State Demonstrations Group

July 22, 2025

Lisa Lee Commissioner, Department for Medicaid Services Cabinet for Health and Family Services 275 East Main Street Frankfort, KY 40601

Dear Commissioner Lee:

The Centers for Medicare & Medicaid Services (CMS) accepts the Reentry and Serious Mental Illness (SMI) or Serious Emotional Disturbance (SED) Monitoring Protocols, which were required by the Special Terms and Conditions (STC), specifically, STC #57 "Monitoring Protocol" of Kentucky's section 1115 demonstration, "TEAMKY Section 1115 Demonstration" (Project No: 11-W00306/4 and 21-W00067/4), effective through December 31, 2029. As noted in CMS's letter to the state on June 25, 2025, CMS is redesigning its demonstration monitoring approach to reduce state burden, promote effective and efficient information sharing, and enhance CMS's oversight of program integrity by reducing variation in information reported to CMS. As part of this redesign, CMS no longer requires the submission of Monitoring Protocols, as the relevant information will now be submitted as part of the Annual Monitoring Report. Therefore, CMS accepts the state's submissions from November 27, 2024 and May 12, 2025. CMS appreciates the state's commitment to monitoring expectations outlined in the STCs and will use the submitted Monitoring Protocols to support the state's transition to Monitoring Redesign.

The Monitoring Protocols will be posted to Medicaid.gov under the demonstration's administrative record. In accordance with STC #110, the approved Reentry and SMI/SED Monitoring Protocols may now be posted to your state's Medicaid website.

We look forward to our continued partnership on Kentucky's TEAMKY Section 1115 Demonstration. If you have any questions, please contact your CMS demonstration team.

Sincerely,

DANIELLE Digitally signed by DANIELLE DALY -S
Date: 2025.07.22

Overview

Kentucky's Reentry 1115 Demonstration Special Terms and Conditions was approved on July 2, 2024. The Commonwealth is required to submit a monitoring protocol by November 29, 2024 and subsequent quarterly/annual monitoring reports. These reports shall include the administration of screenings to identify individuals eligible for pre-release services; participation in Medicaid (including the Children's Health Insurance Program) among carceral providers; utilization of applicable pre-release and post-release services; the provision of health or social service referrals pre-release; participants with established care plans at release; and the take-up of data system enhancements among participating carceral settings. Kentucky and all state agencies will also be required to work with the Centers for Medicare & Medicaid Services (CMS) to identify outcome metrics related to health equity when the CMS guidance is issued.

Quantitative Methods

The quantitative monitoring protocol outlines specific performance metrics and indicators for each milestone, providing a robust framework to evaluate the Reentry 1115 Demonstration's implementation and outcomes. The performance metrics include: metric details, indicators, data sources, and how to use the metrics for monitoring and outcome improvement.

Milestone 1: Increasing coverage and ensuring continuity of coverage for individuals who are incarcerated

1.1. Suspension Strategy: Implement a state policy for a suspension strategy during incarceration (or implement an alternative proposal to ensure only allowable benefits are covered and paid for during incarceration, while ensuring coverage and payment of full benefits as soon as possible upon release), with up to a two-year glide path to fully effectuate.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|---|--|---|
| 1.1.1. Coverage Suspension Implementation Rate – Individuals Percentage of Medicaid-eligible incarcerated individuals at Kentucky correctional facilities whose coverage has been suspended (instead of terminated) during incarceration, with a state policy to ensure reinstatement upon release. | Number of individuals with suspended (rather than terminated) Medicaid coverage during incarceration. | Kentucky Medicaid Management Information System (MMIS); Department of Corrections (DOC) and Department of Juvenile Justice (DJJ) facility records. | High suspension rates indicate successful policy implementation. Low rates may signal the need for additional training for facility staff or adjustments in system processes. This data will guide improvements in suspension implementation to ensure continuity of coverage post-release. |
| 1.1.2. Coverage Suspension Implementation Rate – Facilities Percentage of correctional facilities defined as "14 Kentucky state prisons and six Youth Development Centers (YDCs)" that have implemented a Medicaid suspension policy allowing for suspension of benefits rather than termination during incarceration. | Number of facilities with a suspension policy/total number of participating facilities. Compare incarceration intake date to Medicaid eligibility suspension date (to measure the efficiency of data sharing and subsequent updates). | DMS reports; DOC and DJJ facility policy documents. | Use data to assess which facilities have successfully implemented the suspension strategy. Identify facilities not yet compliant and provide additional guidance or training to ensure full implementation. |

