

## STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State of MICHIGAN

### ***Policy and Methods for Establishing Rates Inpatient Hospital***

---

**(Relative Weight x DRG Price) + Outlier Payment**

Each inpatient hospital claim is assigned to a DRG using the same DRG grouper version used to establish the relative weights.

A. Relative Weight:

A state wide relative weight is assigned to each DRG. The statewide relative weights are calculated using Medicaid and Children's Special Health Care Services Program FEE-FOR-SERVICE (FFS) AND MEDICAID HEALTH PLAN (MHP) ENCOUNTER inpatient paid claims for admissions during three TWO consecutive state fiscal years and hospital specific cost report data drawn from three TWO consecutive cost report years used to establish the relative weights.

The claim file was adjusted to:

1. Combine multiple billings for the same episode of service, including:
  - a. Invoices from a single episode of service billed as a transfer from a hospital and an admission to the same hospital caused by a change of ownership and issuance of a new Medicaid ID number,
  - b. Invoices for a single episode of service billed as a transfer from a hospital and an admission to a hospital created from a merger of two or more hospitals and the assignment of patient bills from multiple hospitals to a single Medicaid ID number.
2. Eliminate episodes with any Medicare charges (For dual Medicare/Medicaid eligible beneficiaries, only claims paid a full Medicaid DRG are included);
3. Eliminate episodes assigned to DRGs reimbursed by multiplying a hospital's inpatient operating cost to charge ration by charges;
4. Eliminate episodes without any charges or days;
5. Assign alternate weights for neonatal services. Two sets of weights are calculated for six (6) DRG classifications representing neonatal services (385-390 789-794). One set of weights is identified as "alternate weights" (385.1, 386.1, 387.1, 388.1, 389.1 and 390.1). These alternate weights are calculated from episodes that are assigned to one of these DRGs and include charges for services in an intensive care unit of one of the hospitals designated as having a neonatal intensive care unit (NICU). The remaining claims assigned to these DRGs are used for the other set of weights.

In order to receive the alternate weights, a hospital must have a Certificate of Need (CON) to operate a NICU or a special newborn nursery unit (SNNU) or the hospital must have previously received alternate weight reimbursement by Medicaid for its SNNU.

### ***Policy and Methods for Establishing Rates Inpatient Hospital***

---

6. Limit episodes to those from Michigan hospitals, including hospitals that are no longer in operation (provided that hospital cost report data are available);
7. Limit episodes to those with a valid patient status (incomplete episodes are excluded as are additional pages of multiple page claims where there is no initial claim containing a valid patient status);
8. Eliminate episodes with a zero dollar Medicaid liability;
9. Eliminate episodes where the beneficiary was enrolled in a Michigan Medicaid clinic plan.
10. Determine the 3<sup>rd</sup> and 97<sup>th</sup> percentile length of stays by DRG, the average length of stay, and the maximum length of stay.
  - a. Set the low day outlier threshold at the greater of one day or the 3<sup>rd</sup> percentile length of stay.
  - b. Set the high day outlier threshold at the lesser of the average length of stay plus 30 days or the 97<sup>th</sup> percentile length of stay.
  - c. If the DRG has less than an adequate number of episodes (currently 32), the low day threshold will be set at the lesser of the average length of stay plus 30 days, the maximum length of stay, or the Medicare DRG 90<sup>th</sup> percentile length of stay (from the corresponding Grouper as published in the Federal Register). If the Medicare DRG also has an inadequate number of claims, then the threshold is set based upon the expert advice of the MSA's medical staff.
11. Eliminate low day outliers (Low day outliers are those episodes whose length of stay are less than the published low day threshold for each DRG. Since low day outliers are paid under a percent of charge method using the hospital's cost to charge ratio times charges, and do not receive a DRG payment, they are excluded from the weight calculations);
12. Calculate the arithmetic mean length of stay for each DRG with each episode's length of stay limited to the high day threshold set above. This serves as the final published average length of stay.
13. Limit episodes ending in a transfer to another acute setting to those whose length of stay was at least equal to the published average length of stay for the DRG (for DRGs 385 and 385.1 all transfers are included);
14. Bring all charges for admissions in the first ~~and second years~~ YEAR of the base period up to third SECOND year charges through application of inflation and weighting factors;

