TARGETED CASE MANAGEMENT SERVICES

Target Group (42 Code of Federal Regulations 441.18(a)(8)(i) and 441.18(a)(9)):

Target Group A: The target group consists of functionally limited persons with multiple needs or a high level of vulnerability who, as shown by an assessment, require mental health case management. Such persons must have a primary diagnosis of either mental illness or developmental disability and a documented need for access to the continuum of mental health services offered by a Medicaid-enrolled mental health clinic services provider. Moreover, these persons must have a documented lack of capacity for independently accessing and sustaining involvement with needed services.

X Target group includes individuals transitioning to a community setting. Case-management services will be made available for up to 120 **[insert a number; not to exceed 180]** consecutive days of a covered stay in a medical institution. The target group does not include individuals between ages 22 and 64 who are served in Institutions for Mental Disease or individuals who are inmates of public institutions). (State Medicaid Directors Letter (SMDL), July 25, 2000)

Areas of State in which services will be provided (§1915(g)(1) of the Act):

- X** Entire State
 _____ Only in the following geographic areas: **[Specify areas]**

Comparability of services (§§1902(a)(10)(B) and 1915(g)(1))

- _____ Services are provided in accordance with §1902(a)(10)(B) of the Act.
X Services are not comparable in amount duration and scope (§1915(g)(1)).

Definition of services (42 CFR 440.169): Targeted case management services are defined as services furnished to assist individuals, eligible under the State Plan, in gaining access to needed medical, social, educational and other services. Targeted Case Management includes the following assistance:

- ❖ Comprehensive assessment and periodic reassessment of individual needs, to determine the need for any medical, educational, social or other services. These assessment activities include
 - taking client history;
 - identifying the individual's needs and completing related documentation; and
 - gathering information from other sources such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the eligible individual;

It is expected that face-to-face assessments are performed annually, however, the frequency should be based on the needs and circumstances of the individual and/or family.
- ❖ Development (and periodic revision) of a specific care plan that is based on the information collected through the assessment that
 - specifies the goals and actions to address the medical, social, educational, and other services needed by the individual;

State Plan under Title XIX of the Social Security Act
State/Territory: Michigan

TARGETED CASE MANAGEMENT SERVICES

- includes activities such as ensuring the active participation of the eligible individual, and working with the individual (or the individual's authorized health care decision maker) and others to develop those goals; and
 - identifies a course of action to respond to the assessed needs of the eligible individual;
- ❖ Referral and related activities (such as scheduling appointments for the individual) to help the eligible individual obtain needed services including
- activities that help link the individual with medical, social, educational providers, or other programs and services that are capable of providing needed services to address identified needs and achieve goals specified in the care plan; and
- ❖ Monitoring and follow-up activities:
- activities and contacts that are necessary to ensure the care plan is implemented and adequately addresses the eligible individual's needs, and which may be with the individual, family members, service providers, or other entities or individuals and conducted as frequently as necessary, and including at least one annual monitoring, to determine whether the following conditions are met:
 - services are being furnished in accordance with the individual's care plan;
 - services in the care plan are adequate; and
 - changes in the needs or status of the individual are reflected in the care plan. Monitoring and follow-up activities include making necessary adjustments in the care plan and service arrangements with providers. The case manager must determine, on an ongoing basis, if the services and supports have been delivered, and if they are adequate to meet the needs/wants of the beneficiary. Frequency and scope (face-to-face and telephone) of case management monitoring activities must reflect the intensity of the beneficiary's health and welfare needs identified in the individual plan of services.

 X Case management includes contacts with non-eligible individuals that are directly related to identifying the eligible individual's needs and care, for the purposes of helping the eligible individual access services; identifying needs and supports to assist the eligible individual in obtaining services; providing case managers with useful feedback, and alerting case managers to changes in the eligible individual's needs.