1.1. Suspension Strategy: Implement a state policy for a suspension strategy during incarceration (or implement an alternative proposal to ensure only allowable benefits are covered and paid for during incarceration, while ensuring coverage and payment of full benefits as soon as possible upon release), with up to a two-year glide path to fully effectuate.

| Metric Details | Indicator(s) | LIDTO SOURCOLCI | Use of Metric to Monitor Progress & Improve |
|----------------|--------------|-----------------|---|
| Wether Details | marcator(3) | Data Source(s) | Outcomes |

1.2. Medicaid Application Assistance: Ensure any Medicaid-eligible person who is incarcerated at a participating facility but not yet enrolled is afforded the opportunity to apply for Medicaid in the most feasible and efficient manner and is offered assistance with the Medicaid application process in accordance with 42 Code of Federal Regulations (CFR) § 435.906 and § 435.908. This could include applications online, by telephone, in person, via mail or common electronic means in accordance with 42 CFR § 435.907. All individuals enrolled in Medicaid during their incarceration must be provided notice of any Medicaid eligibility determinations and actions pursuant to 42 CFR § 435.917 and § 431.211.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|---|--|---|
| 1.2.1. Medicaid Application Assistance Provision Rate Percentage of Medicaid-eligible incarcerated individuals who were not previously enrolled and received assistance in applying for Medicaid. | Number of individuals receiving assistance/total number of eligible individuals (= total offered <minus> the total refused) *reasons for refusal.</minus> | MMIS claims and eligibility; DOC and DJJ facility intake and case management records; Medicaid application logs. | Monitor the reach and effectiveness of Medicaid application support programs. Identify gaps in application assistance and adjust staffing, procedures, or communication strategies. If assistance provision is low, bolster support services or introduce more efficient application processes to ensure all eligible individuals have the opportunity to enroll. Locate patterns for future process enhancements. |

1.3. Medicaid Renewal and Redetermination: Ensure all individuals at a participating facility who were enrolled in Medicaid prior to their incarceration are offered assistance with the Medicaid renewal or redetermination process requirements in accordance with 42 CFR § 435.908 and § 435.916. All individuals enrolled in Medicaid during their incarceration must be provided notice of any Medicaid eligibility determinations and actions pursuant to 42 CFR § 435.917 and § 431.211.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|---|------------------------------------|--|
| 1.3.1. Medicaid Renewal/Redetermination Assistance | Number of individuals receiving | DOC and DJJ | Low assistance rates may point to process |
| Rate Percentage of Medicaid-enrolled individuals at | renewal assistance/total number of eligible individuals due for | facility and case management | barriers or resource gaps. Addressing these issues with more caseworker support or |
| participating facilities who were offered assistance with Medicaid renewal or redetermination before release. | | records; MMIS eligibility records. | streamlined renewal systems will ensure |

1.3. Medicaid Renewal and Redetermination: Ensure all individuals at a participating facility who were enrolled in Medicaid prior to their incarceration are offered assistance with the Medicaid renewal or redetermination process requirements in accordance with 42 CFR § 435.908 and § 435.916. All individuals enrolled in Medicaid during their incarceration must be provided notice of any Medicaid eligibility determinations and actions pursuant to 42 CFR § 435.917 and § 431.211.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|----------------|--------------|----------------|---|
| | | | disruptions in health care access upon release. Track the provision of renewal assistance to ensure continuity of coverage. Address barriers to the renewal process and enhance support services. |

1.4. Medicaid Cards and Documentation: Implement a state requirement to ensure all Medicaid-enrolled individuals who are incarcerated at a participating facility have Medicaid and/or managed care plan cards or some other Medicaid and/or managed care enrollment documentation (e.g., identification number, digital documentation, instructions on how to print a card, etc.) provided to the individual upon release, along with information on how to use their coverage (coordinated with the requirements under milestone #3 below).