### ***Methods and Standards for Establishing Payment Rates – Inpatient Hospital***

---

15. Recognize area cost differences by dividing the charges for each hospital by an area cost adjustor factor. Hospitals are grouped by U.S. Census Core Based Statistical Areas (CBSAs) as determined by the Centers for Medicare and Medicaid Services for the Medicare program for wage data. Each area cost adjustor is calculated as follows:
- a. Cost Adjustor =  $0.71066 \times \text{Wage Adjustor} + 0.28934$
- 1) the cost formula reflects Medicare estimate of labor-related costs as a portion of total hospital costs as published in the federal register.
  - 2) Each area wage factor is area wage per F.T.E. divided by the statewide average hospital wage per F.T.E. Medicare audited wage is collected using the source described in state policy for the rate-setting period in question. Contract labor cost, as defined by Medicare, are included in determining a hospital's wage costs. Physician Medicare Part B labor costs are excluded.
  - 3) Each hospital's wage costs are adjusted for different fiscal year ends by multiplying the hospital's wage costs by inflation and weighting factors. All wages are brought to a common point in time.
  - 4) For hospitals with cost reporting periods ending other than the end of a quarter, the inflation update for the quarter in which the fiscal year ends is used.
  - 5) The wage adjuster is based on a ~~three~~-TWO year moving average with the most recent year weighted 60%, AND the second year weighted 40%, ~~and the initial year weighted 16%~~
  - 6) If two or more hospitals merged and are now operating as a single hospital, salary and wages are computed using the combined cost report data from all hospitals involved in the merger. Salary data will be inflated to a common point in time.
- b. Indirect medical education (IME) charges are removed by dividing each hospital's adjusted charges by an IME adjustor. Each hospital's IME adjustor is calculated as follows:

$$1 + \left( \left[ \left( 1 + \frac{\text{Interns & Residents}}{\text{Beds}} \right) .5795 - 1 \right] \times 0.3575 \right)$$

- 1) The number of beds for each hospital is the average number of available beds for the hospital. Available licensed beds are limited to beds in the medical/surgical

TN No.: 00-01

## STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State of MICHIGAN

### ***Policy and Methods for Establishing Payment Rates Inpatient Hospital***

---

portion of the hospital. Interns and residents are only those allocated to the medical/surgical portion of the hospital.

- 2) Data taken from the hospital's cost report for the ~~three~~ TWO fiscal years is weighted as follows: 60% for the most recent year, ~~24%~~ for the middle year, and ~~16%~~ for the eldest year. ~~40%~~ FOR THE SECOND YEAR.
  - 3) If two or more hospitals merge and are operating as a single hospital, IME data is computed after the merger using the combined cost report data from all hospitals involved in the merger.
- c. Adjust charges for high day and/or cost outliers to approximate the charges for the non-outlier portion of the stay.
- 1) If a claim's length of stay is greater than the high day outlier threshold for the DRG, then it is considered a high day outlier claim. Adjusted charges representing an estimate of the non-outlier portion of charges for high day outliers are used for the relative weight and price calculations as follows:

$$\text{Adj Chrg} = \frac{\text{Charges} \times \text{High Day Threshold}}{\text{High Day Threshold} + [ .6 \times (\text{LOS} - \text{High Day Threshold}) ]}$$

- 2) A claim is a cost outlier if its costs (i.e. charges times hospital's inpatient operating cost to charge ratio) are greater than the cost threshold for that DRG (the threshold is set at the larger of twice the DRG payment or \$50,000 35,000).
  - a) The cost to charge ratio is each hospital's inpatient operating cost to charge ratio, not to exceed 1.0.
  - b) The adjusted charges for cost outliers use a cost threshold estimate the greater of:

$$\text{Cost Threshold} = 2 \times \text{Avg. Cost for DRG}$$

Or \$35,000.

- c) Adjusted charges are calculated as follows:

$$\text{Adj Chrg} = \text{Charges} - \frac{[(\text{Charges} \times \text{Cost Ratio}) - \text{Cost Threshold}] \times 0.85}{\text{Cost Ratio}}$$

- d) If an episode is both a high day and a cost outlier, the lesser of the two adjusted charges is used in computing the relative weights and DRG prices.

