication (ADD)

ADD assesses the percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of these visits must have been within 30 days of the earliest ambulatory prescription dispensed for ADHD medication, at which time the member must have been 6 to 12 years of age. Two rates are reported:

- *Initiation Phase*—The percentage who had one follow-up visit with a practitioner with prescribing authority during the 30-day Initiation Phase
- *Continuation and Maintenance Phase*—The percentage who remained on the medication for at least 210 days and who, in addition to the Initiation Phase follow-up, had at least two follow-up visits with a practitioner within 270 days (nine months) of the end of the Initiation Phase

Follow-Up After Hospitalization for Mental Illness (FUH)

FUH examines continuity of care for mental illness through the percentage of discharges for members six years of age and older who were hospitalized for selected mental illness diagnoses and who had an outpatient visit, an intensive outpatient encounter or partial hospitalization with a mental health practitioner.

Two rates are reported as the percentage of discharges for which the member received follow-up within the following:

- 7 days of discharge
- 30 days of discharge

Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD)

SSD measures the percentage of members 18 to 64 years of age with schizophrenia or bipolar disorder who were dispensed an antipsychotic medication and had a diabetes screening test during the MY.

Diabetes Monitoring for People With Diabetes and Schizophrenia (SMD)

SMD is the percentage of members 18 to 64 years of age with schizophrenia and diabetes who had both an low-density lipoprotein cholesterol (LDL-C) test and an HbA1c test during the MY.

Cardiovascular Monitoring for People With Cardiovascular Disease and Schizophrenia (SMC)

SMC reports the percentage of members 18 to 64 years of age with schizophrenia and CVD who had an LDL-C test during the MY.

Adherence to Antipsychotic Medications for Individuals With Schizophrenia (SAA)

SAA assesses the percentage of members with schizophrenia who were 19 to 64 years of age during the MY who were

dispensed and remained on an antipsychotic medication for at least 80% of their treatment period.

Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)

APM measures the percentage of children and adolescents 1 to 17 years of age who had two or more antipsychotic prescriptions and had metabolic testing. It calculates a total rate as well as three age stratifications:

- 1–5 years
- 6–11 years
- 12–17 years

Medication Management

Annual Monitoring for Patients on Persistent Medications (MPM)

MPM reports the percentage of members 18 years of age and older who received at least 180 treatment days of ambulatory medication therapy for a select therapeutic agent during the MY and at least one therapeutic monitoring event for the therapeutic agent in the MY. Three rates are reported separately and as a sum total rate:

- Annual monitoring for members on angiotensin converting enzyme (ACE) inhibitors or angiotensin receptor blocker (ARB)
- Annual monitoring for members on digoxin
- Annual monitoring for members on diuretics

Overuse / Appropriateness

Not new measures for HEDIS 2016, but grouped under this new category.

Non-Recommended Cervical Cancer Screening in Adolescent Females (NCS)

NCS records the percentage of adolescent females 16 to 20 years of age who were screened unnecessarily for cervical cancer.

Note: A lower rate indicates better performance.

Appropriate Treatment for Children With Upper Respiratory Infection (URI)

This measures the percentage of children 3 months to 18 years of age who were given a diagnosis of upper respiratory infection (URI) and were not dispensed an antibiotic prescription. This measure is reported as an inverted rate [1 - (numerator/eligible population)], with a higher rate indicating appropriate treatment of children with URI (i.e., the proportion for whom antibiotics were not prescribed).

Avoidance of Antibiotic Treatment in Adults With Acute Bronchitis (AAB)

AAB reports the percentage of adults 18 to 64 years of age with a diagnosis of acute bronchitis who were not dispensed an antibiotic prescription. This measure is reported as an inverted rate [1 - (numerator/eligible population)], with a higher rate indicating appropriate treatment of adults with acute bronchitis (i.e., the proportion for whom antibiotics were not prescribed).

Use of Imaging Studies for Low Back Pain (LBP)

LBP assesses the percentage of members with a primary diagnosis of low back pain who did not have an imaging study (plain X-ray, MRI, CT scan) within 28 days of the diagnosis. This measure is reported as an inverted rate [1 - (numerator/eligible population)], with a higher rate indicating an appropriate treatment of low back pain (i.e., the proportion for whom imaging studies did not occur).

Use of Multiple Concurrent Antipsychotics in Children and Adolescents (APC)

APC measures the percentage of children and adolescents 1 to 17 years of age who were on two or more concurrent antipsychotic medications. This measure calculates a total rate as well as three age stratifications:

- 1–5 years
- 6–11 years
- 12–17 years

Note: For this measure, a lower rate indicates better performance (i.e., low rates of concurrent antipsychotics indicate better care).

Measures Collected Through CAHPS Health Plan Survey

Flu vaccinations for adults ages 18 to 64 (FVA)

FVA reports the percentage of members 18 to 64 years of age who received a flu vaccination between July 1 of the MY and the date when the CAHPS 5.0H Adult Survey was completed.

Medical Assistance With Smoking and Tobacco Use Cessation (MSC)

This measure is collected using the survey methodology to arrive at a rolling average that represents the percentage of members 18 years of age and older who were current smokers or tobacco users seen during the MY.

MSC assesses the following facets of providing medical assistance with smoking and tobacco use cessation:

- *Advising Smokers and Tobacco Users to Quit*—Those who received advice to quit
- *Discussing Cessation Medications*—Those for whom cessation medications were recommended or discussed
- *Discussing Cessation Strategies*—Those for whom cessation methods or strategies were provided or discussed

Percentage of Current Smokers is not a HEDIS performance measure, but provides additional information to support analysis of other MSC data. The MCOs started reporting this data in 2015 in CAHPS results; subsequently, the rates have been added to this report.

Access/Availability of Care Measures

The measures in the Access/Availability of Care domain evaluate how members access important and basic services of their MCO. Included are measures of overall access, how many

members are actually using basic MCO services, and the use and availability of specific services.

Adults' Access to Preventive/Ambulatory Health Services (AAP)

This measures the percentage of members 20 years and older who had an ambulatory or preventive care visit during the MY to assess whether adult members have access to/receive such services. MCOs report a total rate and three age stratifications:

- 20–44 years
- 45–64 years
- ≥ 65 years

Note: Rates for adults 65 years of age and older are not included in this report as those services would be provided by Medicare. Because the total rate would include this age group, it has been excluded from this report as well.

Children and Adolescents' Access to Primary Care Practitioners (CAP)

CAP assesses general access to care for children and adolescents through the percentage of members 12 months to 6 years of age who had a visit with a PCP (e.g., pediatrician, family physician) during the MY, and members 7 to 19 years of age who had a visit with a PCP during the MY or the year prior. MCOs report four separate percentages:

- 12–24 months
- 25 months – 6 years
- 7–11 years
- 12–19 years

Initiation and Engagement of Alcohol and Other Drug Dependence Treatment (IET)

IET assesses adolescent and adult members age 13 and older who demonstrated a new episode of alcohol or other drug (AOD) dependence and received the following:

- *Initiation of AOD Treatment*—initial treatment through an inpatient AOD admission, outpatient visit, intensive outpatient encounter or patient hospitalization within 14 days of diagnosis
- *Engagement of AOD Treatment*—two or more services with an AOD diagnosis within 30 days of the initiation visit in addition to initiating treatment

MCOs report a total rate and two age stratifications for each:

- 13–17 years
- ≥ 18 years

Prenatal and Postpartum Care (PPC)

PPC measures the percentage of live birth deliveries between November 6 of the year prior to the MY and November 5 of the MY. For these women, the composite assesses the percentage of deliveries where members received the following PPC facets:

- *Timeliness of Prenatal Care*—received a prenatal care visit as a member of the MCO in the first trimester *or* within 42 days of MCO enrollment
- *Postpartum Care*—had a postpartum visit on or between 21 and 56 days after delivery

Call Answer Timeliness (CAT)

CAT reports the percentage of calls received by the MCO's Member Services call centers (during operating hours) during the MY that were answered by a live voice within 30 seconds. This measure complements member feedback on customer service obtained through the CAHPS 5.0H health plan survey.

Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP)

APP measures the percentage of children and adolescents 1 to 17 years of age who had a new prescription for an antipsychotic medication and had documentation of psychosocial care as first-line treatment. MCOs report a total rate and three age stratifications:

- 1–5 years
- 6–11 years
- 12–17 years

Utilization and Risk-Adjusted Utilization

This domain name was adjusted for HEDIS 2016, but still consists of utilization measures designed to capture the frequency of certain services provided to measure how MCOs use and manage resources and provision of member care. Three kinds of measures are included, i.e., those that express rates of service in per 1,000 member years/months (see Appendix A) or percentages of members receiving certain services (as in the Effectiveness of Care Domain and included in this section), and risk-adjusted measures. Medicaid categories are reported separately and as a total rate:

- Disabled
- Low Income

Note: The total rate includes the category of Medicaid/Medicare dual eligibles, but those members are part of a special needs plan and for TennCare report separately via the Annual HEDIS D-SNPs Report.

Frequency of Ongoing Prenatal Care (FPC)

FPC is the percentage of members who delivered a child between November 6 of the year prior to the MY and November 5 of the MY, and received the expected number of prenatal care visits. This measure uses the same denominator, structure and calculation guidelines as PPC. Rates are reported by the percentage of expected visits:

- < 21%
- 21– 40%
- 41– 60%
- 61– 80%
- ≥ 81%

Well-Child Visits in the First 15 Months of Life (W15)

W15 assesses the percentage of members who turned 15 months old during the MY and who had the following number of well-child visits with a PCP during their first 15 months of life: zero, one, two, three, four, five, or six or more. This measure uses the same structure and calculation guidelines as those in the Effectiveness of Care domain.

Well-Child Visits in the Third, Fourth, Fifth and Sixth Years of Life (W34)

W34 reports the percentage of members who were 3 to 6 years of age who had one or more well-child visits with a PCP during the MY. This measure uses the same structure and calculation guidelines as those in the Effectiveness of Care domain.

Adolescent Well-Care Visits (AWC)

AWC assesses the percentage of enrolled members 12 to 21 years of age who had at least one comprehensive well-care visit

with a PCP or an OB-GYN practitioner during the MY. This measure uses the same structure and calculation guidelines as those in the Effectiveness of Care domain.

Relative Resource Use

These measures summarize resource use during the MY by members with specific acute or chronic conditions, are presented as a ratio to provide better understanding of efficiency or value of services delivered, and are detailed in the separate annual *Relative Resource Use Report* for TennCare.

Experience of Care

For a plan's results in this domain to be considered reliable, the Medicaid MCO must follow one of the standard CAHPS protocols or an enhanced protocol approved by NCQA. Details regarding this calculation methodology and the questions used in each composite are included in *HEDIS 2016, Volume 3: Specifications for Survey Measures.*

CAHPS Health Plan Survey 5.0H Adult Version (CPA) and 5.0H Child Version (CPC)

The CAHPS Health Plan Survey 5.0H Adult Version (CPA) and 5.0H Child Version (CPC) are tools for measuring consumer healthcare satisfaction with the quality of care and customer service provided by their MCOs.

The CAHPS Health Plan Surveys include five composites asked of members (CPA) or parents of child members (CPC):

- Getting Needed Care
- Getting Care Quickly
- How Well Doctors Communicate
- Customer Service
- Shared Decision Making

Each composite category represents an overall aspect of plan quality, how well the MCO meets members' expectations. There are four global rating questions that use a 0–10 scale to assess overall experience:

- Rating of All Health Care
- Rating of Personal Doctor
- Rating of Specialist Seen Most Often
- Rating of Health Plan

For these scaled responses, a 0 represents the 'worst possible' and 10 represents the 'best possible' healthcare received in the last six months. Summary rates represent the percentage of members who responded with a 9 or 10. Additional Health Promotion and Education as well as Coordination of Care questions use the same calculations.

For any given CPA and CPC question used in a composite, the percentage of respondents answering in a certain way is calculated for each MCO. Summary rates represent the percentage of members who responded in the most positive

way, as defined by NCQA. The following descriptions provide a brief explanation of the five composite categories.

Getting Needed Care

The Getting Needed Care Composite measures the ease with which members were able to access care, tests, or treatments needed in the last 6 months. The summary rate represents the percentage of members who responded 'Always' or 'Usually' to specified questions.

Getting Care Quickly

The Getting Care Quickly Composite measures the ease with which members were able to access care quickly, including getting appointments as soon as needed, in the last 6 months. The summary rate represents the percentage of members who responded 'Always' or 'Usually' to specified questions.

How Well Doctors Communicate

The How Well Doctors Communicate Composite evaluates provider-patient communications for the last 6 months by asking members how often their personal doctor listens carefully, explains things in a way to easily understand, shows respect for what they have to say and spends enough time with them. The summary rate represents the percentage of members who responded 'Always' or 'Usually' to specified questions.

Customer Service

The Customer Service Composite measures how often members were able to get information and help from an MCO and how well they were treated by the MCO's customer service in the last 6 months. The summary rate represents the percentage of members who responded 'Always' or 'Usually' to specified questions.

Shared Decision Making

The Shared Decision Making Composite measures how often doctors offered choices regarding healthcare, mentioned the good and bad things associated with each treatment option, the extent to which doctors requested input regarding healthcare preferences, and how often doctors involved members in the decision-making process, according to their preference. The summary rate represents the percentage of members who responded 'Yes' to specified questions. Means and variances are not calculated for this composite.

Children With Chronic Conditions (CCC)

The CAHPS Consortium decided in 2002 to integrate a new set of items in the 3.0H version of the CAHPS Health Plan Survey child questionnaires (now 5.0H) to better address the needs of children with chronic conditions, commonly referred to as children with special healthcare needs. CCC is designed for children with a chronic physical, developmental, behavioral or emotional condition and who also require health and related

services of a type or amount beyond that generally required by children. Three composites summarize parents' satisfaction with their MCO's basic components of care essential for successful treatment, management and support of children with chronic conditions:

- Access to Specialized Services
- Family Centered Care: Personal Doctor Who Knows Child
- Coordination of Care for CCC

Summary rates are reported for each composite and are reported individually for two concepts:

- Access to Prescription Medicines
- Family Centered Care: Getting Needed Information

Health Plan Descriptive Information Measures

These measures help describe an MCO's structure, staffing and enrollment—factors that contribute to its ability to provide effective healthcare to Medicaid members.

Enrollment by Product Line (ENP)

ENP reports the total number of members enrolled in the product line, stratified by age and gender (for the MCOs, reported as ENPA: Total Medicaid). These results are included in Appendix C as population in member months by MCO and Tennessee Grand Region served.

Measures Collected Using Electronic Clinical Data Systems (ECDS)

This domain requires automated and accessible data by the healthcare team at the point of care. The measure in this domain is not reported by the MCOs, hence, not included in this report.

Results

Statewide Performance

In conjunction with NCQA accreditation, MCOs are required to submit a full set of audited HEDIS measures to NCQA and TennCare each year. For HEDIS 2016, this included the statewide MCO Volunteer State Health Plan, Inc., doing business as TennCare*Select* (**TCS**), and three statewide MCOs doing business in each respective Grand Region (East, Middle and West): Amerigroup Community Care, Inc., as Amerigroup (AG—**AGE**, **AGM** and **AGW**); Volunteer State Health Plan, Inc., as BlueCare Tennessee (BC—**BCE**, **BCM** and **BCW**); and UnitedHealthcare Plan of the River Valley, Inc., as UnitedHealthcare (UHC—**UHCE**, **UHCM** and **UHCW**). Beginning in January 2015, there were 400,000 TennCare enrollees transitioning to new MCOs. The transition occurred over several months and may have influenced measure results, resulting in downward trend for some measures. Subsequently, trending should be made with caution.

Tables 1 (**a** and **b**), **2** and **3** summarize the weighted average TennCare score for each of the selected HEDIS 2015 and HEDIS 2016 measures as well as the HEDIS 2015 Medicaid National Average. The Medicaid National Average represents the sum of the reported rates divided by the total number of health plans reporting the rate. Weighted state rates are determined by applying the size of the eligible population within each plan to their overall results. Using this methodology, plan-specific findings contribute to the TennCare statewide estimate, proportionate to eligible population size.

Where possible in **Tables 1** (**a** and **b**), **2** and **3**, the statewide changes for each measure reported during both HEDIS 2015 and HEDIS 2016 are presented. The column titled 'Change 2015 to 2016' indicates whether there was an improvement (⬆) or a decline (⬇) in statewide performance for the measure from HEDIS 2015 to HEDIS 2016. Cells are shaded gray for those measures that were not calculated or for which data were not reported. Each year some measures' technical specifications change. Based on whether the changes are significant or minor, the measures may need to be trended with caution or may not be able to be trended. At the time this report was finalized, NCQA did not determine the ability for 2016 measures to be trended.

Table 1a. Comparative Weighted State and National HEDIS Rates: Effectiveness of Care Measures				
Measure	HEDIS 2015 Medicaid National Avg.	Weighted State Rate 2015	Weighted State Rate 2016	Change 2015 to 2016
Prevention and Screening				
Adult BMI Assessment (ABA)	79.91%	82.84%	82.46%	↓
Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC):				
BMI Percentile: 3–11 years	63.61%	65.98%	71.33%	↑
12–17 years	64.71%	67.14%	65.74%	↓
Total	**64.05%**	**66.30%**	**69.55%**	↑
Counseling for Nutrition: 3–11 years	62.15%	64.42%	62.76%	↓
12–17 years	57.55%	56.91%	54.98%	↓
Total	**60.52%**	**62.03%**	**60.29%**	↓
Counseling for Physical Activity: 3–11 years	52.62%	55.64%	53.08%	↓
12–17 years	55.25%	56.09%	54.47%	↓
Total	**53.54%**	**55.77%**	**53.59%**	↓
Childhood Immunization Status (CIS):				
DTaP	77.98%	78.23%	76.91%	↓
IPV	88.96%	92.36%	91.23%	↓
MMR	89.98%	90.18%	88.46%	↓
HiB	89.30%	91.04%	88.77%	↓
HepB	89.31%	92.95%	92.14%	↓
VZV	89.72%	90.56%	88.52%	↓
PCV	78.32%	81.16%	79.20%	↓
HepA	83.39%	89.52%	87.18%	↓
RV	68.08%	68.74%	69.62%	↑
Influenza	51.10%	44.23%	42.86%	↓
Combination 2	73.79%	74.24%	74.27%	↑
Combination 3	70.42%	72.13%	71.08%	↓
Combination 4	66.17%	71.28%	70.27%	↓

Table 1a. Comparative Weighted State and National HEDIS Rates: Effectiveness of Care Measures				
Measure	HEDIS 2015 Medicaid National Avg.	Weighted State Rate		Change 2015 to 2016
		2015	2016	
Combination 5	57.21%	57.31%	57.87%	↑
Combination 6	43.56%	38.15%	37.28%	↓

**Benchmarks are not currently reported by Quality Compass for this rate.*
***First-year measure*
****Benchmarks are not reported by Quality Compass for 2015 first-year measures.*
† In 2015, the averages were not weighted for CAHPS measures, therefore comparisons cannot be made with 2016.

For the Effectiveness of Care Measures presented in **Table 1b**, a lower rate (particularly one below the national average) is an indication of better performance (⬆). A decrease in rates from the prior year also indicates improvement.

Table 1b. Comparative Weighted State and National HEDIS Rates: Effectiveness of Care Measures Where Lower Rates Indicate Better Performance

Table 3 summarizes results for the Utilization measures included in the Utilization and Risk-Adjusted Utilization Domain of Care.

Table 3. Comparative Weighted State and National HEDIS Rates: Utilization Measures				
Measure	**HEDIS 2015 Medicaid National Avg.**	**Weighted State Rate**		**Change 2015 to 2016**
		2015	**2016**	
Frequency of Ongoing Prenatal Care (FPC): ≥ 81%	55.24%	58.30%	55.51%	↓
Well-Child Visits in the First 15 Months of Life (W15): 6 or More Visits	58.86%	60.69%	57.63%	↓
Well-Child Visits in the Third, Fourth, Fifth and Sixth Years of Life (W34)	71.89%	69.70%	68.01%	↓
Adolescent Well-Care Visits (AWC)	50.02%	47.18%	42.34%	↓

Individual Plan Performance

This section is intended to provide an overview of individual plan performance using appropriate and available comparison data. The results highlight those areas where each MCO is performing in relation to the HEDIS 2015 National Medicaid Means and Percentiles for select MCO-reported HEDIS measures. Qsource uses these data to determine overall TennCare plan performance in a distribution of statistical values that represent the lowest to highest percentiles achieved. For example, the 50th percentile represents the point at which half of the reported rates are below and half of the reported rates are above that value.

Tables 5 (**a** and **b**), **6** and **7** display the plan-specific performance rates for each measure selected from the Effectiveness of Care, Access/Availability of Care, and Utilization and Risk-Adjusted Utilization domains. **Table 4** details the potential color-coding and measure designations used in **Tables 5a** through **7** to indicate the rating of the MCO percentile achieved, and provides additional related comments. While Medical Assistance With Smoking and Tobacco Use Cessation is an Effectiveness of Care measure, results are reported through the CPA as noted in **Tables 1a** and **5a**.

Table 4. HEDIS 2016 Rating Color and Measure Designations

Color Designation	Percentile MCO Achieved	Additional Comments
	Greater than 75th	No additional comments
	25th to 75th	No additional comments
	Less than 25th	No additional comments
	No Rating Available	Benchmarking data not available

Measure Designation	Definition
R	Reportable, a reportable rate was submitted for the measure.
NA	Not Applicable, there was a small denominator, i.e., the MCO followed the specifications, but the denominator was too small (<30) to report a valid rate, hence results are not presented.
NB	No Benefit, the MCO did not offer the health benefit required by the measure (e.g., mental health, chemical dependency).
NR	Not Reported, the MCO chose not to report the measure.
NQ	Not Required, the MCO was not required to report the measure.

Table 4. HEDIS 2016 Rating Color and Measure Designations	
BR	Biased Rate, the calculated rate was materially biased.
UN	Un-Audited, the MCO chose to report a measure that is not required to be audited. This result applies to only a limited set of measures.

**Benchmarks are not currently reported by Quality Compass for this rate.*

***First-year measure*

****Benchmarks are not reported by Quality Compass for 2015 first-year measures.*

For the Effectiveness of Care Measures presented in **Table 5b**, a lower rate (particularly one below the national 50th percentile) is an indication of better performance. For example, a rate in the 10th percentile is better than a rate in the 90th percentile.

Adolescent Well-Care Visits (AWC)	40.05%	46.76%	46.99%	43.55%	41.36%	40.63%	45.01%	35.04%	42.58%	42.34%	49.15%

Table 8 details the color-coding and the MCO rating scale, as well as any additional comments, used in **Tables 9** through **11** to indicate the rating achieved. **Tables 9** through **11** display the plan-specific performance rates for the CAHPS survey results. CAHPS measure results with an 'NA' indicate that there were fewer than 100 valid responses and, hence, results are not presented. For all CAHPS survey results, performance is measured against the calculated statewide average. The 2015 National Medicaid CAHPS Benchmarking data were obtained from Quality Compass.

Table 8. 2016 CAHPS Rating Color and Measure Designations

Color Designation	Rating Scale	Additional Comments
	Greater than one standard deviation above the statewide average	No additional comments
	Within one standard deviation above or below the statewide average	No additional comments
	Greater than one standard deviation below the statewide average	No additional comments
	No Rating Available	Benchmarking data were not available
Measure Designation	**Definition**	
NA	Not Applicable, there were fewer than 100 valid responses, hence results are not presented.

HEDIS Trending—Statewide Weighted Rates

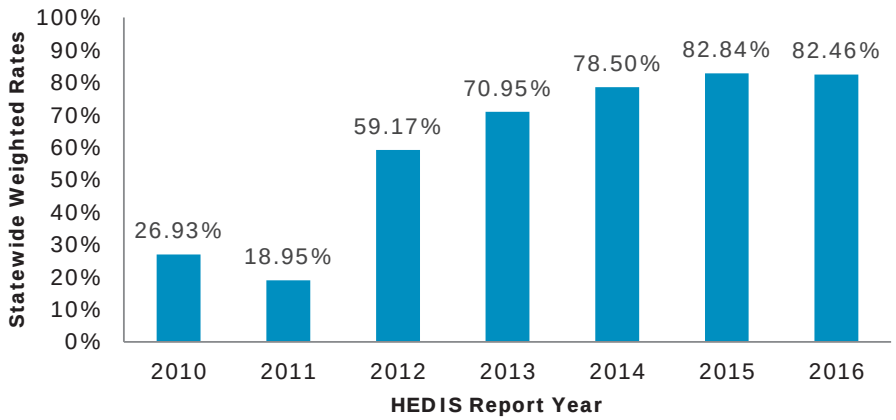
Each year of HEDIS reporting, Qsource has calculated statewide weighted averages for each measure by applying the size of the eligible population for each measure within a health plan to its reported rate. Using this methodology, plan-specific findings can be estimated from an overall TennCare statewide level, with each reporting health plan contributing to the statewide estimate proportionate to its eligible population size.

Trending for first-time measures—those reported for the first time in this year's HEDIS/CAHPS report—is not possible and, therefore, not presented in this section. Remaining measures are plotted to reflect the statewide performance of TennCare MCOs since reporting began in 2006, except where measures were not reported for a particular year as stated in footnotes.

In 2008 new health plans were implemented in the Middle Grand Region that were not required to be NCQA accredited until December 2009. Similarly, new health plans were implemented in 2009 in the West Grand Region that were not required to be accredited until December 2010. The data would not have been reported by these MCOs for 2008 or 2009, respectively; hence, no 2008 or 2009 statewide weighted rates are presented. Beginning in January 2015, there were 400,000 TennCare enrollees transitioning to new MCOs. The transition occurred over several months and may have influenced measure results, resulting in downward trend for some measures. Subsequently, trending should be made with caution.

Effectiveness of Care Measures—Prevention and Screening

Fig. 1. Adult BMI Assessment (ABA)



Footnote: Data reporting began in 2009 (2008 and 2009 data are not reported in these graphs). Measure specifications were revised in 2012; trending between 2012 and prior years should be considered with caution.

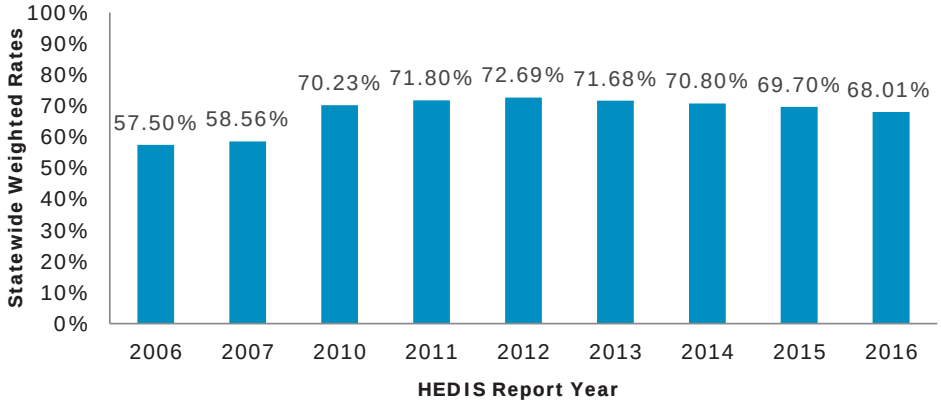

Fig. 117. Adolescent Well-Care Visits (AWC)

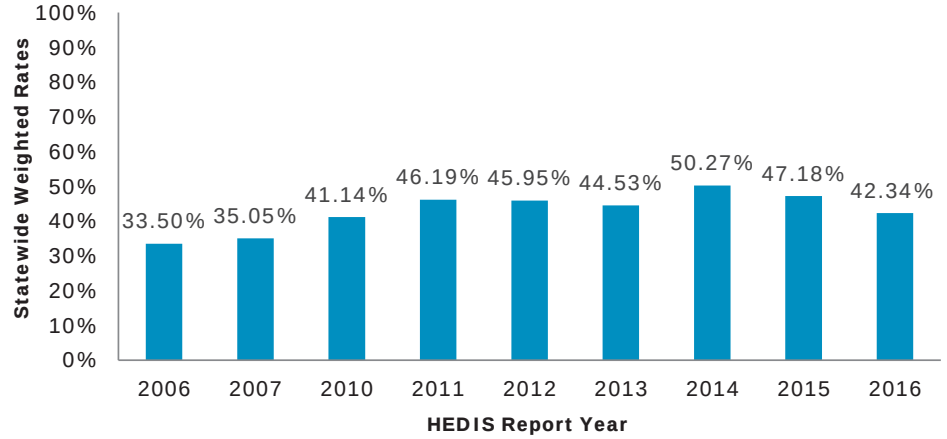

APPENDIX A | Utilization Measure Results and Benchmarks

Utilization Additional Measure Descriptions

Frequency of Selected Procedure (FSP)

FSP summarizes the utilization of frequently performed procedures that often show wide regional variation and have generated concern regarding potentially inappropriate utilization.

Ambulatory Care (AMB)

AMB summarizes utilization of ambulatory care in the following categories:

- Outpatient Visits
- ED Visits

Inpatient Utilization – General Hospital/Acute Care (IPU)

IPU summarizes utilization of acute IP care and services in the following categories:

- Total IP
- Medicine
- Surgery
- Maternity

Identification of Alcohol and Other Drug Services (IAD)

IAD summarizes the number and percentage of members with an AOD claim who received the following chemical dependency services during the measurement year:

- Any services
- IP
- Outpatient or ED
- Intensive outpatient or partial hospitalization

Mental Health Utilization (MPT)

MPT summarizes the number and percentage of members receiving the following mental health services during the measurement year:

- Any services
- IP
- Outpatient or ED
- Intensive outpatient or partial hospitalization

Antibiotic Utilization (ABX)

ABX summarizes the following data on outpatient utilization of antibiotic prescriptions during the MY, stratified by age and gender:

- Total number of and average (Avg.) number of antibiotic prescription per member per year (PMPY)
- Total and avg. days supplied for all antibiotic prescriptions
- Total number of prescriptions and avg. number of prescriptions PMPY for antibiotic of concern
- Percentage of antibiotic of concern for all antibiotic prescriptions
- Avg. number of antibiotics PMPY reported by drug class:
  - For selected 'antibiotics of concern'
  - For all other antibiotics

Utilization Measures: Plan-Specific Rates/National Benchmarks

In **Table A**, cells are shaded gray for those measures that were not calculated or for which data were not reported.

APPENDIX D | Measure Reporting Options

The reporting options are presented for each measure: administrative and/or hybrid. Currently, when the hybrid option is available, TennCare MCOs are required to use the hybrid method.

Table D. Measure reporting options: Administrative / Hybrid

Measure	Administrative	Hybrid
HEDIS Effectiveness of Care		
Prevention and Screening		
Adult BMI Assessment (ABA)	✓	✓
Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC)	✓	✓
Childhood Immunization Status (CIS)	✓	✓
Immunizations for Adolescents (IMA)	✓	✓
Human Papillomavirus Vaccine for Female Adolescents (HPV)	✓	✓
Lead Screening in Children (LSC)	✓	✓
Breast Cancer Screening (BCS)	✓	
Cervical Cancer Screening (CCS)	✓	✓
Chlamydia Screening in Women (CHL)	✓	
Respiratory Conditions		
Appropriate Testing for Children With Pharyngitis (CWP)	✓	
Use of Spirometry Testing in the Assessment and Diagnosis of COPD (SPR)	✓	
Pharmacotherapy Management of COPD Exacerbation (PCE)	✓	
Medication Management for People With Asthma (MMA)	✓	
Asthma Medical Ratio (AMR)	✓	
Cardiovascular Conditions		
Controlling High Blood Pressure (CBP)		✓
Persistence of Beta-Blocker Treatment After a Heart Attack (PBH)	✓	

Table D. Measure reporting options: Administrative / Hybrid		
Measure	**Administrative**	**Hybrid**
Statin Therapy for Patients with Cardiovascular Disease (SPC)	✓	
Diabetes		
Comprehensive Diabetes Care (CDC)	✓	✓
Statin Therapy for Patients with Diabetes (SPD)	✓	
Musculoskeletal Conditions		
Disease-Modifying Anti-Rheumatic Drug Therapy for Rheumatoid Arthritis (ART)	✓	
Behavioral Health		
Antidepressant Medication Management (AMM)	✓	
Follow-Up Care for Children Prescribed ADHD Medication (ADD)	✓	
Follow-Up After Hospitalization for Mental Illness (FUH)	✓	
Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medication (SSD)	✓	
Diabetes Monitoring for People With Diabetes and Schizophrenia (SMD)	✓	
Cardiovascular Monitoring for People With Cardiovascular Disease and Schizophrenia (SMC)	✓	
Adherence to Antipsychotic Medications for Individuals With Schizophrenia (SAA)	✓	
Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)	✓	
Medication Management		
Annual Monitoring for Patients on Persistent Medications (MPM)	✓	
Overuse / Appropriateness		
Non-Recommended Cervical Cancer Screening in Adolescent Females (NCS)	✓	
Appropriate Treatment for Children With Upper Respiratory Infection (URI)	✓	
Avoidance of Antibiotic Treatment in Adults With Acute Bronchitis (AAB)	✓	
Use of Imaging Studies for Low Back Pain (LBP)	✓	
Use of Multiple Concurrent Antipsychotics in Children and Adolescents (APC)	✓	

Table D. Measure reporting options: Administrative / Hybrid		
Measure	**Administrative**	**Hybrid**
Measures Collected Through CAHPS Health Plan Survey		
Flu vaccinations for adults ages 18 to 64 (FVA)		
Medical Assistance With Smoking Cessation (MSC)		
HEDIS Access / Availability of Care Measures		
Adults' Access to Preventive/Ambulatory Health Services (AAP)	✓	
Children and Adolescents' Access to Primary Care Practitioners (CAP)	✓	
Initiation and Engagement of Alcohol and Other Drug (AOD) Dependence Treatment (IET)	✓	
Prenatal and Postpartum Care (PPC)	✓	✓
Call Answer Timeliness (CAT)	✓	
Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP)	✓	
HEDIS Utilization and Risk-Adjusted Utilization Measures		
Frequency of Ongoing Prenatal Care (FPC)	✓	✓
Well-Child Visits in the First 15 Months of Life (W15)	✓	✓
Well-Child Visits in the Third, Fourth, Fifth and Sixth Years of Life (W34)	✓	✓
Adolescent Well-Care Visits (AWC)	✓	✓

SECTION I: INTRODUCTION

Managed Care Goals, Objectives, and Overview

CMS Requirement: Include a brief history of the State's Medicaid managed care programs.

On January 1, 1994, Tennessee launched TennCare, a new health care reform program. This original TennCare waiver, TennCare I, essentially replaced the Medicaid program in Tennessee; Tennessee moved almost its entire Medicaid program into a managed care model.

TennCare I was implemented as a five-year demonstration program and received several extensions after the initial waiver expiration date of December 30, 1999. The original TennCare design was extraordinarily ambitious. TennCare I extended coverage to large numbers of uninsured and uninsurable people, and almost all benefits were delivered by Managed Care Organizations (MCOs) of varying size, operating at full risk. Enrollees under the TennCare program are eligible to receive only those medical items and services that are within the scope of defined benefits for which the enrollee is eligible and determined by the TennCare program to be medically necessary.

TennCare II, the demonstration program that started on July 1, 2002, revised the structure of the original program in several important ways. The program was divided into "TennCare Medicaid" and "TennCare Standard." TennCare Medicaid served Medicaid eligibles, while TennCare Standard served the demonstration population.

When TennCare II began, several MCOs were either leaving the program or at risk of leaving the program due to their inability to maintain financial viability. A Stabilization Plan was introduced under TennCare II whereby the MCOs were temporarily removed from risk. Pharmacy benefits and dental benefits were carved out of the MCO scope of services, and new single benefit managers were selected for those services. Enrollment of demonstration eligibles was sharply curtailed, with new enrollment being open only to uninsurable persons with incomes below poverty and "Medicaid rollovers," persons losing Medicaid eligibility who met the criteria for the demonstration population.

In 2004, in the face of projections that TennCare's growth would soon make it impossible for the state to meet its obligations in other critical areas, Governor Phil Bredesen proposed a TennCare Reform package to accomplish goals such as "rightsizing" program enrollment and reducing the dramatic growth in pharmacy spending. With approval from the Centers for Medicare & Medicaid Services (CMS), the state began implementing these modifications in 2005.

On October 5, 2007, the waiver for the TennCare II extension was approved for three additional years. Subsequent extensions of the TennCare II managed care demonstration were approved in 2009 and 2013.

The integration of behavioral health into the managed care model evolved from the TennCare I waiver. In 1996, behavioral health services were carved out and the Partner's program was established whereby Behavioral Health Organizations (BHOs) contracted directly with the Bureau of TennCare to manage behavioral health services. A primary focus of the carve-out was to provide services for the priority population, a group that included adults with serious and persistent mental illness (SPMI) and children with serious emotional disturbance (SED). The Bureau began integrating behavioral and medical health care delivery for Middle Tennessee members in 2007 with the implementation of two expanded MCOs.

TennCare continued the process with the implementation of new MCO contracts in West Tennessee in November 2008 and East Tennessee in January 2009. The transferring of behavioral health services to Volunteer State Health Plan of Tennessee for TennCare Select members completed the Bureau's phased-in implementation of a fully integrated service delivery system that works with health care providers, including doctors and hospitals, to ensure that TennCare members receive all of their medical and behavioral services in a coordinated and cost-effective manner.

On July 22, 2009 TennCare received approval from CMS for a demonstration amendment to implement the CHOICES program outlined by the State's Long-term Care and Community Choices Act of 2008. Under the CHOICES program the State provides community-based alternatives to people who would otherwise require Medicaid-reimbursed care in a Nursing Facility (NF), and to those at risk of Nursing Facility (NF) placement. The CHOICES program utilizes the existing Medicaid MCOs to provide eligible individuals with nursing facility services or home and community based services. Tennessee was one of the first states in the country to implement managed Medicaid long- term care and the only state to do so in a manner that does not require enrollees to change their MCO.

The CHOICES program was implemented in stages over time in different geographic areas of the state. The first phase of the CHOICES program was successfully implemented in Middle Tennessee on March 1, 2010, with the East and West Grand Region MCOs' implementation occurring in August 2010. Also, in August 2010, the Statewide Home and Community Based Waiver for the Elderly and Disabled was terminated as it was no longer needed with full implementation of the CHOICES program.

With implementation of the CHOICES program, the MCOs became responsible for coordination of all medical, behavioral, and long-term care services provided to their members, age 65 and older and adults age 21 and older with physical disabilities. Currently, the only remaining carve-out services are for dental and pharmacy services, as well as individuals with intellectual disabilities.

Effective July 1, 2016, the Employment and Community First CHOICES program was added to the managed care demonstration. Employment and Community First CHOICES is an integrated managed long-term services and supports program that is specifically geared toward promoting and supporting integrated, competitive employment and independent, integrated community living as the first and preferred option for individuals with intellectual and development disabilities (I/DD).

With implementation of Employment and Community First CHOICES, MCOs are responsible for coordination of all medical, behavioral, and LTSS provided to individuals with I/DD newly enrolling in HCBS under the new MLTSS program. Section 1915(c) waivers will continue to be carved out of managed care, although individuals enrolled in those waivers are enrolled in managed care for their physical and behavioral health services. Members enrolled in a Section 1915(c) waiver will have the opportunity to elect transition to the Employment and Community First CHOICES program at a future date.

MCO Contracting and Turnover Experience

Traditionally, MCOs, operating in the TennCare demonstration, have been "at risk." However, because of instability among some of the MCOs participating in TennCare, the "at risk" concept was replaced in July 2002 with an "administrative services only" arrangement. The state added its own MCO, TennCare Select, to serve as a backup if other plans failed or there was inadequate MCO capacity in any area of the state. TennCare Select also serves enrollees in specific populations such as foster children, children receiving

Supplemental Security Income (SSI) benefits, and children receiving services in a nursing facility or an Intermediate Care Facility for Persons with Intellectual Disabilities.

Maintaining MCO participation in Middle Tennessee has been a focus of the program over the years. During the 2006-2007 state fiscal year, one of the major TennCare priorities was recruiting well-run, well-capitalized MCOs to Middle Tennessee. In addition to bringing in new MCOs, the Bureau wanted to establish a new service-delivery model – an integrated medical and behavioral health model. Another crucial factor in the implementation was structuring the MCOs' contracts to return the organizations to full financial risk. To meet these goals, the state conducted its first competitive procurement process for TennCare MCOs. The Bureau secured contracts with two successful bidders. The two new MCOs "went live" on schedule on April 1, 2007. TennCare placed the managed care contracts for the East and West grand regions of the state up for competitive bid in January 2008. In April 2008, the state awarded the regional contracts to two companies in each region. The MCO contractors accepted full financial risk to participate in the program and the new contracts also established an integrated medical and behavioral health care system for members. The plans began serving West Tennessee members on November 1, 2008 and began serving East Tennessee members on January 1, 2009. In September 2009, behavioral health services for TennCare Select enrollees were transferred to BCBST.