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|--------------------------------|---|--|
| 1.4.1. Provision of Medicaid Enrollment | Number of individuals provided | Correctional | Identify whether individuals consistently |
| Documentation at Release Percentage of Medicaid-enrolled individuals who received Medicaid or managed care documentation (e.g., ID card, digital instructions, enrollment details) upon release. | | facility discharge checklists, participant surveys. | receive the necessary documentation to access their benefits immediately upon release. • Address documentation gaps by adjusting discharge processes or training staff on distribution protocols. |

1.5. Medicaid Application Assistance for Another State: Establish processes to allow and assist all individuals who are incarcerated at a participating facility to access and complete a Medicaid application, including providing information about where to complete the Medicaid application for another state, e.g., relevant state Medicaid agency website, if the individual will be moving to a different state upon release.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|-----------------------------|---|---|
| Percentage of individuals who, upon release, are moving to a different state and received information or | total number of individuals | Case management records; discharge | If rates of interstate assistance are low, enhance training for case managers on assisting with out-of-state applications and provide clearer access to other state Medicaid resources. |

1.5. Medicaid Application Assistance for Another State: Establish processes to allow and assist all individuals who are incarcerated at a participating facility to access and complete a Medicaid application, including providing information about where to complete the Medicaid application for another state, e.g., relevant state Medicaid agency website, if the individual will be moving to a different state upon release.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|----------------|--------------|----------------|--|
| | | planning | This will help improve continuity of care for |
| | | documentation. | those relocating. |

Milestone 2: Covering and ensuring access to the minimum set of pre-release services for individuals who are incarcerated to improve care transitions upon return to the community

2.1. Individuals who Qualify for Pre-Release Services: Implement state processes to identify individuals who are incarcerated who qualify for pre-release services under the state's proposed demonstration design (e.g., by chronic condition, incarceration in a participating facility, etc.).

| ervices under the state's proposed demonstration design (e.g., by chronic condition, incarceration in a participating facility, etc.). | | | | | |
|---|--|--|---|--|--|
| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes | | |
| 2.1.1. Identification Rate of Eligible Individuals for Pre-Release Services Percentage of incarcerated individuals identified as eligible for pre-release services based on chronic conditions, facility participation, and other qualifying factors. | Number of individuals screened/total number of incarcerated individuals. | Screening logs; DOC and DJJ facility intake records; MMIS eligibility. | High identification rates show effective processes for targeting pre-release services. Low rates may indicate issues in eligibility criteria application or data sharing. Improving identification rates can ensure a larger portion of eligible individuals receives timely support for reentry. Evaluate the comprehensiveness of the screening process to ensure all eligible individuals are identified. Refine screening protocols and expand criteria to capture more eligible individuals. | | |

2.2. Coverage and Access to Pre-Release Service Package: Cover and ensure access to the minimum short-term, pre-release benefit package, including case management to assess and address physical and behavioral health needs and health-related social needs (HRSN), medication-assisted treatment (MAT) services for all types of substance use disorder (SUD) as clinically appropriate with accompanying counseling, and a 30-day supply of medication (as clinically appropriate based on the medication dispensed and the indication) provided to the beneficiary immediately upon release, to Medicaid-eligible individuals identified as participating in the Reentry Section 1115 Demonstration Opportunity. In addition, the state should specify any additional services that the state proposes to cover for beneficiaries prerelease. The state should describe the Medicaid benefit category or authority for each proposed service. Develop state process to ensure case managers have knowledge of community-based providers in communities where individuals will be returning upon release or have the skills and resources to inform themselves about such providers for communities with which they are unfamiliar.

