Overview of the Final Rule

Center for Medicaid and CHIP Services
This final rule is the first update to Medicaid and CHIP managed care regulations in over a decade. The health care delivery landscape has changed and grown substantially since 2002.

- Today, the predominant form of service delivery in Medicaid is managed care, which are risk-based arrangements for the delivery of covered services
- The Children’s Health Insurance Program Reauthorization Act of 2009 adopted key Medicaid managed care provisions for CHIP
- Many States have expanded managed care in Medicaid to enroll new populations, including seniors and persons with disabilities who need long-term services and supports, and individuals in the new adult eligibility group
- In 1998, 12.6 million (41%) of Medicaid beneficiaries received Medicaid through capitation managed care plans
- In 2013, 45.9 million (73.5%) of Medicaid beneficiaries received Medicaid through managed care (MCOs, PIHPs, PAHPs, PCCMs)
- As of December 2015, there are 25 states with approximately 2.7 million (73%) children enrolled in managed care in separate CHIP programs
This final rule advances the agency’s mission of better care, smarter spending, and healthier people

Key Goals

• To support State efforts to advance delivery system reform and improve the quality of care

• To strengthen the beneficiary experience of care and key beneficiary protections

• To strengthen program integrity by improving accountability and transparency

• To align key Medicaid and CHIP managed care requirements with other health coverage programs
Key Dates

• Publication of Final Rule
  – On display at the **Federal Register** on April 25th
  – Will publish in the **Federal Register** May 6th

• Dates of Importance
  – Effective Date is July 5th
  – Provisions with implementation date as of July 5th
  – Phased implementation of new provisions primarily over 3 years, starting with contracts on or after July 1, 2017
  – Compliance with CHIP provisions beginning with the state fiscal year starting on or after July 1, 2018
  – Applicability dates/Relevance of some 2002 provisions
Resources

• Medicaid.gov – Landing and Managed Care Pages

  – 8 fact sheets and implementation timeframe table
  – Link to the CMS Administrator’s “Medicaid Moving Forward” blog
• ManagedCareRule@cms.hhs.gov
Goal: Delivery System Reform (DSR)

To further support state and federal delivery system reforms, the final rule:

- Provides flexibility for states to have value-based purchasing models, delivery system reform initiatives, or provider reimbursement requirements in the managed care contract
- Strengthens existing quality improvement approaches with respect to managed care plans

Examples

- Capitation Payments for Enrollees with a Short-Term Stay in an Institution for Mental Disease
- Value-Based Purchasing
Permits state to make a monthly capitation payment to the managed care plan for an enrollee, aged 21-64, that has a short term stay in an Institution of Mental Disease (IMD)
  – Short term stay: no more than 15 days within the month
  – Establishes rate setting requirements for utilization and price of covered services rendered in alternative setting of the IMD

“In lieu of services” (ILOS) are medically appropriate and cost effective alternatives to state plan services or settings
  – Establishes contractual requirements for ILOS
  – Establishes rate setting requirements for ILOS

These provisions apply as of the effective date of the final rule
Clarifies state payment-related tools for managed care plan performance

- Establishes requirements for withhold arrangements
- Retains requirements for incentive arrangements

Acknowledges that states may require managed care plans to engage in value-based purchasing initiatives

Permits states to set min/max network provider reimbursement levels for network providers that provide a particular service

Transition period for pass-through payments to hospitals, physicians and nursing facilities

These provisions apply to rating periods for contracts starting on or after July 1, 2017
Goal: Modernization and Improving Quality of Care

Recognizes advancements in State and managed care plan practices and federal oversight interests

Examples

• Network Adequacy
• Information Standards
• Quality of Care
Modernization: Network Adequacy

- States will develop and implement time and distance standards for:
  - primary care – adult and pediatric;
  - specialty care – adult and pediatric;
  - behavioral health (mental health and substance use disorder) – adult and pediatric;
  - OB/GYN; hospital; pharmacy; and
  - pediatric dental

- States will develop and implement network adequacy standards for MLTSS programs, including for providers that travel to the enrollee to render services

- Managed care plans will certify the adequacy of the networks at least annually

*Provisions apply to any rating period for contracts starting on or after July 1, 2018*
Modernization: Information Requirements

- States will operate a website that provides specific managed care information including each managed care plan’s handbook, provider directory, and formulary.
- States will develop definitions for key terms and model handbook and notice templates for use by the managed care plans.
- States and managed care plans may provide required information electronically if the information is available in paper form upon request and free of charge.