For most of TennCare's history, managed care organizations (MCOs) delivered services on a regional basis (e.g., East Tennessee, Middle Tennessee, and West Tennessee). On October 2, 2013, the Bureau of TennCare issued a Request for Proposals (RFP) for three organizations to furnish managed care services statewide to the TennCare population. The RFP required the winning bidders to provide physical health services, behavioral health services, and Long Term Services and Supports (LTSS) throughout the state, with actual service delivery to begin in Middle Tennessee on January 1, 2015, and in East and West Tennessee later that calendar year.

On December 16, 2013, the Bureau announced that the winning proposals had been submitted by Amerigroup, BlueCare, and UnitedHealthcare, the three companies that currently form TennCare's managed care network. New contracts with these entities will last from January 1, 2014 through December 31, 2016 and contain options for five (5) one (1) year extensions.

Between 1994 and 2002, dental services were part of physical health services delivered by TennCare's medical MCOs. Some MCOs chose to contract directly with dentists and operate their own dental networks, while others subcontracted their dental program to a Dental Benefits Manager (DBM). During this time, dentists did not participate in the TennCare program to the extent desired or anticipated by the State. Differences in the practice of dentistry versus medicine made participation in a managed care "medical" model a challenging business decision for dentists. Dentists complained of inefficiencies associated with participation in multiple MCOs relative to credentialing, authorization, billing, and reimbursement. Each MCO or its dental subcontractor negotiated dental reimbursement rates individually with dentists, and fees were a confidential, contractual matter. Most dentists only signed contracts with certain MCOs, which complicated efforts to ensure enrollee access. Effective October 2002, in an effort to strengthen dental provider networks and improve enrollee access to care, the State moved from a managed care medical model to a managed care dental model for administration of dental services. The dental benefit was removed (carved-out) from the MCOs. Definitive funding was allocated for the revamped dental program, and administration of the dental benefit was awarded to a single DBM following a competitive bid process. The dental contract was an Administrative Services Only (ASO)

contract where the DBM was not financially "at risk" for delivery of dental care. The State paid the DBM an administrative fee for managing the dental benefit and covered expenditures associated with dental claims. In 2013, TennCare transitioned from an ASO contract to a partial risk bearing contract to reflect the maturation of the DBM model and to provide additional incentives for the DBM to improve quality of dental care while lowering costs.

The Dental carve-out model has proven to be beneficial for the State, enrollees, and providers. DBM administration has resulted in more streamlined administrative processes making the program more "dental" friendly for providers. Dentists sign one provider agreement, are subjected to one credentialing process, and are reimbursed on a fee-for-service basis using one approved maximum allowable dental fee schedule. A single DBM means there is one set of program policies, one provider agreement, one provider reference manual, one claims processor, and one organization responsible for all contract deliverables. State oversight of Medicaid dental services is simplified because the Bureau of TennCare is responsible for one DBM versus multiple MCOs delivering or subcontracting for dental care.

The DBM has also been responsible, among other things, for maintaining and managing an adequate statewide dental provider network, processing and paying claims, managing program data, conducting utilization management and utilization review, detecting fraud and abuse, as well as meeting utilization benchmarks or outreach efforts reasonable calculated to ensure participation of all children who have not received screenings.

As mentioned, the pharmacy program was carved out of the managed care plans in 2003 and transferred to a single Pharmacy Benefits Manager (PBM) payer system, which still remains in place today. The first PBM, Affiliated Computer Services (ACS), went into effect for the latter half of 2003 and established the preferred drug list. First Health Services Corporation (FHSC) became the PBM in 2004 and remained until 2008. SXC Health Solutions (which later became known as Catamaran) followed FHSC until 2013 at which time Magellan Medicaid Administration became the current PBM.

The largest drivers of change in pharmacy utilization since the carve-out came with a change in a federal Consent Decree in 2005 and establishment of the Medicare Part D program in 2006. These changes allowed TennCare to more effectively manage the pharmacy program and shifted most dual eligible members to a Medicare drug plan.

Each enrollee has an MCO for his/her primary care, medical/surgical, mental health and substance abuse, and long-term health services and a Pharmacy Benefits Manager (PBM) for his/her pharmacy services. Children under the age of 21 and enrolled in the TennCare program are eligible for dental services, which are provided by a Dental Benefits Manager (DBM).

Population Description/Changes

All Medicaid and demonstration eligibles are enrolled in TennCare, including those are dually eligible for TennCare and Medicare. There are approximately 1.45 million persons currently enrolled in TennCare. There are several mechanisms for TennCare eligibility.

TennCare Medicaid serves Tennesseans who are eligible for a Medicaid program. Some of the groups TennCare Medicaid covers include:

- Low income children under age 21

- Women who are pregnant
- Caretakers of a minor child
- Individuals who need treatment for breast or cervical cancer
- People who receive Supplemental Security Income (SSI).
- People who have received both an SSI check and a Social Security check for the same month at least once since April 1977 AND who still receive a Social Security check
- People who live in a nursing home and have income below $2,022 per month (300% of SSI benefit) OR receive other long-term care services that TennCare pays for

TennCare Standard is only available for children under age 19 who are losing their TennCare Medicaid AND Lack access to group health insurance through their parents' employer.

There are two ways these children can qualify and be able to keep their healthcare benefits:

- The Uninsured category is only available to children under age 19 whose TennCare Medicaid eligibility is ending, who do not have access to insurance through a job or a family member's job, and whose family incomes are below 211% of the poverty level.

- The Medically Eligible category is only available to children under age 19 whose TennCare Medicaid eligibility is ending and whose family income equals or is greater than 211% of the poverty level. To be medically eligible, the child must have health conditions that make the child "uninsurable" from a pre-Affordable Care Act perspective.

Coinsurance for some services is required for members with TennCare Standard if the family income is over ninety-nine percent (99%) of the poverty level.

TennCare Standard also includes a number of demonstration eligibility categories for individuals enrolled in CHOICES and in Employment Community First CHOICES.

CHOICES in Long-Term Services and Supports

In July 2009, CMS approved an amendment to the TennCare waiver that allows MCOs to coordinate all of the care a TennCare member needs, including medical, behavioral, and long-term services and supports for specified populations. Implementation of CHOICES for the Middle Grand Region MCOs occurred on March 1, 2010, and subsequently for the East and West Grand Region MCOs on August 1, 2010. Initial implementation included two CHOICES groups: CHOICES Group 1 and CHOICES Group 2, with CHOICES Group 3 beginning on July 1, 2012.

CHOICES Group 1 is for individuals receiving services in a Nursing Facility (NF). These individuals are enrolled in TennCare Medicaid, except for individuals continuously enrolled in CHOICES Group 1 since before July 1, 2012 that do not meet the new nursing facility level of care criteria in effect as of July 1, 2012, but continue to meet the level of care criteria in effect prior to July 1, 2012, and are eligible in the demonstration CHOICES 1 and 2 Carryover Group.

CHOICES Group 2 is for individuals who meet the NF Level of Care (LOC) and are receiving Home and Community-Based Services (HCBS) as an alternative to NF care. Those in CHOICES 2 may be enrolled in either TennCare Medicaid, if they are SSI-eligible, or in the demonstration CHOICES 217-Like HCBS Group

or CHOICES 1 and 2 Carryover Group. The CHOICES 217-Like HCBS Group is composed of adults age 65 and older, or age 21 and older with physical disabilities, who:

- Meet the NF level of care requirement;
- Are receiving HCBS; and
- Would be eligible in the same manner as specified under 42 CFR § 435.217, 435.236, and 435.726, and Section 1924 of the Social Security Act, if the HCBS were provided under a Section 1915(c) waiver. With the statewide implementation of CHOICES, the Bureau no longer provides HCBS for older adults and adults with physical disabilities under a Section 1915(c) waiver.

Individuals continuously enrolled in CHOICES Group 2 since before July 1, 2012 who do not meet the new nursing facility level of care criteria in effect as of July 1, 2012, but continue to meet the level of care criteria in effect prior to July 1, 2012, and who meet institutional income standards are eligible in the demonstration CHOICES 1 and 2 Carryover Group.

CHOICES Group 3 was implemented July 1, 2012. This option is for individuals age 65 and older, and adults age 21 and older with physical disabilities, who qualify for TennCare as SSI recipients or in the At Risk Demonstration Group, who do not meet the nursing facility level of care, but who, in the absence of HCBS, are "at-risk" for nursing facility care, as defined by the State.

Interim CHOICES Group 3 was closed to new enrollment on June 30, 2015. Individuals who applied for the program before July 1, 2015 and are enrolled in Interim CHOICES Group 3 are permitted to remain in the group so long as they continue to meet financial and medical criteria and remain continuously enrolled in TennCare in in Interim CHOICES Group 3.

In November 2010, Tennessee was recognized by the Center for Health Care Strategies (CHCS) for its statewide implementation of the new TennCare CHOICES Long Term Services and Supports program. In its report *Profiles of State Innovation: Roadmap for Managing Long-Term Supports and Services*, CHCS identified Tennessee as one of five innovative states with demonstrated expertise in managed care approaches to long-term care. Tennessee, along with Arizona, Hawaii, Texas and Wisconsin, was noted as a "true pioneer" in designing innovative approaches to delivering care to the elderly and adults with disabilities. Tennessee in particular was recognized for its open communication and collaboration with the public and stakeholders in designing and implementing the new program.

The key component of the CHOICES program is person-centered care coordination. The "whole person" care coordination approach includes:

- Implementation of active transition and diversion programs for people who can be safely and effectively supported at home or in another integrated community setting outside the nursing home; and
- Installation of an electronic visit verification system to monitor home care access, timeliness and quality through the use of GPS technology, and to immediately address potential gaps in care.

Other components of CHOICES include:

- Consumer choice of service setting and providers
    - Consumer-directed care options, including the ability to hire non-traditional providers like family members, friends, and neighbors with accountability for taxpayer funds.

- Broadening of residential care choices in the community beyond nursing facilities with options such as companion care, community living supports and adult "foster" family living arrangements and improved access to assisted care living facilities.

- Simplified Process for Accessing Services
  - Streamlining the member's eligibility process for faster service delivery and the enrollment process for new providers.
  - Maintaining a single point of entry for people who are not on TennCare today and need access to long-term care services through Medicaid or other available programs.
  - Use of existing Medicaid funds to serve more people in cost-effective home and community settings.

Employment and Community First (ECF) CHOICES

In February 2016, CMS approved Amendment 27 to the TennCare demonstration that allows MCOs to coordinate HCBS (as well as medical and behavioral health services) for individuals with intellectual and developmental disabilities. Dental benefits provided under the ECF CHOICES program will be administered through the DBM. Statewide implementation of Employment and Community First CHOICES began on July 1, 2016. The program was implemented with a choice of only two MCOs: Amerigroup and BlueCare. A third MCO may be added at a later date.

Employment and Community First CHOICES is specifically designed to align financial incentives to support integrated competitive employment and independent, integrated community living as the first and preferred option for individuals with intellectual and developmental disabilities. The comprehensive array of employment supports, designed with technical assistance from subject matter experts with the federal Office of Disability Employment Policy creates a pathway to employment, even for individuals with significant disabilities, with many services to be reimbursed on an outcome-basis as that step along the employment pathway is complete. Other employment services are reimbursed in part on the provider's performance (risk adjusted) on specified employment outcomes. Once sufficient data is available to establish benchmarks (e.g., the # or % of persons supported employed in individual employment in integrated settings, # hours worked/week, and the # or % of people employed earning a competitive (or prevailing wage).

The new ECF CHOICES program will demonstrate the following:

- A tiered benefit structure based on the needs of individuals enrolled in the program allows the State to provide HCBS and other Medicaid services more cost-effectively so that more people who need HCBS can receive them. This includes people with intellectual disabilities who would otherwise be on the waiting list for a Section 1915(c) waiver and people with other developmental disabilities who are not eligible for Tennessee's current Section 1915(c) waivers.
- The development of a benefit structure and the alignment of financial incentives specifically geared toward promoting integrated competitive employment and integrated community living will result in improved employment and quality of life outcomes.

The quality assurance and improvement structure for Employment and Community First CHOICES is unique in that, in addition to quality activities performed by the MCOs, quality assurance monitoring and improvement activities will be conducted by TennCare. TennCare also has a contract with the Department of Intellectual and Development Disabilities (DIDD) to conduct quality assurance surveys of providers enrolled to deliver specified services in the Employment and Community First CHOICES program. DIDD Quality Assurance surveys are completed on site and include visits with people receiving services, thereby obtaining invaluable information about the quality of services from the member's perspective as well as

their satisfaction with services. A Quality Assurance survey process has long been in place for the State's Section 1915 (c) waivers for individuals with ID, but will be modified to reflect the new benefit structure and expectations in Employment and Community First CHOICES with particular focus on employment and integrated community living. This quality assurance model includes establishing performance measures and processes for discovery, remediation, and ongoing data analysis as well as quality improvement. In addition to providing data specific to the quality of services offered in the Employment and Community First CHOICES program, this ensures that TennCare has a comprehensive perspective of quality performance and strategies for quality improvement across the I/DD system as a whole. TennCare has also contracted with DIDD to perform quality assurance surveys of providers who deliver Community Living Supports and Community Living Supports – Family Model services (residential benefits) to individuals in the current CHOICES program.

Employment and Community First CHOICES has 3 groups:

- *Essential Family Supports (Group 4)* – Children under age twenty one (21) with I/DD living at home with family who meet the NF LOC and need and are receiving HCBS as an alternative to NF Care, or who, in the absence of HCBS, are "At Risk of Nursing Facility placement" and adults age 21 and older with I/DD living at home with family caregivers who meet the NF LOC and are receiving HCBS as an alternative to NF care, or who, in the absence of HCBS, are "At risk of NF placement" and elect to be in this group. To qualify in this group, an individual must be SSI eligible or qualify in the ECF CHOICES 217-Like, Interim ECF CHOICES At-Risk Demonstration Group or upon implementation of Phase 2, the ECF CHOICES At-Risk or ECF CHOICES Working Disabled Demonstration Groups.

- *Essential Supports for Employment and Independent Living (Group 5)* – Adults age twenty-one (21) and older I/DD who do not meet nursing facility level of care, but who, in the absence of HCBS are "At Risk" of nursing facility placement. To qualify the adult must be SSI eligible or qualify in the Interim ECF CHOICES At-Risk Demonstration group, or upon implementation of Phase 2, the ECF CHOICES At-Risk or ECF CHOICES Working Disabled Demonstration Groups.

- *Comprehensive Support for Employment and Community Living (Group 6)* – Adults age twenty-one (21) and older with I/DD who meet nursing facility level of care and need and are receiving specialized services for I/DD. To qualify, an individual must be SSI eligible or qualify in the ECF CHOICES 217-Like Demonstration Group, or upon implementation of Phase 2, the ECF CHOICES Working Disabled Demonstration Group.

Evolution of Health Information Technology

TennCare continues to work to enhance accurate and timely data collection, analysis, and distribution. The Bureau's comprehensive information management strategy affects every aspect of Tennessee's "Medicaid Enterprise," from medical and eligibility policy to budget and financial accountability. The process of transforming from a traditional transaction-driven medical program to a health care monitoring and management organization recognizes the advantages of Tennessee's unique, fully managed care framework and builds on the Bureau's commitment to be a wise and efficient contractor of services, steward of public funds, and advocate for quality healthcare for all constituents. With guidance from the Bureau's Health care Informatics group, the State is revamping its data strategy to take into account changes in the Health Information Exchange (HIE) landscape. This includes taking steps to critically examine current data assets and design options to collect and analyze data, make better use of currently available encounter data via the State's Medicaid Management Information System (MMIS), and target methods to distribute the resulting information in ways that are most streamlined and effective for

providers through enhanced dashboards, web portals, and DIRECT Messaging. Examples of these efforts are outlined through the following ongoing projects:

- Admission, Discharge, Transfer (ADT) feeds and Care Coordination Tools (CCT): Edifecs has developed a Clinical Knowledge Management (CKM) tool within the Edifecs Module to collect and standardize the hospital ADT feeds which will contain inpatient and discharge information that will allow for follow-up care. The CCT will allow providers to coordinate patient care across multiple payers and plan types. Subsequently, claims data will be populated with the HIE data to allow for a common risk score, identify gaps in care and present to providers a patient register (history, medications, etc.).

- Quality Applications: These applications will allow HCFA to collect clinical quality data that cannot be acquired from processed medical billing claims. Ultimately, these Quality Apps will provide all payers, beginning with the State's Medicaid participating MCOs, with the necessary information to reimburse providers for high quality health outcomes. Initially, Quality Applications will be based on a contractor-provided service that will support two innovation strategies: Episodes of Care and Long Term Services and Supports. As part of payment reform efforts within the Tennessee Health Care innovation initiative, these two strategies aim to increase quality of care, reduce healthcare costs, and improve the health of Tennessee's population. Episodes of Care Quality Applications will track certain quality measures for clinical encounters that are not included in medical billing claims data. LTSS Quality Applications will support the payment calculations, data aggregation, and quality measures for Nursing Facilities and Home and Community Based Services programs.

- Identify Access Management: This project will implement enterprise-wide Identify Access Management (IAM) for Health Care Finance and Administration (HCFA). This functionally is needed to ensure the privacy and security of patient clinical data and will be the standard for future HCFA applications. This is a security tool that automates user's provisioning based upon roles based access.

- Master Patient Index and Master Provider Directory: HCFA has contracted with Audacious Inquiry (AI) to implement a Master Data Management (MDM) module. This project will provide a data management tool that will enable HCFA to uniquely identify patients and providers through the use of MPI and Master Provider Directory.

- Care Coordination Tool: Both the Primary Care Medical Home project and the Health Link project will use this tool to communicate HEDIS provider specific quality measures to providers.

- Integration of Behavioral Health Services with Primary Care Services: This project is designed to provide an electronic holistic view of an enrollee's care to providers and is currently in the developmental phase.

As an early leader in the work to develop digital health information capacity, Tennessee has built a comprehensive set of health information technology (HIT) and health information exchange (HIE) assets. One of these is the collective level of experience and lessons learned among stakeholders about fostering HIT and HIE innovation amidst evolving health systems, technology environments, and data priorities.

Both the Bureau of TennCare and the Office of eHealth Initiatives (OeHI) within Tennessee's Health Care

Finance and Administration Division play integral leadership roles in the promotion of statewide HIT/HIE. Given the interdependencies between Health Information Technology adoption and Health Information Exchange, efforts to administer Health Information Technology for Economic and Clinical Health (HITECH) Act programs in Tennessee are a highly integrated collaboration between TennCare and OeHI. These programs include the State HIE Cooperative agreement Program and the CMS Medicaid EHR Incentive Program. Strategies and activities are guided with input and active participation by an array of other state partners and stakeholders such as state government agencies, TennCare MCOs, health information organizations throughout the state, and provider associations. For example, to disseminate information about specific EHR Incentive Program features and policies, both TennCare and OeHI have conducted dedicated outreach to entities such as the Tennessee Medical Association, Tennessee Hospital Association, Tennessee Primary Care Association, the Children's Hospital Alliance of Tennessee, and TennCare's MCOs.

Additional examples of the evolution of Information Technology include the continued modularization of the Medicaid Management Information System (MMIS) and the Tennessee Eligibility Determination System (TEDS).

- Medicaid Management Information System: Tennessee currently has a contract with Hewlett Packard Enterprise (HPE) to provide Facility Management services. Direction from the Centers for Medicare and Medicaid Services has encouraged states to pivot from large single vendor systems and contracts to a modular environment with multiple contracts. After careful consideration of the current environment in Tennessee and multiple ongoing projects, Tennessee has elected to continue the business relationship with HPE. Going forward, HCFA will determine functionality that can be uncoupled and modularized. Examples of future modules are Program Integrity, Fee-For-Service (FFS) Claims, and Electronic Data Interchange (EDI). This approach allows an already highly modular Medicaid Enterprise to meet the objectives of CMS with the lowest amount of risk and greatest potential for success.

- Tennessee Eligibility Determination System: The goal of the TEDS project is to modernize and enhance the State's Medicaid and CHIP program eligibility determination system and processes through updated technology, as well as the eligibility appeals functions that protect and support the interests of the State's citizens while complying with the requirements of federal law and regulations. HCFA envisions a client service model that is customer-centric, efficient, and effective and provides a customer friendly experience. Within this vision TennCare enrollees, excluding applicants for Supplement Security Income (SSI) benefits, who must continue to file applications through the Social Security Administration (SSA), will be able to file applications for services or benefits, as well as report changes through an online process. Most required materials and verification documents will be scanned and stored electronically within the electronic case record. Whenever possible, verification of required information will be captured electronically through a web-based service and updated automatically in the electronic case record. Workers or automated processes will review applications and send additional questions or request additional documentation electronically or through print media to communicate with customers.

CMS Requirement: Include an overview of the quality management structure that is in place at the state level.

Although the Bureau of TennCare established a Division of Quality Oversight several years ago, a culture

of quality has also been fostered throughout the Bureau. Both TennCare's Vision and Mission statements reflect that culture:

Vision Statement: "Setting the standard in health care management by delivering high quality, cost-effective care that results in improved health and quality of life for eligible Tennesseans."

Mission Statement: "To maintain an exemplary system of high quality health care for eligible Tennesseans within a sustainable and predictable budget."

Core Values:

- **C**ommitment: Ensuring that Tennessee taxpayers receive value for their tax dollars
- **A**gility: Be nimble when situations require change
- **R**espect: Treat everyone as we would like to be treated
- **I**ntegrity: Be truthful and accurate
- **N**ew Approaches: Identify innovative solutions
- **G**reat customer service: Exceed expectations

All quality improvement activities are consistent with the "three aims" outlined in the National Quality Strategy for better care, healthy people/healthy communities, and affordable care. Wendy Long, M.D. is the Director of the Health Care Finance and Administration (HCFA) Division for the state of Tennessee, with Will Kromer serving as the Deputy Director. The Chief Medical Officer for the Bureau of TennCare, Victor Wu, M.D., reports directly to Dr. Long and in turn provides supervision for the Quality Oversight, Pharmacy, Dental, Provider Networks, and Medical Appeals divisions of the Bureau. The Division of Quality Oversight is led by Mary Katherine Fortner, R.N. and is comprised of a staff of 23 individuals.

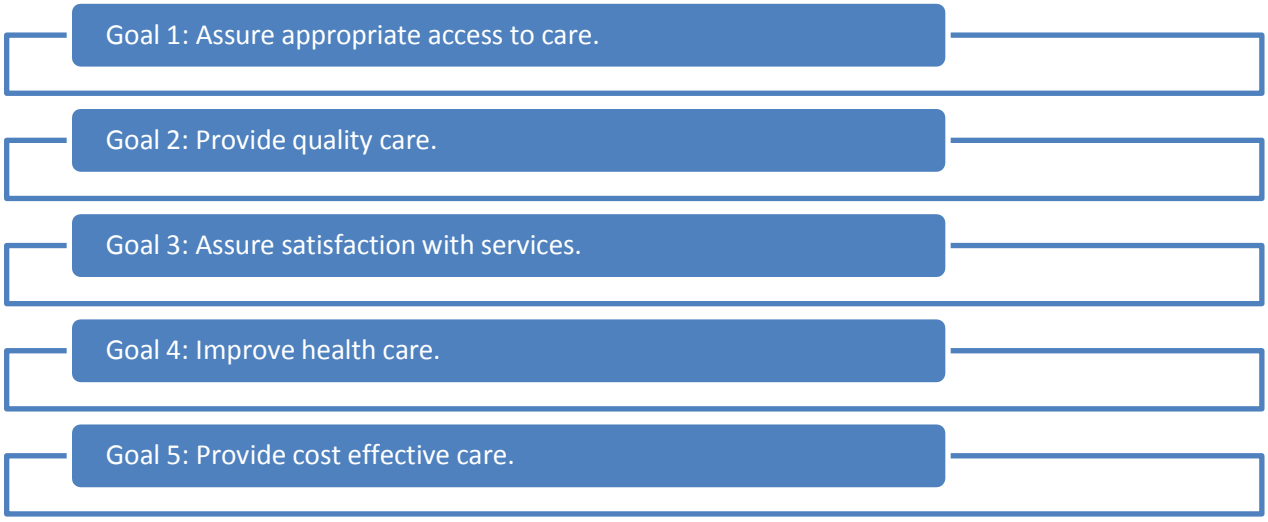
The Division of Quality Oversight is responsible for monitoring many of the activities of the MCOs and for enforcing quality requirements defined in the MCO and DBM Contractor Risk Agreements. This Division is also responsible for developing and monitoring the External Quality Review Organization (EQRO) contract as well as a contract with the Tennessee Department of Health.

CMS Requirement: Include general information about the state's decision to contract with MCOs/PIHPs (i.e., to address issues of cost, quality, and/or access). Include the reasons why the state believes the use of a managed care system will positively impact the quality of care delivered in Medicaid.

The State's decision to contract with MCOs and a Prepaid Inpatient Health Plan (PIHP) for most services, as well as two PAHPs for pharmacy and dental, is rooted in more than 20 years of experience with managed care in Tennessee. The use of these Managed Care Contractors (MCCs) has allowed the State to move from the role of being primarily a payer of claims to a role of orchestrating and coordinating an entire system of care. The use of MCCs without appropriate oversight and direction cannot guarantee a cost-effective system that delivers quality care. However, we have learned that when the state is willing and able to leverage meaningful oversight strategies, managed care offers the best chance of delivering the kind of system we want. Goals addressing cost, quality, and access can be built into the system, along with carrots and sticks to make sure these goals are reached. Such levers are largely unavailable in a fee-for-service system.

CMS Requirement: Include a description of the goals and objectives of the state's managed care program. This description should include priorities, strategic partnerships, and quantifiable performance driven objectives. These objectives should reflect the state's priorities and areas of concern for the population covered by the MCO/PIHP contracts.

Five primary goals for TennCare enrollees shape the Quality Strategy. Ensuring appropriate access to care, providing quality care, and assuring satisfaction with services are processes that ultimately contribute to the fourth and fifth goals of improving health care and providing cost-effective care.



These five goals and their associated objectives align with the three aims of the National Quality Strategy:

- ***Better Care*** **-** Improve the overall quality of care by making health care more patient-centered, reliable, accessible, and safe.
- ***Healthy People/Healthy Communities*** **-** Improve the health of the United States population by supporting proven interventions to address behavioral, social, and environmental determinants of health in addition to delivering higher-quality care.
- ***Affordable Care*** **-** Reduce the cost of quality health care for individuals, families, employers, and government.

Progress toward these five goals is gauged by physical health, behavioral health, as well as long term services and support performance measures. The objectives are drawn from nationally recognized and respected measure sets. Many of the strategy objectives are statewide weighted Healthcare Effectiveness Data and Information Set (HEDIS) rates or statewide average Consumer Assessment of Healthcare Providers and Systems (CAHPS) rates. The MCOs annually complete and submit all applicable HEDIS measures designated by the National Committee for Quality Assurance (NCQA) as relevant to Medicaid. The MCOs are required to contract with an NCQA-certified HEDIS auditor to validate the processes of the health plan in accordance with NCQA requirements. In addition, they annually conduct CAHPS surveys (adult survey, child survey, and children with chronic conditions survey) using an NCQA-certified CAHPS survey vendor.

Strategy Goals and Objectives

The tables below present the Quality Strategy goals and objectives established by the State for physical and behavioral health as well as Long Term Services and Supports.

Physical and Behavioral Health Goals	
Goal 1: Assure appropriate access to care for enrollees	
Objective 1.1: By 2019, the statewide weighted HEDIS rate for adolescent well-care visits will increase from 41.6% to 47.6%.	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Objective 1.2: By 2019 the CMS 416 EPSDT screening rate will increase from 71% to 90%	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Objective 1.3: By 2019, 97% of TennCare heads of household and 99% or greater of TennCare children will go to a doctor or clinic when they are first seeking care rather than a hospital (emergency room).	Data Source: *The Impact of TennCare: A Survey of Recipients.*
Goal 2: Provide quality care to enrollees	
Objective 2.1: By 2019, the percentage of deliveries that had a postpartum visit on or between 21 and 56 days after deliver will increase from 58.74% to 64.74%.	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Objective 2.2: By 2019, the statewide weighted HEDIS rate for timeliness of prenatal care will increase from 64.6% to 69.69%.	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Objective 2.3: By 2019, the percentage of members who remained on an asthma controller medication for at least 75% of their treatment period will increase from 29.35% to 35.35%.	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Objective 2.4: By 2019, The percentage of members, ages 18-75 who had one of the following will increase as follows: • Retinal Eye exam – from 42.87% to 48.7% • Medical Attention for Nephropathy– from 90.89% to 93.89% • Blood Pressure Control (<140/90 mm HG) – from 58.22% to 64.22%	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Objective 2.5: The percentage of children newly prescribed Attention Deficit/Hyperactivity Disorder mediation who has at least three follow-up care visits within a 10 month period, one of which was within 30 days of when the first ADHD medication was dispensed will increase as follows: • Initiation Phase – from 49.26% to 55.26% • Continuation and Maintenance Phase – from 63.14% to 69.14%	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*

Objective 2.6 The percentage of adolescents 13 years of age who had one dose of meningococcal vaccine and one tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap) by their 13th birthday. Combination One (1) will increase from 67.13% to 72.13%	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Goal 3: Assure enrollees' satisfaction with services.	
Objective 3.1: By 2019, the number of TennCare enrollees who expressed satisfaction with TennCare will increase from 95% to 97%.	Data source: *The Impact of TennCare: A Survey of Recipients.*
Objective 3.2: By 2019, the statewide average for adult CAHPS getting needed care-always or usually will increase from 82.45% to 86.45%.	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Objective 3.3: By 2019, the statewide average for child CAHPS getting care quickly-always or usually will increase from 86.06% to 89.06%.	Data Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*
Goal 4: Improve health care for program enrollees.	
Objective 4.1: By 2019, the state will maintain a total statewide CMS 416 EPSDT screening rate of at least 90%.	Data source: *CMS-416*
Objective 4.2: By 2019, the statewide weighted HEDIS rate for antidepressant medication management will be increased from 47.75% to 53.75% for the acute phase and from 32.19% to 38.19% for the continuation phase.	Date Source: *A Comparative Analysis of Audited Results from TennCare MCOs.*

Long-Term Services and Supports

Performance measures in the Quality Strategy specific to CHOICES were initially established based on certain Section 1915(c) waiver assurances and sub-assurances, including level of care, service plan, qualified providers, health and welfare, administrative authority, and participant rights. The table below reflects these core domains and performance measures and how TennCare monitors each under the 1115 waiver authority to ensure prompt remediation of individual findings and promote system improvements in the managed long-term services and supports delivery system. Additional measures were added for 2014 in anticipation of new standardized MLTSS program measures under development by NCQA. Beginning with the baseline year for Employment and Community First CHOICES in 2017, some of these measures will also be applied to the Employment and Community First CHOICES population (with separate sampling and reporting). In addition, one measure is added that is specific to Employment and Community First CHOICES.

Long-Term Services and Supports Goals		
Goal 1: CHOICES and Employment and Community First CHOICES members have a level of care determination indicating the need for institutional services prior to enrollment in CHOICES or Employment and Community First CHOICES, as applicable, and receipt of Medicaid-reimbursed HCBS.		
Domain	**Performance Measure**	**Measurement Method**
Level of Care	Number and percent of CHOICES Employment and Community First CHOICES members who had an approved CHOICES Pre-Admission Evaluation (i.e., nursing facility level of care eligibility) prior to enrollment in CHOICES or Employment and Community First CHOICES and receipt of Medicaid-reimbursed HCBS.	Data Source: MMIS report Sampling Approach: 100% of all CHOICES and Employment and Community First CHOICES members enrolled Frequency: Quarterly Remediation: TennCare is responsible for quarterly reports and review/analysis of data, as well as remediation of individual findings.
Goal 2: CHOICES members are offered a choice between institutional (NF) services and HCBS.		
Domain	**Performance Measure**	**Measurement Method**
Service Plan	Number and percent of CHOICES Group 2 member records reviewed with an appropriately completed and signed freedom of choice form that specifies choice was offered between institutional services and HCBS.	Data Source: Member record review Sampling Approach: Stratified, with strata comprised of CHOICES Group 2 members enrolled in each of the MCOs per region serving the CHOICES Group 2 population. For the first auditing year, sample size will be 60 records per stratum with a 10% oversample to determine subsequent error for future audits. For following years, sample size will be based on the first auditing year's sampling error in order to achieve a 95% confidence interval. Frequency: Semi-annually in April and October Remediation: TennCare is responsible for semi-annual member record review and review/analysis of data. MCO will be responsible for remediation of individual findings with review/validation by TennCare.

Goal 3: LTSS Assessment Composite		
Domain	**Performance Measure**	**Measurement Method**
Service Plan	Number and percent of CHOICES Group 2 and 3 and Employment and Community First CHOICES members reviewed for whom an assessment, including key elements specified in the CRA or by TennCare protocol, was completed within the timeframes specified in the Contractor Risk Agreement.	Data Source: Member Record Review Sampling Approach: Stratified, with strata comprised of CHOICES Groups 2 and 3 and Employment and Community First CHOICES members enrolled in each of the MCOs per region serving the CHOICES and/or Employment and Community First CHOICES population. The year one chart review will be a convenience sample of 25 records per MCO per region. Subsequent sample size will be based on the first auditing year's sampling error to achieve a 95% confidence interval. Any records used previously in a semi-annual audit will be excluded. Frequency: Annually in October Remediation: TennCare is responsible for annual member record reviews and review/analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.
Goal 4: LTSS Plan of Care Composite		
Domain	**Performance Measure**	**Measurement Method**
Service Plan	Number and percent of CHOICES Group 2 and 3 and Employment and Community First CHOICES member records reviewed in which a plan of care, or PCSP, was developed as specified by the Contractor Risk Agreement or by TennCare protocol, and was completed within the timeframes specified in the Contractor Risk Agreement.	Data Source: Member Record Review Sampling Approach: Stratified, with strata comprised of CHOICES Groups 2 and 3 and Employment and Community First CHOICES members enrolled in each of the MCOs per region serving the CHOICES and/or Employment and Community First HCBS population. A 95% confidence interval will be achieved. Any records used previously in a semi-annual audit will be excluded. Frequency: Annually in October Remediation: TennCare is responsible for annual member record reviews and review/analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.

Goal 5: Plans of Care are reviewed/updated at least annually.		
Domain	**Performance Measure**	**Measurement Method**
Service Plan	Number and percent of CHOICES Groups 2 and 3 and Employment and Community First CHOICES member records reviewed in which the plans of care or PCSPs (as applicable) were reviewed and updated prior to the member's annual review data.	Data Source: Member record review Sampling Approach: Stratified, with strata comprised of CHOICES Group 2 and 3 and Employment and Community First members enrolled in each of the MCOs per region serving the CHOICES and/or Employment and Community First CHOICES HCBS population. A 95% confidence interval will be achieved. Any records used previously in a semi-annual audit will be excluded. Frequency: Annually in October Remediation: TennCare is responsible for annual member record review and review/ analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.
Goal 6: Plans of Care reflect member goals, needs and preferences.		
Domain	**Performance Measures**	**Measurement Method**
Service Plan	Number and percent of CHOICES Groups 2 and 3 and Employment and Community First CHOICES member records reviewed whose plans of care or PCSPs, as applicable, clearly identify the member's goals, needs and preferences and include services and supports that are consistent with the member's goals, needs and preferences.	Data Source: Member record review Sampling Approach: Stratified, with strata comprised of CHOICES Group 2 and 3 and Employment and Community First CHOICES members enrolled in each of the MCOs per region servicing the CHOICES and/or Employment and Community First CHOICES HCBS population. A 95% confidence interval will be achieved. Any records used previously in a semi-annual audit will be excluded. Frequency: Annually in October Remediation: Tenncare is responsible for annual member record review and review/analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.

Goal 7: Employment and Community First CHOICES members of working age participate in an employment informed choice process to help them understand and explore individual integrated employment and self-employment options.		
Domain	**Performance Measure**	**Measurement Method**
Service Plan	Number and percent of Employment and Community First CHOICES member records reviewed in which there is signed documentation that, unless the member has decided to pursue employment or services to prepare for employment, indicates the employment informed choice process was completed for individuals needing community integrated supports and/or independent living skills training services.	Data Source: Member record review Sampling Approach: Employment and Community First CHOICES members enrolled in each of the MCOs per region serving the population. Sample size will be based on the first auditing year's sampling error in order to achieve a 95% confidence interval. Any records used previously in a semi-annual audit will be excluded. Frequency: Semi-annually in April and October Remediation: TennCare is responsible for semi-annual record review and review/analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.
Goal 8: CHOICES HCBS providers meet minimum provider qualifications established by the State prior to enrollment in CHOICES and delivery of HCBS.		
Domain	**Performance Measure**	**Measurement Method**
Qualified Providers	Number and percent of CHOICES and Employment and Community First CHOICES HCBS providers reviewed for whom the MCO provides documentation that the provider meets minimum qualifications established by the State and was credentialed by the MCO prior to enrollment in CHOICES and/or Employment and Community First CHOICES, as applicable, and delivery of HCBS.	Data Source: Provider record review Sampling Approach: Stratified, with strata comprised of HCBS providers contracted with each of the MCOs serving the CHOICES Group 2 and 3 population; sample size - 25 records per stratum. Sample size may be adjusted in subsequent years based on individual findings. Frequency: Annually Remediation: TennCare is responsible for annual provider record review and review/analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.

Goal 9: CHOICES Group 2 and 3 and Employment and Community First CHOICES members (or their family member/authorized representative, as applicable) receive education/information at least annually about how to identify and report instances of abuse, neglect, and exploitation.		
Domain	**Performance Measure**	**Measurement Method**
Health and Welfare	Number and percent of CHOICES Group 2 and 3 and Employment and Community First member records reviewed which document that the member (or their family member/authorized representative, as applicable) received education/information at least annually about how to identify and report instances of abuse, neglect and exploitation.	Data Source: Member record review Sampling Approach: Stratified, with strata comprised of CHOICES Group 2 and Employment and Community First members enrolled in each of the MCOs per region serving the CHOICES and Employment and Community First population. Sample size will be based on the first auditing year's sampling error in order to achieve a 95% confidence interval. Any records used previously in a semi-annual audit will be excluded. Frequency: Annually in October Remediation: TennCare is responsible for annual member record review and review/analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.
Goal 10: Critical incidents are reported within timeframes specified in the Contractor Risk Agreement.		
Domain	**Performance Measure**	**Measurement Method**
Health and Welfare	Number and percent of critical incident records reviewed in which the incident was reported within timeframes specified in the Contractor Risk Agreement.	Data Source: Sample record review Sampling Approach: Stratified, with strata comprised of reported incidents for CHOICES Group 2 and 3 and Employment and Community First CHOICES members enrolled in each of the MCOs per region serving the CHOICES Group 2 population. For CHOICEs, sample size will be based on the first auditing year's sampling error in order to achieve a 95% confidence interval. In the first year of Employment and Community First CHOICES, sample size will consist of all records, up to 25 per stratum. For following years, of Employment and Community First CHOICES, the sample size will be based on the first auditing year's sampling error in order to achieve a 95% confidence interval. Frequency: Semi-annually Remediation: TennCare is responsible for semi-annual record review and review/analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.

Goal 11: CHOICES members are informed of and afforded the right to request a Fair Hearing when services are denied, reduced, suspended, or terminated.		
Domain	**Performance Measure**	**Measurement Method**
Participant Rights	Number and percent of CHOICES Group 2 and 3 and Employment and Community First member records reviewed in which HCBS were denied, reduced, suspended, or terminated as evidenced in the Plan of Care or PCSP (as applicable) and, consequently, member was informed of and afforded the right to request a Fair Hearing as determined by the presence of a Grier consent decree notice.	Data Source: Member record review Sampling Approach: Stratified, with strata comprised of reported incidents for CHOICES Group 2 and 3 and Employment and Community First members enrolled in each of the MCOs per region serving the CHOICES and Employment and Community First CHOICES HCBS population. Sample size will be a subset of the sample used in Sub-Assurance 2. Frequency: Semi-annually in April and October Remediation: TennCare is responsible for semi-annual record review and review/analysis of data. MCOs will be responsible for remediation of individual findings with review/validation by TennCare.