| Metric Details | Ind | licator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|-----|----------------------------|-------------------|--|
| 2.2.1. Pre-Release Case Management Coverage Rate | • | Number of eligible | DOC and DJJ | Assess the engagement participation level |
| Percentage of identified eligible individuals who | | individuals receiving pre- | facility case | in case management to address health |
| received case management services to assess and | | release case management/ | management | needs and improve care planning. |
| address physical and behavioral health needs and HRSN. | | total number of eligible | records; service | |
| | | individuals. | utilization data. | |

2.2. Coverage and Access to Pre-Release Service Package: Cover and ensure access to the minimum short-term, pre-release benefit package, including case management to assess and address physical and behavioral health needs and health-related social needs (HRSN), medication-assisted treatment (MAT) services for all types of substance use disorder (SUD) as clinically appropriate with accompanying counseling, and a 30-day supply of medication (as clinically appropriate based on the medication dispensed and the indication) provided to the beneficiary immediately upon release, to Medicaid-eligible individuals identified as participating in the Reentry Section 1115 Demonstration Opportunity. In addition, the state should specify any additional services that the state proposes to cover for beneficiaries prerelease. The state should describe the Medicaid benefit category or authority for each proposed service. Develop state process to ensure case managers have knowledge of community-based providers in communities where individuals will be returning upon release or have the skills and resources to inform themselves about such providers for communities with which they are unfamiliar.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|---|---|---|
| | Number of individuals decline/refuse case management/total number of eligible individuals. | | Use data to adjust case management approaches and enhance engagement participation strategies. Low case management coverage may highlight resource limitations or coordination issues. Address these by reallocating case manager resources or enhancing communication between facilities and case managers to ensure comprehensive support. |
| 2.2.2. Access to MAT Services Percentage of eligible individuals with a SUD diagnosis who received MAT services with accompanying counseling 60 days prior to release, as clinically appropriate. | Number of eligible individuals with SUD receiving MAT and counseling pre-release/ total number of eligible individuals to receive MAT services. Number of individuals decline/refuse MAT/total number of eligible individuals. | Correctional facility health records; MAT provider logs. | Track the provision of MAT to ensure it is accessible to all who need it. Identify barriers to MAT uptake, such as facility constraints or participant reluctance, and implement targeted interventions. If access to MAT is low, evaluate barriers, such as staffing, medication availability, or policy limitations. Address these issues to enhance the availability of essential SUD services, which are critical for successful reentry and reducing relapse rates. |
| 2.2.3. Provision of 30-Day Medication Supply at Release | Number of individuals receiving 30-day medication supply upon release/total number of eligible individuals. | Correctional facility pharmacy records; discharge logs. | Ensure continuity of care by providing necessary medications at the point of release. |

2.2. Coverage and Access to Pre-Release Service Package: Cover and ensure access to the minimum short-term, pre-release benefit package, including case management to assess and address physical and behavioral health needs and health-related social needs (HRSN), medication-assisted treatment (MAT) services for all types of substance use disorder (SUD) as clinically appropriate with accompanying counseling, and a 30-day supply of medication (as clinically appropriate based on the medication dispensed and the indication) provided to the beneficiary immediately upon release, to Medicaid-eligible individuals identified as participating in the Reentry Section 1115 Demonstration Opportunity. In addition, the state should specify any additional services that the state proposes to cover for beneficiaries prerelease. The state should describe the Medicaid benefit category or authority for each proposed service. Develop state process to ensure case managers have knowledge of community-based providers in communities where individuals will be returning upon release or have the skills and resources to inform themselves about such providers for communities with which they are unfamiliar.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|---|--|--|
| Percentage of individuals with conditions or ongoing treatment needs who received a 30-day supply of prescribed medication upon release. | | | Address supply chain issues or policy barriers that may prevent timely provision of medications. Low rates of medication provision may suggest gaps in discharge planning or medication stock. Enhance coordination between facility pharmacies and case managers to ensure timely access to necessary medications for continuity of care. |
| 2.2.4. Utilization Rate of Pre-Release Benefit Package Percentage of individuals eligible for the pre-release benefit package who access at least one of the covered services, such as case management, MAT, or medication. | Number of eligible individuals utilizing at least one pre-release service/total number of eligible individuals. | DOC and DJJ facility and records; MMIS; case management logs. | Low utilization may indicate barriers in accessing services, such as lack of awareness or logistical issues. Opportunity to address issues by improving service outreach and logistical support to ensure more eligible individuals benefit from available pre-release services. |
| 2.2.5. Rate of Follow-Up Contact with Community Providers within 30 Days Post-Release Percentage of individuals who have a scheduled appointment or follow-up with a community-based health care or support provider within 30 days of release. | Number of individuals with post- release follow-up scheduled and completed/total number of eligible individuals. | Case management follow-up records; community provider logs. | Low follow-up rates may indicate issues in connecting individuals to post-release care. Opportunity to address issues by improving the discharge planning process and fostering partnerships with community providers to facilitate timely follow-ups and improve continuity of care. |

