# 6d(8) Psychologists' Services

Services provided by a licensed psychologist are available to Medicaid-eligible recipients. Psychological counseling and services provided by a licensed psychologist are covered if the services (1) are within the psychologist's scope of practice, as defined by state law; and (2) would be covered by the Texas Medical Assistance Program when they are provided by a licensed physician (M.D. or D.O.).

Psychologists' services must be provided by a licensed psychologist enrolled in and approved for participation in the Texas Medical Assistance Program. A psychologist is defined as a person who is licensed to practice as a psychologist in the state in which the service is performed.

Services performed by a provisionally licensed psychologist (PLP) or a licensed psychological associate (LPA) are a benefit of the Texas Medical Assistance Program only when the services are provided within the PLP's or LPA's scope of practice and under the direct supervision of a licensed psychologist.

A licensed psychologist who is employed by or remunerated by a physician, hospital, facility, or other provider may not bill the Texas Medical Assistance Program directly for psychologist's services if that billing would result in duplicate payment for the same services. If the services are covered and reimbursable by the program, payment may be made to the physician, hospital, or other provider (if approved for participation and who is enrolled in the Texas Medical Assistance Program) who employs or reimburses the licensed psychologist. The basis and amount of Medicaid reimbursement depends on the service actually provided, who provided the service, and the reimbursement methodology used by the Texas Medical Assistance Program as appropriate for the service and provider(s) involved.