Data Sources

HEDIS/CAHPS Report: A Comparative Analysis of Audited Results from TennCare Managed Care Organizations (MCOs)

Using individual MCO results, the External Quality Review Organization (EQRO) calculates the statewide weighted HEDIS rates and the statewide CAHPS averages in this annual report.

The Impact of TennCare: A Survey of Recipients

TennCare contracts with the Center for Business and Economic Research at the University of Tennessee Knoxville to conduct a survey of 5,000 Tennesseans to gather information on their perceptions of their health care. The design for the survey is a "household sample," and the interview is conducted with the head of the household. This report allows comparison between responses from all households and households receiving TennCare.

CMS-416 Report

The Statewide EPSDT Screening Rate is calculated by utilizing MCO encounter data submissions in accordance with specifications for the annual CMS-416 report.

Medicaid Management Information Systems (MMIS) Report

Monthly reports are generated by the MMIS to reflect CHOICES and Employment and Community First CHOICES enrollment.

CHOICES and Employment and Community First CHOICES Record Reviews (both member and provider records)

The CHOICES and Employment and Community First Record Reviews are conducted by TennCare Long Term Services and Supports staff to evaluate member or provider records, as applicable. The reviews are completed annually or semi-annually based on the performance measure associated with each

review.

CHOICES and Employment and Community First CHOICES Critical Incidents Audit

The CHOICES Critical Incident Audit and the Employment and Community First CHOICES Critical Incident Audits address MCO determination, documentation, responsiveness, and investigation of critical incidents with specific timeframes on a member specific basis. They also address the systemic response to patterns of incidents. These audits are conducted each year and the results are used to improve individual MCO performance and general program performance.

Employment Informed Choice Audit

This audit addresses MCO performance related to completion of required processes to help members understand and explore individual integrated employment and self-employment options. Compliance with this standard is also monitored through the quarterly MCO submission of the Employment and Community First CHOICES Employment Report and through the individual record reviews specified above.

Provider Qualifications Audit

TennCare assures that MCOs are contracting only with qualified providers through the CHOICES Provider Qualifications Audit and the Employment and Community First CHOICES Provider Qualifications Audit. These audits address MCO compliance with contract requirements by examining whether MCOs ensure that providers possess appropriate qualifications before serving CHOICES or Employment and Community First CHOICES members. The process must meet NCQA requirements as well as state requirements.

Other Data: In addition to the measures listed above, a baseline data plan has been developed for each MLTSS program component. These data plans are focused on collecting data to determine if the program is accomplishing its key policy goals as follows:

Baseline Data Plan CHOICES Program: The CHOICES baseline data plan is organized around five key program objectives. These objectives, together with the baseline measures and the data elements to be collected are provided below. All of the baseline data elements will be collected on the basis of program participation and program expenditures prior to or at the start of the CHOICES program. All of the CHOICES data elements identified below will be collected annually, beginning at one year after implementation, and measured against the baseline data elements each year.

Program Objective #1: Expand access to HCBS for older adults and adults with physical disabilities.

Baseline data elements:

- Number of older adults and adults with physical disabilities actively receiving HCBS as the time of CHOICES implementation and annually thereafter.
- Unduplicated number of older adults and adults with physical disabilities receiving HCBS during the 12 months prior to CHOICES implementation and annually thereafter.
- Number of persons receiving NF services at the time of CHOICES implementation and annually

thereafter.

- Unduplicated number of persons receiving NF services during the first year after CHOICES implementation and annually thereafter.

CHOICES Data Elements:

- Number of older adults and adults with physical disabilities actively receiving HCBS one year after CHOICES implementation and annually thereafter.
- Unduplicated number of older adults and adults with physical disabilities receiving HCBS during the first year after CHOICES implementation and annually thereafter.
- Number of persons receiving NF services one year after CHOICES implementation and annually thereafter.
- Unduplicated number of persons receiving NF services during the first year after CHOICES implementation and annually thereafter.

Program Objective #2: Rebalance TennCare spending on long-term services and supports to increase the proportion that goes to HCBS.

Baseline Data Elements:

- HCBS expenditures on older adults and adults with physical disabilities during the 12 months prior to CHOICES implementation.
- HCBS expenditures on older adults and adults with physical disabilities during the 12 months prior to CHOICES implementation as a percentage of total long-term services and supports expenditures (excluding expenditures on LTSS for individuals with I/DD).
- NF expenditures during the 12 months prior to CHOICES implementation.
- NF expenditures during the 12 months prior to CHOICES implementation as a percentage of total long-term care expenditures (excluding expenditures on LTSS for individuals with I/DD).

CHOICES Data Elements:

- HCBS expenditures (based on encounters, not cap payments) during the first year following CHOICES implementation and annually thereafter.
- NF expenditures (based on encounters, not cap payments) during the first year following CHOICES implementation and annually thereafter.
- HCBS expenditures (based on encounters, not cap payments) during the first year following CHOICES implementation and annually thereafter as a percentage of total long-term care expenditures (excluding expenditures on the population of persons with mental retardation).
- NF expenditures (based on encounters, not cap payments) during the first year following CHOICES implementation and annually thereafter as a percentage of total long-term care expenditures (excluding expenditures on the population of persons with mental retardation).

Program Objective #3: Provide cost effective care in the community for persons who would otherwise require NF care.

Baseline Data Elements:

- Average per person HCBS expenditures on older adults and adults with physical disabilities during the 12 months prior to CHOICES implementation.
- Average per person NF expenditures during the 12 months prior to CHOICES implementation.

CHOICES data elements:

- Average per person HCBS expenditures on older adults and adults with physical disabilities (based on encounters, not cap payments) during the first year following CHOICES implementation and annually thereafter.
- Average per person NF expenditures on older adults with physical disabilities (based on encounters, not cap payments) during the first year following CHOICES implementation and annually thereafter.

Program Objective #4: Provide HCBS that will enable persons who would otherwise be required to enter NFs to be diverted to the community.

Baseline data elements:

- Average length of stay in HCBS during the 12 months prior to CHOICES implementation.
- Percent of new LTSS recipients admitted to NFs during the 12 months prior to CHOICES implementation.

CHOICES Data Elements:

- Average length of stay in HCBS during the first year after CHOICES implementation and annually thereafter.
- Percent of new LTSS recipients admitted to NFs during the first year after CHOICES implementation and annually thereafter.

Program Objective #5: Provide HCBS that will enable persons receiving services in NFs to be able to transition back to the community.

Baseline data elements:

- Average length of stay in NFs during the 12 months prior to CHOICES implementation.
- Number of persons transitioned from NFs to HCBS during the 12 months prior to CHOICES implementation, by average length of stay in the NF.

CHOICES data elements:

- Average length of stay in NFs during the first year after CHOICES implementation and annually thereafter.
- Number of persons who transitioned from NFs to HCBS during the first year following CHOICES implementation and annually thereafter, by average length of stay in the NF.

Baseline Data Plan: Employment and Community First CHOICES Program: This baseline data plan is also organized around five key program objectives. These objectives, together with the baseline measures and the data elements to be collected are provided below. All of the elements will be collected on the basis of program participation and program expenditures prior to or at the start of the Employment and

Community First CHOICES program, except as otherwise specified below. All of the data elements identified below will be collected annually, beginning at one year after implementation, and measured against the baseline data elements each year, except as otherwise specified.

Program Objective #1: Expand access to HCBS for individuals with intellectual and developmental disabilities.

Baseline data elements:

- Number of individuals with ID actively receiving HCBS at the time of Employment and Community First CHOICES implementation.
- Unduplicated individuals with ID receiving HCBS during the 12 months prior to Employment and Community First CHOICES implementation.

Employment and Community First baseline data elements:

- Number of individuals with ID actively receiving HCBS one year after Employment and Community First CHOICES implementation and annually thereafter.
- Unduplicated number of individuals with ID receiving HCBS during the first year after Employment and Community First CHOICES implementation and annually thereafter.

Data shall be reported for Employment and Community First CHOICES and across Medicaid HCBS programs including Section 1915 (c) waivers.

Baseline data elements – Individuals with developmental disabilities (other than intellectual disabilities):

- Number of individuals with DD actively receiving HCBS at the time of Employment and Community First CHOICES implementation.
- Unduplicated individuals with DD receiving HCBS during the 12 months prior to Employment and Community First CHOICES implementation.

Employment and Community First CHOICES data elements – individuals with developmental disabilities (other than intellectual disabilities):

- Number of individuals with DD actively receiving HCBS one year after Employment and Community First CHOICES implementation and annually thereafter.
- Unduplicated number of individuals with DD receiving HCBS during the first year after Employment and Community First CHOICES implementation and annually thereafter.

Data shall be reported only for Employment and Community First CHOICES.

Baseline data elements – individuals with intellectual and developmental disabilities:

- Number of individuals with I/DD actively receiving HCBS at the time of Employment and Community First CHOICES implementation.
- Unduplicated individuals with I/DD receiving HCBS during the 12 months prior to Employment

and Community First CHOICES implementation.

Employment and Community First CHOICES data elements – individuals with intellectual and developmental disabilities:

- Number of individuals with I/DD actively receiving HCBS one year after Employment and Community First CHOICES implementation and annually thereafter.
- Unduplicated individuals with I/DD receiving HCBS during the first year after Employment and Community First CHOICES implementation and annually thereafter.

Data shall be reported for Employment and Community First CHOICES and across Medicaid HCBS programs, including Section 1915(c) waivers.

Program Objective #2: Provide more cost-effective services and supports in the community for persons with intellectual and developmental disabilities.

Baseline data element:

- Average per person LTSS expenditures on individuals with I/DD during the 12 months prior to Employment and Community First CHOICES implementation.

Employment and Community First CHOICES data element:

- Average per person LTSS expenditures on individuals with I/DD (based on encounters, not cap payments) during the first year following Employment and Community First CHOICES implementation and annually thereafter.

Data shall be reported for Employment and Community First CHOICES, Section 1915(c) waivers, ICF/IID services, and across Medicaid HCBS (including Section 1915(c) waivers and LTSS, including ICF/IID.

Program Objective #3: Continue balancing TennCare spending on long-term services and supports for individuals with intellectual and developmental disabilities to increase the proportion spent on HCBS.

Baseline data elements:

- HCBS expenditures on individuals with I/DD during the 12 months prior to Employment and Community First CHOICES implementation.
- HCBS expenditures on individuals with I/DD during the 12 months prior to Employment and Community First CHOICES implementation as a percentage of total LTSS expenditures for individuals with I/DD.
- ICF/IID expenditures during the 12 months prior to Employment and Community First CHOICES implementation.
- ICF/IID expenditures during the 12 months prior to Employment and community First CHOICES implementation as a percentage of total LTSS expenditures for individuals with I/DD.

Employment and Community First CHOICES data elements:

- HCBS expenditures on individuals with I/DD (based on encounters, not cap payments) during the first year following Employment and Community First CHOICES implementation and

annually thereafter.

- ICF/IID expenditures during the first year following Employment and Community First CHOICES implementation and annually thereafter.
- HCBS expenditures on individuals with I/DD (based on encounters, not cap payments) during the first year following Employment and Community First CHOICES implementation, and annually thereafter, as a percentage of total LSS expenditures for individuals with I/DD.
- ICF/IID expenditures during the first year following Employment and Community First CHOICES implementation, and annually thereafter, as a percentage of total LTSS expenditures for individuals with I/DD.

Program Objective #4: Increase the number and percentage of persons with intellectual and development disabilities enrolled in HCBS programs who are employed in an integrated setting earning at or above the minimum wage.

Baseline data elements:

- Number of individuals with I/DD enrolled in HCBS programs who are employed in an integrated setting earning at or above the minimum wage at the time of Employment and Community First CHOICES implementation.
- Percent of individuals with I/DD enrolled in HCBS programs who are employed in an integrated setting earning at or above the minimum wage at the time of Employment and Community First CHOICES implementation.

Employment and Community First CHOICES data elements:

- Number of individuals with I/DD enrolled in HCBS programs who are employed in an integrated setting earning at or above the minimum wage one year after Employment and Community First CHOICES implementation and annually thereafter.
- Percent of individuals with I/DD enrolled in HCBS programs who are employed in an integrated setting earning at or above the minimum wage during the first year following Employment and Community First CHOICES implementation and annually thereafter.

Data shall be reported for Employment and Community First CHOICES and across Medicaid HCBS programs including Section 1915(c) waivers.

Program Objective #5: Improve the quality of life of individuals with intellectual and developmental disabilities enrolled in HCBS programs.

Baseline data element:

- Perceived quality of life of individuals with I/DD upon enrollment into Employment and Community First CHOICES as measured by the National Core Indicators Survey.

Employment and Community First CHOICES data element:

- Perceived quality of life of individuals with I/DD one year after enrollment into Employment and Community First CHOICES as measured by the National Core Indicators Survey.

Development and Review of Quality Strategy

CMS Requirement: Include a description of the formal process used to develop the quality strategy. This must include a description of how the state obtained the input of beneficiaries and other stakeholders in the development of the quality strategy. (CFR 438202(b))

CMS Requirement: Include a description of how the state made (or plans to make) the quality strategy available for public comment before adopting it in final. (CRF 438202(b))

Steps for revising the *TennCare Quality Strategy* include:

- Convening a strategic planning meeting for all Quality Oversight staff, the Division of HealthCare Informatics, and the EQRO. At this meeting, a review of all data submitted by the MCOs, data collected by the EQRO, and statewide data collected from enrollee encounters is conducted.
- Collaboration with appropriate divisions within TennCare, with the Division of Quality Oversight holding responsibility for creating the draft.
- Review of the draft by TennCare's Chief Medical Officer.
- After a final draft is completed, the Quality Strategy will be posted on TennCare's website for public review. MCOs, advocacy groups, TennCare's Medical Care Advisory Committee and beneficiaries will be notified of the posting and given a specific timeframe and e-mail address for comments to be returned to TennCare.
- After the designated time frame has elapsed, a final report will be developed including appropriate recommendations made during the public review period.

CMS Requirement: Include a timeline for assessing the effectiveness of the quality strategy (e.g., monthly, quarterly, annually). (CRF 438.202 (d))

The effectiveness of the Quality Strategy is assessed annually.

CMS Requirement: Include a timeline for modifying or updating the quality strategy. If this is based on an assessment of "significant changes," include the state's definition of "significant changes." (CFR 438.202 (d))

The Bureau of TennCare will update its quality strategy annually and will include significant changes that have occurred as well as updated evaluation data. Significant changes are defined as changes that: 1) alter the structure of the TennCare Program; 2) change benefits; and 3) include changes in MCCs. Updated interventions/activities will also be provided. Every three years, TennCare will coordinate a comprehensive review and update.

SECTION II: ASSESSMENT

Quality and Appropriateness of Care

CMS Requirement: Summarize state procedures that assess the quality and appropriateness of care and services furnished to all Medicaid enrollees under the MCO and PIHP contracts, and to individuals with special health care needs. This must include the state's definition of special health care needs. (CFR 438.204(b)(1)).

Since TennCare's inception, a continuous quality improvement (QI) process has been in place and has been refined over time. Assessment occurs in a variety of ways. Examples of these are listed below.

- TennCare requires all MCOs to be NCQA accredited. MCOs are required, by contract, to provide TennCare with the entire accreditation survey and associated results. They are also required to submit to TennCare their annual NCQA Accreditation update.
- All of the contracted MCOs are required to submit a full set of HEDIS and CAHPS data to TennCare annually. This information is also provided to Qsource, Tennessee's EQRO, for review and trending. Qsource then prepares an annual report of findings for the Bureau.
- The MCOs are contractually required to submit a variety of reports to various divisions within the Bureau of TennCare. The reports include performance improvement projects (PIPs), population health, EPSDT, dental, CHOICES care coordination, annual quality improvement/utilization management (QI/UM) descriptions, evaluations and work plans, provider satisfaction surveys, dual eligible care coordination, etc. These reports are reviewed either quarterly or annually, depending on the report, and an annual analysis is completed.
- Qsource conducts an Annual Quality Survey (AQS) for each MCO and the Dental Benefits Manager that evaluates contractual requirements related to quality.
- Annual audits are conducted related to compliance with federal requirements for Abortions, Sterilizations, and Hysterectomies (ASH).
- Quality Oversight and Long Term Services and Supports staff conduct MCO audits related to compliance with the federal Standard Terms and Conditions for TennCare's CHOICES program and the Employment and Community First CHOICES programs.
- Collaborative workgroups, with all MCOs, are held periodically. These workgroups address issues related to Quality Redesign, EPSDT outreach, and high risk maternity.
- Periodic meetings are held collaboratively with both MCOs and Dual Special Needs Populations

(D-SNPs) to discuss ways of coordinating care.

CMS Requirement: Detail the methods or procedures the state uses to identify the race,Pe ethnicity, and primary language spoken of each Medicaid enrollee. States must provide this information to the MCO and PIHP for each Medicaid enrollee at the time of enrollment. (CFR 438.204(b)(2))

TennCare identifies the race, ethnicity, and primary language spoken of its enrollees upon application. Eligibility for TennCare and other Medicaid programs is determined by the Bureau of TennCare and the Federally Facilitated Marketplace (FFM). The application includes questions about race and ethnicity and instructs the applicant that response to these questions is voluntary. The application also includes questions about the applicant's preferred written and spoken language.

The contracts with the MCOs contain eligibility and enrollment data exchange requirements in CRA § 2.23.5. The requirements state that the MCOs must receive, process, and update enrollment files sent daily by TennCare, and the MCOs must update eligibility/enrollment databases within 24 hours of receipt of enrollment files.

TennCare uses the enrollment file information about language and data collected from TennCare's call center and TennCare's contractors' quarterly and annual language and communication assistance reports to identify those Limited English Proficiency (LEP) groups constituting 5% of the TennCare population or 1,000 enrollees, whichever is less. In CRA § 2.17.2.6, the contract with the MCOs requires that all vital documents be translated and available to the LEP groups identified by TennCare within 90 calendar days of notification from TennCare. The contracts with the MCOs also require the MCO to develop written policies and procedures for the provision of language interpreter and translation services to members in CRA § 2.18.2.

The contracts require that member materials such as the member handbook and the quarterly member newsletter contain statements on how to obtain information in alternative formats or how to access interpretation services as well as a statement that interpretation and translation services are free in CRA
§ 2.17.2 and 2.18.2.

CMS Requirement: Document any efforts or initiatives that the state or MCO/PIHP has engaged in to reduce disparities in health care.

TennCare addresses disparities through tracking the rates of illness and chronic conditions in relation to key demographic factors. TennCare contractually requires the MCOs to include QM/QI activities to improve healthcare disparities identified through data collection and requires them to include the methodology utilized for collecting the data as well as interventions taken to enhance the accuracy of the data collected. Additionally, TennCare is directly working to reduce healthcare disparities through contractually requiring its MCOs to provide essential networks and services required to address disparity issues. These requirements include:

- Ensuring an adequate medical provider network of appropriately credentialed providers increasingly committed to evidence-based practices to improve access to care and higher quality outcomes.
- Requiring opt-out Population Health services to be available to all TennCare members while providing intensive case management to those high-risk members who choose to opt-in to certain aspects of the program.

- Proactively promoting health screenings and preventive healthcare services to all TennCare members.
- Providing care coordination and direct support services for CHOICES HCBS enrollees. CHOICES care coordination provides access to several important determinants of health often lacking for our long-term care population, including:
  - Nutritious food delivered by local meals-on-wheels programs or prepared by homecare providers;
  - Safer home environments by building ramps and installing safety equipment, providing Personal Emergency Response Systems (PERS) and pest control services, and providing light housekeeping support; and
  - Personal care and other medical, behavioral, and long-term care services identified as needed through regular home visits by care coordinators.
- Collaborating with TennCare to develop and implement adult and child health disparities surveys. The adult and child health disparities surveys capture the following five (5) measurements: access to care; provider communication; provider rating; MCO communication; and MCO rating. The results of these surveys will be segmented by the members' race and ethnicity, language, disability, and sex statuses and will be used to create a health disparities report. The report will include recommendations for implementing practices to reduce health disparity issues. CRA sections 2.30.22.4, 2.30.22.4.1, and 2.30.22.4.2.

Coordination of Care for Dual Members

After withdrawing from the Financial Alignment Demonstration, Tennessee is leveraging Medicare Part C authority and the D-SNP platform to help align members in the same health plan for Medicare and Medicaid benefits. TennCare utilizes the MIPPA agreement to require activities designed to support improved coordination of benefits across both programs—for aligned members as well as members enrolled in a non-aligned D-SNP.

To promote member alignment in MCO and D-SNP enrollment, TennCare has employed the strategies listed below:

- *Procurement*: during the last Medicaid procurement (for contract term beginning 2015), all plans were required to have a statewide companion D-SNP or to include in their proposals a plan for establishing a statewide companion D-SNP by 2016. Two MCOs now have fully operational statewide D-SNPs; the third has a D-SNP that will expand operation to 92 of 95 Tennessee counties beginning in 2016.
- *Member Reassignment*: With the implementation of the new statewide Medicaid contracts, TennCare reassigned members to new MCOs in each grand region of the state to equalize membership enrollment across all MCOs. A key priority in the statewide implementation was reassignment to a Medicaid MCO that would achieve alignment with the member's D-SNP enrollment. Reassignment notices included explanations to help selected members understand why they might want to proceed with reassignment to aligned enrollment, rather than opting to remain with their current Medicaid MCO.
- *MIPPA Contracting*: While TennCare will continue to maintain MIPPA agreements with current D-SNPs, we will not contract with any new D-SNPs that are not contracted (through a competitive procurement process) to also provide Medicaid benefits.
- *Member Education*: A process has been implemented for sending educational letters to Medicaid members in advance of their attaining Medicare eligibility to encourage them to enroll in an aligned D-SNP.
- *Hardship*: Going forward, the hardship criteria will be modified to include requests that would

result in alignment with the member's D-SNP.

- *Seamless Conversion*: TennCare has been working with the contracted Medicaid plans that have companion D-SNPs to support them in implementing seamless conversion of Medicaid enrollees attaining Medicare eligibility pursuant to federal requirements. Currently two plans are approved for seamless conversion, with one operational at this point. Prospective Medicare enrollment dates derived from the MMA file submission process are submitted to assist them in identifying their members attaining Medicare eligibility. Upon notification of a Medicaid member's prospective Medicare eligibility date, the state also sends a letter to the member informing them of their upcoming Medicare enrollment, the benefits of enrolling in an aligned D-SNP, and encouraging them to remain enrolled in the aligned plan.
- *Coordination of Benefits*: TennCare exchanges full Medicaid enrollment files with all D-SNPs to assure they are aware of the member's Medicaid MCO assignment. Medicare enrollment data is also provided to Medicaid MCOs for the same purposes. MIPPA agreements include strengthened coordination requirements for D-SNPs, specifically as it relates to discharge planning, care transitions, and use of long-term services and supports. Medicare data, including D-SNP encounter data required by the Medicaid Agency), is also provided to the MCOs for care coordination purposes. Additionally, D-SNPs are required to exchange daily inpatient admission and discharge reports, including observation stays, to help facilitate timely discharge planning.

Prescription for Success

In 2014, TennCare partnered with the Tennessee Department of Mental Health and Substance Abuse Services, in conjunction with the U.S. Drug Enforcement Administration, the Tennessee Bureau of Investigation, and the State Departments of Health, Safety and Homeland Security, Corrections, and Children's Services to develop a report entitled *Prescription for Success: Statewide Strategies to Prevent and Treat the Prescription Drug Abuse Epidemic in Tennessee*. This report outlines a comprehensive, multi-faceted plan to combat prescription drug abuse in Tennessee and includes information on each partner's current strategies in addition to the partnership's future collaborative goals. TennCare's current strategies include:

- *Covered Treatment Services* – TennCare covers a comprehensive continuum of substance abuse services for its beneficiaries, including outpatient, inpatient, and residential treatment/detoxification and medication-assisted treatment.
- *Formulary Regulations* – The TennCare Formulary has regulations in place (i.e., five prescription limit per month, policy for tamper-resistant prescriptions, and strict limitations on coverage of products containing buprenorphine) to prevent doctor shopping and prescription abuse.
- *Pharmacy "Lock-In" Program* – TennCare possesses the authority to restrict or "lock-in" TennCare enrollees to a limited and specified number of pharmacy providers if it is determined that the enrollee has abused TennCare's Pharmacy Program. There were 511 beneficiaries locked-in in 2012.
- *Prescriber Identification* – TennCare has developed a unique and innovative algorithm to identify prescribers who are potentially prescribing opioids in a way that is very inconsistent with their peers. Identified providers are manually evaluated by TennCare's pharmacy staff, and appropriate interventions (e.g., targeted education, blocking of prescriptions by the TennCare Drug Utilization Review Board, etc.) are employed based on the results of the manual evaluation.

Opioid Utilization: The TennCare Pharmacy Advisory Committee adopted criteria to curb potential over utilization and/or misuse of psychotropic medications in enrollees diagnosed with I/DD.

TennCare's pharmacy division is working closely with the Pharmacy Benefits Manager to address over prescribing and misuse of opioids by adopting portions of the Centers for Disease Control's opioid prescribing guidelines.

Long Acting Removable Contraceptives (LARC): The TennCare Pharmacy Division implemented an Outpatient Clinic or Practice LARC project on August 1, 2016 with Bayer Pharmaceuticals and Rick Sain Specialty Pharmacy. The project allows physicians to obtain Intrauterine Contraceptive Devices (IUD) on a consignment type basis to insert at a scheduled appointment and thus avoiding a follow-up visit by the enrollee. The intent of the project is to reduce the number of babies born with Neonatal Abstinence Syndrome (NAS), unintended pregnancies, abortions, etc. The initial pilot targeted 25 physicians in the first month which has been increased to 37 clinics in month two. The goal is to eventually implement this project state-wide.

National Performance Measures

CMS Requirement: Include a description of any required national performance measures and levels identified and developed by CMS in consultation with states and other stakeholders. (CFR 438.204(c))

At this time, CMS has not identified any required national performance measures.

CMS Requirement: Indicate whether the state plans to voluntarily collect any of the CMS core performance measures for children and adults in Medicaid/CHIP. If so, identify state targets/goals for any of the core measures selected by the state for voluntary reporting.

Child Health Quality Measures:

Goals reflect significant improvement over 2016 rates using the NCQA Minimum Effect Size Change Methodology for all HEDIS/CAHPS measures.

Measure Name	*2016 Data*	*2019 Goal*
Timeliness of Prenatal Care	64.69%	69.69%
Frequency of Ongoing Prenatal Care (≥ 81% of expected visits) *	55.51%	61.51%
Childhood Immunization Status		
• DTaP/DT	76.91%	80.91%
• IPV	91.23%	93.23%
• MMR	88.46%	91.46%
• HiB	88.77%	91.77%
• Hepatitis B	92.14%	95.14%
• VZV	88.52%	91.52%
• Pneumococcal Conjugate	79.20%	83.20%
• Hepatitis A	87.18%	90.18%
• Rotavirus	69.62%	74.62%
• Influenza	42.86%	48.86%
• Combination 2	74.27%	69.27%
• Combination 3	71.88%	76.99%
• Combination 4	70.27%	75.27%
• Combination 5	57.87%	63.87%
• Combination 6	37.28%	38.28%
• Combination 7	57.32%	63.32%

• Combination 8	37.02%	43.02%
• Combination 9	31.78%	37.78%
• Combination 10	36.64%	42.64%
Adolescent Immunization Status		
• Meningococcal	67.84%	72.84%
• Tdap/Td	81.80%	85.80%
• Combination 1	67.13%	72.13%
Weight Assessment and Counseling for Nutritional and Physical Activity for Children/Adolescents		
• BMI Percentile (3 - 11 years)	71.33%	76.33%
• BMI Percentile (12 - 17 years)	65.74%	70.74%
• Counseling for Nutrition (3 - 11 years)	62.76%	67.76%
• Counseling for Nutrition (12 - 17 years)	54.98%	60.98%
• Counseling for Physical Activity (3 - 11 years)	53.08%	59.08%
• Counseling for Physical Activity (12 - 17 years)	54.47%	60.08%
Chlamydia Screening	34.0%	40.0%
Well-Child Visits in the First 15 Months of Life: Six or More Visits	69.5%	74.5%
Well-Child Visits in the 3rd, 4th, 5th, and 6th Years of Life	67.7%	72.5%
Adolescent Well-Care Visits	41.6%	47.6%
Child and Adolescent Access to Primary Care Practitioners		
• 12-24 months	95.5%	97.5%
• 25 months – 6 years	89.6%	92.6%
• 7 – 11 years	93.8%	95.8%
• 12 – 19 years	90.3%	93.3%
Follow-up Care for Children Prescribed Attention Deficit Hyperactivity Disorder (ADHD)		
• Initiation Phase	42.1%	47.1%
• Continuation and Follow-Up Phase	52.1%	58.1%
Follow-Up After Hospitalization for Mental Illness		
• 7 day follow- up	61.6%	66.6%
• 30 day follow-up	78.3%	82.3%
Medication Management for People with Asthma – 50%		
• Ages 5-11	56.1%	62.1%
• Ages 12-18	53.1%	59.1%
Medication Management for People with Asthma – 75%		
• Ages 5-11	32.5%	38.5%
• Ages 12-18	23.2%	29.2%
Human Papillomavirus Vaccine for Female Adolescents	15.89%	21.89%
Dental Sealants – 6-9 Years Old	24.8%	30.89%
Consumer Assessment of Health Plans – Child Medicaid Survey		
• Getting Needed Care (Always + Usually)	86.6%	89.6%
• Getting Care Quickly (Always + Usually)	91.58%	94.58%
• How Well Doctors Communicate (Always + Usually)	93.79%	95.79%
• Customer Service (Always + Usually)	89.23%	92.23%
• Shared Decision Making (Yes)	80.49%	84.49%
• Rating of All Health Care (9+10)	70.94%	75.94%
• Rating of Personal Doctor (9+10)	76.89%	80.89%
• Rating of Specialist Seen Most Often (9+10)	75.96%	79.96%

• Rating of Health Plan (9+10)	73.62%	78.62%
Consumer Assessment of Health Plans – Children With Chronic Conditions		
• Getting Needed Care (Always + Usually)	87.93%	90.93%
• Getting Care Quickly (Always + Usually)	93.57%	95.57%
• How Well Doctors Communicate (Always + Usually)	94.22%	96.22%
• Customer Service (Always + Usually)	89.79%	92.79%
• Shared Decision Marking (Yes)	85.83%	88.83%
• Rating of All Health Care (9+10)	69.52%	74.52%
• Rating of Personal Doctor (9+10)	75.45%	79.45%
• Rating of Specialist Seen Most Often (9+10)	72.87%	77.87%
• Rating of Health Plan (9+10)	69.18%	74.18%
• Access to Specialized Services (Always + Usually)	80.20%	84.20%
• FCC-Doctor or Nurse Who Knows Child (Yes)	90.95%	93.0%
• Coordination of Care (Yes)	77.58%	81.58%
• FCC – Getting Needed Information (Always + Usually)	91.11%	94.11%
• Access to Prescription Medicines (Always + Usually)	92.63%	95.63%

Adult Quality Measures:

Goals reflect significant improvement over 2016 rates using the NCQA Minimum Effect Size Change methodology for all HEDIS and CAHPS measures.

Measure Name	*2016 Data*	*2019 Goal*
Adult BMI Assessment*	82.46%	86.4%
Breast Cancer Screening*	54.47%	60.47%
Cervical Cancer Screening	55.60%	61.60%
Chlamydia Screening in Women Ages 21-24	54.61%	57.61%
Follow-Up After Hospitalization for Mental Illness		
• 7 Day Follow-Up	55.95%	61.95%
• 30 Day Follow-Up	70.63%	75.63%
Controlling High Blood Pressure*	55.10%	61.10%
Comprehensive Diabetes Care: Hemoglobin A1c Testing*	82.59%	86.59%

• Rating of Specialist Seen Most Often (9+10)	67.25%	72.25%
• Rating of Health Plan (9 + 10)	58.71%	64.71%

*Data was not collected according to ages specified.

Monitoring and Compliance

CMS Requirement: Detail procedures that account for the regular monitoring and evaluation of MCO and PIHP compliance with the standards of subpart D (access, structure and operations, and measurement and improvement standards). (CFR 438.204(b)(3))

NCQA Accreditation – Each MCO must obtain and maintain NCQA accreditation. Failure to obtain and/or maintain accreditation is considered to be a breach of the Contractor Risk Agreement (CRA) and will result in termination of the Agreement. Achievement of provisional accreditation status requires a corrective action plan within 30 days of receipt of notification from NCQA and may result in termination of the Agreement. Each MCO is required to submit every accreditation report immediately upon receipt of the written report from NCQA. It is then reviewed by staff to determine areas of deficiency. If the reviewer deems necessary, a corrective action plan may be required.

Quarterly and Annual Reports from Managed Care Contractors – All MCCs are required to submit a variety of reports to TennCare on either a monthly, quarterly or annual basis. When received through a secure tracking system, each report is reviewed by staff and a corrective action plan is required for any report deemed deficient. Liquidated damages may be applied for deficient reports. Information from the reports is used by program staff to help monitor compliance with program requirements. Examples of reports include Population Health, EPSDT Outreach, Enrollment and Disenrollment, Community Outreach, Behavioral Health, Case Management, Nursing Facility Diversion Activities, Nursing Facility to Community Transition, CHOICES and Employment and Community First CHOICES, HCBS Late and Missed Visits, CHOICES Care Coordination, HCBS Consumer Direction, CHOICES and Employment and Community first CHOICES Money Follows the Person, Cost and Utilization, Quality

Management/Quality Improvement, NCQA Accreditation, Performance Improvement Projects, CHOICES Critical Incidents, CHOICES Caseload and Staffing Ratio, Employment and Community First CHOICES Caseload and Staffing Ratio, HCBS Setting Compliance Committee, Employment and Community First CHOICES Critical Incidents, Employment and Community First CHOICES Support Coordination, Employment and Community First Reimbursement Services Report, Employment and Community First CHOICES Housing Profile Assessment, Employment and Community First CHOICES Employment, Employment and Community First CHOICES Qualified Workforce Strategies, HEDIS/CAHPS, Nurse Triage Line, Utilization Management Phone Line, Emergency Department (ED) Assistance Tracking, ED Threshold, Provider Satisfaction, Financial Management, Provider Networks, Customer Service, and Fraud and Abuse.

HEDIS results – Annually each MCO is required to submit all HEDIS measures designated by NCQA as relevant to Medicaid, with an exception for dental measures. The results must be reported separately for each Grand Region in which the MCO operates. The MCO must contract with an NCQA certified HEDIS auditor to validate the processes in accordance with NCQA requirement. HEDIS data is then submitted to both TennCare and the EQRO, which provides analyses of the data as well as a written comparative report.

Performance Improvement Projects (PIPs) – All MCOs are required to submit at least two clinical and three non-clinical PIPs annually. The two clinical PIPs must include one in the area of behavioral health that is relevant to one of the Population Health programs for bipolar disorder, major depression, or schizophrenia, and one in the area of either child health or perinatal (prenatal/postpartum) health. One of the three non-clinical PIPs must be in the area of long-term services and supports. All PIPs must be in accordance with CMS Protocols for Performance Improvement Projects. After three years, a decision is made jointly between the MCO and TennCare on the continuation of the PIP.

Annual Quality Survey – The EQRO is contractually required to conduct an Annual Quality Survey of each MCC to assure compliance with contractual requirements. As part of the preparation for the survey, the EQRO, in conjunction with TennCare, reviews all contractual standards for changes that have occurred during the previous year and develops the criteria for review. EQRO staff conducts the survey and provide a detailed written report of findings for each MCO. If an MCO scores less than 100% on any element, a corrective action plan must be submitted within two weeks of receipt of the findings. Both the EQRO and TennCare staff review the corrective action plans to ensure the MCCs take appropriate action. Follow-up on the plans is conducted by the TennCare Division of Quality Oversight.

Site visits/collaborative work groups – Both the Division of Quality Oversight and the Behavioral Health Operations Unit conduct periodic site visits to learn about and monitor various aspects of MCC activities. On a semi-annual basis, or more frequently if needed, TennCare staff meet with each MCO to receive updates on different initiatives and special projects. The Division of Quality Oversight meets with the Quality Directors on a monthly basis to discuss issues, projects, etc. and participates on multiple workgroups facilitated by the Tennessee Department of Health. Additionally, TennCare and the MCOs have created Technical Advisory Groups for Tennessee Health Link implementation and Episodes of Care. Other workgroups that TennCare Behavioral Health staff participates in include

TDMHSAS Planning and Policy Council, Tennessee Suicide Prevention Network (TSPN) Zero Suicide Initiative Task Force, Children's Cabinet state-wide, multi-agency Collaboration Pilot, Department of Children's Services/TennCare Select Coordination of Care Meeting and Tennessee Association of Mental Health (TAMHO) Finance and Administration meetings.

Audits/Medical Record Reviews – Either annually or semi-annually the following Medical Record Reviews (MRRs) are conducted by either the EQRO or the Division of Quality Oversight.

- An EPSDT Medical Record Review is conducted annually by the EQRO. TennCare staff participates in the training of auditors and develop the content for review. Reviews are primarily conducted at provider offices and are used as an educational opportunity related to the components of EPSDT screenings.
- A sample of provider records is reviewed to determine compliance with Abortion, Sterilization, and Hysterectomy (ASH) federal regulations.
- CHOICES and Employment and Community First CHOICES chart reviews are conducted to determine compliance with federal and/or state standards for Level of Care, Plans of Care, Freedom of Choice, Qualified Providers, Critical Incidents, Participant Rights, and Abuse and Neglect Education. Some of these areas are audited annually while some are audited bi-annually.
- Chart reviews are conducted on a quarterly basis by desk audits to determine compliance with the coordination of benefits for members who receive services from an MCO and are also enrolled in a Home and Community Based Services (HCBS), Department of Intellectual and Developmental Disabilities (DIDD) Waiver.

Provider Validation Surveys – TennCare's EQRO is required to conduct a quarterly provider data validation (PDV) survey. The purpose of this activity is to determine the accuracy of the provider data files submitted by the TennCare MCCs and to use the results as a proxy to determine the extent to which providers are available and accessible to TennCare members. Liquidated damages are recommended each quarter if data for more than 10% of providers is incorrect for each data element.

Provider Satisfaction Surveys – Each MCO is required to submit an annual Provider Satisfaction Survey Report that encompasses both physical and behavioral health. The report must summarize the provider survey methods and findings and must provide an analysis of opportunities for improvement. An additional CHOICES and Employment and Community First CHOICES survey of providers is also required. This report must address results for CHOICES and Employment and Community First CHOICES long-term services and supports providers. It also must include a summary of survey methods and findings as well as an analysis of opportunities for improvement.

Customer Satisfaction Surveys

- Annually each MCO must conduct a CAHPS survey utilizing a vendor that is certified by NCQA to perform CAHPS surveys. The surveys conducted are the CAHPS Adult Survey, the CAHPS Child Survey, and the CAHPS Children with Chronic Conditions Survey. The data is then submitted to both TennCare and the EQRO, which provides analyses of the data as well as a written report.
- TennCare contracts with The University of Tennessee Center for Business and Economic Research to conduct an annual survey of 5,000 Tennesseans to gather information on their

perceptions of their health care. The design for the survey is a "household sample," and the interview is conducted with the head of the household. The report, *The Impact of TennCare: A Survey of Recipients*, allows comparison between responses from all households and households receiving TennCare.

- TennCare contracts with the nine Area Agencies on Aging and Disability, the State's Single Point of Entry, to conduct a face-to-face CHOICES Customer Satisfaction Survey. Previously, TennCare contracted with the EQRO, Qsource, to conduct an analysis of the customer satisfaction survey data and compile a report of findings. The report evaluates CHOICES members' satisfaction with the services and supports they receive, as well as their overall contentment. In 2015, TennCare contracted with NASUAD to participate in the National Core Indicators consumer satisfaction survey for the elderly and adults with disabilities. TennCare continues to contract with the nine Area Agencies on Aging and Disability to conduct the face-to-face interviews. Human Services Research Institute completes the data analysis as a component of the contract with NASUAD. This NCI-AD survey measures CHOICES members' satisfaction with services, their ability to access services, their understanding of their rights and their ability to live the life they intend with the necessary supports in place to help them achieve their desired health and psycho-social outcomes.
- As part of the baseline data plan for Employment and Community First CHOICES, TennCare will utilize the NCI survey to assess the quality of life of each person with I/DD enrolled into the Employment and Community First CHOICES and one year following enrollment. Beginning in late 2017, TennCare will also use the NCI tool to conduct a satisfaction survey for individuals with I/DD who have been enrolled in Employment and Community First CHOICEs for more than one year.

