State Plan Amendment (SPA) #: 20-0010

1) Approval Letter

2) Approved 4.19B pages

3) CMS 179
Financial Management Group

May 8, 2020

Donna Frescatore
Medicaid Director
New York State Department of Health
One Commerce Plaza, Suite 1211
Albany, NY 12210

RE: NY-20-0010

Dear Ms. Frescatore:

We have reviewed the proposed amendment to Attachment 4.19-B of your Medicaid State plan submitted under transmittal number 20-0010. This amendment extends the Ambulatory Patient Group (APG) methodology for freestanding clinic and ambulatory surgery center services for the effective period January 1, 2020 thru December 31, 2020 and revise the APG methodology to reflect the recalculated weights with component updates.

Based upon the information provided by New York we have approved the amendment with an effective date of January 1, 2020. We are enclosing the approved CMS-179 and a copy of the new state plan pages.

If you have any additional questions or need further assistance, please contact Division of Reimbursement Review (DRR) analyst Yvette Moore at (646) 694-0915 or Yvette.moore@cms.hhs.gov

Sincerely,

Todd McMillion
Director
Division of Reimbursement Review

23. REMARKS
APG Reimbursement Methodology - Freestanding Clinics

For the purposes of sections pertaining to the Ambulatory Patient Group, and excepted as otherwise noted, the term freestanding clinics shall mean freestanding Diagnostic and Treatment Centers (D&TCs) and shall include freestanding ambulatory surgery centers.

For dates of service beginning September 1, 2009 through December 31, [2019] 2020, for freestanding Diagnostic and Treatment Center (D&TC) and ambulatory surgery center services, the operating component of rates shall be reimbursed using a methodology that is prospective and associated with resource utilization to ensure that ambulatory services are economically and efficiently provided. The methodology is based upon the Ambulatory Patient Group (APG) classification and reimbursement system. This methodology incorporates payments for the separate covered Medicaid benefits in accordance with the payment methods for these services. Reimbursement for the capital component of these rates shall be made as an add-on to the operating component as described in the APG Rate Computation section.

The Ambulatory Patient Group patient classification system is designed to explain the amount and type of resources used in an ambulatory visit by grouping patients with similar clinical characteristics and similar resource use into a specific APG. Each procedure code associated with a patient visit is assigned to an APG using the grouping logic developed by 3M Health Information Systems (3M). When evaluation and management codes are coded, the APG grouping logic also uses the diagnosis code to make the APG assignment. Ultimately, the procedures and diagnoses coded for a patient visit will result in a list of APGs that correspond on a one-for-one basis with each procedure coded for the visit.