---

TN NO.: 11-06

Approval Date DEC 20 2011

Effective Date: 07/01/2011

Supersedes  
TN No.: 05-10

**STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT**

State of MICHIGAN

***Policy and Methods for Establishing Rates – Inpatient Hospital***

---

- d. The adjusted cost for each episode is calculated by multiplying the adjusted charges for the episode by the inpatient operating cost to charge ratio.
  - 1) Each hospital's Title XIX operating cost to total charge ~~ratio~~ RATIO is obtained from the hospital's filed cost reports for the fiscal year ending in the second year of the base period. If the cost to charge ratio is greater than 1.0, then 1.0 is used.
  - 2) If two or more hospitals merge, and are operating as a single hospital, a cost to charge ratio for the period is computed using the combined cost report data from all hospitals involved in the merger. Cost and charge data will be inflated to a common point in time.
- e. The average cost for episodes within each DRG is calculated by dividing the sum of the costs for the episodes by the number of episodes within the DRG.
- f. The relative weight for each DRG is calculated by dividing the average cost for episodes within each DRG by the average cost per episode for all episodes. A table showing the relative weights, average lengths of stay, and outlier thresholds for each DRG is included in Appendix A.
- g. Bring all charges for discharges to the applicable time period through application of inflation and weighting factors.

Data for current wage adjustors are taken from hospital cost reporting periods ending between September 1, 2004 2006 and August 31, 2007 2008. Each hospital's wage costs are adjusted for different fiscal year end dates by multiplying the hospital's wage costs by inflation and weighting factors. All wages are brought to a common point in time. Filed wage data is used for hospitals where audited data is not available. The following adjustment factors derived from the Global Insight PPS-Type Hospital Market Basket Index, employee cost component relative to the period, are used:

Fiscal Year Ending	Wage Inflation Factors	Weighting Factors
9/30/04	1.1361	0.16
12/31/04	1.1217	0.16
3/31/05	1.1081	0.16

State of MICHIGAN

### ***Policy and Methods for Establishing Rates Inpatient Hospital***

For hospitals with cost reporting periods ending other than at the end of a quarter, the inflation update for the quarter in which the hospital "fiscal year ends is used.

#### B. DRG Price:

The episode file used for DRG price calculations is the same as the file used to set the relative weights with the following exceptions:

1. The episode file is limited to those hospitals enrolled as of a specified date.
2. HOSPITALS IDENTIFIED WITH MEDICARE CRITICAL ACCESS HOSPITAL (CAH) STATUS AS OF JULY 1, 2011 ARE GROUPED AND PAID A SINGLE DRG PRICE. THE DRG PRICE IS THE TRUNCATED MEAN OF THE HOSPITAL SPECIFIC BASE PRICES OF ALL CAHS ADJUSTED BY THE RURAL COST ADJUSTER AND BUDGET NEUTRALITY. THIS IS THE SUM OF THE PRODUCT OF THE HOSPITALS' SPECIFIC BASE PRICE TIMES DISCHARGES DIVIDED BY THE SUM OF ALL GROUP DISCHARGES. IN THE EVENT A HOSPITAL STATUS CHANGES FROM PROSPECTIVE PAYMENT SYSTEM (PPS) TO CAH STATUS, MDCH RECOGNIZES THE HOSPITAL UNDER CAH STATUS AS OF THE CMS EFFECTIVE DATE.
3. The case mix is calculated using the sum of all relative weights assigned to each hospital's claims during the base period, divided by the total number of episodes for the hospital during the same period.
4. The adjusted cost for each hospital is summed.
5. The hospital specific base price (cost per discharge for a case mix of 1.00) is computed
  - a) Divide total adjusted cost by total number of episodes
  - b) Divide average costs by the case mix.
  - c) Multiply the result by the applicable inflation and weighting factors. Costs are inflated through the rate period. Inflation factors are obtained from the 1<sup>st</sup> Quarter 2006 Data Resources, Inc. PPS – Type Hospital Market Basket Index. The following inflation and weighting factors are used:

Fiscal Year Ending	Cost Inflation Factors	Weighting Factors
09/30/00	1.1111	0.16
12/31/00	1.1002	0.16
03/31/01	1.0882	0.16

TN No.: 07-04

## STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State of MICHIGAN

### **Policy and Methods for Establishing Rates – Inpatient Hospital**

Rates will be adjusted by an inflation factor of 1.0708 1.0517 for the period from August 31, 2009-2009 to December 31, 2009. JULY 1, 2011.