Prior approval of all member materials – The Division of Quality Oversight, in conjunction with Managed Care Operations staff, reviews all member materials that have clinical information included. Staff reviews information for clinical accuracy, culturally appropriate information, and appropriateness of clinical references. LTSS staff, in conjunction with MCO staff, reviews all member materials related to the CHOICES and the Employment and Community First CHOICES program as well as all materials submitted by the D-SNPs. All member materials must be approved by TennCare before distribution can occur.

Tennessee Department of Commerce and Insurance – The TennCare Oversight Division is considered to be a Health Oversight Authority under the guidelines of the Health Insurance Portability and Accountability Act. As such the release of protected health information without authorization is permitted under 45 CFR 164.512 for the purposes of regulation. The TennCare Oversight Program is required to:

- Act upon licensure applications;
- Examine HMOs and Prepaid Limited Health Services Organizations (PLHSOs) at least once every four years (examinations conducted more frequently than once every four is years are optional);
- Review and analyze annual reports filed by the TennCare Bureau;
- Contract for an independent evaluation of the statutory standards where failures have been identified;

- Process eligible requests for independent review of denied TennCare provider claims;
- Review and either approve or disapprove material modifications to organization documents, contracts, evidences of coverage, rates, marketing materials, management personnel, and any other item that would materially change the operations of the HMO or PLHSO;
- Administer and enforce the TennCare Prompt Pay Act found at TCA 56-32-126; and
- Provide support services to the Selection Panel for TennCare Reviewers, pursuant to the TennCare Prompt Pay Act.

Policies and Procedures, developed by the MCOs, are reviewed by TennCare staff upon readiness review for new contracts or programs and as needed throughout the life of their contracts.

LTSS Audits – The LTSS Quality and Compliance Unit conducts eleven types of contract compliance audits as listed below, in addition to other audits conducted as the need arises. The measurement criteria for the audits are determined by the CRA with the MCOs or the contract with other entities, as well as CHOICES protocols. Based on these audits, an MCO may be subject to the Corrective Action Plan process and/or liquidated damages when performance is not compliant with the MCO's Contractor Risk Agreement. Additionally, aggregate information obtained from the audits is used for program management and program improvements, including adjustments to program or contract requirements, technical assistance, etc.

- New Member Audit for members who are new to Medicaid and/or CHOICES – addresses identification of services in the Plan of Care (POC), MCO authorization of HCBS, and the timely initiation of HCBS.
- Referral Audits for existing Medicaid enrollees who are referred for potential enrollment in CHOICES – addresses MCO performance of applicant telephonic screenings, face-to-face assessments, and Pre-Admission Evaluation submissions.
- Critical Incident Audit – addresses MCO determination, documentation, responsiveness, and investigation of critical incidents within specified timeframes. It also addresses the systemic response to patterns of incidents.
- Fiscal Employer Agent (FEA) Audit – addresses the timeliness of support broker assignment to new Consumer Direction (CD) members, notification and provision of the support broker contact information to CD member and care coordinator, initiation of CD services, and frequency of contact with the member.
- Area Agency on Aging and Disability (AAAD) Audit – addresses AAAD performance related to information and referral requests, contact with members and potential members, processing of referrals related to the Minimum Data Set (MDS), ensuring face-to-face evaluations, and completion/submission of eligibility, evaluation and enrollment information consistent with contractual guidelines.
- Money Follows the Person (MFP) Audit – addresses MCO performance related to member eligibility qualifications, member notification about enrollment and disenrollment, reporting of inpatient admissions and discharges, and post inpatient admission follow-up.
- Provider Qualifications Audit – addresses MCO compliance with contract requirements by examining whether MCOs ensure that providers possess appropriate qualifications before serving CHOICES members.
- Short-Term Stay (STS) Audit – addresses MCO performance related to verification of Nursing Facility level of care prior to admission, verification that the MCO properly managed the STS benefit (i.e., 90 days or less), verification that the MCO reviewed circumstances resulting in

multiple STS benefit periods, and verification of the MCO's evaluation of services and supports for members receiving multiple STS.

- Annual Level of Care Reassessment Audit – addresses MCO performance as it relates to conducting a Level of Care Reassessment for all CHOICES members on an annual basis. The reassessment is conducted to ensure our members are receiving services consistent with their needs and are enrolled in the appropriate CHOICES group, particularly focusing on the Carryover demonstration group.
- Select Community Audit – addresses the MCOs performance related to enrolling members of the specified population into the program and completing assignment and assessment within specified timeframes.
- CHOICES MCO capitation Reconciliation Audit – determines if MCOs are exempt from recoupment of overpayments when members have had an extended period without services. This process examines whether or not the lapse in service was justified or represents underperformance by the MCO, such that readjustment of the capitation payment is appropriate.

LTSS Employment and Community First CHOICES Audits: The LTSS Quality and Compliance Unit conducts contract compliance audits as listed below, in addition to other focused reviews conducted as the need arises. The measurement criteria for the audits are determined by the CRA with the MCOs or the contract with other entities, as well as Employment and Community First CHOICES protocols. Based on the performance on these audits, an MCO may be subject to the Corrective Action Plan process and/or liquidated damages when performance is not compliant with the CRA. Additionally, aggregate information, obtained from the audits is used for program management which may include adjustments to the CRA, technical assistance, etc.

- New Enrollee Audit for members who are new to Medicaid and/or Employment and Community First CHOICES – addresses identification of services in the Initial Support Plan (ISP), the comprehensive Person-centered Support Plan (PCSP), when the initial SP is waived, MCO authorization of Employment and Community First CHOICES services, and the timely initiation of Employment and Community First CHOICES services.
- Referral Audits for individuals who are referred for potential enrollment in Employment and Community First CHOICES – addresses the referral, intake and enrollment processes, MCO response time and documentation.
- Critical Incident Audit – addresses MCO determination, documentation, responsiveness, and investigation of critical incidents within specified timeframes. It also addresses MCO categorization of reportable events, timelines and the systemic response to patterns of incidents.
- Provider Qualifications Audit – addresses MCO performance in determining the qualifications of an Employment and Community First provider prior to entering into a contract for Employment and Community First CHOICES services and periodically recredentialing the provider, including review of the provider's processes for compliance with background and registry check requirements. The process must meet NCQA requirements as well as state requirements.
- Employment Informed Choice Audit –addresses MCO performance related to completion of required processes to help members understand and explore individual integrated employment and self-employment options. Compliance with this standard is also monitored through the quarterly MCO submission of Employment and Community First CHOICES Employment Report and through individual record reviews.
- Family Caregiver Stipend Audit – addresses MCO performance related to this service to ensure that recipients who may benefit from the service have access to the service and to ensure that the service is properly included in the PCSP, authorized, delivered, documented and reimbursed in accordance with the PCSP and approved waiver authority. This audit is supplemented by the

Reimbursement Services Report submitted quarterly by MCOs and validated using data from the MMIS.

- Employment Benefits Audit – addresses MCO performance related to the availability, delivery and management of the employment benefits in accordance with the approved waiver authority. Ensures that for recipients receiving employment benefits, these services are properly included in the PCSP, authorized, delivered, documented and reimbursed in accordance with approved waiver authority, including applicable benefit limits. This audit is driven by the Employment Report submitted quarterly by MCOs and validated using data from the MMIS.
- Individual Education and Training Audit – addresses MCO performance related to this service to ensure that recipients who may benefit from the service have access to the service and to ensure that the service is properly included in the PCSP, authorized, delivered, documented and reimbursed in accordance with the approved waiver authority. This audit is supplemented by the Reimbursement Services Report submitted quarterly by MCOs and validated using data from the MMIS.
- Family Caregiver Education and Training Audit – addresses MCO performance related to this service to ensure that recipients who may benefit from the service have access to the service and to ensure that the service is properly included in the PCSP, authorized, delivered, documented and reimbursed in accordance with the approved waiver authority. This audit is supplemented by the Reimbursement Services Report submitted quarterly by MCOs and validated using data from the MMIS.
- Consumer Directed Community Transportation Audit – addresses MCO performance related to this service to ensure the required processes of authorizing Community Transportation as a benefit, receiving and reviewing required documents for appropriateness of reimbursement and submitting all necessary documents to the Fiscal Employer Agent are adhered to.

CHOICES Care Coordination Monitoring

Because care coordination is the cornerstone of an effective MLTSS program, monitoring the quality of the Care Coordination function is essential to the program's success. This monitoring is conducted by the LTSS Quality and Compliance unit and includes the following:

- CHOICES chart reviews are conducted to determine compliance with federal and/or state Standards for Level of Care, Plans of Care, Freedom of Choice, Qualified Providers, Critical Incidents, Participant Rights, and Abuse and Neglect Education. Some of these areas are audited annually while some are audited bi-annually. Chart reviews are conducted on a quarterly basis by desk audits to determine compliance with the coordination of benefits for members who receive services from an MCO and are also enrolled in Home and Community Based Services (HCBS) waiver.
- Ride-along assessments are conducted by TennCare staff with the CHOICES care coordinators to determine depth of knowledge of the program and available services as well as ensure program information is shared in a manner that reflects compliance with state and federal regulations.
- Person-centered planning (PCP) reviews of the member's plan of care along with interviews with the member are conducted. These activities evaluate the effectiveness of the person-centered planning process and ensure the member is being assisted as needed in driving the PCP process and receiving the assessed needed supports. They also assure that supports required to assist the member in meaningful day activities and achieving personal health and psycho-social outcomes are provided.

Employment and Community First CHOICES Support Coordination Monitoring – Similar to CHOICES,

person-centered support coordination for Employment and Community First CHOICES members will be critical for individual and program success. For this reason, monitoring of this function will be a process that is essential to a successful quality strategy. This monitoring is conducted by the Person-Centered Practices Unit within LTSS Quality and Compliance and includes the following:

- Employment and Community First CHOICES chart reviews are conducted to determine compliance with federal and/or state standards for Plans of Care, Qualified Providers, Critical Incidents, Participant Rights, and Abuse and Neglect Education. Some of these areas are audited annually while some are audited bi-annually. Chart reviews are conducted on a quarterly basis by desk audits to determine compliance with the coordination of benefits for members who receive additional services from an MCO.
- Ride-along assessments are conducted by TennCare staff with the Employment and Community First CHOICES support coordinators to determine depth of knowledge of the program and available services as well as ensure program information is shared in a manner that reflects compliance with state and federal regulations.
- Person-Centered Support Plan (PCSP) reviews of the member's plan of care along with interviews with the member are conducted. These activities evaluate the effectiveness of the PCSP planning process and ensure the member is being assisted as needed in leading the PCSP process and receiving the assessed needed supports. They also assure that supports required to assist the member in achieving community integration and employment goals are being provided.

LTSS Quality Assurance Processes – In addition to the audits described above, processes are being implemented to achieve and ensure ongoing compliance with the HCBS final rule including HCBS settings and PCP provisions across all HCBS settings (CHOICES and Employment and Community First CHOICES). These quality assurance and monitoring activities include ongoing MCO credentialing and re-credentialing processes, oversight of provider transition plan implementation, provider compliance with the new rule, conducting an Individual Experience Assessment for each CHOICES and Employment and Community First CHOICES member, standardizing plan of care documents across programs and MCOs, and annual consumer/family satisfaction and quality of life surveys.

LTSS Quality Assurance Surveys of Community Living Supports (CLS) and CLS–Family Model Providers – Effective July 1, 2015, CMS approved new community based residential alternative benefits. These are small shared living arrangements designed to serve people who would otherwise require or be at risk of nursing facility placement because they can no longer live alone. These individuals also do not have family members or others who can assist them with ongoing support needs. The benefits offer assistance with daily living activities, and support the member's full participation in community activities. The Department of Intellectual and Developmental Disabilities (DIDD) conducts an initial survey of all newly-licensed CLS and CLS-FM providers. The initial survey includes an on-site visit to the home to observe service delivery in action. It also includes an administrative review of the agency's compliance with program requirements. DIDD will also conduct annual quality surveys of these providers, including on-site visits with members regarding their experience of care in the CHOICES program.

LTSS Quality Assurance Surveys of Employment and Community First CHOICES provider: With the implementation of Employment and Community First CHOICES, DIDD will extend the Quality Assurance

Surveys to Employment and Community First CHOICES providers of CLS and CLS-FM services as well as providers of other specified Employment and Community First CHOICES HCBS. The reviews include an initial onsite survey and subsequent surveys are scheduled based on the performance of the provider on the initial survey. DIDD will replicate the Quality Assurance Survey process currently utilized with 1915(c) Waiver providers including interviews with members to ensure that services are being delivered in a manner consistent with the program design, but will use tools that have been specifically developed for Employment and Community First CHOICES.

Readiness Reviews – TennCare conducts readiness reviews with the MCOs and other contractors whenever there are substantial changes to the contract requirements. This allows us to determine if the contractor is adequately prepared to implement programmatic changes. These reviews consist of a document review as well as an onsite review of critical processes and operating functions. Feedback is provided to the contractor and they are required to implement corrections before proceeding. Readiness reviews were conducted with the MCOs implementing Employment and Community First CHOICES prior to July 1, 2016. These reviews included IT system readiness testing, desk reviews of all required documentation, demonstration of reporting abilities and onsite review of processes to demonstrate compliance.

Critical Incidents and Complaints – TennCare has a mechanism within both the Division of Quality Oversight and LTSS for addressing critical incidents and quality of care concerns. These processes include tracking, receiving information from the MCOs, and resolving issues if possible. As a result staff have the ability to observe trends in MCC or program performance and utilize this information in quality improvement activities.

Dental Benefits Manager (DBM) Reports and Other Deliverables – The DBM is responsible for submitting a variety of monthly, quarterly, and annual reports and other deliverables through Team Track, TennCare's secure tracking system. These reports are reviewed by the appropriate business owner at TennCare and a corrective action plan is issued for reports or other deliverables deemed deficient. Liquidated damages may be applied for deficiencies. Examples of DBM reports include Fraud and Abuse activities, QI/UM Committee Meeting minutes, Quarterly Outreach Activities, Case Referral and Corrective Action Assistance, Enrollee Cost Sharing, Quarterly Non-discrimination Compliance, Annual Member Satisfaction Surveys, Annual Provider Satisfaction Surveys, Annual Quality Improvement Activity (QIA) Dental Studies, and Annual QMP Report.

- The DBM is required to submit two PIPs related to children's clinical dental care or administrative process annually. After three years, a decision will be made jointly between the DBM and TennCare on the continuation of the PIP.
- Qsource conducts an Annual Quality Survey of the DBM to assure compliance with contractual requirements. A detailed written report of findings is provided by the EQRO. If the DBM scores less than 100% on any element, a corrective action plan must be submitted and is reviewed by both Qsource and TennCare to assure the DBM takes appropriate action.
- The DBM is required to conduct both a Customer Satisfaction Survey and a Provider Satisfaction Survey and report on the findings annually.

- The DBM is responsible for maintaining and managing an adequate statewide dental provider network, processing and paying claims, managing program data, conducting utilization management and utilization review, and detecting fraud and abuse, as well as meeting utilization benchmarks for annual dental screening percentages, annual dental participation ratios, or outreach efforts calculated to ensure participation of all children who have not received screenings.

External Quality Review

CMS Requirement: Include a description of the state's arrangements for an annual, external, independent quality review of the quality, access, and timeliness of the services covered under each MCO and PIHP contract. Identify what entity will perform the EQR and for what period of time. (CFR 438.204(d))

Tennessee contracts with Qsource to provide External Quality Review (EQR) activities. The services to be provided under this contract include multiple tasks and deliverables, including an annual quality survey of all MCOs and the DBM, that are consistent with applicable federal EQR regulations and protocols for Medicaid Managed Care Organizations and state-specific requirements related to federal court orders. This contract allows the State to be compliant with Federal EQR regulations and rules and to measure MCC-specific compliance with State-specific Federal court orders and the TennCare Section 1115 Waiver. Qsource is the entity selected to be Tennessee's EQRO.

The Annual Quality Survey must include, but not be limited to, review of enrollee rights and protections, quality assessment and performance improvement, structure and operation standards, measurement and improvement standards, and compliance with the appeal process. The survey process includes document review, interviews with key MCC personnel, and an assessment of the adequacy of information management systems. In addition to this survey, QSource conducts Performance Improvement Project validations and Performance Measure validations in accordance with federal requirements.

In addition, Qsource conducts an Annual Network Adequacy Survey to determine the extent to which the MCCs' networks are compliant with contractual requirements.

CMS Requirement: Identify what, if any optional EQR activities the state has contracted with the External Quality Review Organization (EQRO) to perform. The five optional activities include: validation of encounter data reported by an MCO or PIHP; administration or validation of consumer or provider surveys of quality of care; calculation of performance measures in addition to those reported by an MCO or PIHP and validated by an EQRO; conduct of performance improvement projects (PIPs) in addition to those conducted by an MCO or PIHP and validated by an EQRO; and conduct of studies on quality and focus on a particular aspect of clinical or nonclinical services at a point in time.

While Tennessee has not required the EQRO to conduct any of the specified optional activities, Qsource has assisted TennCare with a number of other activities that are not required by CMS. These activities are as follows:

- Participation in MCO collaborative workgroups.
- Training of MCO staff on conducting Performance Improvement Projects.
- Quarterly validation of the accuracy of provider information reported by the MCOs.

- Preparation of an annual comparative analysis of HEDIS measures, Relative Resource Use Measures, and CAHPS measures provided to TennCare by D-SNPS who have signed a MIPPA Agreement. Because the health plans are required to submit the measures listed above and because of improved statistical capability within the Bureau of TennCare, the measures that QSource might otherwise calculate are limited.
- Preparation of an annual Impact Analysis Report outlining national initiatives/changes that have potential to impact managed care in Tennessee.
- Planning and execution of an educational meeting three times a year for TennCare's Quality Oversight staff as well as all MCOs and the DBM.
- Analysis of the CHOICES Customer Satisfaction Survey.
- Assisting the Division of Quality Oversight with its strategic planning sessions and Quality Strategy development.
- Providing technical assistance to MCCs on a variety of topics including HEDIS and CAHPS reporting.

Until a few years ago, the EQRO validated encounter data, but with the implementation of the State's information system, the encounter validation process reached a point where there was no added value due to the inherent system edits and checks.

CMS requirement: If applicable, identify the standards for which the EQR will use information from Medicare or private accreditation reviews. This must include an explanation of the rationale for why the Medicare or private accreditation standards are duplicative to those in 42 CFR 438.204(g). (CFR 438.360(b)(4))

Below is a table reflecting those contractual standards that are deemed met by the NCQA Accreditation Survey. Annually all contractual requirements are compared with the most current NCQA standards. Those contractual requirements that are greater than the comparable NCQA standard remain a part of the TennCare Annual Quality Survey. If any contractual standards are equal to or lesser than the NCQA standards they will be deemed met by the NCQA survey.

State Requirements Deemed Met by NCQA Accreditation Survey	
2016 State Standards	**2016 NCQA Accreditation Standards**
CRA § 2.11.1.5.-2.11.1.5.1-4 (E/W, Middle, & TCS)	**QI 3B Affirmative Statement**
The contractor may not prohibit or otherwise restrict a health care professional acting within the lawful scope of practice from advising or advocating on behalf of a member who is his or her patient for the following: • The member's health status or medical, behavioral health, or long-term care treatment options, including alternative treatments that may be self-administered; • Any information the member needs in order to decide among all relevant treatment options; • The risks, benefits, and consequences of treatment or non-treatment; or • The member's right to participate in decisions regarding his or her health care, including the right to refuse treatment, and to express preferences about future treatment decisions.	Contracts with practitioners include an affirmative statement indicating that practitioners may freely communicate with patients about their treatment, regardless of benefit coverage limitations.
CRA § 2.18.3-2.18.3.1.4 (E/W, Middle, & TCS)	**NET 1A - Cultural Needs and Preferences and RR RR 3, Element B, Interpreter Services InterpretesServices**
As required by 42 CFR 438.206, the CONTRACTOR and its providers and subcontractors that are providing services pursuant to this Contract shall participate in the State's efforts to promote the delivery of services in a culturally competent manner to all enrollees, including those with Limited English Proficiency, disabilities, and diverse cultural and ethnic backgrounds regardless of an enrollee's gender, sexual orientation, or gender identify. This includes the CONTRACTOR emphasizing the importance of network providers to have the capabilities to ensure physical access, accommodations, and accessible equipment for the furnishing of services with physical or mental disabilities.	The organization assesses the cultural, ethnic, racial and linguistic needs of its members and adjusts the availability of practitioners within its network, if necessary.

CRA 2.8.4.3.2	QI 6, Elements A-J
The CONTRACTOR shall develop and operate the "opt out" health risk management program per NCQA standards QI 6 for disease management. Program services shall be provided to eligible members unless they specifically ask to be excluded.	***QI 6A– Program Content*** The content of the organization's programs addresses the following for each condition. 1. Condition monitoring 2. Adherence to treatment plan 3. Medical and behavioral health co-morbidities and other health conditions 4. Health behaviors 5. Psychosocial issues 6. Depression screening 7. Information about the patient's condition provided to caregivers who have patient's consent 8. Encouraging patients to communicate with their practitioners about health conditions and treatment. 9. Additional resources external to the organization as appropriate.

	QI 6B–Identifying Members for DM Programs The organization uses the following sources to identify members who qualify for DM programs. 1. Claim or encounter data 2. Pharmacy data, if applicable 3. Health risk appraisal results 4. Laboratory results, if applicable 5. Data collected through the UM, case management, or care management process 6. Member and practitioner referrals 7. Information from Electronic Health Records 8. Data from health management, wellness, or health coaching programs. ***QI 6C–Frequency of Member Identification*** The organization systematically identifies members who qualify for each of its DM programs. ***QI 6D–Providing Members with Information*** The organization provides eligible members with the following written information about the program: 1. How to use services 2. How members become eligible to participate 3. How to opt in or opt out ***QI 6E–Interventions Based on Assessment*** The organization provides intervention to members based on assessment. ***QI 6F–Eligible Member Active Participation*** The organization annually measures active member participation rates. ***QI 6G–Informing and Educating Providers*** The organization provides practitioners with written information about the DM program that includes: • Instructions on how to use DM services. • How the organization works with a practitioner's patients in the program. ***QI 6H Integrating Member Information*** The organization integrates information from the following system to facilitate access to member health information for continuity of care: 1. A health information line 2. A DM program 3. A case management program 4. A UM program, if applicable 5. A wellness program, if applicable 6. A health information line 7. A DM program

	8. A case management program 9. A UM program, if applicable 10. A wellness program, if applicable ***QI 6I–Satisfaction with Disease Management*** The organization annually evaluates satisfaction with its disease management services by: 1. Obtaining member feedback 2. Analyzing member complaints and inquiries ***QI 6J–Measuring Effectiveness*** The organization employs and tracks one performance measure for each DM program. Each measurement: 1. Addresses a relevant process or outcome 2. Produces a quantitative result 3. Is population based 4. Uses data and methodology that are valid for process or outcome being measured 5. Has been analyzed in comparison with a benchmark or goal
CRA 2.8.4.7.3	**QI 5 Complex Case Management**
The CONTRACTOR shall develop and implement the Complex Case Management Program according to NCQA standard QI 5.	***QI 5A–Population Assessment*** The organization annually: 1. Assesses the characteristics and needs of its member population and relevant subpopulations 2. Reviews and updates its complex case management processes to address member needs, if necessary. 3. Asses the needs of children and adolescents. 4. Assess the needs of individuals with disabilities. 5. Assess the needs of individuals with serious and persistent mental illness. 6. Reviews complex case management processes and resources and updates them if necessary to address member needs. ***QI 5B-Program Description – must include:*** 1. Evidence used to develop the program. 2. Criteria for identifying members who are eligible for the program. 3. Services offered to organization 4. Defined program goals. 5. Integration with services of others involved in the member's care.

	QI 5C–Identifying Members for Case Management The organization uses the following sources to identify members for complex case management: 1. Claim or encounter data 2. Hospital discharge data 3. Pharmacy data, if applicable 4. Data collected through UM management process, if applicable 5. Data supplied by purchases, if applicable 6. Data supplied by member or care givers 7. Data supplied by practitioners ***QI 5D – Access to Case management System*** The organization has multiple avenues for members to be considered for complex CM services, including: 1. Health information line referral, if applicable. 2. DM program referral. 3. Discharge planer referral. 4. UM referral, if applicable. 5. Member or care giver referral 6. Practitioner referral ***QI 5E–Case Management Systems*** The organization uses CM systems that support: 1. Evidence-based clinical guidelines or algorithms to conduct assessment and management 2. Automatic documentation of the staff's; members ID and date and time on the case or when interaction with the member occurred 3. Automated prompts for follow-up, as required by the case management plan.

	QI 5F–Case Management Process The organization's complex case management procedures address the following: 1. Initial assessment of members' health status, including medications 2. Documentation of clinical history, including medications 3. Initial assessment of the activities of daily living 4. Initial assessment of mental health status, including cognitive functions 5. Initial assessment of life-planning activities 6. Evaluation of cultural and linguistic needs, preferences, or limitations 7. Evaluation of visual and hearing needs, preferences, or limitations 8. Evaluation of caregiver resources and involvement 9. Evaluation of available benefits within the organization and from community resources 10. Evaluation of an individualized case management plan, including prioritized goals, that considers the member's and caregivers' goals, preferences and desired level of involvement in the CM plan 11. Identification of barriers to meeting goals or complying with plan 12. Facilitation of member referrals to resources and follow-up process to determine whether members act on referrals 13. Development of a schedule for follow-up and communication with members 14. Development and communication of member self-management plans 15. A process to assess progress against case management plans for members.

	QI5G – Initial Assessment: The organization follows its' documented processes for: 1. Initial assessment of member health status, including condition-specific issues 2. Documentation of clinical history, including medications 3. Initial assessment of activities of daily living 4. Initial assessment of mental health status, including cognitive functions 5. Evaluation of cultural and linguistic needs, preferences or limitations 6. Evaluation of visual and hearing needs, preferences or limitations 7. Evaluation of caregiver resources and involvement 8. Evaluation of available benefits within the organization and form community resources 9. Initial assessment of life-planning activities ***QI 5H–Case Management-Ongoing Management*** The NCQA review of a sample of organization's complex case management files demonstrate that the organization follows its documented processes for: 1. Development of case management plans, including prioritized goals, that take into account member and caregivers' goals, preferences and desired level of involvement in the program 2. Identification of barriers to meeting goals and complying with the plans 3. Development of schedules for follow-up and communication with members. 4. Development and communication of member self-management plans 5. Assessment of progress against case management plans and goals, and modifications as needed. ***QI 5I–Experience with Case Management*** At least annually, the organization evaluates satisfaction with its case management program by: 1. Obtaining feedback from members 2. Analyzing member complaints ***QI 5J-Measuring Effectiveness*** The organization annually measures the effectiveness of its complex case management program using three measures and their components. ***QI 5K – Action and Re-measurement*** • Improve clinical performance • Improve member satisfaction • Re-measure to determine impact on clinical performance and member experience

CRA 2.14.1.6 - 2.14.1.6.5	UM 2A - UM Criteria
The UM program shall have criteria that: • Are objective and based on medical, behavioral, health and/or long-term care evidence, to the extent possible. • Are applied based on individual need. • Are applied based on an assessment of the local delivery system. • Involve practitioners in developing, adopting, and reviewing them. • Are annually reviewed and updated as appropriate.	The organization has written policies for applying the criteria based on individual needs. The organization has written policies for applying the criteria based on an assessment of the local delivery system. Involves appropriate practitioners in developing, adopting, and reviewing criteria. Annually review the UM criteria and the procedures for applying them, and updates the criteria when appropriate.
CRA § 2.14.1.8 (E/W, Middle and TCS)	**UM 4 - Appropriate Professionals**
The CONTRACTOR shall use appropriately licensed professionals to supervise all medical necessity decisions and specify the type of personnel responsible for each level of UM, including prior authorization and decision making. The CONTRACTOR shall have written procedures documenting access to Board Certified Consultants to assist in making medical necessity determinations. Any decision to deny a service authorization request or to authorize a service in an amount, duration, or scope that is less than requested shall be made by a physical health or behavioral health care professional who has appropriate clinical expertise in treating the member's condition or disease or, in the case of long-term care services, a long-term care professional who has appropriate expertise in providing long-term care services.	*Element A*: The organization has written procedures • Requiring appropriately licensed professionals to supervise all medical necessity decisions • Specifying the type of personnel responsible for each level of UM decision-making. *Element C*: The organization ensures that a physician or other health care professional, as appropriate, reviews any non-behavioral healthcare denial based on medical necessity. *Element D*: The organization ensures that a physician, appropriate behavioral health care practitioner or pharmacist, as appropriate, reviews any behavioral healthcare denial of care based on medical necessity. *Element E*: The organization uses physician or a pharmacist to review pharmacy denials based on medical necessity. *Element F*: The organization • Has written procedures for using board-certified consultants to assist in making medical necessity determinations
CRA 2.14.1.10	**UM 4G – Affirmative Statement about Incentives**
The CONTRACTOR shall have mechanisms in place to ensure that required services are not arbitrarily denied or reduced in amount, duration, or scope solely because of the diagnosis, type of illness or condition.	The organization distributes a statement to all members and to all practitioners, providers, and employees who make UM decisions, affirming the following: • UM decision making is based only on appropriateness of care and service and existence of coverage. • The organization does not specifically reward practitioners or other individual for issuing denials of coverage. • Financial incentives for UM decision makers do not encourage decisions that result in under utilization.

CRA 2.14.1.12	UM 4G – Affirmative Statement about Incentives
The CONTRACTOR shall assure, consistent with 42 CFR 436.6(h), 42 CFR 422.208 and 422.210, that compensation to individuals or entities that conduct UM activities are not structured so as to provide incentives to deny, limit, or discontinue medically necessary covered services to any member.	The organization distributes a statement to all members and to all practitioners, providers, and employees who make UM decisions, affirming the following: • UM decision making is based only on appropriateness of care and service and existence of coverage. • The organization does not specifically reward practitioners or other individual for issuing denials of coverage. • Financial incentives for UM decision makers do not encourage decisions that result in under utilization.
CRA 2.7.1.3	**UM 11 – Emergency Services**
The CONRACTOR shall provide emergency services without requiring prior authorization or PCP referral, as described in Section 2.7.1, regardless of whether these services are provided by a contract or non-contract provider. The CONTRACTOR shall provide post-stabilization care services in accordance with 42 CFR 422.113	The organization's emergency services policies and procedures require coverage of emergency services in the following situations: 1. To screen and stabilize the member without prior approval, where a prudent layperson, acting reasonable, would have believed that an emergency medical condition existed. 2. If any authorized representative, acting for the organization, authorized provision of emergency services.
CRA 2.15.1.2	**QI 2B – Informing Members and Practitioners**
All information about the QM/QI program will be made available to providers and members.	The organization annually makes information about its QI program available to the following groups: 1. Members 2. Providers
CRA § 2.27.2 & 2.27.2.8 (E/W, Middle, & TCS)	**RR 4 – Privacy and Confidentiality**
In accordance with HIPAA regulations, the CONTRACTOR shall, at a minimum: Make available to TENNCARE enrollees the right to amend their PHI data in accordance with the federal HIPAA regulations. The CONTRACTOR shall also send information to enrollees educating them of their rights and necessary steps in this regard.	The organization has policies and procedures that address members' right to authorize or deny the release of PHI beyond uses for treatment, payment or health care operations.

CRA § 2.26.1; 2.26.1.1; 2.26.1.2; 26.1.3; 2.26.1.5	CR 9 – Elements A, C, and E
If the CONTRACTOR delegates responsibilities to a subcontractor, the CONTRACTOR shall ensure that the subcontracting relationship and subcontracting document(s) comply with federal requirements, including, but not limited to, compliance with the applicable provisions of 42 CFR 438.230(b) and 42 CFR 434.6 as specified in Contract Section D.5. • The CONTRACTOR shall evaluate the prospective subcontractor's ability to perform the activities to be delegated. • The CONTRACTOR shall require that the agreement be in writing and specify the activities and report responsibilities delegated to the subcontractor and provide for revoking delegation or imposing other sanctions if the subcontractor's performance is inadequate. • Effective with any new subcontracts or upon the next amendment to existing subcontracts, the CONTRACTOR shall include a requirement that the subcontract may be terminated by the CONTRACTOR for convenience and without cause upon a specified number of day's written notice. • The CONTRACTOR shall monitor the subcontractors' performance on an ongoing basis and subject it to formal review at least annually consistent with NCQA standards and MCO laws and regulations. • The CONTRACTOR shall identify deficiencies or areas for improvement, and the CONTRACTOR and the subcontractor shall take corrective action as necessary.	*CR 9A Written Delegation Agreement-* The written delegation document: 1. Is mutually agreed upon 2. Describes the delegated activities and the responsibilities of the organization and the delegated entity 3. Requires at least semiannual reporting of the delegated entity to the organization 4. Describes the process by which the organization evaluates the delegated entity's performance 5. Describes the remedies available to the organization if the delegated entity does not fulfill its obligations, including revocation of the delegation agreement. 6. Specifies that the organization retains the right to approve, suspend, and terminate individual practitioners, providers, and sites even if the organization delegates decision making. *CR 9A Right to Approve and Terminate-* The organization retains the right to approve, suspend and terminate individual practitioners, providers, and sites in situations where it has delegated decision making. This right is reflected in the delegation document. *CR 9E Opportunities for Improvement-* For delegation arrangements that have been in effect for more than 12 months, at least once in each of the past 2 years, the organization identified and followed up on opportunities for improvement, if applicable.

CMS Requirement: If applicable, for MCOs or PIHPs serving only dual eligibles, identify the mandatory activities for which the state has exercised the non-duplication under 438.360(c) and include an explanation of the rationale for why the activities are duplicative to those under 438.358(b)(1) and (b)(2). (CRA 438.360(c)(4))

Not applicable.

SECTION III: STATE STANDARDS

Access Standards

CMS Requirement: This section should include a discussion of the standards that the state has established in the MCO/PIHP contracts for access to care, as required by 42 CFR, Part 438, subpart D. These standards should relate to the overall goals and objectives listed in the quality strategy's introduction. States may either reference the access to care provisions from the state's managed care contracts or provide a summary description of the contract provisions. CMS recommends states minimize reference to contract language in the quality strategy. However, if the state chooses the latter option, the summary description must be sufficiently detailed to offer a clear picture of the specific contract provisions and be written in language that may be understood by stakeholders who are interested in providing input as part of the public comment process.

STATE ACCESS STANDARDS AS REQUIRED BY 42 CFR, PART 438, SUBPART D
42 CFR 438.206 AVAILABILITY OF SERVICES
42 CFR 438.206(b)(1) Maintains and monitors a network of appropriate providers
The Contractor Risk Agreement (CRA) between TennCare and the MCOs addresses provider networks in section 2.11 including primary care providers, specialty service providers, prenatal care providers, behavioral health services, long-term services & supports providers, and safety net providers; credentialing and other certification; and network notice requirements. CRA Section 2.12 addresses provider agreements. CRA Section 2.18 addresses customer service for members, including member services toll-free phone line, interpreter/translation services, cultural competency, and member involvement with behavioral health services. CRA Attachment III addresses general access standards and Attachment IV addresses specialty network standards. Attachment V addresses access and availability for behavioral health services.
438.206(b)(2) Female enrollees have direct access to a women's health specialist
CRA Section 2.11.4 states that a sufficient number of providers must be enrolled in the TennCare program so that prenatal or other medically necessary covered services are not delayed or denied to pregnant women at any time, including during their presumptive eligibility period.
438.206(b)(3) Provides for a second opinion from a qualified health care professional
CRA Section 2.6.4 provides for a second opinion in any situation where there is a question concerning a diagnosis or the options for surgery or other treatment of a health condition when requested by a member, parent, and/or legally appointed representative. The second opinion must be provided by a contracted qualified health care professional or the MCO must arrange for a member to obtain one from a non-contract provider. The second opinion shall be provided at no cost to the member.
438.206(b)(4) Adequate and timely coverage of services not available in network
CRA Section 2.11.1.9 States if the MCO is unable to provide medically necessary covered services to a particular member using contract providers, it must adequately and timely cover these services for that member using non-contract providers, for as long as the provider network is unable to provide them.
438.206 (b)(5) Out of network providers coordinate with the MCO or PIHP with respect to payment
CRA Sections 2.13.12-15 address circumstances under which out-of-network providers may seek payment from the MCO. It states the following: • The MCO shall pay for any medically necessary covered services provided to a member by a non-contract provider at the request of a contract provider; • The payment shall not be less than 80% of the rate that would have been paid by the MCO if the member had received the services from a contract provider; and

- The MCO shall only pay for covered long-term care services for which the member was eligible and that were authorized by the MCO in accordance with the requirements of this agreement.

438.206(b)(6) Credential all providers as required by 438.214

CRA Section 2.11.9 addresses credentialing of both contract and non-contract providers.

CRA 2.11.9.1.1 states the MCCs must utilize the current NCQA Standards and Guidelines for the Accreditation of MCOs for the credentialing and recredentialing of licensed independent providers and provider groups with whom it contracts or employs and who fall within its scope of authority and action.

CRA 2.11.9.1.1 states the MCCs must utilize the current NCQA standards for credentialing and recredentialing of licensed independent providers with whom it does not contract but with whom it has an independent relationship.

CRA 2.11.9.1.2 states that all credentialing applications must be completely processed within 30 calendar days of receipt of a completed credentialing application, including all necessary documentation and attachments, and a signed contract/agreement if applicable.

438.206(c)(1)(i) Providers meet state standards for timely access to care and services

CRA Attachment III states that, in general, MCOs shall provide available, accessible, and adequate numbers of institutional facilities, service locations, service sites, and professional, allied, and paramedical personnel for the provision of covered services, including all emergency services, on a 24 hour a day, seven day a week basis. At a minimum, this shall include:

Primary Care Physician or Extender

- Rural – 30 miles.
- Urban – 20 miles.
- Patient Load – 2,500 or less for physician; one-half this for a physician extender.
- Appointment/Waiting times – Not to exceed 3 weeks from date of a patient's request for regular appointments and 48 hours for urgent care. Waiting times shall not exceed 45 minutes.

Specialty Care and Emergency Care

- Not to exceed 30 days for routine care or 48 hours for urgent care. All emergency care is immediate, at the nearest facility available, regardless of contract. Waiting times shall not exceed 45 minutes.

Hospital Care

- Transport distance will be the usual and customary, not to exceed 30 miles, except in rural areas where access distance may be greater. If greater, the standard needs to be the community standard for accessing care, and exceptions must be justified and documented to the State on the basis of community standards.

Long-Term Care Services

- Transport distance to licensed Adult Day Care providers will be the usual and customary, not to exceed 20 miles in urban areas, not to exceed 30 miles for suburban areas, and not to exceed 60 miles in rural areas except where community standards and documentation shall apply.

All Other Services

- Usual and customary as defined by TennCare.

Access to specialty care (CRA Attachment IV)

- The MCO must have provider agreements with providers practicing the following specialties: Allergy, Cardiology, Dermatology, Endocrinology, Otolaryngology, Gastroenterology, General Surgery, Neonatology, Nephrology, Neurology, Neurosurgery, Oncology/Hematology, Ophthalmology, Orthopedics, Psychiatry (adult, child, and adolescent), and Urology.
- Travel distance must not exceed 60 miles for at least 75% of non-dual members.
- Travel distance must not exceed 90 miles for all non-dual members.

