Income standard chosen

Individuals qualify under this classification under the following income standard:

- The minimum standard.
- The maximum income standard.

If not chosen as the maximum income standard, the state's effective income level for this classification under the Medicaid state plan as of March 23, 2010, converted to a MAGI-equivalent percent of FPL or amounts by household size.

If not chosen as the maximum income standard, and if higher than the effective income level used under the Medicaid state plan as of March 23, 2010, the state's effective income level for this classification under the Medicaid state plan as of December 31, 2013, converted to a MAGI-equivalent percent of FPL or amounts by household size.

If not chosen as the maximum income standard, and if higher than the effective income level used under the Medicaid state plan as of March 23, 2010, the state's effective income level for this classification under a Medicaid 1115 Demonstration as of March 23, 2010, converted to a MAGI-equivalent percent of FPL or amounts by household size.

If not chosen as the maximum income standard, and if higher than the effective income level used under the Medicaid state plan as of March 23, 2010, the state's effective income level for this classification under a Medicaid 1115 Demonstration as of December 31, 2013, converted to a MAGI-equivalent percent of FPL or amounts by household size.

Another income standard in-between the minimum and maximum standards allowed, provided it is higher than the effective income level for this classification in the state plan as of March 23, 2010, converted to a MAGI equivalent.

Other Reasonable Classifications Previously Covered

The state covers reasonable classifications of children not covered in the Medicaid state plan as of March 23, 2010, but covered under the Medicaid state plan as of December 31, 2013 or under a Medicaid 1115 Demonstration as of March 23, 2010 or December 31, 2013 with an income standard higher than the current mandatory income standard for the age group.

Additional new age groups or reasonable classifications covered

If the state has not elected to cover the Adult Group (42 CFR 435.119), it may elect to cover additional new age groups or reasonable classifications that have not been covered previously. If the state covers the Adult Group, this additional option is not available, as the standard for the new age groups or classifications is lower than that used for mandatory coverage.

The state does not cover the Adult Group and elects the option to include in this eligibility group additional age groups or reasonable classifications that have not been covered previously in the state plan or under a Medicaid 1115 Demonstration. Any additional age groups or reasonable classifications not previously covered are restricted to the AFDC income standard from July 16, 1996, not converted to a MAGI-equivalent standard.