5. Determine the DRG base price by:
  - a. Calculate each hospital's limited base price. This is the lesser of the hospital specific base price or the mean of all base prices, plus one standard deviation.
  - b. Calculate the statewide operating cost limitation. This is a truncated, weighted mean of all hospitals' limited base prices divided by base period discharges.
  - c. The lesser of the truncated mean or the hospital specific base price then becomes the DRG base price (before the cost adjustor and incentives are added) for each hospital.
6. Calculate any incentive. For hospitals with base DRG prices below the operating limit (truncated mean), the hospital's base DRG price is increased by adding 10% of the difference between the hospital specific base price and the limit.

Adjust each hospital's DRG base price, plus any incentive, by the updated cost adjustor. The updated cost adjustor is calculated, to reflect the most current data available, in the same manner as the base cost adjustor, except that:

1. Wage data is collected using the source described within State policy for the rate-setting period.
2. The wage and benefit inflation factors are derived from the employee cost component of the Global Insight PPS – Type Hospital Market Basket Index relative to the period.
3. In the event that changes in federal regulations result in incompatible data between the base and update periods, adjustments are made either to the base or the update period to render the data comparable.
4. A budget neutrality factor is included in the hospital price calculation. Hospital prices are reduced by the percentage necessary so that total aggregate hospital payments using the new hospital prices and DRG relative weights do not exceed the total aggregate hospital payments made using the prior hospital base period data and DRG Grouper relative weights. THE ESTIMATE IS BASED ON ONE YEAR'S PAID CLAIMS, INCLUDING MHP ENCOUNTER DATA WITH FFS RATES APPLIED. The calculated DRG prices are deflated by the percentage necessary for the total payments to equate to the amount currently paid. BUDGET NEUTRALITY FOR CAHS IS DETERMINED AS A GROUP, INDEPENDENT OF NON-CAHS.
5. FOR PAYMENT PURPOSES, A SINGLE COST TO CHARGE RATIO IS PUBLISHED ON THE MDCH WEBSITE. THE SINGLE COST TO CHARGE RATIO IS USED FOR CALCULATING PAYMENTS PAID A PERCENT OF CHARGE, COST OUTLIERS, AND LOW-DAY OUTLIERS. THE RATIO IS CALCULATED FROM THE AVERAGES OF FFS AND MHP RATIOS, NET OF IME.

---

TN NO.: 11-06

Effective Date: 07/01/2011

Supersedes

TN No.: 10-03

## STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

### State of MICHIGAN

#### ***Policy and Methods for Establishing Rates – Inpatient Hospital***

---

Readmissions for an unrelated condition, whether to the same or a different hospital, are considered separate episodes for payment purposes.

#### 7. Percent of Charge Reimbursement

The payment amount for claims that fall into DRGs 1, 2, 5, 6, 7, 8, 9, or 10 is total hospital charges times the hospital's inpatient operating cost to charge ratio excluding IME.

The ratio is the hospital's Title XIX inpatient operating cost to charge ratio as obtained from weighted filed cost reports for fiscal years ending between September 1, 2003 2007 and August 31, 2006 2009.

#### 8. Hospitals Outside of Michigan

Medical/surgical hospitals not located in Michigan are reimbursed under the DRG system. The DRG price is the statewide operating cost limit (truncated mean of base prices located in Michigan).

Hospitals that have charges that exceed \$250,000 during a single fiscal year (using the State of Michigan fiscal year – October 1<sup>st</sup> through September 30<sup>th</sup>) may be reimbursed the hospital's inpatient operating cost to charge ratio for those Michigan Medicaid DRGs reimbursed by percentage of charge. The hospitals' chief financial officer must submit and the MSA must accept documentation stating the hospital's Medicaid cost to charge ratio in the state that the hospital is located. Once accepted, the hospital's actual cost to charge ratio is applied prospectively to those DRGs and claims subject to percentage of charge reimbursement using the Michigan DRG payment system.