- Access for Behavioral Health Services (CRA Attachment V)
- *Psychiatric Inpatient Hospital Services* – Travel does not exceed 90 miles for at least 90% of members. Maximum time for admission/appointment is 4 hours (emergency involuntary), 24 hours (involuntary), and 24 hours (voluntary).
- *24 Hour Psychiatric Residential Treatment* – Must contract with at least one provider of service in the Grand Region for adult members. Travel distance does not exceed 60 miles for at least 75% of child members and does not exceed 90 miles for at least 90% of child members. Maximum time for admission/appointment is within 30 days.
- *Outpatient Non-MD Services* – Travel distance does not exceed 30 miles for all members. Maximum time for admission/appointment is within 10 business days; if urgent, within 48 hours.
- *Intensive Outpatient [may include day treatment (adult), intensive day treatment (children/adolescents), or Partial Hospitalization]* – Travel distance does not exceed 90 miles for at least 90% of members. Maximum time for admission/appointment is within 10 business days; if urgent, within 48 hours.
- *Inpatient Facility Services (Substance Abuse)* – Travel distance does not exceed 90 miles for at least 90% of members. Maximum time for admission/appointment is within 10 business days; four hours for an emergency and 24 hours for non-emergencies.
- *24 Hour Residential Treatment Services (Substance Abuse)* – Must contract with at least one provider of service in the Grand Region for adult members and one provider of service in the Grand Region for child members. Timeframe: within 10 business days.
- *Outpatient Treatment Services (Substance Abuse)* – Travel distance does not exceed 30 miles for all members. Timeframe: within 10 business days; within 24 hours for detoxification.
- *Mental Health Case Management* – Not subject to geographic access standards. Timeframe: within seven calendar days.
- *Psychosocial Rehabilitation (may include Supported Employment, Illness Management & Recovery, Peer Recovery services, or Family Support services)* – Not subject to geographic access standards. Timeframe: within ten business days.
- *Supported Housing* – Not subject to geographic access standards. Timeframe: within 30 calendar days.
- *Crisis Services (Mobile)* – Not subject to geographic access standards. Timeframe: face-to-face contact within one hour for emergency situations and four hours for urgent situations.

438.206(c)(1)(ii) Network providers offer hours of operation that are no less than the hours of operation offered to commercial enrollees or comparable to Medicaid Fee For Service

CRA section 2.12.9.65 requires that providers offer hours of operation that are no less than the hours of operation offered to commercial enrollees.

438.206(c)(1)(iii) Services included in the contract are available 24 hours a day, 7 days a week

CRA Section 2.7.1.1 requires that emergency services be available 24 hours a day, seven days a week.

438.206(c)(1)(iv-v) Mechanisms/monitoring to ensure compliance by providers

Each MCO has a provider services unit that monitors the network for compliance with certain standards. The Bureau of TennCare has contracted with Qsource, TennCare's EQRO, to conduct a quarterly provider data validation (PDV) survey. The purpose of this activity is to determine the accuracy of the provider data files submitted by the TennCare MCCs and to use the results as a proxy to determine the extent to which providers are available and accessible to TennCare members. The survey is conducted using a hybrid methodology developed to maximize response rates. The survey consists of telephone calls and facsimile follow-up protocol as necessary. The validation tool was programmed into a Microsoft Access database and pre-populated with data elements from the MCC provider files. Qsource attempts to contact providers up to three times by telephone.

Providers were also notified of a toll-free number to allow the provider to call back if the time was not convenient. The following standards are monitored through this survey.

- MCC Data Accuracy - Provider Credentialed Specialty/Behavioral Health Service Code.
- Provider Panel Status (Open/Closed)
- Routine and Urgent Care Services - Provider offices were questioned regarding whether they offered routine and/or urgent care during the time reported for validation. Accuracy was determined by comparing the responses to the thresholds specific to each provider.
- Services for Patients - Two questions were asked of the providers: 1) Do you provide services to patients less than 21 years of age? And 2) Do you provide services to patients 21 years of age and older?
- Primary Care Services
- Prenatal Care Services

438.206(c)(2) Culturally competent services to all enrollees

MCCs are contractually required in CRA 2.18.3 to participate in the State's efforts to promote the delivery of services in a culturally competent manner to all enrollees, including those with Limited English Proficiency and diverse cultural and ethnic backgrounds. Additionally, the CRA states that health coaching or other interventions for health risk management shall emphasize self-management strategies addressing healthy behaviors, self-monitoring, co-morbidities, cultural beliefs, depression screening, and appropriate communication with providers.

42 CFR 438.207 ASSURANCES OF ADEQUATE CAPACITY AND SERVICES

438.207(b)(1) Offer an appropriate range of preventive, primary care, and specialty services

CRA 2.7.5.1 states, "The Contractor shall provide preventive services which include, but are not limited to, initial and periodic evaluations, family planning services, prenatal care, laboratory services, and immunizations in accordance with TennCare Rules and Regulations."

CRA 2.7.5.2.1 states, "The Contractor shall provide or arrange for the provision of medically necessary prenatal care to members beginning on the date of their enrollment in the MCO. This requirement includes pregnant women who are presumptively eligible for TennCare, enrollees who become pregnant, as well as enrollees who are pregnant on the effective date of enrollment in the MCO. The requirement to provide or arrange for the provision of medically necessary prenatal care shall include assistance in making a timely appointment for a woman who is presumptively eligible and shall be provided as soon as the Contractor becomes aware of the enrollment."

CRA 2.7.6.1.1 requires that the MCOs provide EPSDT services (TennCare Kids) to members under age 21. CRA 2.7.6.3.1-2 further requires that the MCO provide periodic comprehensive child health assessments, meaning, "regularly scheduled examinations and evaluations of the general physical and mental health, growth, development, and nutritional status of infants, children, and youth." At a minimum, these screens must include periodic and interperiodic screens and be provided at intervals which meet standards set forth in the American Academy of Pediatrics Recommendations for Preventive Pediatric Health Care for medical practice and American Academy of Pediatric Dentistry (AAPD) guidelines for dental practice. See the response for 438.207(b)(2) (below) for further standards of care.

438.207(b)(2) Maintain network sufficient in number, mix, and geographic distribution

CRA Attachments III, IV and V outline standards that the MCOs have to meet.
(See Attachment I of this document to see the full set of standards.)

42 CFR 438.208 COORDINATION AND CONTINUITY OF CARE
438.208(b)(1) Each enrollee has an ongoing source of primary care appropriate to his or her needs
CRA Attachment III outlines standards for primary care providers that each MCO has to meet. The requirements for Primary Care Physicians or Extenders are as follows: • Distance/Time Rural: 30 miles • Distance/Time Urban: 20 miles • Patient Load: 2,500 or less for physician; one-half this for a physician extender • Appointment/Waiting Times: Usual and customary practice, not to exceed three weeks from date of a patient's request for regular appointments and 48 hours for urgent care. Waiting times shall not exceed 45 minutes. • Documentation/Tracking requirements: ○ Health plans must have a system in place to document appointment scheduling times. ○ Tracking – Plans must have a system in place to document the exchange of member information if a provider other than the primary care provider (i.e., school-based clinic or health department clinic) provides health care.
438.208(b)(2) All services that the enrollee receives are coordinated with the services the enrollee receives from any other MCO/PIHP
The MCOs are responsible for the management, coordination, and continuity of care for all their TennCare members. They coordinate care among PCPs, specialists, behavioral health providers, and long-term services and supports providers and develop/maintain policies and procedures to address this responsibility. For CHOICES and Employment and Community First CHOICES members, these policies and procedures specify the role of the care coordinator/care coordination team in conducting these functions (CRA 2.9.1). Additionally, MCOs coordinate with other state and local departments and agencies to ensure that coordinated care is provided to members (CRA 2.9.16).
438.208(b)(3) Share with other MCOs, PIPHPs, and PAHPs serving the enrollee with special health care needs the results of its identification and assessment to prevent duplication of services
MCOs use their Population Health and CHOICES care coordination and Employment and Community First CHOICES support coordination programs to support the continuity and coordination of covered physical health, behavioral health, and long-term services and supports, and to support collaboration between providers (CRA 2.9.9.8).
438.208(b)(4) Protect enrollee privacy when providing care
The MCOs are required to comply with all applicable HIPAA and HITECH requirements including, but not limited to, the following (CRA 2.27.2): • Compliance with the Privacy Rule, Security Rule, and Notification Rule • The creation of and adherence to sufficient Privacy and Security Safeguards and Policies • Timely reporting of violations in the access, use, and disclosure of PHI • Timely reporting of privacy and/or security incidents

438.208(c)(1) State mechanisms to identify persons with special health care needs

CRA 2.9.16 requires MCOs to coordinate with a variety of agencies to assure that those individuals with special health care needs receive the services they need. These agencies include:

- *Tennessee Department of Mental Health & Substance Abuse Services* and *Tennessee Department of Intellectual & Developmental Disabilities (DIDD)* interface and assure continuity and coordination of specialized services in accordance with federal PASRR requirements.
- *Tennessee Department of Children's Services* addresses the needs of children who are in State custody. The TennCare Select MCO serves the majority of these children in order to have continuity when children move from place to place in the state.
- *Tennessee Department of Health, Children's Special Services Program*
- *Area Agencies on Aging and Disability (AAADs)* collaborate on intake of members new to both TennCare and CHOICES. AAADs also assist CHOICES members in Groups 2 and 3 with the TennCare eligibility redetermination process.

MCOs are responsible for the delivery of medically necessary covered services to school-aged children. They are encouraged to work with school-based providers to manage the care of students with special needs. The State implemented a process, referred to as TennCare Kids Connection, to facilitate notification of MCOs when a school-aged child enrolled in TennCare has an Individualized Education Plan (IEP) that identifies a need for medical services. In such cases, the school is responsible for obtaining parental consent to share the IEP with the MCO and for subsequently sending a copy of the parental consent and IEP to the MCO. The school is also responsible for clearly delineating the services on the IEP that the MCOs are to consider for payment (CRA 2.9.16.7.1). Each MCO has a predictive modeling system that allows it to identify high risk individuals and their needs (CRA 2.8.2.1).

438.208(c)(2) Mechanisms to assess enrollees with special health care needs by appropriate health care professionals

For members determined to need a course of treatment or regular care monitoring, the MCO shall have a mechanism in place to allow members to directly access a specialist as appropriate for the members' condition and identified needs (CRA 2.14.3.3).

438.208(c)(3) If applicable, treatment plans developed by the enrollee's primary care provider with enrollee participation, and in consultation with any specialists caring for the enrollee; approved in a timely manner; and in accord with applicable state standards

Not Applicable

438.208(c)(4) Direct Access to specialists for enrollees with special health care needs

The MCOs establish and maintain a network of physician specialists that is adequate and reasonable in number, in specialty type, and in geographic distribution to meet the medical and behavioral health needs of its members (adults and children) without excessive travel requirements. TennCare monitors compliance with specialty network standards on an ongoing basis (CRA 2.11.3.1-2).

42 CFR 438.210 COVERAGE AND AUTHORIZATION OF SERVICES

438.210(a)(1) Identify, define, and specify the amount, duration, and scope of each service.

See Attachment IV for covered benefits.

438.210(a)(2) Services are furnished in an amount, duration, and scope that is no less than those furnished to beneficiaries under fee-for-service Medicaid.

All covered benefits are provided if medically necessary through a capitated arrangement with the MCCs.

438.210(a)(3)(i) Services are sufficient in amount, duration, or scope to reasonably be expected to achieve the purpose for which the services are furnished.

CRA 2.6.3 relates to Medical Necessity Determinations. It states that the MCCs may establish procedures for the determination of medical necessity with the determination being made on a case by case basis and in accordance with the definition of medical necessity defined in TCA 71-5-144 and TennCare rules and regulations. However, this requirement does not limit the MCCs' ability to use medically appropriate cost-effective alternative services in accordance with Section 2.6.5.

438.210(a)(3)(ii) No arbitrary denial or reduction in service solely because of diagnosis, type of illness or condition

CRA Sections 2.6.3.2 and 2.6.3.3 state the MCCs may not employ, and shall not permit others acting on their behalf to employ, utilization control guidelines or other quantitative coverage limits, whether explicit or de facto, unless supported by an individualized determination of medical necessity based upon the needs of each TennCare enrollee and his/her medical history. The MCCs must not arbitrarily deny or reduce the amount, duration, or scope of a required service solely because of the diagnosis, type of illness, or condition.

438.210(a)(3)(iii) Each MCO/PIHP may place appropriate limits on a service, such as medical necessity.

CRA Sections 2.6.3.2 and 2.6.3.3 state the MCCs may not employ, and shall not permit others acting on their behalf to employ, utilization control guidelines or other quantitative coverage limits, whether explicit or de facto, unless supported by an individualized determination of medical necessity based upon the needs of each TennCare enrollee and his/her medical history. The MCCs must not arbitrarily deny or reduce the amount, duration, or scope of a required service solely because of the diagnosis, type of illness, or condition.

42 CFR 438.210(a)(4) Specify what constitutes "medically necessary services".

CRA 2.6.3 relates to Medical Necessity Determinations. It states that the MCCs may establish procedures for the determination of medical necessity with the determination being made on a case-by-case basis and in accordance with the definition of medical necessity defined in TCA 71-5-1944 and TennCare rules and regulations governing medical necessity, which are delineated at 1200-13-16. Specifically, to be medically necessary, the benefit must meet each of the following criteria:

- It must be recommended by a licensed physician who is treating the enrollee or other licensed healthcare provider practicing within the scope of his or her license who is treating the enrollee;
- It must be required in order to diagnose or treat an enrollee's medical condition;
- It must be safe and effective;
- It must not be experimental or investigational; and
- It must be the least costly alternative course of diagnosis or treatment that is adequate for the enrollee's medical condition.

438.210(b)(1) Each MCO/PIHP and its subcontractors must have written policies and procedures for authorization of services.

438.210(b)(2)(i) Each MCO/PIHP must have mechanisms to ensure consistent application of review criteria for authorization decisions.

CRA Section 2.14.1.8 states that MCOs must use appropriately licensed professionals to supervise all medical necessity decisions and specify the type of personnel responsible for each level of UM, including prior authorization and decision making. They must also have written procedures documenting access to Board Certified Consultants to assist in making medical necessity determinations. Any Amount, duration, or scope that is less than requested shall be made by a physical health or behavioral health care professional that has appropriate clinical expertise in treating the member's condition or disease or, in the case of long-term care services, a long-term care professional that has appropriate expertise in providing long-term care services.

CRA Section 2.14.2.1 states that MCOs must have in place, and follow, written policies and procedures for processing requests for initial and continuing prior authorizations of services and have in effect mechanisms to ensure consistent application of review criteria for prior authorization decisions. The policies and procedures shall provide for consultation with the requesting provider when appropriate. If prior authorization of a service is granted by the MCO and the service is provided, payment for the prior authorized service shall not be denied based on the lack of medical necessity, assuming that the member is eligible on the date of service, unless it is determined that the facts at the time of the denial of payment are significantly different than the circumstances which were described at the time the prior authorization was granted.

CRA 2.14.5.1 states that MCOs must have in place an authorization process for covered long-term services and cost effective alternative services that is separate from but integrated with the prior authorization process for covered physical and behavioral health services.

438.210(b)(3) Any decision to deny or reduce services is made by an appropriate health care professional.

CRA Section 2.14.1.9 states that MCOs must use appropriately licensed professionals to supervise all medical necessity decisions and specify the type of personnel responsible for each level of UM, including prior authorizations and decision making. They must also have written procedures documenting access to Board Certified Consultants to assist in making medical necessity determinations. Any decision to deny a service authorization request or to authorize a service in an amount, duration, or scope that is less than requested shall be made by a physical health or behavioral health care professional who has appropriate clinical expertise in treating the member's condition or disease or, in the case of long-term care services, a long-term care professional who has appropriate expertise in providing long-term care services.

438.210(c) Each MCO/PIHP must notify the requesting provider, and give the enrollee written notice of any decision to deny or reduce a service authorization request, or to authorize a service in an amount, duration, or scope that is less than requested.

438.210(d) Provide for the authorization decisions and notices as set forth in 438.210(d).

438.210(e) Compensation to individuals or entities that conduct utilization management activities does not provide incentives to deny, limit, or discontinue medically necessary services.

CRA 2.14.7, Notice of Adverse Action Requirement, requires MCOs to:

- Clearly document and communicate the reasons for each denial of a prior authorization request in a manner sufficient for the provider and member to understand the denial and decide about requesting reconsideration of or appealing the decision;
- Comply with all member notice provisions in TennCare rules and regulations; and
- Issue appropriate notice prior to any contractor-initiated decision to reduce or terminate CHOICES or non-CHOICES nursing facility services and shall comply with all federal court orders, and federal and state laws and regulations, regarding members' transfer or discharge from nursing facilities.

CMS Requirement: This section should include a discussion of the standards that the state has established in the MCO/PIHP contracts for structure and operations, as required by 42 CFR, Part 438, subpart D. These standards should relate to the overall goals and objectives listed in the quality strategy's introduction. States may either reference the structure and operations provisions from the state's managed care contracts, or provide a summary description of such provisions. CMS recommends states minimize reference to contract language in the quality strategy. However, if the state chooses the latter option, the summary description must be sufficiently detailed to offer a clear picture of the specific contract provisions and be written in language that may be understood by stakeholders who are interested in providing input as part of the public comment process.

STATE STRUCTURE & OPERATIONS STANDARDS AS REQUIRED BY 42 CFR, PART 438, SUBPART D
42 CFR 438.214 Provider Selection
438.214(a) Written Policies for Selection and Retention of Providers.
CRA Section 2.11.1.3.3 states the MCO must have in place written policies and procedures for the selection and retention of providers. These policies and procedures must not discriminate against particular providers that service high risk populations or specialize in conditions that require costly treatment.
438.214(b)(1) Uniform credentialing and recredentialing that each MCO/PIHP must follow.
CRA 2.11.9.1 - Credentialing of Contract Providers: • The MCO must utilize the current NCQA Standards and Guidelines for the Accreditation of MCOs for the credentialing and recredentialing of licensed independent providers and provider groups with whom it contracts or employs and who fall within its scope of authority and action. • The MCO must completely process credentialing applications from all types of providers (physical health, behavioral health, and long-term care providers) within 30 calendar days of receipt of a completed credentialing application, including all necessary documentation and attachments, and a signed provider agreement. "Completely process" means that the MCO shall approve and load approved applicants to its provider files in its claims processing system or deny the application and assure that the provider is not used by the MCO. • The MCO must ensure all providers submitted to it by the delegated credentialing agent are loaded to its provider files and into its claims processing system within 30 days of receipt. *CRA 2.11.9.2 - Credentialing of Non-Contract Providers* • The MCO must utilize the current NCQA Standards and Guidelines for the Accreditation of MCOs for the credentialing of licensed independent providers with whom it does not contract but with whom it has an independent relationship. An independent relationship exists when the MCO selects and directs its members to see a specific provider or group of providers. • The MCO must completely process credentialing applications within 30 calendar days of receipt of a completed credentialing application, including all necessary documentation and attachments, and a signed contract/agreement if applicable. "Completely process" means that the MCO shall review, approve, and load approved applicants to its provider files in its claims processing system or deny the application and assure that the provider is not used by the MCO. • The MCO must notify TennCare when it denies a provider credentialing application for program integrity-related reasons or otherwise limits the ability of providers to participate in the program for program integrity reasons.

CRA 2.11.9.3 - Credentialing of Behavioral Health Entities

- The MCO must ensure each behavioral health provider's service delivery site meets all applicable requirements of law and has the necessary and current license/certification/accreditation/designation approval per state requirements.
- When individuals providing behavioral health treatment services are not required to be licensed or certified, it is the responsibility of the MCO to ensure, based on applicable state licensure rules and/or program standards, that they are appropriately educated, trained, qualified, and competent to perform their job responsibilities.

CRA 2.11.9.4 - Credentialing of Long-Term Services and Supports Providers

- The MCO must develop and implement a process for credentialing and recredentialing long-term services and supports providers including CHOICES and Employment and Community First CHOICES providers. The process must, as applicable, meet the minimum NCQA requirements. In addition, the MCO must ensure that all long-term care providers, including those credentialed/ recredentialed in accordance with NCQA standards, meet applicable State requirements, as specified by TennCare in State Rule, in this agreement, or in policies or protocols.
- The MCO must develop policies that specify by HCBS provider type the credentialing process, the recredentialing process including frequency, and ongoing provider monitoring activities.
- Ongoing CHOICES and Employment and Community First CHOICES HCBS providers must be recredentialed at least annually.
- All other CHOICES and Employment and Community First CHOICES HCBS providers (e.g. pest control and assistive technology) must be recredentialed, at a minimum, every three years.
- At a minimum, credentialing of LTSS providers must include the collection of required documents, including disclosure statements, and verification that the provider:
  - Has a valid license or certification for contracted services;
  - Is not excluded from participation in the Medicare or Medicaid programs;
  - Has a National Provider Identifier (NPI) Number, where applicable, and has obtained a Medicaid provider number from TennCare;
  - Has policies and processes in place to conduct, in accordance with Federal and State law and rule and TennCare policy, criminal background checks, which must include a check of the Tennessee Abuse Registry, Tennessee Felony Offender Registry, National and Tennessee Sexual Offender Registry, and List of Excluded Individuals/Entities, on all prospective employees who will deliver CHOICES and Employment and Community First CHOICES HCBS and to document these in the worker's employment record; and
  - Has a process in place to provide and document initial and ongoing education to its employees who will provide services to CHOICES and Employment and Community First CHOICES members, and
  - Is compliant with the federal HCBS Settings rule.
- Recredentialing of HCBS providers must include verification of continued licensure and/or certification (as applicable) and compliance with policies and procedures identified during credentialing, including background checks and training requirements, compliance with the HCBS settings rule, critical incident reporting and management, and use of the Electronic Visit Verification (EVV) system.
- For both credentialing and recredentialing process, the MCO must conduct a site visit, unless the provider is located out of state, in which case the site visit may be waived and the reason documented in the provider file.

438.214(c) Provider selection policies and procedures do not discriminate against providers serving high-risk populations or specialize in conditions that require costly treatment.

CRA Section 2.11.1.3.3 requires MCOs to have in place written policies and procedures for the selection and retention of providers. These policies and procedures shall not discriminate against particular providers that service high risk populations or specialize in conditions that require costly treatment.

438.214(d) MCOs/PIHPs may not employ or contract with providers excluded from Federal Health Care Programs.

CRA 2.20.1.5 states, "The contractor, as well as its subcontractors and providers, whether contract or non-contract, shall comply with all federal requirements (42 CFR 1002) on exclusion and debarment screening. All tax-reporting provider entities that bill and/or receive TennCare funds…..shall screen their owners and employees against the federal exclusion databases."

CRA 2.20.3.6 states, "The contractor shall have provisions in its Compliance Plan regarding conducting monthly comparison of their provider files, including atypical providers, against both the Excluded Parties List System (EPLS) and the HHS-OIG List of Excluded Individuals/Entities (LEIE) and provide a report of the result of comparison to TENNCARE each month. The contractor shall establish an electronic database to capture identifiable information on the owners, agents and managing employees listed on providers' Disclosure forms."

CRA 2.20.3.7 states, "The contractor shall have provisions in its Compliance Plan regarding performing a monthly check for exclusions of their owners, agents and managing employees. The contractor shall establish an electronic database to capture identifiable information on its owners, agents and managing employees and perform monthly exclusion checking. The contractor shall provide the State Agency with such database and a monthly report of the exclusion check."

42 CFR 438.218 Enrollee Information

438.218 Incorporate the requirements of 438.10

CRA 2.17 incorporates the responses to CFR 438.10. Primary language is identified by the enrollment contractor at the time of each person's application for TennCare services. If the primary language is omitted from the enrollment files received by the MCO, the MCO staff then collects the information during new member calls. Requirements for the MCOs are as follows:

- Must submit all materials that will be distributed to members to TennCare for prior approval. This includes, but is not limited to member handbooks, provider directories, member newsletters, identification cards, fact sheets, notices, brochures, form letters, mass mailings, and system generated letters. Modifications to existing materials must also receive prior approval.
- All member materials must be worded at a sixth grade reading level and must be clearly legible. They must also be available in alternative formats for persons with special needs at no expense to the member. Formats may include Braille, large print, and audio, depending on the needs of the member.
- All vital documents must be translated and available in Spanish. Within 90 calendar days of notification from TennCare, all vital documents must be translated and available to each Limited English Proficiency (LEP) group identified by TennCare that constitutes 5% of the TennCare population or 1,000 enrollees, whichever is less.
- All written member materials must notify enrollees that oral interpretation is available for any language at no expense to them and how to access those services.
- The MCO must provide written notice to members of any changes in policies or procedures described in written materials previously sent to members. They must provide written notice at least 30 days before the effective date of a request.
- The contractor must use the approved Glossary of Required Spanish Terms in the Spanish translation of all member materials.
- All educational materials must be reviewed and updated concurrently with the update of the Clinical Practice Guidelines to assure the materials reflect current evidence-based information.

- The MCO must develop a member handbook based on a template provided by TennCare and update it periodically (at least annually). It must be distributed within 30 calendar days of receipt of notice of enrollment in the MCO or prior to enrollees' enrollment effective date and at least annually thereafter. Members must receive a revised member handbook whenever material changes are made.

CRA 2.17.4.6 requires that each member handbook include the following:

- Table of Contents.
- Explanation of how members will be notified of member-specific information such as effective date of enrollment, PCP assignment, and care coordinator assignment for CHOICES members or support coordinator assignment for Employment and Community First CHOICES members.
- Explanation of how members can request to change PCPs.
- Description of services provided including benefit limits, the consequences of reaching a benefit limit, non-covered services, and use of non-contract providers, including that members are not entitled to a fair hearing about non-covered services and that members shall use contract providers except in specified circumstances.
- Explanation that prior authorization is required for some services, including non-emergency services provided by a non-contract provider, and that service authorization is required for all long-term care services; that such services will be covered and reimbursed only if such prior authorization/service authorization is received before the service is provided; that all prior authorizations/service authorizations are null and void upon expiration of a member's TennCare eligibility; and that the member shall be responsible for payment for any services provided after the member's eligibility has expired.
- Descriptions of the Medicaid Benefits, Standard Benefits, and the covered long-term care services for CHOICES and Employment and Community First CHOICES members, by CHOICES group and Employment and Community First CHOICES group.
- Provide information regarding Employment and Community First CHOICES as specified in a template provided by TennCare.
- Description of TennCare cost sharing or patient liability responsibilities including an explanation that providers and/or the CONTRACTOR may utilize whatever legal actions are available to collect these amounts. Further, the information shall specify the instances in which a member may be billed for services, and shall indicate that the member may not be billed for covered services except for the amounts of the specified TennCare cost sharing or patient liability responsibilities and explain the member's right to appeal in the event that they are billed for amounts other than their TennCare cost sharing or patient liability responsibilities. The information shall also identify the potential consequences if the member does not pay his/her patient liability, including loss of the member's current nursing facility provider, disenrollment from CHOICES or Employment and Community First CHOICES, and, to the extent the member's eligibility depends on receipt of long-term care services, loss of eligibility for TennCare.
- Information about preventive services for adults and children, including TennCare Kids; a listing of covered preventive services; and notice that preventive services are at no cost and without cost sharing responsibilities.
- Procedures for obtaining required services, including procedures for obtaining referrals to specialists as well as procedures for obtaining referrals to non-contract providers. The handbook shall advise members that if they need a service that is not available from a contract provider, they will be referred to a non-contract provider and any copayment requirements would be the same as if this provider were a contract provider.

- Information on the CHOICES program, including a description of the CHOICES groups; eligibility for CHOICES; enrollment in CHOICES, including whom to contact at the MCO regarding enrollment in CHOICES; enrollment targets for Group 2 and Group 3 (excluding Interim Group 3), including reserve capacity and administration of waiting lists; and CHOICES benefits, including benefit limits, the individual cost neutrality cap for Group 2, and the expenditure cap for Group 3.
- Information on the Employment and Community First CHOICES program including a description of the Employment and Community First CHOICES groups, eligibility for Employment and Community First CHOICES , enrollment in Employment and Community First CHOICES including who to contact at the MCO regarding enrollment in Employment and Community First CHOICES, and Employment and Community First CHOICES benefits including benefit limits and the individual expenditure caps for Employment and Community First CHOICES.
- Information on care coordination for CHOICES members, including but not limited to the role of the care coordinator, level of care assessment and reassessment, needs assessment and reassessment, and care planning, including the development of a plan of care for members in CHOICES Groups 2 and 3.
- Information on support coordination for Employment and Community First CHOICES members, including but not limited to the role of the support coordinator, level of care assessment and reassessment, needs assessment and reassessment, and care planning, including the development of a person centered support plan.
- Information on the right of CHOICES and Employment and Community First CHOICES members to request an objective review by the State of their needs assessment and/or care planning processes and how to request such a review.
- Information regarding consumer direction of eligible CHOICES and Employment and Community First CHOICES HCBS, including but not limited to the roles and responsibilities of the member or the member's representative, the services that can be directed, the member's right to participate in or voluntarily withdraw from consumer direction at any time, the role of and services provided by the FEA, and a statement that voluntary or involuntary withdrawal from consumer direction will not affect a member's eligibility for CHOICES or Employment and Community First CHOICES.
- Explanation of emergency services and procedures on how to obtain emergency services both in and out of the contractor's service area, including but not limited to an explanation of post-stabilization services, the use of 911, locations of emergency settings, and locations for post-stabilization services.
- Information on how to access the primary care provider on a 24 hour basis as well as the 24 hour nurse line. The handbook may encourage members to contact the PCP or 24 hour nurse line when they have questions as to whether they should go to the emergency room.
- Information on how to access a care coordinator, including the ability to access a care coordinator after regular business hours through the 24 hour nurse triage/advice line.
- Notice of the right to file a discrimination complaint as provided for by applicable federal and state civil rights laws, including but not limited to Title VI of the Civil Rights Act of 1964, the Age Discrimination Act of 1975, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and Titles II and III of the Americans with Disabilities Act of 1990, as well as a complaint form on which to do so. The notice must be considered a Vital Document and shall be available at a minimum in the English and Spanish languages.
- Information about the Long-Term Care Ombudsman Program.

- Information about the CHOICES and Employment and Community First CHOICES consumer advocate, including but not limited to the role of the consumer advocate in the CHOICES and Employment and Community First CHOICES program and how to contact the consumer advocate for assistance.
- Information about how to report suspected abuse, neglect, and exploitation of members who are adults (see TCA 71-6-101 *et seq*.) and suspected brutality, abuse, or neglect of members who are children (see TCA 37-1-401 *et seq*. and TCA 37-1-601 *et seq*.), including the phone numbers to call to report suspected abuse/neglect.
- Complaint and appeal procedures.
- Notice that in addition to the member's right to file an appeal directly to TennCare for adverse actions taken by the MCO, the member shall have the right to request reassessment of eligibility related decisions directly to TennCare.
- Written policies on member rights and responsibilities, pursuant to 42 CFR 438.100 and NCQA's Standards and Guidelines for the Accreditation of MCOs.
- Written information concerning advance directives as described in 42 CFR 489 Subpart I and in accordance with 42 CFR 422.128.
- Notice that enrollment in the contractor's MCO invalidates any prior authorization for services granted by another MCO but not utilized by the member prior to the member's enrollment into the contractor's MCO and notice of continuation of care when entering the contractor's MCO as described in Section 2.9.2 of this Agreement.
- Notice to the member that it is his or her responsibility to notify the MCO, TennCare, and Department of Human Services (DHS) (or for SSI eligibles, SSA) each and every time the member moves to a new address and that failure to notify DHS (or for SSI eligibles, SSA) could result in the member not receiving important eligibility and/or benefit information.
- Notice that a new member may request to change MCOs at any time during the 45 calendar day period immediately following their initial enrollment in an MCO, subject to the capacity of the selected MCO to accept additional members and any restrictions limiting enrollment levels established by TennCare. This notice must include instructions on how to contact TennCare to request a change.
- Notice that the member may change MCOs at the next choice period and shall have a 45 calendar day period immediately following the enrollment, as requested during said choice period, in a new MCO to request to change MCOs, subject to the capacity of the selected MCO to accept additional enrollees and any restrictions limiting enrollment levels established by TennCare. This notice shall include instructions on how to contact TennCare to request a change.
- Notice that the member has the right to ask TennCare to change MCOs based on hardship, the circumstances which constitute hardship, explanation of the member's right to file an appeal if such request is not granted, and how to do so.
- Notice of the enrollee's right to terminate participation in the TennCare program at any time with instructions to contact TennCare for termination forms and additional information on termination.
- TennCare and MCO member services toll-free telephone numbers, including the TennCare hotline, the MCO's member services information line, and the MCO's 24/7 nurse triage/advice line with a statement that the member may contact the MCO or TennCare regarding questions about the TennCare program, including CHOICES and Employment and Community First CHOICES, as well as the service/information that may be obtained from each line.
- Information on how to obtain information in alternative formats or how to access interpretation services as well as a statement that interpretation and translation services are free.
- Information educating members of their rights and necessary steps to amend their data in accordance with HIPAA regulations and state law.
- Directions on how to request and obtain information regarding the "structure and operation of the

MCO" and "physician incentive plans."

- Information that the member has the right to receive information on available treatment options and alternatives, presented in a manner appropriate to the member's condition and ability to understand.
- Information that the member has the right to be free from any form of restraint or seclusion used as a means of coercion, discipline, convenience, or retaliation.
- Information on appropriate prescription drug usage.
- Any additional information required in accordance with NCQA's Standards and Guidelines for the Accreditation of MCOs.

Provider Directory requirements, listed in CRA 2.17.8, are as follows:

- The MCO must distribute information regarding general provider directories to new members within 30 calendar days of receipt of notification of enrollment in the MCO or prior to the member's enrollment effective date. Such information must include how to access the provider directory, including the right to request a hard copy and to contact the member services line to inquire regarding a provider's participation in the network. Members receiving a hard copy of the provider directory must be advised that the network may have changed since the directory was printed and told how to access current information regarding participating providers.
- The MCO must provide information regarding the CHOICES or Employment and Community First CHOICES provider directory to each CHOICES or Employment and Community First CHOICES member as part of the face-to-face visit (for members enrolled through the SPOE) or face-to-face intake visit (for current members) as applicable, but not more than 30 days from notice of CHOICES enrollment. Such information shall include how to access the CHOICES or Employment and Community First CHOICES provider directory, including the right to request a hard copy and to contact the member services line to inquire regarding a provider's participation in the network. Members receiving a hard copy of the CHOICES or Employment and Community First CHOICES provider directory shall be advised that the network may have changed since the directory was printed, and how to access current information regarding the MCO's participating providers.
- The MCO is also responsible for maintaining updated provider information in an online searchable electronic general provider directory and an online searchable electronic CHOICES and Employment and Community First CHOICES provider directory. A PDF copy of the hard copy version will not meet this requirement. The online searchable version of the general provider directory and the CHOICES or Employment and Community First CHOICES provider directory shall be updated on a daily basis during the business week. In addition, the MCO must make available upon request, in hard copy format, a complete and updated general provider directory to all members and an updated CHOICES or Employment and Community First CHOICES provider directory to CHOICES or Employment and Community First CHOICES members. The hard copy of the general provider directory and the CHOICES or Employment and Community First CHOICES provider directory shall be updated at least on an annual basis. Members receiving a hard copy and/or accessing a PDF version of the hard copy on the MCO's website of the general provider directory or the CHOICES provider directory must be advised that the network may have changed since the directory was printed and told how to access current information regarding participating providers, including the searchable electronic version of the general provider directory and the CHOICES or Employment and Community First CHOICES provider directory as well as the member services line.

- Provider directories (including the general provider directory, the CHOICES provider directory and the Employment and Community First CHOICES provider directory) and any revisions thereto, must be submitted to TennCare for written approval prior to distribution to enrollees. The text of the directory must be in the format prescribed by TennCare. In addition, the provider information used to populate the provider directory must be submitted as a TXT file or such format as otherwise approved in writing by TennCare and be produced using the same extract process as the actual provider directory.
- The MCO must develop and maintain a general provider directory, which shall be made available to all members. The provider directory must be posted on the MCC website and provided in hard copy upon request of the member. Members must be advised in writing regarding how to access the provider directory, including the right to request a hard copy and to contact the member services line to inquire regarding a provider's participation in the network. Members receiving a hard copy of the provider directory must be advised that the network may have changed since the directory was printed and told how to access current information regarding participating providers. The online version of the provider directory shall be updated on a daily basis. The general provider directory must include the following: names, locations, telephone numbers, office hours, and non-English languages spoken by contract PCPs and specialists; identification of providers accepting new patients; identification of whether or not a provider performs TennCare Kids screens; hospital listings, including locations of emergency settings and post-stabilization services, with the name, location, and telephone number of each facility/setting; and a prominent notice that CHOICES or Employment and Community First CHOICES members should refer to the CHOICES or Employment and Community First CHOICES provider directory for information on long-term services and supports providers.

42 CFR 438.224 Confidentiality

438.224 Individually identifiable health information is closed in accordance with Federal privacy requirements.

Individually identifiable health information is used and disclosed in accordance with HIPAA privacy requirements (CRA 2.23.2.1).

42 CFR 438. 226 Enrollment and Disenrollment

438.226 Each MCO/PIHP complies with the enrollment and disenrollment requirements and limitations in 438.56

CRA Section 2.5.3 states that the MCO must not request disenrollment of an enrollee for any reason, and TennCare shall not disenroll members for any of the following reasons:

- Adverse changes in the enrollee's health;
- Pre-existing medical or behavioral health conditions;
- High cost medical or behavioral health bills;
- Failure or refusal to pay applicable TennCare cost sharing responsibilities, except when this results in loss of eligibility for TennCare;
- Enrollee's utilization of medical or behavioral health services;
- Enrollee's diminished mental capacity; or
- Enrollee's uncooperative or disruptive behavior resulting from his or her special needs (except when his or her continued enrollment in the MCO seriously impairs the entity's ability to furnish services to either this particular enrollee or other enrollees).

42 CFR 438.228 Grievance Systems

438.228(a) Grievance system meets the requirements of Part 438, subpart F

438.228(b) If applicable, random State reviews of notice of action designation to ensure notification of enrollees in a timely manner

CRA Section 2.19.3 outlines all requirements related to appeals as stated below:

- The MCO must have a contact person who is knowledgeable of appeal procedures and shall direct all appeals, whether the appeal is verbal or the member chooses to file in writing, to TennCare. Should a member choose to appeal in writing, the member shall be instructed to file via mail or fax to the designated TennCare P.O. Box or fax number for medical appeals.
- The MCO must have sufficient support staff (clerical and professional) available to process appeals in accordance with TennCare requirements related to the appeal of adverse actions affecting a TennCare member. The MCO must notify TennCare of the names of appointed staff members and their phone numbers. Staff must be knowledgeable about applicable state and federal law, TennCare rules and regulations, and all court orders and consent decrees governing appeal procedures, as they become effective.
- The MCO must educate its staff concerning the importance of the appeals procedure, the rights of the member, and the time frames in which action must be taken by the MCO regarding the handling and disposition of an appeal.
- The MCO must identify the appropriate internal individual or body having decision-making authority as part of the appeal procedure.
- The MCO must have the ability to take telephone appeals and accommodate persons with disabilities during the appeals process. Appeal forms shall be available at each service site and by contacting the MCO. However, members shall not be required to use a TennCare-approved appeal form in order to file an appeal.
- Upon request, the MCO must provide members a TennCare approved appeal form(s).
- The MCO must provide reasonable assistance to all appellants during the appeal process.
- At any point in the appeal process, TennCare has the authority to remove a member from the MCO when it is determined that such removal is in the best interest of the member and TennCare.
- The MCO must require providers to display notices of members' right to appeal adverse actions affecting services in public areas of each facility in accordance with TennCare rules and regulations. The MCO must ensure that providers have correct and adequate supply of public notices.
- Neither the MCO nor TennCare shall prohibit or discourage any individual from testifying on behalf of a member.
- The MCO must ensure compliance with all notice requirements and notice content requirements specified in applicable state and federal law, TennCare rules and regulations, and all court orders and consent decrees governing notice and appeal procedures, as they become effective.
- TennCare may develop additional appeal process guidelines or rules, including requirements as to content and timing of notices to members, which must be followed by the MCO. However, the MCO must not be precluded from challenging any judicial requirements, and to the extent judicial requirements that are the basis of such additional guidelines or rules are stayed, reversed, or otherwise rendered inapplicable, the MCO must not be required to comply with such guidelines or rules during any period of such inapplicability.
- The MCO must provide general and targeted education to providers regarding expedited appeals (described in TennCare rules and regulations), including when an expedited appeal is appropriate, and procedures for providing written certification thereof.
- The MCO must require providers to provide written certification regarding whether a member's appeal is an emergency upon request by a member prior to filing such appeal, or upon reconsideration of such appeal by the MCO when requested by TennCare.
- The MCO must provide notice to contract providers regarding provider responsibility in the appeal process, including but not limited to, the provision of medical records and/or documentation.

