

MACPro

Medicaid & CHIP Program System

MACPro to be
Released in
Spring 2013!

WHAT is MACPro?

A web-based system for the submission, review, disposition and management support of State Plan Amendments, waivers, demonstrations, advance planning documents and other initiatives.

WHY is MACPro needed?

- To improve the State application and Federal review processes, federal program management and transparency
- To support data-driven decision making through online access to data and information on Medicaid and CHIP eligibility and programs
- To support implementation of the Affordable Care Act

WHEN will MACPro be available?

The initial MACPro release is scheduled for spring 2013 and includes four program applications:

- Medicaid Alternative Benefit Plan (ABP)
- Part of Medicaid Administration
- CHIP Eligibility
- Part of CHIP Administration

HOW does MACPro support the submission of changes to existing program applications?

- MACPro standardizes applications by using structured data templates with system edits
- MACPro provides online reports to manage workflow
- MACPro allows a real-time view of staff assignments and clock cycles for Managers
- MACPro supports states benchmarking and learning collaboratives
- MACPro ensures consistent information is available for the many individuals and systems that use Medicaid data