2.3. Case Managers Knowledge of Community-Based Providers in Communities: Develop state process to ensure case managers have knowledge of community-based providers in communities where individuals will be returning upon release or have the skills and resources to inform themselves about such providers for communities with which they are unfamiliar.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|--|--|--|
| 2.3.1. Community Provider Knowledge and Referral Capacity of Case Managers Percentage of case managers who demonstrate knowledge of and ability to refer individuals to community-based providers in the areas where reentering individuals will reside. | Number of case managers able to provide appropriate community provider referrals/total number of case managers assessed. | Case manager training records; referral logs; case manager knowledge assessments. | Evaluate case manager preparedness to support post-release transitions. Use findings to guide additional training or resource updates to enhance community knowledge. If case managers struggle with referrals, enhance training programs on community resource mapping or build stronger connections with local health and social service providers. This will improve the continuity of care and integration into community services. Possible need to develop/enhance system (automated or manual) to capture community-based referrals (name, location, service offering, etc.) |
| 2.3.2. Pre-Release Health Education Completion Rate Percentage of individuals completing health education sessions aimed at preparing them for managing their health post-release. | Number of individuals completing education sessions/ total number of eligible individuals. | Correctional facility education logs, participant feedback. | Monitor the reach and effectiveness of health education initiatives. Use participant feedback to tailor educational content and access to better meet their needs. |

Milestone 3: Promoting continuity of care

3.1. Care Plans for Incarcerated Individuals: Implement a state requirement that individuals who are incarcerated receive a person-centered care plan prior to release to address any physical and behavioral health needs, as well as HRSN and consideration for long-term services and supports (LTSS) needs that should be coordinated post-release, that were identified as part of pre-release case management activities and the development of the person-centered care plan.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|--|---|--|
| 3.1.1. Person-Centered Care Plan Completion Rate Percentage of incarcerated individuals who received a person-centered care plan addressing physical and behavioral health, HRSN, and LTSS prior to release. | Number of eligible individuals with a completed personcentered care plan/total number of eligible individuals. | Case management records; Care Plan documentation; DOC and DJJ facility discharge documentation. | Monitor care plan development to ensure it aligns with identified needs and is completed on time. Use data to refine care planning processes and enhance case manager training. High completion rates indicate effective care planning. Low rates may reveal resource or process gaps; addressing these can help ensure every individual has a personalized care plan to guide post-release support. |

3.2. Timely Access to Post-Release Services: Implement state policies to provide or facilitate timely access to any post-release health care items and services, including fills or refills of prescribed medications and medical supplies, equipment, appliances or additional exams, laboratory tests, diagnostic, family planning, or other services needed to address the physical and behavioral health care needs, as identified in the course of case management and the development of the person-centered care plan.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|--|---|--|
| 3.2.1. Timely Access to Post-Release Health Care Services Percentage of individuals who received timely access (within seven days of release) to prescribed medications, medical supplies, equipment, or other essential health services identified in their care plan. | essential services within seven days post-release/total number | Pharmacy records; MMIS claims; medical provider follow- up logs; case management records. | Low rates of timely access indicate potential delays in service delivery. Addressing barriers such as coordination issues, supply shortages, or appointment scheduling can improve continuity of care. |