• The MCO must urge providers who feel they cannot order a drug on the TennCare Preferred Drug List to seek prior authorization in advance, as well as to take the initiative to seek prior authorization or change or cancel the prescription when contacted by a member or pharmacy regarding denial of a pharmacy service due to system edits (e.g., therapeutic duplication, etc.). • Member eligibility and eligibility-related grievances and appeals (including but not limited to long-term care eligibility and enrollment), including termination of eligibility, effective dates of coverage, and the determination of premium, copayment, and patient liability responsibilities shall be directed to TennCare.
42 CFR 438.230 Subcontractual Relationships and Delegation
438.230(a) Each MCO/PIHP must oversee and be accountable for any delegated functions and responsibilities
In accordance with contractual requirements, MCOs must monitor all delegated functions to ensure that they are in compliance with all regulations (CRA 2.26.1).
438.230(b)(1) Before any delegation, each MCO/PIHP must evaluate prospective subcontractor's ability to perform.
All MCOs must evaluate prospective subcontractors' ability to perform the activities to be delegated in accordance with contractual requirements (CRA 2.26.1.1).
438.230(b)(2) Written agreement that specifies the activities and report responsibilities delegated to the subcontractor; and provides for revoking delegation or imposing other sanctions if the subcontractor's performance is inadequate.
MCOs must require that all delegated agreements be in writing and specify the activities and report responsibilities delegated to the subcontractor. Contracts require that delegation may be revoked or sanctions applied if the subcontractor's performance is inadequate (CRA 2.26.1.2).
438.230(b)(3) Monitoring of subcontractor performance on an ongoing basis
MCOs must monitor all subcontractors on an ongoing basis and subject them to formal review, on at least an annual basis, consistent with NCQA standards and state MCO laws and regulations (CRA 2.26.1.4).
438.230(b)(4) Corrective action for identified deficiencies or areas for improvement
MCOs must identify deficiencies or areas for improvement and require subcontractors to take corrective action as necessary (CRA 2.26.1.5).

Measurement and Improvement Standards

CMS requirement: This section should include a discussion of the standards that the state has established in the MCO/PIHP contracts for measurement and improvement, as required by 42 CFR, Part 438, Subpart D. These standards should relate to the overall objectives listed in the quality strategy's introduction. States may either reference the measurement and improvement provisions from the state's managed care contracts, or provide a summary description of such provisions. CMS recommends states minimize reference to contract language in the quality strategy. However, if the state chooses the latter option, the summary description must be sufficiently detailed to offer a clear picture of the specific contract provisions and be written in language that may be understood by stakeholders who are interested in providing input as part of the public comment process.

STATE MEASUREMENT & IMPROVEMENT STANDARDS AS REQUIRED BY 42 CFR, PART 438, SUBPART D
42 CFR 438.236 Practice Guidelines
438.236(b) Practice guidelines: 1) are based on valid and reliable clinical evidence or a consensus of health care professionals in the particular field; 2) consider the needs of enrollees; 3) are adopted in consultation with contracting health care professionals; and 4) are reviewed and updated periodically, as appropriate.
CRA Section 2.15.4 states that the MCO must utilize evidence-based clinical practice guidelines in its Population Health Programs. Wherever possible, MCOs utilize nationally recognized clinical practice guidelines. On occasion, tools for standardized specifications for care to assist practitioners and patient decisions about appropriate care for specific clinical circumstances are developed through a formal process and are based on authoritative sources that include clinical literature and expert consensus. The guidelines must be reviewed and revised whenever the guidelines change and at least every two years. The MCO is required to maintain an archive of its clinical practice guidelines for a period of five years. Such archive must contain each clinical guideline as originally issued so that the actual guidelines for prior years are retained for program integrity purposes. NCQA standard QI 9, Element A requires that guidelines be distributed to appropriate practitioners. All MCOs are required to be NCQA accredited. As part of the accreditation survey, files are reviewed to assure that the NCQA requirements for clinical practice guidelines are met. It should be noted that TennCare defines evidenced-based practice as a clinical intervention that has demonstrated positive outcomes in several research studies to assist consumers in achieving their desired goals of health and wellness. Implied in that definition is that the evidence-based guidelines will incorporate the enrollee's needs and interests as part of the development of evidence-based guidelines.
438.236(c) Dissemination of practice guidelines to all providers, and upon request, to enrollees
All MCOs are required to be NCQA accredited. As part of the accreditation survey, files are reviewed to assure that the NCQA requirements for clinical practice guidelines are met.
42 CFR 438.240 Quality Assessment and Performance Improvement Program
438.240(a) Each MCO and PIHP must have an ongoing quality assessment and improvement program.

CRA Section 2.15 addresses the Quality Assessment and Performance Improvement standards for the MCOs. They must:

- Receive and maintain accreditation from NCQA.
- Have a written program that clearly defines its quality structures and processes and assigns responsibility to appropriate individuals.
- Use NCQA standards as a guide and include a plan for improving patient safety.
- Address physical health, behavioral health, and long-term care services.
- Be accountable to the MCC Board of Directors and executive management team.
- Have substantial involvement of a designated physician and designated behavioral health practitioner.
- Have a Quality Improvement (QI) Committee that oversees the QI functions.
- Have an annual work plan.
- Have dedicated staff as well as data and analytical resources.
- Evaluate the program annually and update as appropriate.
- Make all information available to providers and members.
- Make performance data available to providers and members.
- Use results of activities to improve the quality of physical health, behavioral health, and long-term care service delivery with appropriate input from providers and members.
- Take appropriate action to address service delivery, provider, and other QI issues as they are identified.
- Participate in workgroups hosted by TennCare and agree to establish and implement policies and procedures, including billing and reimbursement, in order to address specific quality concerns.
- Collect data on race and ethnicity.
- Include QM/QI activities to improve healthcare disparities identified through data collection.
- Have a QM/QI committee which must include medical, behavioral health, and long-term care staff as well as contract providers, including medical, behavioral, and long-term care. This committee analyzes and evaluates results, recommends policy decisions, and ensures participation of providers. It must also review and approve the QM/QI program description, annual evaluation, and associated work plan prior to submission to TennCare.

438.240(b)(1) and 438.240(d) Each MCO and PIHP must conduct PIPs and measure and report to the state its performance. List out PIPs in the quality strategy.

CRA 2.15.3 – Performance Improvement Projects (PIPs) – requires that each MCO must perform at least two clinical and three non-clinical PIPs. The two clinical PIPs must include one in the area of behavioral health that is relevant to bipolar disorder, major depression, or schizophrenia and one in the area of either child health or perinatal (prenatal/postpartum) health.

One of the three non-clinical PIPs must be in the area of long-term care. The MCOs must use existing processes, methodologies, and protocols, including the CMS protocols.

438.240(b)(2) and 438.240(c) Each MCO and PIHP must measure and report performance measurement data as specified by the State. List out performance measures in the quality strategy.

CRA 2.15.6 states that MCOs must complete all HEDIS measures designated by NCQA as relevant to Medicaid. Due to a Dental carve-out, the dental measures are excluded. Measure results are reported separately for each Grand Region of the state. MCOs must use the Hybrid methodology (i.e., gathered from administrative and medical record data) as the data collection method for any Medicaid HEDIS measure containing Hybrid specifications as identified by NCQA. The MCOs must contract with an NCQA certified HEDIS auditor to validate the processes of the MCO in accordance with NCQA requirements. Audited HEDIS results are submitted both to TennCare and to the EQRO, who then provides a written report to TennCare. See Attachment V for a list of all HEDIS measures.

438.240(b)(3) Each MCO and PIHP must have mechanisms to detect both underutilization and overutilization of services.

CRA Section 2.14, Utilization Management (UM), requires MCOs to provide for methods of assuring the appropriateness of inpatient care. Such methodologies must be based on individualized determinations of medical necessity in accordance with UM policies and procedures and, at a minimum, must include:

- Pre-admission certification process for non-emergency admissions;
- A concurrent review program to monitor and review continued inpatient hospitalization, length of stay, or diagnostic ancillary services regarding their appropriateness and medical necessity.
- Admission review for urgent and/or emergency admissions, on a retroactive basis when necessary, in order to determine if the admission is medically necessary and if the requested length of stay for the admission is reasonable based upon an individualized determination of medical necessity. Such reviews must not result in delays in the provision of medically necessary urgent or emergency care.
- Restrictions against requiring pre-admission certification for admissions for the normal delivery of children; and
- Prospective review of same day surgery procedures.

MCOs must review ED utilization data, at a minimum, every six months to identify members with utilization exceeding the threshold defined by TennCare as ten or more visits in the defined six month period (CRA 2.14.1.16.1).

MCOs must have in place, and follow, written policies and procedures for processing requests for initial and continuing prior authorizations of services and have in effect mechanisms to ensure consistent application of review criteria for prior authorization decisions (CRA 2.14.2.1).

Any decision to deny a service authorization request or to authorize a service in an amount, duration, or scope that is less than requested shall be made by a physical health or behavioral health care professional who has appropriate clinical expertise in treating the member's condition or disease or, in the case of long-term care services, a long-term care professional who has appropriate expertise in providing long-term care services (CRA 2.14.1.9).

MCOs must not place maximum limits on the length of stay for members requiring hospitalization and/or surgery. MCOs may not employ, and shall not permit others acting on their behalf to employ, utilization control guidelines or other quantitative coverage limits, unless supported by an individualized determination of medical necessity based upon the needs of each member and his/her medical history (CRA 2.14.1.10).

MCOs must have mechanisms in place to ensure that required services are not arbitrarily denied or reduced in amount, duration, or scope solely because of the diagnosis, type of illness, or condition (CRA 2.14.1.11).

438.240(b)(4) Each MCO and PIHP must have mechanisms to assess the quality and appropriateness of care furnished to enrollees with special health care needs.

MCOs are contractually required to have in place a written Quality Management/Quality Improvement program that describes all of the mechanisms that they have in place for assessing the quality and appropriateness of care for all enrollees, including those with special health care needs (CRA 2.15).

438.240(e) Annual review by the State of each quality assessment and improvement program. If the state requires that an MCO or PIHP have in effect a process for its own evaluation of the impact and effectiveness of its quality assessment and performance improvement program, indicate this in the quality strategy.

The MCO quality assessment and improvement programs are reviewed in multiple ways. The first is the NCQA Accreditation Review that occurs for all health plans every three years. The second review is done annually by the EQRO and includes the following:

- Policies and procedures ensuring coordination between physical, behavioral health, and long-term care (LTC) services by including the following key elements:
  - Screening for behavioral health needs
  - Referral to physical health, behavioral health, and LTC providers
  - Screening for LTC needs
  - Confidentiality
  - Exchange of information
  - Assessment
  - Treatment plan development
  - Collaboration
  - Case management (CM) and population health (PH)
  - Provider training
  - Monitoring implementation and outcomes
  - Encourages PCPs and other providers to use state-approved behavioral health screening tool
- Processes in place to assure that members discharged from psychiatric inpatient hospitals and psychiatric residential treatment facilities are evaluated for mental health CM services and provided with appropriate behavioral health follow-up services.
  Process in place to identify and enroll eligible members in each PH program including CHOICES and Employment and Community First CHOICES members, through the same process used for identification of non-CHOICES and Employment and Community First CHOICES members and the CHOICES non-Employment and Community firs CHOICES care coordination process or Employment and Community First CHOICES support coordination process.
- Processes to assure that each Population Health program includes the development of program descriptions that serve as the outline for all activities and interventions in the program. Condition monitoring, patient adherence to the program, consideration of other co-morbidities and condition related lifestyle issues are addressed.

- Processes to assure that PH program descriptions address how the CHOICES care-coordinator or Employment and Community First support coordinator will receive notification of the member's participation, information collected about the member, and educational materials given to the member.
- Processes to identify CHOICES and Employment and Community First CHOICES member needs when they are in transition between MCOs. Must assures that a comprehensive needs assessment is immediately conducted, the plan of care is updated, and the changes in services are implemented within 10 days of the MCO becoming aware of the change in needs.
- Processes for assuring that members transitioning from a nursing facility to a community based residential alternative or to live with a relative or other caretaker, the care coordinator makes contact with the member within the first 24 hours of transition and visits the member in his/her new residence within seven days of transition.
- Processes to assure the MCO conducts a CHOICES or Employment and Community First CHOICES level of care assessment at least annually and within five business days of awareness of a change in a member's functional or medical status that could potentially affect eligibility.

Quality Oversight staff receive many different reports from the health plans that are due at various times of the year. These include, but are not limited to:

- EPSDT Annual Community Outreach Plan and subsequent quarterly reports.
- Annual Quality Report that outlines major initiatives conducted by the health plan.
- Population Health Program reports – both quarterly and annually.
- 24/7 Nurse Line reports

Additionally there are collaborative workgroups that address specific topics and includes individuals from all health plans; monthly meetings with the MCO Quality Director's; and site visits with the health plans at least annually.

42 CFR 438.242 Health Information Systems

438.242(a) Each MCO and PIHP must maintain a health information system that can collect, analyze, integrate, and report data and provide information on areas including, but not limited to, utilization, grievances and appeals, and disenrollments for other than loss of Medicaid eligibility.

By contract, each MCO must maintain all information related to interactions with enrollees and providers, including complaints and appeals. Each MCO is also required by contract to maintain all information and/or encounter information for providers with whom the MCO has a capitated arrangement both current and historical. Each MCO is also required to maintain all records and information related to member health status and outcomes.

438.242(b)(1) Each MCO and PIHP must collect data on enrollee and provider characteristics and on services furnished to enrollees.

By contract, each MCO is required to maintain all member enrollment and other information, both current and historical. By contract, each MCO is required to maintain all claims information and/or encounter information and all authorization and care coordination both current and historical.

438.242(b)(2) Each MCO and PIHP must ensure data received is accurate and complete.

By contract, each MCO is responsible for ensuring that the level of care is accurate and complete and reflects the member's current medical and functional status based on information gathered and/or claims and encounters submitted.

SECTION IV: IMPROVEMENT AND INTERVENTIONS

CMS Requirement: Describe, based on the results of assessment activities, how the state will attempt to improve the quality of care delivered by MCOs and PIHPs through interventions such as, but not limited to:

- ***Cross state agency collaborative***
- ***Pay-for-performance or value-based purchasing initiatives***
- ***Accreditation requirements***
- ***Grants***
- ***Disease management programs***
- ***Changes in benefits for enrollees***
- ***Provider network expansion***

Describe how the state's planned interventions tie to each specific goal and objective of the quality strategy.

PLANNED INTERVENTIONS' ALIGNMENT WITH QUALITY STRATEGY GOALS AND OBJECTIVES		
GOAL	**OBJECTIVE**	**INTERVENTION**
ACCESS TO CARE	Adult's access to preventive/ ambulatory health services	Distribution of Member Materials: MCOs distribute a large number of educational and informational materials to their membership, including but not limited to member handbooks, newsletters, fact sheets, and brochures. Each MCO is required to receive prior written approval from TennCare of all materials that are distributed to members, whether developed by the MCOs or their contractors. TennCare staff reviews the submitted materials for both clinical and programmatic content and either approves or denies them within 15 calendar days from the date of submission. QO staff works closely with the MCOs regarding continual quality improvement of materials developed.
	Children & adolescents' access to primary care	MCC EPSDT (TennCare Kids) Collaborative: The Division of Quality Oversight will continue to host ad hoc MCC EPSDT (TennCare Kids) collaborative meetings that include representatives from all MCOs, the Dental Benefits Manager, and the Department of Health. This group addresses ways of reaching out to TennCare enrollees who are under the age of 21 as well as to their families.
	Children and adults visit doctor/clinic when first seeking care as opposed to hospital/ED	Strategic Planning: Annually, the Division of Quality Oversight staff, in collaboration with Qsource and the Division of Healthcare Informatics, reviews and analyzes all data coming in to the Division of Quality Oversight through MCC reporting and other areas. At that time, and in subsequent meetings, decisions are made about areas of performance that need additional emphasis. In 2015, staff expanded strategies to address excessive Emergency Department utilization and will continue these through 2017. The strategies include: • Identified opportunities for improvement let QO to eliminate the MCO self-report in lieu of an automated ED claims report along with individual medical record reviews;

		• Changing medical record reviews from semi-annually to quarterly for timelier results; • Adding additional fields to the ED database in order to trend the data by member and to compare member utilization rankings from quarter to quarter; • Placing a strong focus on members who appear in multiple quarterly reports as high utilizers and those that did not receive outreach attempts from the MCOs; • Enhancing the sampling methodology; • Established a target population of the top five ED utilizers for each MCO by region and began auditing MCO records for these individuals; and • Continue conducting medical record reviews and determining if appropriate interventions were conducted by the MCOs. An opportunity for improvement is to increase the number of MCO outreach attempts in order to decrease the percentage of members who had no outreach attempts.
	Adolescent Access to Care	In late fall 2015; TennCare staff established an Adolescent Screening Workgroup (ASW) consisting of MCO Clinical Quality and Population Health Directors. The goal of the project was to increase adolescent screening rates in 2016 and going forward. Each MCO, the DBM, and the Department of Health selected two representatives to serve on the workgroup. The first meeting occurred on February 18, 2016, with follow-up meetings occurring on May 19 and June 30, 2016. Using MCO and statewide CMS-416 data the workgroup identified three to four counties in each Grand Region that would be appropriate for a pilot. At the May meeting the group decided to hold one event in each Grand Region of the state. The kickoff event occurred on July 30, 2016 in West Tennessee at Christ Community Health Services in Memphis. The event was a success with 41 adolescents being screened onsite and others signing up for screens later in the month long campaign. Drawings were held and small incentive items were given out during the event. The second event will be conducted in the fall of 2016.

QUALITY OF CARE	Adolescent well-care visits	Teen Newsletter: As described above, the MCC EPSDT (TennCare Kids) Collaborative focuses its efforts on improving health care access, education, and services for enrollees. An extremely hard population to reach is the adolescent population. For this reason, the Collaborative specifically targets this age group through a quarterly MCO teen newsletter that includes adolescent-specific articles that address physical, behavioral, and dental health. In 2015, TennCare began allowing the MCOs to deliver this newsletter through social media, if appropriate, rather than always through a mailing. A specialized workgroup was also initiated to focus on increasing adolescent well-care visits. Members of the workgroup included staff from all MCOs and the Department of Health. TennCare has included the HEDIS Adolescent Well-Care Visits measure in the list of measures with which the MCOs can receive a pay for performance incentive. Likewise, the MCOs have included this measure in their Provider Pay for Performance program. TennCare has included the HEDIS Medication Management for People with Asthma Measure in the list of measures for which the MCOs can receive a pay for performance incentive. Likewise, the MCOs may include this measure in their Provider Pay for Performance program.
	Diabetes	TennCare has included the HEDIS Comprehensive Diabetes Care Measures for Retinal Eye Exams, Nephropathy, and Blood Pressure <140/90 in the list of measures for which the MCOs can receive a pay for performance incentive. Likewise, the MCOs have included this measure in their Provider Pay for Performance program.
	Timeliness of Prenatal Care	TennCare has included the HEDIS Timeliness of Prenatal Care Measure in the list of measures with which the MCOs can receive a pay for performance incentive. Likewise, the MCOs have included this measure in their Provider Pay for Performance program. Cross State Agency Collaborative: The Division of Quality Oversight will continue to host collaborative meetings addressing maternity issues with prenatal and postpartum care. This group includes representatives from all MCOs and the Tennessee Department of Health as well as TennCare. The group has previously developed a number of interventions related to tobacco use and pregnancy , provider referral to MCO maternity programs, information for referrals for substance abuse, Neonatal Abstinence Syndrome flyers, and provider information about performing and billing for postpartum depression screening. Department Of Health Perinatal Advisory Committee: The Quality Oversight Clinical Quality Review Manager participates on the Department of Health's Perinatal Advisory Committee. The committee continues to meet on a semi-annual basis to address Neonatal Abstinence Syndrome, Post-neonatal Follow-up, Baby and Me Tobacco Free, Safe Sleep, Breastfeeding, the Tennessee Infant Mortality Reduction Strategic Plan, Certificate of Need Changes, Mothers' Milk Bank of Tennessee, and issues identified by the Regional Perinatal Centers. A new workgroup is reviewing and revising the Educational Objectives for Nurses.

	Breast and Cervical Cancer Screening	Breast and Cervical Cancer Screening Program: This program provides breast and cervical cancer screening to eligible women and diagnostic follow-up tests for those with suspicious results. Women diagnosed with breast or cervical cancer or pre-cancerous conditions for these cancers are enrolled for treatment coverage through TennCare. The mission of the program is to reach and serve lower income uninsured or underinsured women for these basic preventive health screening exams.
	Quality of Care Concerns	Quality of Care Concern's Process: The Division of Quality Oversight receives notification of quality of care concerns regarding enrollees that are sent directly to TennCare. These concerns are addressed in a variety of ways – through calls to the person submitting the concern, correspondence with the MCOs, or referrals to other agencies. Quality of care concerns may also be received from other Divisions within TennCare. Home Health Agency (HHA) critical incidents are also sent directly to TennCare from the MCOs. These incidents are investigated and addressed through action taken by the agency involved or through other State agencies, action taken by the MCOs, corrective action as indicated, and follow-up actions.
	Child Health	Asthma Medication Management Project: TennCare staff participate in a statewide asthma workgroup. The goal of the workgroup is to reduce the number of Emergency Department (ED) visits for children that are due to asthma related complications. The workgroup is convened by the Department of Health and is composed of TennCare staff as well as staff from MCOs, hospitals, pharmacy and the Department of Health. Subcommittees work on various issues such as enhanced care coordination and enhanced asthmas education. The data extraction unit is the Children's Hospital Alliance of Tennessee (CHAT) and is focusing on data extractions for acute asthma repeat encounters at 30 days and 6 months. The goal for this unit is to develop evidence-based clinical pathway guidelines for asthma encounters. Another group involved in this project is the Pediatric Healthcare Improvement Initiative for Tennessee (PHIT) and is focused on education. This group has completed a series of training videos for providers dealing with identification and diagnosing asthma, determination of severity and control, developing a partnership and action plan for asthma treatment, both acute and maintenance. All subgroups are working to coordinate and educate providers and develop stakeholder care coordination for children with asthma. The ultimate goal is to develop a statewide asthma plan that includes stakeholders from both the medical community and school communities.

		The Tennessee Health Care Innovation Initiative has three strategies – primary care transformation, episodes of care, and long-term services and supports. The Attention Deficit and Hyperactivity Disorder (ADHD) episode revolves around patients who are diagnosed with ADHD. The trigger event is either a professional claim with a primary diagnosis of ADHD, or a professional claim with a primary diagnosis for ADHD specific symptoms and a secondary diagnosis code for ADHD, along with a procedure code that is for assessments and testing, case management, evaluation and management code, or therapy visits. Only care with a primary diagnosis of ADHD, or a primary diagnosis of ADHD specific symptoms and a secondary diagnosis from among the ADHD trigger codes, as well as a specific list of medications, are included in the episode spend. The Quarterback of the episode is the specific health care provider deemed to have the greatest accountability for the quality and cost of care for the patient. The ADHD episode begins on the day of the triggering visit and extends or an additional 79 days. TennCare has included a measure for increasing the ratio for EPSDT screenings to 90% in the list of measures for which the MCOs can receive a pay for performance incentive. Likewise, the MCOs may include these measures in their Provider Pay for Performance programs.
		<u>Activities Related to Child Health Conducted by Individual MCOs:</u> • The HEDIS Compliance Impact Report uses claims data to show non-compliant measures at a member level. As a result a monthly report is created to identify members who were missing required immunizations two months prior to their 13th birthday. A brochure entitled "*Protecting Teens and Young Adults"* is then sent to both male and female members who were on this report. • The Pregnancy Identification List compiles all pregnant members based on claims data, pharmacy data and obstetric authorizations. Each weekly list of pregnant members is combined quarterly to mail the Tdap Immunization/Maternity Postcard to pregnant members. • The Be Wise Immunize Program provides an outreach reminder to eligible TennCare Kids members who will reach certain age milestones. These mailings remind parents about the importance of childhood and adolescent immunizations, and include a schedule of immunizations recommended by the American Academy of Pediatrics (AAP) and the Centers for Disease Control and Prevention (CDC). These interventions encourage parents to call their health care provider for an appointment. • The "Taking Care of Baby and Me" program provides pregnant members prenatal packets offering healthcare information, MCO contact information for assistance in scheduling appointments or transportation, and an incentive (gift card) to members when their doctor sends written verification to the MCOs indicating the member has been seen.

SATISFACTION	Consumer Satisfaction	<u>CAHPS Survey</u>: Annually, each MCO must conduct a CAHPS survey by entering into a contract with a vendor that is certified by NCQA to perform CAHPS surveys. The vendor must conduct the adult survey, the child survey, and the survey for children with chronic conditions. Survey results must be reported to TennCare separately for each required CAHPS survey and must be reported by grand region.
	Complaint Process	<u>Quality of Care Complaint Process</u>: The Division of Quality Oversight receives enrollee complaints that are sent directly to TennCare. These complaints are addressed in a variety of ways – through calls to the person submitting the complaint, correspondence with the MCOs, or referrals to other agencies. The Division of Quality Oversight receives Home Health Agency (HHA) critical incident reports that are sent directly to TennCare from the MCOs. Quality of Care Concerns may also be received from other Divisions within the Bureau of TennCare. The incidents are investigated and addressed in a variety of ways – action taken by agency or other agency, action taken by MCO, corrective action as indicated, and follow-up actions. Critical incidents related to the LTSS population are forwarded to the TennCare LTSS Division.
IMPROVE HEALTH CARE	Comprehensive Diabetes Care	As part of TennCare's Population Health Program all members are stratified, according to associated risks, into levels of care that have specific interventions associated with them. Diabetes is one of the diagnoses that are categorized into either the Health Risk Management (HRM) group or the Chronic Care Management Group (CCM). Pregnant women who have diabetes are placed into a High Risk Maternity Program. If the member is in the HRM group they will receive one to four non-interactive contacts, offer of individual support for self-management, 24/7 nurse line, offer of health coaching, and offer of weight management and/or tobacco cessation assistance. If the member is in the CCM group, they receive monthly coaching calls with a face to face visit as appropriate, clinical reminders, development of a plan of care, and after hours' assistance if needed. The following are other interventions conducted by TennCare Managed Care Organizations. • Diabetic self-management care plans for topics such as foot care, signs and symptoms of hyper/hypoglycemia, management of co-morbidities, management of diabetes when they are ill. • Members who are identified with health risk behaviors are directed to local community resources. • Members identified with psychosocial issues receive education on their condition and treatment plan. They are provided access to transportation and receive assistance with any identified barriers. • Depression screening. • Education on types of questions to ask their Primary Care Physician (PCP) • Interactive web-based health tools that members may use to track, chart, and respond to clinical and wellness parameters, such as blood glucose. • Availability of home monitoring services.

		• Member outreach calls to diabetic members that are no-compliant to discuss and encourage recommended screenings. • Mobile Diabetic Retinal Eye Exams, • Member mailings. • Member incentives. • Medical Record Documentation Audits of providers. • Rapid Cycle Improvement Projects related to Diabetes.
	F/U after hospitalization for mental illness	<u>MCO Monitoring</u>: The contracted MCOs are required to submit a *Post-Discharge Services* quarterly report that shows the length of time between psychiatric hospital discharge and first subsequent mental health service that qualifies as a post-discharge service. These services may include MD services, non-MD services, substance abuse outpatient services, psychosocial rehabilitation services, and mental health case management services. TennCare reviews the reports and determines if the MCO meets the performance measure benchmark listed in the Contractor Risk Agreement. A service that qualifies as a post-discharge service must be received by a member within seven calendar days of discharge. For the reporting period of calendar year 2014, 59% of a MCO's post-discharge services must meet the standard in order to be considered compliant with the performance measure. When an MCO falls under the performance measure, TennCare first issues a Corrective Action Plan (CAP) to alert the MCO to address the issue with contracted providers. The response to the CAP also helps TennCare learn more about MCO initiatives to improve compliance. At this time, no MCOs are under a CAP for the *Post-Discharge Services* report.
	EPSDT (TennCare Kids) screening	<u>Community Outreach</u>: All federal requirements will continue to be met. Each MCO must submit to TennCare a comprehensive EPSDT outreach plan annually by December 1. The following information must be included in each plan: • Methodology for developing the plan to include data assessments conducted, policy and procedure reviews, and any other research that may have been conducted; • Outreach efforts that include both written and oral communications as well as both rural and urban areas of the state; • Outreach efforts to teens; • Interim evaluation criteria; • Annual evaluation criteria. Each plan must be resubmitted quarterly with updates on their progress. While the MCOs are expected to develop a comprehensive outreach plan, other outreach criteria also remain as contractual requirements. They are as follows: • Ability to conduct EPSDT outreach in formats appropriate to members who are blind, deaf, illiterate or have Limited English Proficiency (LEP). • New member calls if screening rate is below 90%; • Minimum of six (6) outreach contacts per member per calendar year; • Method for notifying families when screenings are due

		• Follow-up for members who do not receive their screenings timely; • Two attempts to re-notify families if no services were used within a year; • Must have outreach activities informing pregnant women, prior to their expected delivery date, about the availability of EPSDT services for their children and to offer these services for the children when they are borne. Currently, all of the MCOs hire Spanish-speaking bilingual outreach staff, if available, for community outreach events targeting the Hispanic TennCare population. These events promote the importance of preventive health care and educate members about how to access their benefits and improve their health outcomes by properly utilizing available health care resources.
	Antidepressant medication management	<u>Children's Special Workgroups</u>: The TennCare Division of Behavioral Health Operations participates in regular workgroup meetings with the Department of Children's Services addressing the issues affecting children in foster care. This workgroup includes representatives from all MCOs and the Department of Mental Health and Substance Abuse Services. These meetings focus on the use of psychotropic medications, coordination of treatment, and identification of data that can be shared between agencies that will increase the quality of care. The workgroup continues to review the data on an annual basis and discuss relevant issues.
	F/U care for children prescribed ADHD medication

<tr><th colspan="3">LTSS-CHOICES</th></tr>
<tr><td rowspan="1">LEVEL OF CARE</td><td>Pre-admission evaluation</td><td rowspan="6"><u>CHOICES and Employment and Community First CHOICES Monitoring</u>: CHOICES and Employment and Community First CHOICES Monitoring Audits are conducted at least annually to evaluate MCO and contractor compliance with CHOICES and Employment and Community First CHOICES requirements. Specific measures monitored include the number and percentage of:
• CHOICES Group 2 members who had an approved CHOICES Pre-Admission Evaluation prior to enrollment in CHOICES and receipt of Medicaid-reimbursed HCBS.
• CHOICES Group 2 member records reviewed with an appropriately completed and signed freedom of choice form that specifies choice was offered between institutional services and HCBS.
• Employment and Community First CHOICEs member records reviewed with an appropriately completed and signed Employment Informed CHOICE form indicating that the member declined to pursue employment services.
• CHOICES Group 2 member records and Employment and Community First member records whose plans of care were reviewed/updated prior to the member's annual review date.
• CHOICES HCBS and Employment and Community First CHOICES providers reviewed for whom the MCO provides documentation that the provider meets minimum qualifications established by the State and was credentialed by the MCO in accordance with NCQA guidelines prior to enrollment in CHOICES and delivery of HCBS.
• CHOICES Group 2 member records and Employment and Community First CHOICES member records reviewed which document that the member/authorized representative (as applicable) received education/information at least annually about how to identify and report instances of abuse, neglect and exploitation.
• Critical incident records for CHOICES and Employment and Community First CHOICES reviewed in which the incident was reported within timeframes specified in the Contractor Risk Agreement.
• CHOICES Group 2 member records and Employment and Community First CHOICES member records reviewed in which HCBS were denied, reduced, suspended, or terminated as evidenced in the Plan of Care and consequently, the member was informed of and afforded the right to request a Fair Hearing when services were denied, reduced, suspended, or terminated as determined by the presence of a Grier consent decree notice.</td></tr>

</table>

Other Interventions Affecting All Goals and Objectives

Pay-for-performance or value-based purchasing initiatives:

TennCare has been providing performance incentives, based on improvement to specific HEDIS measures, to the MCOs for several years. As a result of the Quality Redesign meetings conducted in 2015, the Quality Incentive performance measures were re-evaluated. The following measures were included in the July 2015 Contractor Risk Agreement (CRA) for payment year 2016 and will continue for at least three years. These measures were selected because all three (3) MCOs scored below the 25th percentile of the National Medicaid Average. The MCOs intend to use the same incentive measures, as appropriate, in provider contracts. The EPSDT measure was selected because of performance as reflected in the CMS 416 report. The measures are:

- Timeliness of Prenatal Care;
- Postpartum Care;
- Medication Management for People with Asthma – 75% measure;
- Diabetes – Nephropathy, Retinal Exam, and BP <140/90;
- Follow-up Care for Children Prescribed ADHD medication-initiation phase;
- Follow-up Care for Children Prescribed ADHD medication – continuation phase. Both initiation and continuation measures have to be calculated in order to receive the quality incentive payment;
- Adolescent Well-Care Visits;
- Immunizations for Adolescents – Combo 1;
- Antidepressant Medication Management – acute and continuation;
- EPSDT screening ratio 90% or above.

Quality Improvement Collaborative Meetings:

Qsource facilitates three meetings a year that are attended by TennCare and MCCs. Each meeting is organized around a specific quality improvement topic and features keynote presentations, panel discussion, and breakout session. Qsource also arranges for continuing education opportunities to be offered at all of the health plan meetings.

LTSS Initiatives:

- **Quality Improvement in Long Term Services and Supports (QuILTSS)** – In the fall of 2013 TennCare began the QuILTSS initiative with the assistance of Lipscomb University's School of TransformAging®, supported by a Robert Wood Johnson Foundation State Quality and Value Strategies Program grant. Community forums, stakeholder meetings and an on-line survey for members, families, and providers were implemented. The quality framework that resulted from this input focused on Satisfaction, Person Centered Practices/Culture Change, Staffing/Staff Competency, and Clinical Performance. This framework has been applied to NFs since August 2014 through a quarterly submission process that allows TennCare to evaluate NF quality practices and provide quarterly retrospective per diem rate adjustments, based on quality practices and performance. In the first year of implementation, NFs expanded their quality improvement activities to include resident, family, staff satisfaction surveys and Culture Change/Person Centered Practices assessments. NFs have produced quality improvement activities based on the results of these surveys and assessments. As a result changes were

made that are consistent with the proposed regulations for Long-Term Care Facilities (CMS-3260-P) and which support the delivery of more person-centered care in more homelike environments. Going forward, the initiative will continue to evolve, moving from quality improvement activities to quality performance on specified measures that most impact the member's experience of care.

TennCare is additionally developing plans to apply the QuILTSS framework to specified CHOICES and Employment and Community First CHOICES HCBS and eventually to the performance of the MCOs. While many of the quality strategies ensure compliance with minimum standards, the QuILTSS initiative incentivizes providers and MCOs to improve quality to approach the expectations of members who receive services.

- **Enhanced Respiratory Care (ERC) -** In 2010, TennCare began providing enhanced reimbursement to NFs that provide Enhanced Respiratory Care (ERC) services (chronic ventilator care, ventilator weaning and frequent tracheal suctioning). It is the intent to apply payment reform strategies to ERC such that reimbursement is aligned with preferred outcomes. NFs are currently collecting clinical performance data and technology use data for submission to TennCare. After an adequate baseline period, TennCare will establish benchmarks for quality and technology and will adjust reimbursement to provide higher reimbursement to those facilities that are producing better outcomes with more state-of-the-art technology. In addition, we have implemented CRA changes to increase MCO focus on this vulnerable and high-cost population. MCOs are implementing changes to provider contracting and the utilization review and authorization practices as well as improved quality monitoring of these services. MCOs have been required to obtain clinical expertise in the area of respiratory care to improve their functioning with the service area and population.

- **Workforce Development -** Through its extensive stakeholder input processes, Tennessee has identified that one of the most critical aspects of LTSS value pertains to the level of training and competency of professionals delivering direct supports—whether in a NF or in the community. As a result of these processes TennCare is planning to invest in the development of a comprehensive training program for individuals paid to deliver LTSS. We will establish a framework through research of best practices and stakeholder meetings, including members and providers, and will develop a comprehensive competency based workforce development program and credentialing registry. This program will be offered through secondary, vocational/technical schools, trade schools, community colleges, and 4-year institutions, offering portable, stackable credentials and college credit toward certificate and/or degree program. Professionals delivering services will have the opportunity to both learn and earn by acquiring shorter term credentials with clear labor market value. They will continue to build competencies to access more advanced jobs and higher wages—career path for direct support professionals. The earned credentials will be recognized and accepted (portable) by employers across service settings and a registry for search/matching by individuals, families, providers based on needs/interests of person needing support will be developed. Agencies employing better trained and qualified staff will be appropriately compensated for the higher quality of care experienced by individuals they serve, with higher compensation for staff based on competencies earned.

- **Person-Centered Planning (PCP) –** PCP is an important activity for MCO and TennCare staff. Program activities have already begun. Leveraging MFP Rebalancing Funds, National experts Michael Smull and associates have been engaged to work with TennCare and MCO LTSS staff and leadership on person-center thinking, PCP, and how to operate as a person-centered

organization. A leadership group of TennCare, MCO, DIDD and provider staff will help to embed key learnings across the service delivery system, transforming service and support delivery to align with person-centered values and best practices.

Asthma Advisory Committee:

TennCare's Managed Care Organizations are working in collaboration with the Tennessee Department of Health, the American Lung Association, Vanderbilt University, numerous physicians and educators around the state and TennCare Population Health staff. The first meeting for the initiative was in May of 2015 with a goal of putting together a coalition for asthma prevention in each county of the state. Goals for the initiative include:

- Enhanced data availability, sharing;
- Improved quality of care for children with asthma;
- Improved coordination of care for children with asthma, and;
- Enhanced knowledge/understanding of asthma among key populations (general public, parents, children, providers).

In 2016, TennCare staff continues to participate in a statewide asthma related workgroup with the goal of reducing ER visits for children due to asthma related complications. The group includes medical professionals from across the state, Managed Care Organizations, hospitals, pharmacists, and health department personnel. The group has formed subcommittees dealing with enhancing care coordination and enhancing asthma education. The ultimate goal is to develop a statewide asthma plan that includes stakeholders from both the medical and school communities.

Clinical Practice Guidelines:

MCOs are contractually required to utilize evidence-based clinical practice guidelines in their Population Health Programs. These guidelines must be formally adopted by the MCO's QM/QI committee or other clinical committees. The guidelines must include a requirement to conduct a mental health and substance abuse screening and must be reviewed and revised whenever the guidelines change and at least every two years. The MCOs are required to maintain an archive of its clinical practice guidelines for a period of five years.

HEDIS Measures:

Annually, each MCO must submit all HEDIS measures designated by NCQA as relevant to Medicaid. The only exclusion from the complete Medicaid HEDIS data set is dental measures. The MCOs must use the hybrid methodology for any measure containing Hybrid Specifications as identified by NCQA. The results must be reported annually for each grand region in which the Contractor operates. They must contract with an NCQA-certified HEDIS auditor to validate their processes in accordance with NCQA requirements.

Each DNSP that has signed a MIPPA agreement with TennCare also submits HEDIS and CAHPS measures designated for D-SNPs to both TennCare and Qsource, who then aggregates the data and provides a written report.

Performance Improvement Projects:

Requirements for the MCOs to conduct Performance Improvement Projects relevant to the enrollee population will be continued. The two clinical PIPs must include one in the area of behavioral health that is relevant to one of the Population Health programs for bipolar disorder, major depression, or schizophrenia and one in the area of either child health or perinatal (prenatal/postpartum) health. Two of the three non-clinical PIPs must be in the area of long-term services and supports. CMS protocols must be utilized.

Strategic Planning:

Annually, the Division of Quality Oversight staff, in collaboration with Qsource and the Division of HealthCare Informatics, review and analyze all data coming in to the Division of Quality Oversight through MCC reporting and other areas. At that time, and in subsequent meetings, decisions are made about areas of performance that need additional emphasis. In early 2014, Quality Oversight chose to develop additional improvement strategies addressing two major issues: 1) excessive ED utilization and 2) heart attacks/strokes.

The Million Hearts Campaign, a national initiative to prevent one million heart attacks and strokes by 2017, was identified as a program that is closely aligned with improving outcomes in this area. The MCOs are continuing to support this campaign with innovative ideas and member incentives. Some of these include automated telephone outreach targeting members with hypertension; clinic days that focus on hypertension; prevention and general wellness activities; incentivizing providers for coding using CPT II codes; case management interventions tailored for member participation; stroke education; educational mailings; and smoking cessation. There has been great reception and participation in the campaign by the MCOs and within TennCare. As a result of this process, medical reviews are conducted on the top five (5) emergency department utilizers from each MCO. This process provides staff insight to behaviors causing excessive utilization.

Population Health:

In December 2011, Quality Oversight staff began leading discussions with the MCOs about moving from a disease management model to a more comprehensive population health model. Discussion continued throughout 2012. Up until this point a traditional disease management model was utilized, addressing only those members who already have a distinct disease process. Beginning in January 2013, a phased in implementation of the new model began with full implementation occurring in July of 2013. The newly designed model was a collaborative effort across all MCOs and reflects a consensus of all participants.

