More information on updates to the 2023 Child and Adult Core Health Care Quality Measurement Sets is available at <https://www.medicaid.gov/medicaid/quality-of-care/performance-measurement/adult-and-child-health-care-quality-measures/adult-health-care-quality-measures/index.html>. A resource that provides a history of the measures included in the Child and Adult Core Sets is available at <https://www.medicaid.gov/medicaid/quality-of-care/downloads/core-set-history-table.pdf>.

It is important to note that these measures reflect high quality comprehensive care provided across health care providers and settings. Domains are intended to categorize measure topic areas and are not intended to define the type of providers or the health care settings in which care is provided.

\* The CMS Measures Inventory Tool (CMIT) is the repository of record for information about the measures that CMS uses to promote health care quality and quality improvement. More information is available at <https://cmit.cms.gov/cmit/>. A public access quick start guide for CMIT is available at <https://cmit.cms.gov/cmit/assets/CMIT-QuickStartPublicAccess.pdf>.

\*\* The Comprehensive Diabetes Care: Hemoglobin A1c (HbA1c) Poor Control (>9.0%) (HPC-AD) measure was modified by the measure steward into a combined measure that has two rates: HbA1C Control (<8%) and HbA1C Poor Control (>9%). The combined measure is called Hemoglobin A1c Control for Patients With Diabetes (HBD-AD).

\*\*\* The Adult Core Set includes the NCQA version of the measure, which is adapted from the CMS measure.

\*\*\*\* AHRQ is the measure steward for the survey instrument in the Adult Core Set (CMIT #152) and NCQA is the developer of the survey administration protocol.

\*\*\*\*\* This measure was added to the 2023 Adult Core Set.

<sup>a</sup> The Colorectal Cancer Screening and Breast Cancer Screening measures are also specified for Electronic Clinical Data System (ECDS) reporting for HEDIS. ECDS specifications are not currently available for Adult Core Set reporting.