*These provisions apply to any rating period for contracts starting on or after July 1, 2017.*
Improving Quality: Quality Rating System

- States must implement a quality rating system (QRS) for Medicaid and CHIP managed care plans and to report plan performance for MCOs, PIHPs, and PAHPs

- CMS expects to implement the QRS over 5 years including:
  - A public engagement process to develop a proposed QRS framework and methodology using summary indicators adopted by the Marketplace QRS
  - Publication of the proposed QRS in the Federal Register with comment period, followed by notice of the final Medicaid and CHIP QRS

- States will have flexibility to adopt alternative QRS, with CMS approval

States must implement a QRS no later than 3 years from the date of a final notice published in the Federal Register
Improving Quality: Quality of Care

- Extends managed care quality strategy, QAPI, and external quality review (EQR) to PAHPs and to PCCM entities whose contracts include financial incentives
  - Applies 60 days after publication; see QS, QAPI and EQR applicability below
- Adds two new elements to states’ managed care quality strategies related to health disparities and long term services and supports
  - Applies July 1, 2018
- Adds new mandatory EQR activity to validate network adequacy
  - Applies no later than one year from the issuance of the EQR protocol
- Improves transparency of quality information
  - Applies no later than the rating period for contracts starting July 1, 2017 for QAPI and posting of accreditation status; applies July 1, 2018 for QS and EQR
Goal: Strengthen Beneficiary Experience

Strengthens the beneficiary experience of care and key beneficiary protections

Examples

• Enrollment Process
• Beneficiary Support System, Including Choice Counseling
• Managed Long-Term Services and Supports (MLTSS)
Enrollment

• States retain flexibility to design their enrollment processes to best meet population needs and programmatic goals

• States will be required to provide notices to explain implications of enrollees’ choices as well as all disenrollment opportunities

• Improved information content and distribution methods
  – Applies to rating periods for contracts starting on or after July 1, 2017

Supports

• Establishment of a beneficiary support system - An independent system to provide choice counseling and assist enrollees post-enrollment
  – Applies to rating periods for contracts starting on or after July 1, 2018
Rule implements elements of CMS’ May 2013 MLTSS guidance, such as
• Requires States to establish and maintain a structure for stakeholder engagement in planning and oversight of MLTSS programs
• Requires that enrollees with LTSS needs are involved in person-centered treatment and service planning
• Creates for cause disenrollment reason to another plan if institutional, employment, or residential provider leaves enrollee’s plan
• Ensures there is more accurate and timely data gathering and sharing among managed care plans and providers
  – Above apply to any rating period for contracts starting on or after July 1, 2017
• Requires transition plans when a beneficiary moves from FFS to managed care or into a new managed care plan
  – Applies to any rating period for contracts starting on or after July 1, 2018
Goal: Payment and Accountability Improvements

The final rule retains state flexibility to meet state goals and reflect local market characteristics while:

- Ensuring rigor and transparency in the rate setting process
- Clarifying and enhancing state and managed care plan expectations for program integrity

- **Examples**
  - Better defining Actuarial Soundness
  - Transparency in the Rate Setting Process and Approval
  - Program Integrity
  - Encounter Data
Establishes standards for the documentation and transparency of the rate setting process to facilitate federal review and approval of the rate certification
- Applies to any rating period for contracts starting on or after July 1, 2017

Permits states to increase or decrease the certified capitation rate by 1.5% (overall 3% range) without submission of a new rate certification
- Applies to any rating period for contracts starting on or after July 1, 2018