3.2. Timely Access to Post-Release Services: Implement state policies to provide or facilitate timely access to any post-release health care items and services, including fills or refills of prescribed medications and medical supplies, equipment, appliances or additional exams, laboratory tests, diagnostic, family planning, or other services needed to address the physical and behavioral health care needs, as identified in the course of case management and the development of the person-centered care plan.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|--|---|---|
| 3.2.2. Prescription Refill Adherence Rate Post-Release Percentage of individuals who refill their prescriptions, as recommended, within the first 30 days refill period post-release. | Number of prescription refills completed/total number of eligible prescriptions. | Pharmacy records; MMIS claims; medical provider follow- up logs; case management records. | Monitor adherence to prescribed medication regimens to ensure continuity of care. Use findings to implement interventions for individuals with low adherence, such as medication management support. |

3.3. Data Exchange Process and Managed Care Organization (MCO) Contract Requirements: Implement state processes to ensure, if applicable, that managed care plan contracts reflect clear requirements and processes for transfer of the member's relevant health information for purposes of continuity of care (e.g., active prior authorizations, care management information or other information) to another managed care plan or, if applicable, state Medicaid agency (e.g., if the beneficiary is moving to a region of the state served by a different managed care plan or to another state after release) to ensure continuity of coverage and care upon release (coordinated with the requirements under milestone #1 above).

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|--|---|---|
| 3.3.1. Transfer of Health Information to Post-Release Managed Care Plans Percentage of successful data transfers of health information (e.g., active prior authorizations, care management notes) between pre-release and post-release providers. | Number of successful health data transfers for continuity of care/total number of transfers attempted. | Managed care data transfer logs (i.e., electronic health record), provider feedback. | Monitor health data sharing effectiveness to ensure providers have the necessary information for continuity of care. Address any gaps in health data transfer processes to improve provider collaboration. Low health information transfer rates highlight gaps in data-sharing protocols. Strengthen processes between facilities, MCOs, and Medicaid to improve information flow and support continuous care for reentering individuals. |

3.4. Case Manager Coordination with Pre-Release Service Providers and Community-Based Service Providers: Implement state processes to ensure case managers coordinate with providers of prerelease services and community-based providers, if they are different providers. Implement a state policy to require case managers to facilitate connections to community based providers pre-release for timely access to services upon reentry in order to provide continuity of care and seamless transitions without administratively burdening the beneficiary (e.g., identifying providers of post-release services, making appointments, having discussions with the post-release case manager, if different, to facilitate a warm handoff and continuity of services). A simple referral is not sufficient. Warm hand-offs to a post-release case manager and follow-up are expected, consistent with guidance language in the case management section.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|--|---|---|
| 3.4.1. Pre-Release Community Provider Connection Rate Percentage of individuals connected with a community- based provider before release to ensure access to services upon reentry. 3.4.2. Warm Hand-Off Success Rate | Number of individuals with documented community provider connections prerelease/total number of eligible individuals. Number of individuals receiving | Case management records; discharge planning documents. Case | Low connection rates may indicate that case managers lack adequate information on community resources. Enhance training and resource databases for case managers to facilitate more effective provider connections pre-release. • Assess the effectiveness of care transitions |
| Percentage of individuals who received a "warm hand-off" to a post-release case manager or community-based provider, including direct coordination between pre-release and post-release case managers. | a warm hand-off/total number of individuals released. | management records; communication logs between pre-release and post-release managers. | to ensure seamless continuity. Improve communication, coordination, and reporting protocols to enhance warm handoff success rates. If warm hand-offs are not consistently occurring, evaluate case manager protocols and communication tools. Enhancing collaboration and communication practices can ensure smoother transitions and better post-release engagement. |
| 3.4.3. Follow-Up Appointment Adherence Rate within | Number of individuals attending | Community | Low adherence rates may indicate challenges in |
| First 30 Days Post-Release Percentage of individuals who attended at least one follow-up appointment with a community-based provider within 30 days of release. | follow-up appointments within 30 days post-release/total number of eligible individuals. | provider records; case management follow-up logs. | accessing or attending appointments. Address transportation, scheduling, or other logistical barriers to improve follow-up rates and continuity of care. |
| 3.4.4. Case Manager Coordination with Pre- and Post- | Number of cases with | Case | Low coordination rates suggest a need for |
| Release Providers Percentage of cases where the pre-release case manager coordinated with post-release providers or case managers, including exchanging care plans, discussing the individual's needs, and aligning follow-up. | documented pre- and post- release case manager/provider coordination/total number of eligible individuals. | management records; meeting and coordination logs. | stronger protocols or better communication tools for case managers. Addressing these issues will facilitate a seamless transition and ensure continuity of care for reentering individuals. |