#### 9. New Hospitals

A new medical/surgical hospital is one for which no Michigan Medicaid program cost or paid claims data exists during the period used to establish hospital specific base rates or one which was not enrolled in the Medicaid program when hospital specific base prices/rates were last established. Hospitals that experience a change of ownership or that are created as the result of a merger are not considered new hospitals.

The DRG base price for new general hospitals is the statewide operating limit until new DRG base prices are calculated for all hospitals using data from time periods during which the new hospital provided services to Medicaid beneficiaries.

#### D. Hospitals and Units Exempt from DRG Reimbursement

##### 1. Calculating Per Diem Rates

---

TN NO.: 11-06

Approval Date: DEC 20 2011

Effective Date: 07/01/2011

Supersedes  
TN No.: 09-01

## STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State of MICHIGAN

### ***Policy and Methods for Establishing Rates – Inpatient Hospital***

---

The per diem prices are calculated in part on Medicaid and Children's Special Health Care Services FFS paid claims data taken from hospital admissions between September 1, 2004 2005 and August 31, 2008, and paid by August 2009. Per diem prices are also calculated based in part on encounter paid claims data taken from hospital admissions between September 1, 2006 and August 31, 2008, and received by August 2009.

The claim file is limited to those hospitals enrolled as of the specified date.

a) The invoice file is adjusted to:

- 1) Eliminate episodes with any Medicare charges. (For dual Medicare/Medicaid eligible beneficiaries, only claims paid a full Medicaid DRG are included);
- 2) Eliminate episodes without any charges or days.
- 3) Limit episodes to those from Michigan hospitals (provided that hospital cost report data are available).
- 4) Limit episodes to those with a valid patient
- 5) Eliminate episodes with a zero dollar Medicaid liability.

Total charges and days paid are summed by hospital.

b) The cost for each hospital is calculated by multiplying the charges for the hospital by the cost to charge ratio for the hospital.

- 1) Each hospital's operating cost to total charge ratio is obtained from weighted filed cost reports for fiscal years ending between September 1, 2005 and August 31, 2008. If the cost to charge ratio is greater than 1.00 then 1.00 is used. For distinct part rehabilitation units, this ratio is unique to the unit.
- 2) If two or more hospitals merged and are now operating as a single hospital, a cost to charge ratio is computed using the combined cost report data from all hospitals involved in the merger. Cost and charge data will be inflated to a common point in time.

The cost per day by hospital is calculated by dividing the sum of the costs by the number of days for the hospital.

c) To determine a hospital specific Per Diem base rate:

State of MICHIGAN

### ***Policy and Methods for Establishing Rates – Inpatient Hospital***

---

- 1) Multiply the cost per day by the applicable inflation factor. Each hospital's costs are inflated to a common point in time. Inflation factors were obtained from the Global Insight PPS-Type Hospital Market Basket Index relative to the period.

Fiscal Year Ending	Cost Inflation Factors	Weighting Factors
9/30/05	1.1490	0.16
12/31/05	1.1321	0.16
3/31/06	1.1170	0.16
6/30/06	1.1032	0.16
9/30/06	1.0921	0.24
12/31/06	1.0845	0.24
3/31/07	1.0766	0.24
6/30/07	1.0676	0.24
9/30/07	1.0583	0.60
12/31/07	1.0466	0.60
3/31/08	1.0327	0.60
6/30/08	1.0171	0.60
8/31/08	1.0000	0.60

~~Rates will be adjusted by an inflation factor of 1.0118 or the period from August 31, 2008 to December 31, 2009. RATES WILL BE ADJUSTED BY AN INFLATION FACTOR OF 1.0662 FOR THE PERIOD FROM AUGUST 31, 2008 TO JUNE 30, 2011.~~

The inflation update for the quarter in which the hospital's fiscal year ends is used.

