- Adult Medicaid: 56%

**Getting Care Quickly, 2021**

**Getting Care Quickly Composite**
- Child Medicaid: 73%
- Adult Medicaid: 59%

**Parent-Reported Mental Health Status of Children (Ages 3-17), 2020**

- Currently has mental, emotional, developmental, or behavioral problem: 31%
- Currently taking or has taken medication for ADD or ADHD, autism or ASD, or difficulties with emotions, concentration, or behavior in past 12 months: 12%

**Adults Receiving Mental Health Care**

- 19% Received mental health counseling or therapy in past 12 months
- 25% Currently taking or has taken medication for emotional or mental health issues in past 12 months

**Notes:**
- To qualify as having a “mental, emotional, developmental or behavioral problem,” the child must qualify on the Children with Special Health Care Needs (CSHCN) Screener ongoing emotional, developmental or behavioral conditions criteria and/or have any of 10 conditions currently. Regularly had feelings of worry, nervousness, or anxiety (depression) is defined as: (1) feeling worried, nervous, or anxious and describing the level of those feelings as “somewhere in between a little and a lot” or “a lot,” OR (2) feeling worried, nervous, or anxious weekly and describing the level of those feelings as “a lot.”
- Children’s receipt of mental health care is defined as receiving any treatment or counseling from a mental health professional (based on parent-report). Adults’ receipt of mental health care is based on self-report.