3.4. Case Manager Coordination with Pre-Release Service Providers and Community-Based Service Providers: Implement state processes to ensure case managers coordinate with providers of prerelease services and community-based providers, if they are different providers. Implement a state policy to require case managers to facilitate connections to community based providers pre-release for timely access to services upon reentry in order to provide continuity of care and seamless transitions without administratively burdening the beneficiary (e.g., identifying providers of post-release services, making appointments, having discussions with the post-release case manager, if different, to facilitate a warm handoff and continuity of services). A simple referral is not sufficient. Warm hand-offs to a post-release case manager and follow-up are expected, consistent with guidance language in the case management section.

| | Length of time an individual | | |
| | maintains connection with case | | |
| | manager for case management | | |
| | services. | | |
| | | | |
| | Number of individuals who | | |
| | maintain connection with case | | |
| | manager for case management | | |
| | services at 3, 6, 9, and 12 | | |
| | months/total number of eligible | | |
| | individuals. | | |

Milestone 4: Connecting to services available post-release to meet the needs of the reentering population

4.1. Systems to Monitor Individuals and Care Plans to Ensure Timely Delivery of Post-Release Services: Develop state systems to monitor individuals who are incarcerated and their person-centered care plans to ensure that post-release services are delivered within an appropriate timeframe. We expect this generally will include a scheduled contact between the reentering individual and the case managers that occurs within one to two days post-release and a second appointment that occurs within one week of release to ensure continuity of care and seamless transition to monitor progress and care plan implementation. These short-term follow-ups should include the pre-release and post release (if different) case managers, as possible, to ensure longer term post-release case management is as seamless as possible. In keeping with the person-centered care plan and individual needs, CMS is providing these general timeframes as suggestions, but recognizes that depending on the beneficiary's individualized needs and risk factors, a case manager may determine that the first scheduled contact with the beneficiary should occur, for example, within the first 24 hours after release and on a more frequent cadence in order to advance the goals of this demonstration.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|---|--|--|
| 4.1.1. Timeliness of Initial Post-Release Contact Percentage of reentering individuals contacted by a case manager within one to two days post-release. | Number of individuals receiving first contact within specified time/total number of released individuals. | Case management records/logs; tracking system. | Ensure timely follow-up to address immediate needs and support continuity of care. Use data to adjust contact protocols and improve support strategies for high-risk individuals. Identify delays in initial contact. If rates fall below target, evaluate staffing levels, case manager schedules, or logistical issues impacting responsiveness. Increase support or adjust protocols to improve prompt follow-ups. |

4.2. Processes to Monitor Case Management Activities for Individual Transition to Community and Continuity of Care Post-Release: Develop state processes to monitor and ensure ongoing case management to ensure successful transitions to the community and continuity of care post-release, to provide an assessment, monitor the person-centered care plan implementation and to adjust it, as needed, and to ensure scheduling and receipt of needed covered services.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|----------------------------|----------------|--|
| 4.2.1. Continuity of Care with Pre- and Post-Release | Number of cases where both | Case | Evaluate the level of hand-off continuity. If low |
| Case Managers | pre- and post-release case | management | continuity is noted, establish joint case |

