average case mix index and the statewide average Medicaid case mix index.

(i) The Medicaid average case mix index for each facility to be used in rate setting will be the simple average of each facility's four Medicaid case mix indices calculated for the periods of February 1 of the current year and November 1, August 1 and May 1 of the year immediately preceding the current year. The statewide average Medicaid case mix index will be the weighted average of each facility's four quarter average Medicaid case mix index to be used in rate setting.

(c) The statewide price for nursing facility services will be determined each year through a public process. Factors that could be considered in the establishment of this price include the cost of providing nursing facility services, Medicaid recipients access to nursing facility services, and the quality of nursing facility care.

(d) The total payment rate available for the period September 1, 2012 through June 30, 2013 will be the rate as computed in (2), plus any additional amount computed in ARM 37.40.311 and 37.40.361.

(3) Providers who, as of July 1 of the rate year, have not filed with the department a cost report covering a period of at least six months participation in the Medicaid program in a newly constructed facility shall have a rate set at the statewide median price of \$162:80 as computed on September 1, 2012. Following a change in provider as defined in ARM 37.40.325, the per diem rate for the new provider shall be set at the previous provider's rate, as if no change in provider had occurred.