- 2) Recognize area cost differences by dividing the cost per day for each hospital by an area cost adjustor factor. Hospitals are grouped by U.S. Census Core Based Statistical Area (CBSAs) as determined by the Centers for Medicare and Medicaid Services for the Medicare program for wage data. Each area cost adjustor is calculated as follows:

$$\text{COST ADJUSTOR} = 0.71066 \times \text{WAGE ADJUSTOR} + 0.28934$$

The cost adjuster formula reflects Medicare estimate of labor-related costs as a portion of total hospital costs as published in the Federal Register.

- 3) Each area wage factor is area wage per full-time equivalent (F.T.E.) divided by the statewide average hospital wage per F.T.E. Contract labor costs are included in determining a hospital's wage costs.

## STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State of MICHIGAN

### ***Policy and Methods for Establishing Rates – Inpatient Hospital***

---

To determine the per diem rate:

- Calculate the statewide operating cost limit (by provider type). This is a weighted mean of all hospital's specific base prices weighted by base period days (truncated mean), multiplied by the appropriate percentage.
  - For freestanding rehabilitation hospitals the percentages is 150%
  - The 50<sup>th</sup> percentile is determined by calculating a standardized rate for each unit. The standardized rate for all enrolled Michigan units are sorted in ascending order. The standardized rate of the first unit after the 50% of the units listed becomes the statewide 50<sup>th</sup> percentile.
  - For distinct part rehabilitation units the percentage is 200%
- Calculate the statewide operating cost minimum (by provider type). This is a truncated, weighted mean of all hospitals' specific base prices weighted by base period days multiplied by 70%.
- The per diem base rate is the lesser of:
  - The greater of the hospital specific base price or the statewide operating cost minimum, or
  - The statewide operating cost limit.

Adjust each hospital's per diem rate by the updated cost adjustor (to reflect a hospital specific per diem rate). The updated cost adjustor is calculated, to reflect the most current data available, in the same manner as the base cost adjustor, except that:

- Medicare audited wage data for hospital fiscal years ending between September 1, 2002 2004 and August 31, 2007 2008 is used.
- The wage inflation and weighting factors are derived from the employee cost component of the Global Insight PPS-Type Hospital Market Basket Index relative to the period. The same inflation and weighting factors were used here as were used for the DRG update found in Section III, B., *DRG Price*.
- In the event that changes in federal regulations result in incompatible data between the base and update periods, adjustments are made either to the base or the update period to render the data comparable.

Calculate the final per diem rate by rounding to the nearest whole dollar.

## OS Notification

**State/Title/Plan Number:** Michigan 11-006  
**Type of Action:** SPA Approval  
**Required Date for State Notification:** December 25, 2011  
**Fiscal Impact:** FY 2011 \$0  
FY 2012 \$0

**Number of Services Provided by Enhanced Coverage, Benefits or Retained Enrollment:** 0

**Number of Potential Newly Eligible People:** 0

**Eligibility Simplification:** No

**Provider Payment Increase:** No

**Delivery System Innovation:** No

**Number of People Losing Medicaid Eligibility:** No

**Reduces Benefits:** No

**Detail:** Effective for services on or after July 1, 2011, this amendment revises the methodology for setting reimbursement rates for inpatient hospital services. Michigan reimburses hospitals for inpatient hospital services based on diagnosis related groups (DRG). Specifically, this amendment makes revisions to its methodology for calculating relative weights and provides an update to its DRG grouper. There is no Federal budget impact. The amendment does impact relative weights and the DRG Grouper that go into the calculation of inpatient hospital reimbursement, however the State makes supplemental payments to hospitals to cover the gap to the upper payment limit (UPL). Subsequently, there is no overall impact on the Federal budget as a result of this amendment. There are no issues with the UPL. Funding the non-Federal share comes from State appropriations. The State met public process requirements.

**Other Considerations:** This plan amendment has not generated significant outside interest and we do not recommend the Secretary contact the governor.

**Recovery Act Impact:**

The Regional office has reviewed this state plan amendment in conjunction with the Recovery Act and, based on the available information provided by the State regarding 1) MOE; 2) local match; 3) prompt pay; 4) rainy day funds, and 5) eligible expenditures, the Regional Office believes that the State is not in violation of the Recovery Act requirements noted above.
