

Section 1115 Demonstrations: TX Family Planning Women's Health Program

Public Comments

Title	Description	Created At
Providers	There is need to be more providers available to offer the service other than a speciality provider and a cost cap to where the providers can provide the care and still make a profit. The system now is set up to where the cost would be too high to provide the service and the reimbursement is poor so it limits the amount of providers who would be willing to offer the service.	2012-12-13 18:04