Requires that differences among capitation rates for covered populations must be based on valid rate development standards
- Applies to any rating period for contracts starting on or after July 1, 2017

Permits certain mid-contract year rate changes due to the application of approved risk adjustment methodologies without additional contract and rate certification approval
- Applies to any rating period for contracts starting on or after July 1, 2017
Payment and Accountability: Program Integrity

- Requires managed care plans to implement and maintain administrative and managerial procedures to prevent fraud, waste and abuse
  - Applies to rating periods for contracts starting on or after July 1, 2017
- Network providers will be screened, enrolled and revalidated as done in FFS
  - Network providers are not required to participate in the FFS program.
  - States can require managed care plans or a third party to conduct the screening process
  - Applies to rating periods for contracts starting on or after July 1, 2018
- Requires managed care contracts to address treatment of recovered overpayments by managed care plans and to take these amounts into account in the rate setting process
  - Applies to rating periods for contracts starting on or after July 1, 2017
The Affordable Care Act and this rule condition payment of FFP on timely, accurate, and complete reporting of encounter data.

For contracts starting on or after July 1, 2017, States must require that managed care plans:

- Collect and submit encounter data sufficient to identify the provider rendering the service;
- Submit all encounter data necessary for the State to meet its reporting obligation to CMS; and
- Submit encounter data in appropriate industry standard formats (i.e., ASC X12N 837, ASC X12N 835, NCPDP).
Goal: Alignment with Other Insurers

Aligns Medicaid and CHIP managed care requirements with the private market or Medicare Advantage requirements to:

• Smooth beneficiary coverage transitions
• Ease administrative burdens of managed care plans that participate across publicly-funded programs and the commercial market

Examples

• Medical Loss Ratio (MLR)
• Appeals and Grievances
Alignment: Medical Loss Ratio

• Managed care plans are required to calculate and report their MLR experience for each contract year
  – Applies to rating periods for contracts starting on or after July 1, 2017

• Actuarially sound rates are set to achieve a MLR of at least 85%
  – Applies to rating periods for contracts starting on or after July 1, 2019

• States have the flexibility to set a standard higher than 85% and/or impose a remittance requirement

• Expenditures for program integrity activities in the MLR calculation will align with a future standard adopted in the private market rules
Alignment: Appeals and Grievances

- Definitions and timeframes for resolution of appeals are generally consistent with the private market and Medicare Advantage
- Extends managed care appeals and grievance requirements to Pre-paid Ambulatory Health Plans (PAHPs)
- Managed care plans will perform one level of internal appeal for enrollees to use before proceeding to a State Fair Hearing
- States have the option to offer enrollees an external review so long as that process does not extend overall timeframes for the appeals process

*These provisions apply to rating periods for contracts starting on or after July 1, 2017*
Aligning CHIP with Medicaid

CHIP substantially aligns with Medicaid provisions related to:

- Medical loss ratio
- Information requirements
- Disenrollment
- Conflict of interest
- Continued services to enrollees
- Network adequacy
- Enrollee rights & protections
- MCO, PIHP, and PAHP standards
- Quality measurement and improvement
- External quality review
- Grievance system
- Program integrity
- Sanctions

Note: CHIP adopts the changes Medicaid finalized in these sections
Non-Aligned CHIP Provisions

Medicaid standards not applied:

• Prior approval of plan contracts
• Enrollment protections related to choice of plans (which is not required in CHIP)
• Rate-setting standards and certification
• Managed long-term services and supports
Questions
In the coming weeks, we will host in depth presentations on the following topics:

- All Times are 12:00-1:30 EST
- May 12 - Beneficiary Experience/MLTSS
- May 19 - Quality
- May 26 - Program Integrity
- June 2 - Rate Setting, DSR, and MLR
- June 9 - CHIP
Additional Questions?

Please send additional questions to the mailbox dedicated to this rule:

ManagedCareRule@cms.hhs.gov

While we cannot guarantee individualized responses, inquiries will inform future guidance and presentations.
