If you would like more information about the Medicaid and CHIP programs and their beneficiaries, please see the following additional resources:

- The 2020 Medicaid and CHIP Beneficiary Profile provides an overview of the characteristics, health status, access, utilization, expenditures, and experience of the beneficiaries served by Medicaid and CHIP. It is available at: [https://www.medicaid.gov/medicaid/quality-of-care/index.html](https://www.medicaid.gov/medicaid/quality-of-care/index.html)
- CMS developed the Medicaid and CHIP Scorecard to increase public transparency and accountability about the programs’ administration and outcomes. It is available at: [https://www.medicaid.gov/state-overviews/scorecard/index.html](https://www.medicaid.gov/state-overviews/scorecard/index.html)
Fast fact: Dually eligible individuals are enrolled in Medicare and Medicaid. About 71% (7,888,961) receive full benefits, and the remaining 29% (3,249,121) receive partial benefits. Full-benefit dually eligible individuals are Medicare beneficiaries who qualify for the full package of Medicaid benefits. They often separately qualify for assistance with Medicare premiums and cost sharing through the Medicare Savings Programs (MSPs). Partial-benefit dually eligible individuals are enrolled only in Medicare and an MSP. The exhibits below include only those beneficiaries with full Medicaid benefits.

Demographic Characteristics of Dually Eligible Beneficiaries, 2019

- **Sex**: 60% Female, 40% Male
- **Age 85+**: 12%
- **Ages 75-84**: 19%
- **Ages 65-74**: 31%
- **Under Age 65**: 38%

Note: Total may not sum to 100% due to rounding.