Advantages of the Population Health model include:

- Targeting all members' needs across the continuum, with all eligible populations being included;
- Providing both proactive and reactive interventions;
- Targeting interventions based on risk and lifestyle, not just disease;
- Addressing multiple risks and co-morbidities in a whole person approach; and
- Addressing upstream causes of poor health (e.g., nutrition, physical inactivity, substance abuse).

Under the new Population Health model, the entire TennCare population for each MCO is stratified into the following seven programs, with specific minimum interventions required for each:

1. *Wellness* - To include behavioral and physical Health Promotion, and Preventive services.
2. *Low to Moderate risk Maternity* - Formerly Opt out low to moderate DM maternity program.
3. *"Opt Out" Health Risk Management* - Includes members in the low or moderate risk categories with one of the current DM conditions; members in high risk category with multiple conditions who did not "Opt in" to the high risk Chronic Care management program; and members who may not have a chronic disease but need help with any health risk they might have, such as tobacco use or weight management. This must include, at a minimum, obesity and tobacco cessation programs.
4. *Care Coordination* - Helps members navigate and coordinate health care services available to them. A care plan may or may not be developed.
5. *"Opt In" Chronic Care Management* - Includes members with complex chronic conditions that fall within the top 3% of the population and who agree to participate. Formerly opt out high risk DM plus other chronic conditions

6. *"Opt In" High Risk Maternity* - Includes members having high risk pregnancy needs and who agree to participate.
7. *"Opt In" Complex Case Management* - Includes members that fall within the top 1% of the population but have complex needs outside of chronic conditions . Members may also be identified as potentials for CM by trigger lists or referrals.

The Population Health Workgroup composed of both TennCare and MCO staff, developed both process and outcome measures related to the new model. 2014 data was collected as the baseline year with 2015 being the first full measurement year. Outcome measures utilized for this program that indicate improvements after the first full year of data are as follows:

- Total population Emergency Department visits in areas of mental illness, pain, acute disease and chronic disease: Decreased from a rate of 826.5 per 1,000 enrollees to a rate of 770 per 1,000 enrollees.
- Total, all-cause population readmissions within 30 days: Decreased from a rate of 14.1 per 1,000 enrollees to a rate of 13.1 per 1,000 enrollees.
- Evaluation and management visit rates: Increased from a rate of 3,263 per 1,000 enrollees to a rate of 3,306 per 1,000 enrollees.
- Diabetes – End Stage Renal Disease: Decreased from a rate of 7.7 per 100 enrollees to a rate of 7.5 per 100 enrollees.
- Diabetes – Lower Extremity Amputations: Decreased from a rate of 10.4 per 1,000 to a rate of 8.0 per 1,000 enrollees.
- Emergency Department Visits with a primary diagnosis of asthma: Decreased from a rate of 287.6 per 1,000 to a rate of 262.9 per 1,000 enrollees.
- Inpatient visits with a primary diagnosis of Asthma: Decreased from a rate of 18.6 per 1,000 to a rate of 16.1 per 1,000 enrollees.

As part of the evaluation process, all MCOs are required to conduct Rapid Cycle Improvement (RCI) projects. Some of the RCI's that were successful included changing or improving member behavior with a focus on completing appropriate diabetic screenings; decreasing the rate of "unable to contact" members in a given county by six percent; and improving the health of members by successful weight management. There were also some RCIs that were attempted and were not successful. These include attempting to improve the retention of enrollees in Chronic Care Management; and improving the ability of members to track and update their own personal health care information via a web portal device.

MCO Provider Agreements: The Tennessee Department of Commerce and Insurance (TDCI) operates under an inter-agency agreement with the Bureau of TennCare to review all MCOs' provider agreements to ensure the provider agreements meet the uniform requirements set forth in the CRA. When TDCI receives a provider agreement that contains clinical information or other information outside their area of expertise, a copy is sent to the Bureau of TennCare for review and comments. As a means of quality assurance, the Tennessee Comptroller's office is responsible for auditing the activities of TDCI.

Grants:

- Money Follows the Person – TennCare implemented its Money Follows the Person (MFP)

Rebalancing Demonstration Grant program in October 2011. A unique incentive payment structure rewards MCOs who are successful in achieving the state's transition, rebalancing, and related benchmarks established under the program. In addition to help significant numbers of individuals transition from institutions to qualified residences in the community, the State has utilized rebalancing funds to increase housing capacity across the state, creating more affordable and accessible housing for individuals served in Medicaid programs.

- In 2013, TennCare was awarded a grant from the Robert Wood Johnson Foundation to fund technical assistance in the state's Quality Improvement in Long-Term Services and Supports (QuILTSS) value-based purchasing initiative. As part of the QuILTSS initiative, TennCare will develop a new payment approach based in part on a quality framework, including a core set of quality domains and quality performance measures that will be collected to measure the quality of services provided by LTSS providers. These providers include both those in nursing facilities and in home and community based services (HCBS). The framework, developed in conjunction with stakeholders, focuses on quality from the member's perspective—the member's experience of care. The data will be used to calculate payments in order to properly align incentives, enhance the customer experience of care, support better health and improve health outcomes for persons receiving LTSS.

State Innovations Model – In 2015, TennCare was awarded a State Innovations Model (SIM) grant by CMS. This grant supports TennCare's LTSS program in its implementation of value-based purchasing models for NF and HCBS services, Enhanced Respiratory Care services within NFs, and the two Payment Reform Initiatives – Episodes of Care and Primary Care Transformation. It also supports the development and implementation of a comprehensive competency based workforce development program and credentialing registry for direct service workers in NF and HCBS settings. These initiatives will further advance the vision of improved quality of services from the perspective of the member.

Compliance with Federal Requirements:

Intermediate Sanctions

42CFR 438.204(e) For MCOs, detail how the state will appropriately use intermediate sanctions that meet the requirements of 42 CFR, Part 428, Subpart I.

CRA E.29.1 Addresses Intermediate Sanctions:

- TennCare may impose any or all sanctions upon reasonable determination that the contractor failed to comply with any corrective action plan (CAP) or is otherwise deficient in the performance of its obligations under the Agreement, which shall include, but may not be limited to the following:
  - Fails substantially to provide medically necessary covered services;
  - Imposes on members cost sharing responsibilities that are in excess of the cost sharing permitted by TennCare;
  - Acts to discriminate among enrollees on the basis of health status or need for health care services;
  - Misrepresents or falsifies information that it furnishes to CMS or to the State;
  - Misrepresents or falsifies information furnished to a member, potential member, or provider;
  - Fails to comply with the requirements for physician incentive plans as listed in 42 CFR 438.6(h);
  - Has distributed directly, or indirectly through any agent or independent contractor, marketing or member materials that have not been approved by the State or that contain false or materially misleading information; and
  - Has violated any of the other applicable requirements of Sections 1903(m) or 1932 of the Social Security Act and any implementing regulations.
- TennCare shall only impose those sanctions it determines to be appropriate for the deficiencies identified. However, TennCare may impose intermediate sanctions on the contractor simultaneously with the development and implementation of a corrective action plan if the deficiencies are severe and/or numerous. Intermediate sanctions may include:
  - Liquidated damages;
  - Suspension of enrollment in the contractor's MCO;
  - Disenrollment of members;
  - Limitation of contractor's service area;
  - Civil money penalties as described in 42 CFR 438.704;
  - Appointment of temporary management for an MC as provided 42 CFR 438.706
  - Suspension of all new enrollment, including default enrollment, after the sanction's effective date;
  - Suspension of payment for members enrolled after the sanction's effective date and until CMS or the State is satisfied that the reason for the sanction no longer exists and is not likely to recur; or
  - Additional sanctions allowed under federal law or state statue or regulation that address areas of non-compliance;
  - Suspension of payment for members enrolled after the effective date of the sanction and until CMS or the State is satisfied that the reason for the sanction no longer exists and is not likely to recur; or
  - Additional sanctions under federal law or state statute or regulation that address areas of non-compliance.

Specify the state's methodology for using intermediate sanctions as a vehicle for addressing identified quality of care problems.
Each Division of TennCare is responsible for recommending sanctions on an MCO if any of the following are identified. The Division of Managed Care Operations reviews all recommendations for sanctions and has the final responsibility for either approving or disapproving them. Once sanctions are approved, the MCO involved is notified that the sanctions will be imposed. Liquidated damages may be assessed for a variety of quality of care issues, including: • Failure to perform specific responsibilities or requirements that result in a significant threat to patient care or to the continued viability of the TennCare program; • Failure to perform specific responsibilities or requirements that pose threats to TennCare integrity, but which do not necessarily imperil patient care; • Failure to perform specific responsibilities or requirements that result in threats to the smooth and efficient operation of the TennCare Program • Failure to meet performance standards Deficiencies may be identified through review of MCO reports, audits, or failure to meet other contractual obligations.

Health Information Technology

42 CFR 438.204(f) Detail how the state's information system supports initial and ongoing operation and review of the state's quality strategy. Describe any innovative health information technology (HIT) initiatives that will support the objectives of the state's quality strategy and ensure the state is progressing toward its stated goals.
Tennessee's Quality Strategy represents a different route for meeting the goals and priorities outlined by ONC for expanding statewide e-Prescribing, sharing electronic structured lab results from labs, and supporting patient care transitions with electronic care summaries. These basic HIE building blocks will support numerous care improvements for patients, including better treatment and diagnosis, improved chronic care coordination, and reductions in medication errors and unnecessary repeat testing, as well as protecting enrollee privacy by utilizing electronic health records. In addition to promoting Electronic Health Records, and in accordance with the HITECH Act of 2009, a Business Associate's (BA) disclosure, handling, and use of PHI must comply with HIPAA Security Rule and HIPAA Privacy Rule mandates. Under the HITECH Act, any HIPAA business associate that serves a health care provider or institution is now subject to audits by the Office for Civil Rights (OCR) within the Department of Health and Human Services and can be held accountable for a data breach and penalized for noncompliance. With these new regulations in mind, TennCare's HIPAA business associate agreement explicitly spells out how a BA will report and respond to a data breach, including data breaches that are caused by a business associate's subcontractors. In addition, TennCare's HIPAA business associate agreement requires a BA to demonstrate how it will respond to an OCR investigation. CRA Section 2.12.9.55 requires that the provider safeguard enrollee information according to applicable state and federal laws and regulations including, but not limited, to HIPAA and Medicaid laws, rules and regulations.

SECTION V: Delivery System Reforms

CMS requirement: This section should be completed by states that have recently implemented or are planning to implement delivery system reforms. Examples of such delivery system reforms include, but are not limited to, the incorporation of the following services and/or populations into a managed care delivery system: aged, blind, and disabled population; long-term services and supports; dental services, behavioral health; substance abuse services; children with special healthcare needs; foster care children; or dual eligibles.

Describe the reasons for incorporating this population/service into managed care. Include a definition of this population and methods of identifying enrollees in this population.
N/A
List any performance measures applicable to this population/service, as well as the reasons for collecting these performance measures.
N/A
List any performance improvement projects that are tailored to this population/service. This should include a description of the interventions associated with the performance improvement projects.
N/A
Address any assurances required in the state's Special Terms and Conditions (STCs), if applicable.
N/A

In the first quarter 2015, TennCare began working with behavioral health experts to design and implement a new Behavioral Health Crisis Prevention, Intervention and Stabilization Services benefit for individuals with I/DD who experience challenging behaviors that place themselves or others at risk of harm. Services began in early 2016. The service is delivered under a new person-centered system of support (SOS) designed to improve quality of life by promoting crisis planning and prevention. Crisis prevention includes person-centered assessment and planning, and training on the SOS as well as the needs of the individual in order to avoid potential triggers and to provide positive behavior supports so that individuals have the opportunity to experience greater independence and an improved quality of life, free of challenging behavior. The model will further support sustained integrated community living by equipping families and providers supporting individuals with I/DD to quickly identify and address potential crisis situations, intervening immediately to de-escalate a potential crisis situation whenever possible. When necessary, the SOS includes the availability of an in-home crisis intervention and stabilization response to assist and support the person or agency who is primarily responsible for supporting an individual with I/DD who is experiencing a behavioral crisis that presents a threat to the individual's health and safety or community living arrangement, or the health and safety of others. The goal is to stabilize in place, divert from inpatient, and support sustained integrated community living whenever possible and appropriate. If it is determined that short-term placement (i.e., respite) out of the current living arrangement is needed in order to stabilize the crisis or that inpatient psychiatric hospitalization is appropriate, the model includes preparation and planning for transition back to the appropriate community living arrangement as soon as appropriate, and with review and revision as needed of the Crisis Prevention and Intervention Plan prior to such transition. TennCare is collecting quality data that will be used to develop an incentive or shared savings model based on such key performance indicators, including a decrease in the PRN use of anti-psychotic medications, a decrease in crisis events, an increase in in-place stabilization when crises occur, and a decrease in inpatient psychiatric admissions and inpatient days.

TennCare Patient Centered Medical Homes (PCMH): PCMH is a comprehensive care delivery model designed to improve the quality of primary care services for TennCare members. The capabilities of and practice standards of primary care providers, and the overall value of health care delivered to the TennCare population. Tennessee has built on the existing PCMH efforts by providers and payers in the State to create a robust PCMH program that features alignment across payers on critical elements. A PCMH Technical Advisory Group of Tennessee clinicians was convened in 2015 to develop recommendations in several areas of program design including quality measures, sources of value, and provider activity requirements. TennCare's three MCOs will launch a statewide joint PCMH program starting with approximately 20 practices on January 1, 2017. Tennessee is also partnering with the Tennessee Chapter of the American Academy of Pediatrics (TNAAP) to implement a portfolio of quality improvement projects with Tennessee pediatricians that meet the distinct health care needs of infants, children and adolescents. Since 2008, TNAAP has collaborated with the Bureau of TennCare in a multi-year medical home implementation project to promote Pediatric PCMH implementation across the state.

Quality Measures for PCMH are as follows:

- Well-child visits first 15 months of life
- Well-child visits at 18, 24, and 30 months
- Well-child visits ages 3-6 years
- Well-child visits ages 7-11 years
- Adolescent well-care visits age 12-21 years
- Asthma medication management
- Childhood immunizations
- Immunizations for adolescents
- BMI percentile and counseling for nutrition
- Comprehensive Diabetes Care
- Adult BMI screening
- Antidepressant medication management

Efficiency measures for PCMH are as follows:

- All-cause hospital readmission rate per 1,000 member months
- Avoidable ED visits per 1,000 member months
- Ambulatory care – ED visits per 1,000 member months
- Inpatient admissions per 1,000 member months – total inpatient
- Mental health utilization per 1,000 member months-inpatient

- *Tennessee Health Link for TennCare members with significant behavioral health needs:* The primary objective of Tennessee Health Link is to coordinate health care services for TennCare members with the highest behavioral health needs. TennCare has worked closely with providers and TennCare's MCOs to create a program to address the diverse needs of people with severe and persistent mental illness (SPMI). Through better coordinated behavioral and physical health services, the program is meant to produce improved patient outcomes, greater provider accountability and flexibility when it comes to the delivery of appropriate care for each individual and improved cost control for the State. Health Link providers are encouraged to ensure the best care setting for each patient, offer expanded access to care, improve treatment adherence, and reduce hospital admissions. In addition, the program is built to encourage the integration of physical and behavioral health, as well as mental health recovery, giving every member a chance to reach his or her full potential for living a rewarding and increasingly independent life in the community. A Health Link Technical Advisory Group of Tennessee clinicians and practice administrators was convened in 2015, to develop recommendations in several areas of program design including, quality measures,

sources of value, and provider activity requirements. The program will assist providers in furthering integrated care and will build practices' to transition to value-based payment and delivery. Integrated delivery of care will improve clinical outcomes, quality of care, and member experience for TennCare members with SPMI who have a great need for improved coordinated care. The design of Health Link was also influenced by federal Health Home requirements. The program will launch statewide on December 1, 2016.

Quality measures for Tennessee Health Link are as follows:

- 7 and 30 day psychiatric hospital/RTF readmission rates
- Antidepressant medication management
- Follow-up after hospitalization for mental illness within 7 and 30 days
- Initiation/engagement of alcohol and drug dependence treatment
- Use of multiple concurrent antipsychotics in children/adolescents
- BMI and weight composite metrics
- Comprehensive diabetes care
- Well-child visits ages 7-11 years
- Adolescent well-care visits ages 12-21

Efficiency measures for Tennessee Health Link are as follows:

- All-cause hospital readmission rates
- Ambulatory care – ED visits
- Inpatient admissions – total inpatient
- Mental health utilization – inpatient
- Rate of inpatient psychiatric admissions

SECTION VI: CONCLUSIONS AND OPPORTUNITIES

Identify any successes that the state considers to be best or promising practices:

The TennCare MCOs have successfully transitioned from Disease Management to Population Health (PH). All 1.45 million TennCare enrollees are now stratified into three PH levels across the care continuum based on their health risk rather than disease. This approach allows for both proactive and reactive interventions and supports staying healthy as well as managing a chronic illness. 2016 evaluation data showed positive results for a number of the measures. These are listed in a previous section of this document.

An effective process is now in place for seamless coordination of a dual member surrounding an inpatient admission through TennCare's MIPPA Dual Care Coordination Project. Beginning in January of 2013, staff from TennCare's Long Term Services and Supports Division and the Quality Oversight Division began discussions with five D-SNPs related to coordinating care for dual eligible enrollees. These D-SNPs included two who were associated with currently contracted MCOs and three who had no contractual relationships with TennCare other than through the MIPPA agreements. Also included was one contracted MCO in the process of becoming a D-SNP who has since successfully completed the process and is now a fully-functioning collaborator. A series of planning meetings was held with all MCOs and these D-SNPs, with the ultimate goal of developing procedures that would allow all of the plans to refer to each other in order to meet the needs of the enrollees. The group gained consensus and jointly developed two referral tools that could be electronically sent on a daily basis. The tools include information about inpatient admissions and discharges and indicate needs for referrals for specific services, such as Nursing Facility Diversion and Exhaustion of Benefits. The Health Plans work together to address any issues in real time, and the TennCare staff have continued to have regular phone and face-to-face meetings to improve data collection and reporting processes. During such discussions, it was revealed that members admitted to the hospital for 'Observation' were not always captured, so the processes were revised to ensure inclusion of this important dual population for coordination of care. Quarterly reports are submitted to TennCare for monitoring and support of the process. In addition, these plans submit HEDIS data to TennCare for measures identified for D-SNPs by NCQA.

During the 2016 AQS, surveyors noticed several MCO improvements from the previous year, demonstrating a strong commitment to addressing the opportunities identified during the 2015 AQS. One key area to note is that all MCOs and the DBM demonstrated their serious dedication to quality and compliance by achieving 100% on a majority of the AQS measures. In addition each MCO continued to participate in the statewide collaborative work groups with TennCare and other MCOs. These collaborations remain important strengths for 2016 and have improved how the MCOs educate and conduct outreach to members and providers by presenting a unified message on topics such as adolescent outreach and increasing the number of adolescent well-child visits.

Innovation has always been a priority throughout TennCare. Consistent with its mission "to continuously improve the health and satisfaction of TennCare enrollees"; the Division of Quality Oversight works closely with health plan representatives to foster such innovation and encourage adoption of evidence-based practices statewide. In 2015, each MCC demonstrated a strong commitment to quality improvement and best practices across a range of programs. During the various activities monitored by the EQRO, the following activities were identified as promising practices:

***Performance Measure Validations*:**

- Continual use of standard and nonstandard supplemental data sources for HEDIS 2015 reporting.
- Ongoing efforts to increase electronic claims submissions from providers
- Excellent processes for tracking and trending all sources of HEDIS data
- Commitment to achieving a more sophisticated internal body of knowledge of the HEDIS reporting process

Performance Improvement Projects:

- Dedication to ensuring compliance across all PIPs.
- Detailed analyses of PIPs maturing to subsequent re-measurement years.
- Ongoing multidisciplinary barrier analyses to determine the effectiveness of implemented interventions.
- Thorough, comprehensive results covering all required criteria.
- Complete measurement descriptions & corresponding documentation of results and significance of findings

Annual Network Adequacy & Benefit Delivery Review:

- Improvements to the overall credentialing & re-credentialing process.
- Staff training to improve knowledge of documentation requirements.
- High compliance with provider to member ratios and geographical-across standards.
- Ongoing provider education to improve member outcomes.
- Excellent scores related to provider & member benefit notification.

Annual Quality Survey:

- Continued commitment to participating in the statewide collaborative workgroups with TennCare and other MCCs.
- Continued commitment to monitoring EPSDT services.
- Successful integration of population health programs.
- High ratings on Quality Performance standards and Performance Activity Standards.
- Ongoing and improved outreach to members and providers.

Include a discussion of the ongoing challenges the state faces in improving the quality of care for beneficiaries.

Lack of member engagement in chronic condition programs, wellness programs, and even complex case management programs continues to be a barrier to positive outcomes, both nationally and the TennCare population. Proven programs can be implemented, but fail if members cannot be engaged. TennCare MCOs, as well as national research, have identified several reasons for lack of engagement by the Medicaid population. Lack of correct or current phone numbers is always the first barrier listed. Medicaid members are very mobile; they change phone numbers and discontinue use of cell phones frequently. Health plans have found this to be true even when the attempt is made one day after receiving the number. When using traditional identification methodologies, there is often a significant lag time between diagnosis and engagement attempts. Members are much more receptive to help at the time of diagnosis. Psychosocial issues also affect engagement rates. If a member has a behavioral health problem, lack of housing and food, or low self-worth, engaging them in health issues is difficult. Another concern for those attempting to engage Medicaid members in continuing program is the fact that many want their immediate needs met and are not receptive to addressing long-term issues. Often initial engagement occurs but retention in a program does not. The last barrier identified is

discovering the right message for the targeted audience. This is extremely difficult and varies tremendously among subpopulations. All TennCare health plans use motivational interviewing techniques in an attempt to engage their members. They are also testing engagement techniques such as social media, face-to-face engagement, focus group approaches, and telephonic strategies.

Include a discussion of challenges or opportunities with data collection systems, such as registries, claims or enrollment reporting systems, pay-for-performance tracking or profiling systems, electronic health record (EHR) information exchange, regional health information technology collaborative, telemedicine initiatives, grants that support state HIT/EHR development or enhancement, etc.

Although some information systems present challenges to data collection for quality oversight and analysis, the State of Tennessee has multiple opportunities for the collection of data to track a variety of quality metrics. Tennessee is constantly seeking ways to upgrade data analytic capabilities across state systems as well as its Medicaid Management Information System (MMIS).

With the implementation of the Care Coordination Tool, Tennessee will be able to provide the ability for health care providers to coordinate patients across multiple payers and plan types (i.e., Medicaid, Medicare and Commercial plans). The solution, once implemented will produce risk scores; prioritize patients and activities based on their risk scores; track gaps in care; allow for view of prescription fill information; produce care plans; allow users to track completion of tasks attributed to the care plans and the patient's needs; utilize eCommunication to foster greater coordination across the Care Team; and support the work of both Patient Centered Medical Home and Health Link care models. Opportunities also include the ability to provide a greater quality of care to patients in a more timely manner.

The implementation of a Clinical Knowledge Module, that includes hospital admission, discharge information and transfer information (ADT), will standardize the clinical information loaded from the ADT feeds. Once hospitals are on-boarded Tennessee will begin to collect and co-locate ADT feeds to begin building a clinical database for the State Health Information Exchange (HIE) that will address gaps in care and reduce hospital admissions.

Through the Quality Apps project, the state will have the ability to collect clinical quality data that cannot be acquired from processed medical billing claims. Ultimately, these Quality Apps will provide all payers, beginning with the State's Medicaid participating MCOs, with the necessary information to reimburse providers for high quality health outcomes.

EHR Information Exchange and Regional Health Information Collaborative – In Tennessee, HIE development/use has experienced many challenges. Taking advantage of a national initiative, the State has launched Direct Project to create the set of standards and services that, with a policy framework, can enable simple, directed, routed and scalable transport over the Internet to be used for secure and meaningful exchange between known participants in support of meaningful use. Direct technology offers providers a simple and secure way to communicate protected health information (e.g., clinical summaries, continuity of care documents, and laboratory results) between care settings, as well as directly with the patient who also owns a Direct address. Patients are able to communicate via Direct in a secure fashion by using personal health records that are Direct-enabled. The most basic implementation of the Direct Project is secure email via an email client or web portal, which works just like regular email but with an added level of security required for point-to point exchange of sensitive health information. Direct is advantageous for those with an EHR because it helps in meeting the meaningful use requirements for electronic exchange/transport/transfer of electronic health information. As many as six Meaningful Use Modified Stage 2 measures could be met with various implementations of Direct. The state currently has nearly 5,000 DIRECT secure messaging users. Over the past three years, EHR system adoption measured by the number of providers participating in the

EHR Provider Incentive Program, through either Medicare or Medicaid has grown by almost 20%, to 10,951 at the end of August 2016. Combined with Medicare EHR registrations, this means that approximately 39% of the eligible provider types in Tennessee (including hospitals) have registered for the EHR Incentive Program. Since the inception of the program, TennCare has made 4,843 payments to unique providers, totaling a little more than $253.5 million.

EHR and Meaningful Use – TennCare's Quality Oversight division is responsible for the meaningful use aspect of the EHR incentive program. As such, the Division has four responsibilities:

- Evaluating meaningful use attestations (pre-payment verification)
- Facilitating successful meaningful use
- Collecting MU data
- Analysis and reporting

The prepayment verification procedures have been structured to encourage and enable providers' continued participation in the program even if an attestation is at first incorrect or incomplete. The robust verification procedures also contribute to the success of that participation by correcting mistakes when they are first available for note and identifying areas of common challenge. A key administrative tool in the prepayment verification process is the TennCare attestation portal: the Provider Incentive Payment Program (PIPP) portal. This portal receives attestations, stores the most recent attestation in a given payment year, and allows TennCare staff to approve or return the attestations as they progress through various stages of the portal. Additional functionality in the portal to support administration of the program is constantly being planned and implemented, and such improvements will continue to affect the process, though not the content, of verification procedures. The goal of these improvements is to support electronic submission of Clinical Quality Measures and other measures as technology advances. These improvements will result in greater reliability of submissions, reducing clerical errors.

The Quality Oversight Meaningful Use Unit is in their fourth year of prepayment verification of meaningful use. The first year of meaningful use in Tennessee was 2012. Data is complete for payment years 2012 and 2013, 2014 and preliminary data is ready for payment year 2015. The biggest challenges in 2016 have been related to meaningful use rule changes to the current requirements. The final rule made modifications to Stage 2and provisions for Stage 3. The changes were published in the Federal Register in October 2015 with an effective date of December 15, 2015. The modifications to Stage 2 made it a requirement for all attesting EPs, regardless of their scheduled state of meaningful use to attest to the same set of objectives and measures for the 2015 reporting period. Prior to the Final Rule effective date, 48 EPs that were first time attesters successfully attested to Stage 1. The portal opened to receive attestations on January 4, 2016. There was a 10% increase in meaningful use attestation for the 2015 payment year over the prior year. This reflects the effort of MU staff in providing outreach through onsite visits, EHR mailbox responses, and technical assistance.

The number of first year meaningful use attesters increased in payment year 2015 with the conversion rate for providers moving from AIU in payment year 2014 to MU in 2015 being 39%. The remaining 62% will be the focus for outreach by TennCare's MU Clinical educator. Overall, 64% of providers are returning meaningful users. In order to adapt to changes for the 2017 Incentive year and Stage 3, staff is involved in retooling PIPP MU pages, evaluation tools as well as updating web pages and providing educational webinars.

Telemedicine Initiatives - Tennessee has telemedicine facilities in over 100 cities across the state. A recent initiative is the STORC program, a telemedicine project developed through the efforts of Regional Obstetrical Consultants. The project is funded by a grant from the Blue Cross Tennessee Health Foundation and is designed to deliver perinatology services to rural areas. Since its initial implementation in 2009, STORC has now grown to include two physician hub sites, six Tennessee sites and four out-of-state sites. Via STORC services, patients are able to go to a local health center or hospital and meet with a mid-level caregiver and sonographer on site, and with a Maternal-Fetal Medicine specialist physician live via telemedicine equipment. A genetic counselor, diabetic counselor, behavioral health counselor, and interpreter can participate online as well. As of 2012, the technology is used to deliver care in other sub-specialties to which patients in rural areas would otherwise have no access. This technology can also be used to provide Continuing Medical Education.

Grants that support State HIT/EHR development or enhancement - The state of Tennessee has received grants from the Office of the National Coordinator (ONC), CMS, and SAMSHSA/MITRE to further HIT and HIE across the state. ONC granted $11.7 million for HIE advancement over a four year period (February 2010 to February 2014). These funds have assisted in upgrading the state's immunization system, electronic lab reporting, a state DIRECT HISP implementation, the statewide roll-out to providers of DIRECT technology, and ePrescribing adoption, as well as operations and oversight of the program. CMS has granted the state a HIT/HIE IAPD grant of $25,551,041.00. $12,184,496 of these funds is intended to fund administration of the CMS Provider Incentive Program and HIE program in Tennessee as well as updates to the State's incentive program registration system. $13,366,543.00 of these funds is intended to fund HIE projects, including providing State HIE Core services, allowing access to clinical data contained in Medicaid claims to both providers and Medicaid recipients, development of regional HIE organizations, and assisting provider practices in attainment of meaningful use.

Include recommendations that the State has for ongoing Medicaid and CHIP quality improvement activities in the state. Highlight any grants received that support improvement of the quality of care received by managed care enrollees, if applicable.

State Innovation Model (SIM) Grants - Tennessee received a SIM Design grant from the Centers for Medicare and Medicaid Innovation in 2013 that was used to develop payment and delivery system reform models (such as episodes of care and Patient Centered Medical Homes) to enhance the quality of care, improve the patient experience of care for members, and reduce costs.

The State, led by the Tennessee Health Care Innovation Initiative, applied in October 2014 for a SIM Testing grant to help accelerate the implementation of payment and delivery system reforms. If the State receives this grant, the following quality improvements will begin or be accelerated for managed care enrollees:

- Episodes of care will improve the quality of acute care received by members.
- Patient Centered Medical Homes will promote better care through care coordination as well as proactive closing of gaps in care.
- Health Homes will promote better quality, integrated physical and behavioral health care for TennCare members with severe and persistent mental illness.
- The grant will support Tennessee's chapter of the American Academy of Pediatrics in implementing a portfolio of quality improvement projects working with Tennessee pediatricians.
- Tennessee will implement quality-and acuity-based payment and delivery system reforms for long-term services and supports, including Nursing Facility services and Home and Community Based Services for seniors and adults with physical, intellectual, and developmental disabilities.
- Value-based purchasing for enhanced respiratory care will adjust facilities' rates based on performance on key performance indicators (e.g., infection rates)
- Tennessee is working on developing a comprehensive training program for professionals delivering long-term services and supports. Staff training is an important quality measure, and agencies employing better trained staff will be appropriately compensated for the higher quality of care experienced by the individuals they serve.

GENERAL ACCESS STANDARDS

In general, contractors shall provide available, accessible, and adequate numbers of institutional facilities, service locations, service sites, professional, allied, and paramedical personnel for the provision of covered services, including all emergency services, on a 24-hour-a-day, 7-day-a-week basis. At a minimum, this shall include:

- Primary Care Physician or Extender:

  (a) Distance/Time Rural: 30 miles

  (b) Distance/Time Urban: 20 miles

  (c) Patient Load: 2,500 or less for physician; one-half this for a physician extender.

  (d) Appointment/Waiting Times: Usual and customary practice (see definition below), not to exceed 3 weeks from date of a patient's request for regular appointments and 48 hours for urgent care. Waiting times shall not exceed 45 minutes.

  (e) Documentation/Tracking requirements:

  + Documentation - Plans must have a system in place to document appointment scheduling times.

  + Tracking - Plans must have a system in place to document the exchange of member information if a provider, other than the primary care provider (i.e., school-based clinic or health department clinic), provides health care.

- Specialty Care and Emergency Care: Referral appointments to specialists (e.g., specialty physician services, hospice care, home health care, substance abuse treatment, rehabilitation services, etc.) shall not exceed 30 days for routine care or 48 hours for urgent care. All emergency care is immediate, at the nearest facility available, regardless of contract. Waiting times shall not exceed 45 minutes.

- Hospitals

  (a) Transport time will be the usual and customary, not to exceed 30 miles, except in rural areas where distance may be greater. If greater, the standard needs to be the community standard for accessing care, and exceptions must be justified and documented to the State on the basis of community standards.

- Long-Term Care Services:

  Transport distance to licensed Adult Day Care providers will be the usual and customary not to exceed 20 miles for TennCare enrollees in urban areas, not to exceed 30 miles for TennCare enrollees in suburban areas and not to exceed 60 miles for TennCare enrollees in rural areas except where community standards and documentation shall apply.

- General Optometry Services:
    (a) Transport time will be the usual and customary, not to exceed 30 minutes, except in rural areas where community standards and documentation shall apply.

    (b) Appointment/Waiting Times: Usual and customary not to exceed 3 weeks for regular appointments and 48 hours for urgent care. Waiting times shall not exceed 45 minutes.

- All other services not specified here shall meet the usual and customary standards for the community as determined by TENNCARE.

TENNCARE will evaluate the need for further action when the above standards are not met. At its sole discretion TENNCARE may elect one of three options: (1) TENNCARE may request a Corrective Action Plan (CAP), (2) a Request for Information (RFI), (3) or an On Request Report (ORR) depending on the severity of the deficiency.

The requested CAP, RFI or ORR response shall detail the CONTRACTOR's network adequacy considering any alternate measures, documentation of unique market conditions and/or its plan for correction. If TENNCARE determines the CONTRACTOR's response demonstrates existence of alternate measures or unique market conditions, TENNCARE may elect to request periodic updates from the CONTRACTOR regarding efforts to address such conditions.

SPECIALTY NETWORK STANDARDS

The CONTRACTOR shall adhere to the following specialty network requirements to ensure access and availability to specialists for all members (adults and children) who are not dually eligible for Medicare and TennCare (non-dual members). For the purpose of assessing specialty provider network adequacy, TENNCARE will evaluate the CONTRACTOR's provider network relative to the requirements described below. A provider is considered a "specialist" if he/she has a provider agreement with the CONTRACTOR to provide specialty services to members.

Access to Specialty Care

The CONTRACTOR shall ensure access to specialty providers (specialists) for the provision of covered services. At a minimum, this means that:

(1) The CONTRACTOR shall have provider agreements with providers practicing the following specialties: Allergy, Cardiology, Dermatology, Endocrinology, Otolaryngology, Gastroenterology, General Surgery, Nephrology, Neurology, Neurosurgery, Oncology/Hematology, Ophthalmology, Orthopedics, Psychiatry (adult), Psychiatry (child and adolescent), and Urology; and

(2) The following access standards are met:
- Travel distance does not exceed 60 miles for at least 75% of non-dual members and
- Travel distance does not exceed 90 miles for ALL non-dual members

Availability of Specialty Care

The CONTRACTOR shall provide adequate numbers of specialists for the provision of covered services to ensure adequate provider availability for its non-dual members. To account for variances in MCO enrollment size, the guidelines described in this Attachment have been established for determining the number of specialists with whom the CONTRACTOR must have a provider agreement. These are aggregate guidelines and are not age specific. To determine these guidelines the number of providers within each Grand Region was compared to the size of the population in each Grand Region. The CONTRACTOR shall have a sufficient number of provider agreements with each type of specialist in each Grand Region served to ensure that the number of non-dual members per provider does not exceed the following:

Maximum Number of Non-Dual Members per Provider by Specialty

Specialty	Number of Non-Dual Members
Allergy & Immunology	100,000
Cardiology	20,000
Dermatology	40,000
Endocrinology	25,000
Gastroenterology	30,000
General Surgery	15,000
Nephrology	50,000
Neurology	35,000
Neurosurgery	45,000
Oncology/Hematology	80,000
Ophthalmology	20,000
Orthopedic Surgery	15,000
Otolaryngology	30,000
Psychiatry (adult)	25,000
Psychiatry (child & adolescent)	150,000
Urology	30,000

TENNCARE will evaluate the need for further action when the above standards are not met. At its sole discretion TENNCARE may elect one of three options: (1) TENNCARE may request a Corrective Action Plan (CAP), (2) a Request for Information (RFI), (3) or an On Request Report (ORR) depending on the severity of the deficiency.

The requested CAP, RFI or ORR response shall detail the CONTRACTOR's network adequacy considering any alternate measures, documentation of unique market conditions and/or its plan for correction. If TENNCARE determines the CONTRACTOR's response demonstrates existence of alternate measures or unique market conditions, TENNCARE may elect to request periodic updates from the CONTRACTOR regarding efforts to address such conditions.

ACCESS & AVAILABILITY FOR BEHAVIORAL HEALTH SERVICES

The CONTRACTOR shall adhere to the following behavioral health network requirements to ensure access and availability to behavioral health services for all members (adults and children). For the purpose of assessing behavioral health provider network adequacy, TENNCARE will evaluate the CONTRACTOR's provider network relative to the requirements described below. Providers serving adults will be evaluated separately from those serving children.

Access to Behavioral Health Services

The CONTRACTOR shall ensure access to behavioral health providers for the provision of covered services. At a minimum, this means that:

The CONTRACTOR shall have provider agreements with providers of the services listed in the table below and meet the geographic **and** time for admission/appointment requirements.

Service Type	Geographic Access Requirement	Maximum Time for
Psychiatric Inpatient Hospital Services	Travel distance does not exceed 90 miles for at least 90% of members	4 hours (emergency involuntary)/24 hours
24 Hour Psychiatric Residential Treatment	The CONTRACTOR shall contract with at least one (1) provider of service in the Grand Region for **ADULT** members --- Travel distance does not exceed 60 miles for at least 75% of **CHILD** members and does not exceed 90 miles for at least 90% of **CHILD**	Within 30 calendar days
Outpatient Non-MD Services	Travel distance does not exceed 30 miles for ALL members	Within 10 business days; if urgent, within

Intensive Outpatient (may include Day Treatment (adult), Intensive Day Treatment (Children & Adolescent) or	Travel distance does not exceed 90 miles for at least 90% of members	Within 10 business days; if urgent, within 48 hours
Inpatient Facility Services (Substance Abuse)	Travel distance does not exceed 90 miles for at least 90% of members	Within 2 calendar days; for detoxification - within 4 hours in an emergency and 24 hours for non-
24 Hour Residential Treatment Services (Substance Abuse)	The CONTRACTOR shall contract with at least one (1) provider of service in the Grand Region for **ADULT** members --- The CONTRACTOR shall contract with at least one (1) provider of	Within 10 business days
Outpatient Treatment Services (Substance Abuse)	Travel distance does not exceed 30 miles for ALL members	Within 10 business days; for detoxification – within 24 hours
Mental Health Case	Not subject to geographic access standards	Within 7 calendar days
Psychosocial Rehabilitation (may include Supported Employment, Illness Management &	Not subject to geographic access standards	Within 10 business days
Supported Housing	Not subject to geographic access standards	Within 30 calendar days
Crisis Services (Mobile)	Not subject to geographic access standards	Face-to-face contact within 2 hours for emergency situations and 4
Crisis Stabilization	Not subject to geographic access standards	Within 4 hours of referral

TENNCARE will evaluate the need for further action when the above standards are not met. At its sole discretion TENNCARE may elect one of three options: (1) TENNCARE may request a Corrective Action Plan (CAP), (2) a Request for Information (RFI), (3) or an On Request Report (ORR) depending on the severity of the deficiency.

