23. REMARKS:
2. The SBP will be established based on the following process and mathematical sequence.
   a. Steps in the mathematical sequence:
      i. Step 1: Develop, by facility, an average facility specific, all payer, cost neutral per discharge rate.
      ii. Step 2: Convert the by facility per discharge rates developed in Step 1 to a price.
      iii. Step 3: Adjust the price developed in Step 2 for budget neutrality.

   b. For the period May 1, 2012 through March 31, 2013 and for state fiscal year periods on and after
      April 1, 2013 through March 31, 2015, the statewide base price will be adjusted such that total
      Medicaid payments are decreased for such period and for each such state fiscal year period by
      $19,200,000.

   c. Step 1: Develop an average facility specific, all payer, cost neutral per discharge rate. This rate
      represents the operating costs that will be paid by the statewide base price and is converted to a
      price in Step 2. The average per discharge rate developed in this process is represented as H in
      the chart in paragraph (2)(c)(iii).

      i. Step 1 uses the following data on a facility specific basis and the mathematical process in the
         chart in paragraph (2)(c)(iii):

         1. Total allowable facility ICR costs in the base year, as defined in the Definitions section.
            These costs are represented as A in the chart.

         2. Total allowable facility specific costs in the ICR from the base year, as defined in the
            Definitions Section of this Attachment, that are associated with the rate add-ons as defined
            in the Add-Ons to the Acute Rate Per Discharge Section of this Attachment. These costs are
            represented as B in the chart.

         3. Total facility ICR discharges in the base year, as defined in the Definitions section. These
            discharges are represented as D in the chart.

         4. The wage equalization factor (WEF) for the base year, as defined in the Definitions section,
            and calculated based on the Wage Equalization Factor (WEF) section of this Attachment.
            This WEF factor is represented as F in the chart.

         5. A facility specific all payer CMI, as defined in the definitions section.

            a. Uses the all payer acute claims of the base year, as defined in the Definitions Section of
               this Attachment.
