December 2014

This toolkit provides information about and links to 18 existing training resources related to the competencies identified in the Direct Service Workforce Resource Center core competency set. Information is provided about how to access each training resource, the delivery mode (e.g., online, in person), the cost associated with taking the training, what topics the training addresses, and the target audience. This toolkit is intended to help LTSS program administrators, agency employers, individuals who employ their own workers, and direct service workers identify training programs and stand-alone curricula that help build staff competencies identified in the core set. The DSW RC core competency set was developed based on a comprehensive review of existing competency sets and related credentialing and apprenticeship programs, some of which are included in this toolkit. All training programs/curricula in this toolkit are for services for all adults, regardless of state, organization, or program, and are for people who work in home and community-based services (though the training program/curriculum might also apply to institutional settings).

There are 12 core competency areas into which the skill statements in the Core Competency Set have been organized. This toolkit identifies training programs and curricula that contain content addressing statements in one or more competency area. The table below indicates how many resources we identified that address each area. There are at least four and as many as 13 training resources described in this toolkit that address each broad competency area.