The requested CAP, RFI or ORR response shall detail the CONTRACTOR's network adequacy considering any alternate measures, documentation of unique market conditions and/or its plan for correction. If TENNCARE determines the CONTRACTOR's response demonstrates the existence of alternate measures or unique market conditions, TENNCARE may elect to request periodic updates from the CONTRACTOR regarding efforts to address such conditions

At a minimum, providers for the following service types shall be reported on the Provider Enrollment File:

Service Type	Service Code(s) for use in position 330-331 of the Provider
Psychiatric Inpatient Hospital Services	Adult - 11, 79, 85 Child – A1 or H9
24 Hour Psychiatric Residential Treatment	Adult - 13, 81, 82 Child – A9, H1, or H2
Outpatient MD Services (Psychiatry)	Adult – 19 Child – B5
Outpatient Non-MD Services	Adult – 20 Child – B6
Intensive Outpatient/ Partial Hospitalization	Adult – 21, 23, 62 Child -
Inpatient Facility **Services (Substance**	Adult – 15, 17
24 Hour Residential Treatment **Services (Substance Abuse)**	Adult - 56 Child - F6
Outpatient Treatment **Services (Substance**	Adult – 27 or 28 Child
Mental Health Case Management	Adult - 31, 66, or 83 Child – C7, D7, G2, G6, or K1
Psychiatric Rehabilitation Services:	
Psychosocial Rehabilitation	42
Supported Employment	44
Peer Support	88
Illness Management & Recovery	91
Supported Housing	32 and 33
Crisis Services (Mobile)	Adult - 37, 38, 39 Child - D8, D9, E1
Crisis Respite	Adult – 40
Crisis Stabilization	Adult 41

2.6.1 CONTRACTOR Covered Benefits

2.6.1.1 The CONTRACTOR shall cover the physical health, behavioral health and long-term care services/benefits outlined below. Additional requirements for behavioral health services are included in Section 2.7.2 and Attachment I.

2.6.1.2 The CONTRACTOR shall integrate the delivery of physical health, behavioral health and long-term care services. This shall include but not be limited to the following:

2.6.1.2.1 The CONTRACTOR shall operate a member services toll-free phone line (see Section 2.18.1) that is used by all members, regardless of whether they are calling about physical health, behavioral health and/or long-term care services. The CONTRACTOR shall not have a separate number for members to call regarding behavioral health and/or long-term care services. The CONTRACTOR may either route the call to another entity or conduct a "warm transfer" to another entity, but the CONTRACTOR shall not require an enrollee to call a separate number regarding behavioral health and/or long-term care services.

2.6.1.2.2 If the CONTRACTOR's nurse triage/nurse advice line is separate from its member services line, the CONTRACTOR shall comply with the requirements in Section
2.6.1.2.2 as applied to the nurse triage/nurse advice line. The number for the nurse triage/nurse advice line shall be the same for all members, regardless of whether they are calling about physical health, behavioral health and/or long-term services, and the CONTRACTOR may either route calls to another entity or conduct "warm transfers," but the CONTRACTOR shall not require an enrollee to call a separate number.

2.6.1.2.2 As required in Sections 2.9.5 and 2.9.6, the CONTRACTOR shall ensure continuity and coordination among physical health, behavioral health, and long-term care services and ensure collaboration among physical health, behavioral health, and long-term care providers. For CHOICES members, the member's care coordinator shall ensure continuity and coordination of physical health, behavioral health, and long-term care services, and facilitate communication and ensure collaboration among physical health, behavioral health, and long-term care providers.

2.6.1.2.3 Each of the CONTRACTOR's Population Health programs (see Section 2.8) shall address the needs of members who have co-morbid physical health and behavioral health conditions.

2.6.1.2.4 The CONTRACTOR shall provide the appropriate level of Population Health services (see Section 2.8.4 of this Agreement) to non-CHOICES members and non-ECF CHOICES members with co-morbid physical health and behavioral health

conditions. These members should have a single case manager that is trained to provide Population Health services to enrollees with co-morbid physical and behavioral

health conditions. If a member with co-morbid physical and behavioral conditions does not have a single case manager, the CONTRACTOR shall ensure, at a minimum, that the member's Population Health Care Manager collaborates on an ongoing basis with both the member and other individuals involved in the member's care. As required in Section 2.9.6.1.9 of this Agreement, the CONTRACTOR shall ensure that upon enrollment into CHOICES, the appropriate level of Population Health activities are integrated with CHOICES care coordination processes and functions, and that the member's assigned care coordinator has primary responsibility for coordination of all the member's physical health, behavioral health and long-term care needs. The member's care coordinator may use resources and staff from the CONTRACTOR's Population Health program, including persons with specialized expertise in areas such as behavioral health, to supplement but not supplant the role and responsibilities of the member's care coordinator/care coordination team. The CONTRACTOR shall report on its Population Health activities per requirements in Section A.2.30.5.

2.6.1.2.5 If the CONTRACTOR uses different Systems for physical health services, behavioral health and/or long-term care services, these systems shall be interoperable. In addition, the CONTRACTOR shall have the capability to integrate data from the different systems.

2.6.1.2.6 The CONTRACTOR's administrator/project director (see Section 2.29.1.3.1) shall be the primary contact for TENNCARE regarding all issues, regardless of the type of service, and shall not direct TENNCARE to other entities. The CONTRACTOR's administrator/project director shall coordinate with the CONTRACTOR's Behavioral Health Director who oversees behavioral health activities (see Section A.2.29.1.3.5 of this Contract) for all behavioral health issues and the senior executive responsible for CHOICES activities (see Section A.2.29.1.3. of this Contract) for all issues pertaining to the CHOICES program.

2.6.1.3 CONTRACTOR Physical Health Benefits Chart

SERVICE		BENEFIT LIMIT
Inpatient Hospital Services		**Medicaid/Standard Eligible, Age 21 and older:** As medically necessary. Inpatient rehabilitation hospital facility services are not covered for adults unless determined by the CONTRACTOR to be a cost effective alternative (see Section 2.6.5). **Medicaid/Standard Eligible, Under age 21:** As medically necessary, including rehabilitation hospital facility.
Outpatient Hospital		As medically necessary.

Physician Inpatient		As medically necessary.

SERVICE		BENEFIT LIMIT
Physician Outpatient Services/Community Health Clinic Services/Other		As medically necessary.
TennCare Kids Services		**Medicaid/Standard Eligible, Age 21 and older:** Not covered. **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary, except that the screenings do not have to be medically necessary. Children may also receive screenings in-between regular checkups if a parent or caregiver believes there is a problem. Screening, interperiodic screening, diagnostic and follow-up treatment services as medically necessary in accordance with federal and state requirements. See Section 2.7.6.
Preventive Care		As described in Section 2.7.5.
Lab and X-ray		As medically necessary.
Hospice Care		As medically necessary. Shall be provided by a Medicare-certified hospice.
Dental Services		**Dental Services shall be provided by the Dental Benefits Manager.** However, the facility, medical and anesthesia services related to the dental service that are not provided by a dentist or in a dentist's office shall be covered services provided by the CONTRACTOR when the dental service is covered by the DBM. This requirement only applies to Medicaid/Standard Eligibles Under age 21.
Vision Services		**Medicaid/Standard Eligible, Age 21 and older:** Medical eye care, meaning evaluation and management of abnormal conditions, diseases, and disorders of the eye (not including evaluation and treatment of refractive state), shall be covered as medically necessary. Routine periodic assessment, evaluation or screening of normal eyes and examinations for the purpose of prescribing fitting or changing eyeglass and/or contact lenses are not covered. One pair of cataract glasses or lenses is covered for adults following cataract surgery. **Medicaid/Standard Eligible, Under age 21:** Preventive, diagnostic, and treatments services (including eyeglasses) are covered as

SERVICE		BENEFIT LIMIT
Home Health Care		**Medicaid /Standard Eligible, Age 21 and older:** Covered as medically necessary and in accordance with the definition of Home Health Care at Rule 1200-13-13-.01 (for TennCare Medicaid) and Rule 1200-13-14-.01 (for TennCare Standard). Prior authorization required for home health nurse and home health aide services, as described in Rule 1200-13-13-.04 (for TennCare Medicaid) and 1200-13- 14-.04 (for TennCare Standard). **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary in accordance with the definition of Home Health Care at Rule 1200-13-13-.01 (for TennCare Medicaid) and Rule 1200-13-14-.01 (for TennCare Standard). Prior authorization required for home health nurse and home health aide services, as described in Rule 1200-13-13-.04 (for TennCare Medicaid) and 1200-13- 14-.04 (for TennCare Standard).
Pharmacy Services		**Pharmacy services shall be provided by the Pharmacy Benefits Manager (PBM), unless otherwise described below.** The CONTRACTOR shall be responsible for reimbursement of injectable drugs obtained in an office/clinic setting and to providers providing both home infusion services and the drugs and biologics. The CONTRACTOR shall require that all home infusion claims contain National Drug Code (NDC) coding and unit information to be paid. Services reimbursed by the CONTRACTOR shall not be included in any pharmacy benefit limits established by TENNCARE for pharmacy services (see Section A.2.6.2.2).
Durable Medical Equipment (DME)		As medically necessary. Specified DME services shall be covered/non-covered in accordance with TennCare rules and regulations.
Medical Supplies		As medically necessary. Specified medical supplies shall be covered/non-covered in accordance with TennCare rules and regulations.
Emergency Air And Ground Ambulance		As medically necessary.

SERVICE		BENEFIT LIMIT
Non-emergency Medical Transportation (including Non-Emergency Ambulance		Covered non-emergency medical transportation (NEMT) services are necessary non-emergency transportation services provided to convey members to and from TennCare covered services (see definition in Exhibit A to Attachment XI). Non-emergency transportation services shall be provided in accordance with federal law and the Bureau of TennCare's rules and policies and procedures. TennCare covered services (see definition in Exhibit A to Attachment XI) include services provided to a member by a non-contract or non-TennCare provider if (a) the service is covered by Tennessee's Medicaid State Plan demonstration waiver, (b) the provider could be a TennCare provider for that service, and (c) the service is covered by a third party resource (see definition in Section A.1 of the Contract.). If a member requires assistance, an escort (as defined in TennCare rules and regulations) may accompany the member; however, only one (1) escort is allowed per member (see TennCare rules and regulations). Except for fixed route and commercial carrier transport, the CONTRACTOR shall not make separate or additional payment to a NEMT provider for an escort. Covered NEMT services include having an accompanying adult ride with a member if the member is under age eighteen (18). Except for fixed route and commercial carrier transport, t**he CONTRACTOR shall not make separate or additional payment to a NEMT provider for an adult accompanying a member under age eighteen (18).** The CONTRACTOR is not responsible for providing NEMT to HCBS provided through a 1915(c) waiver program for persons with intellectual disabilities (i.e., mental retardation) and HCBS provided through the CHOICES program. However, as specified in Section A.2.11.1.8 in the event the CONTRACTOR is unable to meet the access standard for adult day care (see Attachment III), the CONTRACTOR shall provide and pay for the cost of transportation for the member to the adult day care facility until such time the CONTRACTOR has sufficient provider capacity. Mileage reimbursement, car rental fees, or other reimbursement for use of a private automobile (as defined in Exhibit A to Attachment XI) is not a covered NEMT service. If the member is a child, transportation shall be provided in accordance with TennCare requirements (see Section 2.7.6.4.6). Failure to comply with the provisions of this Section may result in
Renal Dialysis		As medically necessary.

SERVICE		BENEFIT LIMIT
Private Duty Nursing		**Medicaid/Standard Eligible, Age 21 and older:** Covered as medically necessary in accordance with the definition of Private Duty Nursing at Rule 1200-13-13-.01 (for TennCare Medicaid) and Rule 1200-13-14-.01 (for TennCare Standard), when prescribed by an attending physician for treatment and services rendered by a Registered Nurse (R.N.) or a licensed practical nurse (L.P.N.) who is not an immediate relative. Private duty nursing services are limited to services that support the use of ventilator equipment or other life sustaining technology when constant nursing supervision, visual assessment, and monitoring of both equipment and patient are required. Prior authorization required, as described Rule 1200-13-13-.04 (for TennCare Medicaid) and 1200-13-14- .04 (for TennCare Standard). **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary in accordance with the definition of Private Duty Nursing at Rule 1200-13-13-.01 (for TennCare Medicaid) and 1200-13-14-.01 (for TennCare Standard) when prescribed by an attending physician for treatment and services rendered by a registered nurse (R.N.) or a licensed practical nurse (L.P.N.), who is not an immediate relative. Prior authorization required as described
Speech Therapy		**Medicaid/Standard Eligible, Age 21 and older:** Covered as medically necessary by a Licensed Speech Therapist to restore speech (as long as there is continued medical progress) after a loss or impairment. The loss or impairment must not be caused by a mental, psychoneurotic or personality disorder. **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary in accordance with TennCare requirements.
Occupational Therapy		**Medicaid/Standard Eligible, Age 21 and older:** Covered as medically necessary when provided by a Licensed Occupational Therapist to restore, improve, or stabilize impaired functions. **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary in accordance with TennCare requirements.
Physical Therapy		**Medicaid/Standard Eligible, Age 21 and older:** Covered as medically necessary when provided by a Licensed Physical Therapist to restore, improve, or stabilize impaired functions. **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary in accordance with TennCare requirements.

SERVICE		BENEFIT LIMIT
Organ and Tissue Transplant And Donor Organ Procurement		**Medicaid/Standard Eligible, Age 21 and older:** All medically necessary and non-investigational/experimental organ and tissue transplants, as covered by Medicare, are covered. These include, but may not be limited to: Bone marrow/Stem cell; Cornea; Heart; Heart/Lung; Kidney; Kidney/Pancr eas; Liver; Lung; Pancreas; and Small bowel/Multi-visceral. **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary in accordance with TennCare requirements. Experimental
Reconstructive Breast Surgery		Covered in accordance with TCA 56-7-2507, which requires coverage of all stages of reconstructive breast surgery on a diseased breast as a result of a mastectomy, as well as surgical procedures on the non-diseased breast to establish symmetry between the two breasts in the manner chosen by the physician. The surgical procedure performed on a non- diseased breast to establish symmetry with the diseased breast shall only be covered if the surgical procedure performed on a non-diseased breast occurs within five (5) years of the date the reconstructive breast surgery was performed on a
Chiropractic Services		**Medicaid/Standard Eligible, Age 21 and older:** Not covered unless determined by the CONTRACTOR to be a cost effective alternative (see Section A.2.6.5). **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary in accordance with TennCare requirements.

2.6.1.4 CONTRACTOR Behavioral Health Benefits Chart

SERVICE		BENEFIT LIMIT
Psychiatric Inpatient Hospital Services (including physician services)		As medically necessary.
24-hour Psychiatric Residential Treatment		**Medicaid/Standard Eligible, Age 21 and older:** As medically necessary. **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary.
Outpatient Mental Health Services (including physician services)		As medically necessary.
Inpatient, Residential & Outpatient Substance Abuse Benefits[1]		**Medicaid/Standard Eligible, Age 21 and older:** Covered as medically necessary. **Medicaid/Standard Eligible, Under age 21:** Covered as medically necessary.
Mental Health Case		As medically necessary.
Psychiatric-Rehabilitation Services		As medically necessary.
Behavioral Health Crisis Services		As necessary.
Lab and X-ray Services		As medically necessary.
Non-emergency Medical Transportation (including Non- Emergency Ambulance		Same as for physical health (see Section A.2.6.1.3 above).

[1]When medically appropriate, services in a licensed substance abuse residential treatment facility may be substituted for inpatient substance abuse services. Methadone clinic services are not covered for adults.

2.6.1.5 Long-Term Care Benefits for CHOICES Members

2.6.1.5.1 In addition to physical health benefits (see Section A.2.6.1.3) and behavioral health benefits (see Section 2.6.1.4), the CONTRACTOR shall provide long-term care services (including CHOICES HCBS and nursing facility care) as described in this Section A2.6.1.5 to members who have been enrolled into CHOICES by TENNCARE, as shown in the outbound 834 enrollment file furnished by TENNCARE to the CONTRACTOR, effective upon the CHOICES Implementation Date (see Section 1).

2.6.1.5.2 TennCare enrollees will be enrolled by TENNCARE into CHOICES if the following conditions, at a minimum, are met:

2.6.1.5.2.1 TENNCARE or its designee determines the enrollee meets the categorical and financial eligibility criteria for Group 1, 2 or 3;

2.6.1.5.2.2 For Groups 1 and 2, TENNCARE determines that the enrollee meets nursing facility level of care including for Group 2, that the enrollee needs ongoing CHOICES HCBS in order to live safely in the home or community setting and to delay or prevent nursing facility placement;

2.6.1.5.2.3 For Group 2, the CONTRACTOR or, for new TennCare applicants, TENNCARE or its designee, determines that the enrollee's combined CHOICES HCBS, private duty nursing and home health care can be safely provided at a cost less than the cost of nursing facility care for the member;

2.6.1.5.2.4 For Group 3, TENNCARE determines that the enrollee meets the at-risk level of care; and

2.6.1.5.2.5 For Groups 2 and 3, but excluding Interim Group 3, if there is an enrollment target, TENNCARE determines that the enrollment target has not been met or, for Group 2, approves the CONTRACTOR's request to provide CHOICES HCBS as a cost effective alternative (see Section A.2.6.5). Enrollees transitioning from a nursing facility to the community will not be subject to the enrollment target for Group 2 but must meet categorical and financial eligibility for Group 2.

2.6.1.5.3 The following long-term care services are available to CHOICES members, per Group, when the services have been determined medically necessary by the CONTRACTOR.

Service and Benefit Limit	Group	Group	Group 3
Nursing facility care	X	Short-term only	Short-term only (up to 90 days)

Community-based residential alternatives		X	Specified CBRA services and levels of reimburseme nt only. See below.
Personal care visits (up to 2 visits per day at intervals of no less than 4 hours between visits)		X	X
Attendant care (up to 1080 hours per calendar year; up to 1400 hours per full calendar year only for persons who require covered assistance with household chores or errands in addition to		X	X
Home-delivered meals (up to 1 meal per day)		X	X
Personal Emergency Response Systems		X	X
Adult day care (up to 2080 hours per		X	X
In-home respite care (up to 216 hours per		X	X
In-patient respite care (up to 9 days per		X	X
Assistive technology (up to $900 per calendar year)		X	X
Minor home modifications (up to $6,000 per project; $10,000 per calendar		X	X
Pest control (up to 9 units per calendar year)		X	X

2.6.1.5.3.1 The CONTRACTOR shall review all requests for short-term NF stays and shall authorize and/or reimburse short-term NF stays for Group 2 and Group 3 members only when (1) the member is enrolled in CHOICES Group 2 or 3, as applicable, and receiving HCBS upon admission; (2) the member meets the nursing facility level of care in place at the time of admission; (3) the member's stay in the facility is expected to be less than ninety (90) days; and (4) the member is expected to return to the community upon its conclusion. The CONTRACTOR shall monitor all short-term NF stays for

Group 2 and Group 3 members and shall ensure that the member is transitioned from Group 2 or Group 3, as applicable, to Group 1 at any time a) it is determined that the stay will not be short-term or the member will not transition back to the community; and b) prior to exhausting the ninety (90)-day short-term NF benefit covered for CHOICES Group 2 and Group 3 members.

2.6.1.5.3.1.1. The ninety (90) day limit shall be applied on a per admission (and not a per year) basis. A member may receive more than one short-term stay during the year. However, the CONTRACTOR shall be responsible for carefully reviewing any instance in which a member receives multiple short-term stays during the year or across multiple years, including a review of the circumstances which resulted in each nursing facility admission, and shall evaluate whether the services and supports provided to the member are sufficient to safely meet his needs in the community such that transition back to CHOICES Group 2 or Group 3 (as applicable) is appropriate.

2.6.1.5.3.1.2 The CONTRACTOR shall monitor, on an ongoing basis, members utilizing the short-term NF benefit, and shall submit to TENNCARE on a monthly basis a member-by-member status for each Group 2 and Group 3 member utilizing the short-term NF stay benefit, including but not limited to the name of each Group 2 and Group 3 member receiving short-term NF services, the NF in which s/he currently resides, the date of admission for short-term stay, the number of days of short-term NF stay utilized for this admission, and the anticipated date of discharge back to the community. For any member exceeding the ninety (90)-day limit on short-term NF stay, the CONTRACTOR shall include explanation regarding why the benefit limit has been exceeded, and specific actions the CONTRACTOR is taking to facilitate discharge to the community or transition to Group 1, as applicable, including the anticipated timeline.

2.6.1.5.4 In addition to the benefit limits described above, in no case shall the CONTRACTOR exceed the member's individual cost neutrality cap (as defined in Section 1 of this Agreement) for CHOICES Group 2 or the expenditure cap for Group 3.

2.6.1.5.4.1 For CHOICES members in Group 2, the services that shall be compared against the member's individual cost neutrality cap include the total cost of CHOICES HCBS and Medicaid reimbursed home health care and private duty nursing. The total cost of CHOICES HCBS includes all covered CHOICES HCBS and other non- covered services that the CONTRACTOR elects to offer as a cost effective alternative to nursing facility care pursuant to Section A.2.6.5.2 of this Agreement including, as applicable: CHOICES HCBS in excess of specified CHOICES benefit limits, the one-time transition allowance for Group 2 and NEMT for Groups 2 and 3.

2.6.1.5.4.2 For CHOICES members in Group 3, the total cost of CHOICES HCBS, excluding minor home modifications, shall not exceed the expenditure cap

(as defined in Section 1 of this Contract).

2.6.1.5.5 CHOICES members may, pursuant to Section A.2.9.7, choose to participate in consumer direction of eligible CHOICES HCBS and, at a minimum, hire, fire and supervise workers of eligible CHOICES HCBS.

2.6.1.5.6 The CONTRACTOR shall, on an ongoing basis, monitor CHOICES members' receipt and utilization of long-term care services and identify CHOICES members who are not receiving long-term care services. Pursuant to Section A.2.30.11.4, the CONTRACTOR shall, on a monthly basis, notify TENNCARE regarding members that have not received long-term care services for a thirty (30) day period of time. The CONTRACTOR shall be responsible for immediately initiating disenrollment of any member who is not receiving TennCare-reimbursed long-term care services and is not expected to resume receiving long-term care services within the next thirty (30) days, except under extenuating circumstances which must be reported to TennCare on the *CHOICES Utilization Report*. Acceptable circumstances may include, but are not limited to, a member's temporary hospitalization or temporary receipt of Medicare-reimbursed skilled nursing facility care. Such notification and/or disenrollment shall be based not only on receipt and/or payment of claims for long- term care services, but also upon review and investigation by the CONTRACTOR as needed to determine whether the member has received long-term care services, regardless of whether claims for such services have been submitted or paid.

2.6.1.5.7 The CONTRACTOR may submit to TENNCARE a request to no longer provide long- term care services to a member due to concerns regarding the ability to safely and effectively care for the member in the community and/or to ensure the member's health, safety and welfare. Acceptable reasons for this request include but are not limited to the following:

2.6.1.5.7.1 A member in Group 2 for whom the CONTRACTOR has determined that it cannot safely and effectively meet the member's needs at a cost that is less than the member' cost neutrality cap, and the member declines to transition to a nursing facility;

2.6.1.5.7.2 A member in Group 2 or 3 who repeatedly refuses to allow a care coordinator entrance into his/her place of residence (Section A.2.9.6);

2.6.1.5.7.3 A member in Group 2 or 3 who refuses to receive critical HCBS as identified through a needs assessment and documented in the member's plan of care; and

2.6.1.5.7.4 A member in Group 1 who fails to pay his/her patient liability and the CONTRACTOR is unable to find a nursing facility willing to provide services to the member (Section A.2.6.7.2).

2.6.1.5.7.5 A member in Group 2 or 3 who refuses to pay his/her patient liability and for whom the CONTRACTOR is either: 1) in the case of persons receiving CBRA services, unable to identify another provider willing to provide services to the member; or 2) in the case of persons receiving non-residential HCBS or companion care, the CONTRACTOR is unwilling to continue to serve the member, and the Bureau of TennCare has determined that no other MCO is willing to serve the member.

2.6.1.5.7.6 The CONTRACTOR's request to no longer provide long-term care services to a member shall include documentation as specified by TENNCARE. The State shall make any and all determinations regarding whether the CONTRACTOR may discontinue providing long-term care services to a member, disenrollment from CHOICES, and, as applicable, termination from TennCare.

2.6.1.5.8 The CONTRACTOR may submit to TENNCARE a request to disenroll from CHOICES a member who is not receiving any Medicaid-reimbursed LTC services based on the CONTRACTOR's inability to reach the member only when the CONTRACTOR has exhausted all reasonable efforts to contact the member, and has documented such efforts in writing, which must be submitted with the disenrollment request. Efforts to contact the member shall include, at a minimum:

2.6.1.5.8.1 Multiple attempts to contact the member, his/her representative or designee (as applicable) by phone. Such attempts must occur over a period of at least two (2) weeks and at different times of the day and evening, including after business hours. The CONTRACTOR shall attempt to contact the member at the phone numbers the CONTRACTOR has on file, including referral records and case management notes; and phone numbers that may be provided in TENNCARE's TPAES system. The CONTRACTOR shall also contact the member's Primary Care Provider and any contracted LTC providers that have delivered services to the member during the previous six (6) months in order to obtain contact information that can be used to reach the member;

2.6.1.5.8.2 At least one (1) visit to the member's most recently reported place of residence except in circumstances where significant safety concerns prevent the CONTRACTOR from completing the visit, which shall be documented in writing; and

2.6.1.5.8.3 An attempt to contact the member by mail at the member's most recently reported place of residence at least two (2) weeks prior to the request to disenroll.

2.6.1.6 <u>Long Term Services and Supports Benefits for ECF CHOICES Members</u>

2.6.1.6.1 In addition to physical health benefits (see Section A.2.6.1.3)and behavior health benefits (see Section A.2.6.1.4), the CONTRACTOR shall provide

long-term services and supports as described in this Section A.2.6.1.6 to members who have been enrolled into ECF CHOICES by TennCare as shown in the outbound 834 enrollment file furnished by TennCare to the CONTRACTOR.

2.6.1.6.2. TennCare enrollees will be enrolled by TENNCARE into ECF CHOICES in accordance with criteria set forth in the approved 1115 waiver and TennCare rule.

2.6.1.6.3 The following long-term services and supports are available to ECF CHOICES members, per Group and subject to all applicable service definitions, benefit limits, and Expenditure Caps, when the services have been determined medically necessary by the CONTRACTOR.

Benefit	Group 4	Group 5	Group 6
Respite (up to 30 days per calendar year or up to 216 hours per calendar year only for persons living with unpaid family caregivers.	X	X	X
Supportive Home Care (SHC)	X		
Family caregiver stipend in lieu of SHC (up to $500 per month for children under age 18; up to $1,000 per month for adults age 18 and older),	X		
Community integration support services (subject to limitations specified in the approved 1115 waiver and TennCare Rule),	X	X	X
Community transportation	X	X	X
Independent living skills training (subject to limitations specified in the approved 1115 waiver and TennCare rule)	X	X	X
Assistive technology, adaptive equipment and supplies (up to $5,000 per calendar year)	X	X	X
Minor home modifications (up to $6,000 per project; $10,000 per calendar year; and $20,000 per lifetime)	X	X	X
Community support development, organization and navigation	X		
Family caregiver education and training (up to $500 per	X		

calendar year)			
Family-to-family support	X		
Conservatorship and alternatives to conservatorship counseling and assistance (up to $500 per lifetime)	X	X	X
Health insurance counseling/forms assistance (up to 15 hours per calendar year)	X		
Personal assistance (up to 215 hours per month)		X	X
Community living supports (CLS)		X	X
Community living supports – family model (CLS-FM)		X	X
Individual education and training (up to $500 per calendar year)		X	X
Peer-to-peer person-centered planning, self-direction, employment and community support and navigation (up to $1,500 per lifetime)		X	X
Specialized consultation and training (up to $5,000 per calendar year)		X	X
Adult dental services (up to $5,000 per calendar year; up to $7,500 across three consecutive calendar years.	X Limited to adults age 21 and older	X	X
Employment services/supports as specified below (subject to limitations specified in the 1115 waiver and TennCare Rule)	X	X	X
Supported employment – individual employment support • Exploration • Benefits counseling • Discovery • Situational observation and assessment • Job development plan or self-employment plan • Job development or self-employment start-up	X	X	X

• Job coaching for individualized, integrated employment or self-employment • Co-worker support • Career advancement			
Supported employment – small groups	X	X	X
Integrated employment path services	X	X	X

2.6.1.6.4 In addition to the benefits specified above which shall be delivered in accordance with the definitions, including limitations set forth in the approved 1115 waiver and in TennCare rule, a person enrolled in ECF CHOICES may receive short-term nursing facility care, without being required to disenroll from their ECF CHOICES group until such time that it is determined that transition back to HCBS in ECF CHOICES will not occur within ninety (90) days from admission.

A.2.6.2 **TennCare Benefits Provided by TENNCARE**

TennCare shall be responsible for the payment of the following benefits:

2.6.2.1 Dental Services

Except as provided in Section A2.6.1.3 of this Contract, dental services shall not be provided by the CONTRACTOR but shall be provided by a dental benefits manager (DBM) under contract with TENNCARE. Coverage of dental services is described in TennCare rules and regulations.

2.6.2.2 Pharmacy Services

Except as provided in Section A.2.6.1.3 of this Agreement, pharmacy services shall not be provided by the CONTRACTOR but shall be provided by a pharmacy benefits manager (PBM) under contract with TENNCARE. Coverage of pharmacy services is described in TennCare rules and regulations. TENNCARE does not cover pharmacy services for enrollees who are dually eligible for TennCare and Medicare.

2.6.2.3 ICF/IID Services and Alternatives to ICF/IID Services

For qualified enrollees in accordance with TennCare policies and/or TennCare rules and regulations, TENNCARE covers the costs of long-term care institutional services in an Intermediate Care Facility for Individuals with

Intellectual Disabilities (ICF/IID) or alternative to an ICF/IID provided through a Home and Community Based Services (HCBS) waiver for persons with intellectual disabilities.

HEDIS 2016 MEASURES

Effectiveness of Care Measures	
Prevention and Screening Measures:	
Adult BMI Assessment (ABA)	
Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC) – Broken Out by Age:	**BMI Percentile:** 3-11 years
	12-17 years
	Counseling for Nutrition: 3-11 years
	12-17 years
	Counseling for Physical Activity: 3-11 years
	12 -17 years
Childhood Immunization Status (CIS):	DTaP IPV MMR HiB HepB VZV PCV HepA RV Flu Combination 2 Combination 3 Combination 4 Combination 5 Combination 6 Combination 7 Combination 8 Combination 9 Combination 10
Immunizations for Adolescents (IMA):	Meningococcal Tdap/Td Combination 1
Human Papillomavirus Vaccine for Female Adolescents (HPV)	
Lead Screening in Children (LSC)	
Breast Cancer Screening (BCS)	
Cervical Cancer Screening (CCS)	
Chlamydia Screening in Women (CHL) – Broken Out by Age :	16-20 years 21-24 years
Respiratory Conditions:	
Appropriate Testing for Children With Pharyngitis (CWP)	
Use of Spirometry Testing in the Assessment and Diagnosis of COPD (SPR)	

Effectiveness of Care Measures	
Pharmacotherapy Management of COPD Exacerbation (PCE):	Systemic corticosteroid
	Bronchodilator
Use of Appropriate Medications for People With Asthma (ASM) – Broken Out by Age:	5-11 years
	12-18 years
	19-50 years
	51-64 years
Medication Management for People with Asthma (MMA) – Broken Out by Age:	**Medication Complication 50%:** 5-11 years
	12-18 years
	19-50 years
	51-64 years
	Medication Complication 75%: 5-11 years
	12-18 years
	19-50 years
	51-64 years
Asthma Medical Ratio (AMR) – Broken Out by Age:	5-11 years
	12-18 years
	19-50 years
	51-64 years
Cardiovascular Conditions:	
Controlling High Blood Pressure (CBP)	
Persistence of Beta-Blocker Treatment After a Heart Attack (PBH)	
Statin Therapy for Patients with Cardiovascular Disease (SPC)	Received Statin Therapy: Males 21-75 years Females 40-75 years
	Statin Adherence 80%: Males 21-75 years Females 40-75 years
Diabetes:	
Comprehensive Diabetes Care (CDC):	HbA1c Testing
	HbA1c Control (<7.0%)
	HbA1c Control (<8.0%)
	HbA1c Poor Control (>9.0%)
	Retinal Eye Exam Performed
	Medical Attention for Nephropathy
	Blood Pressure Control (<140/90 mm Hg)
Statin Therapy for Patients with Diabetes (SPD)	Received Statin Therapy: 40-75 years
	Statin Adherence 80%: 40-75 years
Musculoskeletal Conditions:	
Disease-Modifying Anti-Rheumatic Drug Therapy for Rheumatoid Arthritis (ART)	
Behavioral Health:	
Antidepressant Medication Management (AMM):	Effective Acute Phase Treatment
	Effective Continuation Phase Treatment
Follow-Up Care for Children Prescribed ADHD Medication (ADD):	Initiation Phase
	Continuation and Maintenance Phase
Follow-Up After Hospitalization for Mental Illness (FUH):	7-day follow-up
	30-day follow-up

Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medication (SSD)	
Diabetes Monitoring for People With Diabetes and Schizophrenia (SMD)	
Cardiovascular Monitoring for People With Cardiovascular Disease and Schizophrenia (SMC)	
Adherence to Antipsychotic Medications for Individuals With Schizophrenia (SAA)	
Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)	1-5 years 6-11 years 12-17 years
Use of Multiple Concurrent Antipsychotics in Children and Adolescents	1-5 years 6-11 years 12-17 years
Medication Management:	
Annual Monitoring for Patients on Persistent Medications (MPM):	ACE Inhibitors or ARBs
	Digoxin
	Diuretics
Measures Collected Through CAHPS Health Plan Survey:	
Flu Vaccinations for adults ages 18-64 (FVA)	
Medical Assistance With Smoking and Tobacco Use Cessation (MSC):	Advising Smokers and Tobacco Users to Quit
	Discussing Cessation Medications
	Discussing Cessation Strategies

Effectiveness of Care Measures Where Lower Rates Indicate Better Performance	
Prevention and Screening:	
Non-Recommended Cervical Cancer Screening in Adolescent Females (NCS)	
Diabetes	
Comprehensive Diabetes Care (CDC):	HbA1c Poor Control (>9.0%)

Access/Availability of Care Measures	
Adults' Access to Preventive/Ambulatory Health Services (AAP) – Broken Out by Age:	20-44 years
	45-64 years
Children and Adolescents' Access to Primary Care Practitioners (CAP) – Broken Out by Age:	12-24 months
	25 months-6 years
	7-11 years
	12-19 years
Initiation and Engagement of Alcohol and Other Drug (AOD) Dependence Treatment (IET) – Broken Out by Age:	**Initiation of AOD Treatment:** 13-17 years
	≥ 18 years
	Engagement of AOD Treatment: 13-17 years
	≥ 18 years
Prenatal and Postpartum Care (PPC):	Timeliness of Prenatal Care
	Postpartum Care
Call Answer Timeliness (CAT)	
Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics	1-5 years 6-11 years 12-17 years

Utilization Measures	
Frequency of Ongoing Prenatal Care (FPC):	≥ 81 percent
Well-Child Visits in the First 15 Months of Life (W15): 6 or More Visits	
Well-Child Visits in the Third, Fourth, Fifth, and Sixth Years of Life (W34)	
Adolescent Well-Care Visits (AWC)	
Relative Resource Use Measures

On September 27, the Draft 2016 Quality Assessment and Quality Improvement Strategy was posted on the TennCare Website for Review. The deadline for submission of comments was close of business on October 12. After posting notices were sent by TennCare to the following groups and/or individuals and all three TennCare contracted health plans. The notice included the link for the Quality Strategy as well as the deadline for submission.

- Legal Aid Society of Middle TN and the Upper Cumberlands
- Family and Childrens Services
- TN Mental Health Consumers Association (TMHCA)
- TN Healthcare Campaign
- TN Association of Mental Health Organizations (TAMHO)
- Greater Nashville Regional Council
- The ARC of TN
- National Alliance for the Mentally Ill - TN chapter (NAMI T)
- TN Primary Care Association
- Nashville Cares
- TN Disability Coalition
- American Cancer Society
- National Healthcare for the Homeless Campaign
- TN Conference on Social Welfare
- Rural Health Association of TN
- Children's Hospital Alliance of TN
- Tennessee Community Services Agency (TNCSA)
- Disability Law and Advocacy Center of Tennessee
- Mental Health Cooperative
- Cherokee Health
- Centerstone
- Vanderbilt (Crystal Terrace)

Amerigroup, one of the TennCare contracted MCOs, then sent the notice to the following individuals:

- Kim Noe – Interim HealthCare of East TN
- Adrienne Surber – The Heritage Center Nursing Home
- Mahon Fritts – ALPS Adult Day Care Center
- Lisa Pullem – ETAAD office
- Morgan Yates – Quality of Life Home Care
- Janice Craven – Memphis Center for Independent Living (MCIL)
- Tamara Perry – Caring Everyday Healthcare
- Marilyn Thompson – Grace Healthcare Cordova
- Chanzana Gregory – Comforting Angels Home Health
- Tina Sanders – Comforting Angels
- Beth James – Jackson Center for Independent Living (JCIl)
- Rena Baker – Senior Solutions Home Care
- Dana Crotts – Senior Solutions Home Care

- Barbara McKinney – My Faith Home Care
- Tonya Dixon – Grace and Mercy Home care
- Lanita Pugh – Popular Point Nursing Rehab
- Dee Taylor – Crossroads Hospice
- Dominique Zinn – United Home Health
- Tamela Thomas – Nursing Angels Home Health
- Jeffrey Guy, MD – Trauma and Burn Surgery, CMO TriStar HCA
- Rick Donlon, MD – Internal Medicine, CEO Resurrection Health
- Brenda Darling, DO – Family Medicine
- Parinda Khatri, PhD – Clinical Psychology, Chief Clinical Officer – Cherokee
- Paul Heil, MD – Pediatrics, Medical Director Old Harding Pediatrics
- Keith Williams, MD – Obstetrics and Gynecology, CMO Jackson Clinic
- Trey LaCharite, MD – Internal Medicine, Hospitalist, CMO UPA
- David Patzar, MD – Psychiatry, Mental Health Cooperative
- Stephen Staggs, MD – Obstetrics and Gynecology, Tennessee's Women Care
- George O. Davis, DO – Maternal Fetal Medicine, ETSU

No comments were submitted by the individuals/groups listed above. However, the three TennCare contracted health plans made comments.

- United HealthCare commented about a typographical error in the document.
- BlueCare commented that the name "Mental Health Case Mangement" should be changed. However, this was referencing a future contract change that has not yet occurred. Any changes to this will be included in the 2017 update report.
- Amerigroup submitted the following comments:
    - " TennCare identifies the race, ethnicity, and primary language spoken of its enrollees upon application. Amerigroup is not seeing 100% of the TennCare beneficiaries with this information, this may be an area of improvement that could be added or discussed.
        - TennCare's response: Since this information is collected through the eligibility system, it is only as good as the information collected at the time of application. TennCare is in the process of developing a new eligibility system that should help resolve these issues.
    - "should the requirement for MCO's to gather OMB required data, including race and language, to use proactively to develop programs that will analyze and reduce health disparities be added to the Health Disparity section?"
        - TennCare's response: This language was previously removed from the MCO contracts.
    - Section on Health Disparities Surveys: "Would like to have this activity aligned with NCQA's Multicultural Health Distinction program. Amerigroup is seeking distinction and the standards are setting a national roadmap for health disparity activity. That would reduce duplication if MCO's that have this distinction are exempt or could use activities they are doing for this NCQA program to meet the activities TennCare desires."
        - TennCare's Response: This information has been forwarding those individuals in TennCare responsible for this contractual requirement. However, should this alignment be included in the future MCO contracts, it will appear in the 2017 update report.
    - Current MCO language requires 3 non-clinical PIPs with one related to CHOICES.
        - TennCare's Response: The change from two related to CHOICES to one related to CHOICES was made.
    - Page 86 stated "In 2015, TennCare began allowing the MCOs to deliver this newsletter

through social media rather than always through a mailing. “May want to edit; this is allowed if proof can be shown supporting the use of social media vs. mail.”
    - TennCare’s Response: Changed the language to say “social media is allowed, if appropriate”.
- “Amerigroup currently does not have any bilingual community outreach staff, however, we agree this is an important attribute for our outreach team and continue to make this a priority when recruiting for these positions.”
    - TennCare’s Response: Changed the language to say the MCOs will hire, if available, Spanish-speaking bilingual outreach staff.
- Hybrid vs. administrative HEDIS data for well-child visit measures. “Hoping this will be changed to the option of reporting administrative only data for well-child visits or admin only for well child will be implemented in 2017.
    - TennCare’s Response: This has been changed back to utilizing hybrid specifications as identified by NCQA.
- Submitted language related to an Adolescent Screening Collaborative Workgroup facilitated by TennCare.
    - TennCare’s Response: Did not incorporate all of the language submitted but referenced this topic in the Collaborative Workgroup Section.
- “Should Seamless Conversion and Dual Citizen Focus be mentioned more? This program and requirement impacts HEDIS outcomes and all Quality Programming.”
    - TennCare’s Response: Have requested clarification on this request from Amerigroup and will include language, if appropriate, in the 2017 update report.