4.2. Processes to Monitor Case Management Activities for Individual Transition to Community and Continuity of Care Post-Release: Develop state processes to monitor and ensure ongoing case management to ensure successful transitions to the community and continuity of care post-release, to provide an assessment, monitor the person-centered care plan implementation and to adjust it, as needed, and to ensure scheduling and receipt of needed covered services.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|-----------------------------------|------------------|--|
| Track the frequency of pre- and post-release case | managers are present in first two | coordination | management protocols or cross-training to |
| manager participation in initial and secondary follow- | follow-up contacts/total number | reports; follow- | ensure smoother transitions and better |
| ups with reentering individuals. | of released individuals. | up session logs. | engagement post-release. |
| 4.2.2. Completion Rate of Scheduled Follow-Up | Number of individuals with | Case | Highlight potential barriers to follow-up (e.g., |
| Appointments | completed follow-up | management | transportation, scheduling conflicts). If |
| Percentage of scheduled follow-up appointments | appointments within specified | records; | completion rates are low, address identified |
| completed within the first week and month post- | timeframes/total number of | individual | issues by arranging alternative follow-up |
| release. | released individuals. | contact logs. | methods (e.g., telehealth, mobile units) to |
| | | | ensure regular contact. |

4.3. Processes for Individuals' Access to Services to Address LTSS and HRSN: Develop state processes to ensure that individuals who are receiving services through the Reentry Section 1115 Demonstration Opportunity are connected to other services needed to address LTSS and HRSN, such as housing, employment support, and other social supports as identified in the development of the person-centered care plan.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|--|--|--|
| 4.3.1. Referral Success Rate for LTSS and HRSN Percentage of individuals successfully connected to housing, employment, or other social services as outlined in their person-centered care plan. | Number of referrals made to individual for needed LTSS and HRSN services within 30 days of release/total number of referrals. Number of individuals connected to services/total number of eligible individuals. | Case management records; LTSS and HRSN service provider reports. | services and refine referral processes. |

4.4. Policies to Monitor Case Managers' Response to Individuals: Implement state policies to monitor and ensure that case managers have the necessary time needed to respond effectively to individuals who are incarcerated who will likely have a high need for assistance with navigating the transition into the community.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|--|--|--|
| 4.4.1. Adjustment Rate of Person-Centered Care Plans Percentage of care plans adjusted to reflect changing needs or risk factors post-release. | Rate of care plan reviewed and/or adjustments within the first 30 days post-release/total number of active care plans. | Facility policy, case management records, care plan tracking data. | Monitor the adaptability of care plans to meet ongoing needs. Ensure case managers are responsive to evolving participant circumstances. Determine responsiveness of case managers to evolving client needs. Provide additional training if needed for case managers to recognize when to adapt care plans. |
| 4.4.2. Case Manager Responsiveness and Workload | Average caseload size and hours | Case manager | Ensure case managers have adequate time to |
| Balance | per case/best practice caseload | schedules; | assist high-need individuals. If caseloads are |
| Average caseload size and time allocated per individual | size and hours per case. | workload | high, consider hiring additional staff or |
| for case managers working with reentering individuals. | | assessments. | reallocating resources to improve service quality and responsiveness. |
| 4.4.3. Individual's Satisfaction with Transition Support | Number of individuals rating | Individual's | Identify areas where Individuals feel |
| Measure individual-reported satisfaction with the | services as satisfactory or | satisfaction | underserved. Low satisfaction ratings may |
| support received during reentry. | higher/total number of eligible | surveys | indicate areas for protocol adjustments, |
| | individuals who actually took the | administered at | improved communication, or increased support |
| | survey. | intervals post- | options to enhance overall satisfaction and |
| | | release (e.g., one | reentry success. |
| | | month, three | |
| | | months). | |

Milestone 5: Ensuring cross-system collaboration

5.1. Readiness Assessment Process: Establish an assessment outlining how the state's Medicaid agency and participating correctional system/s will confirm they are ready to ensure the provision of pre-release services to eligible beneficiaries, including but not limited to, how facilities participating in the Reentry Section 1115 Demonstration Opportunity will facilitate access into the correctional facilities for community health care providers, including case managers, in person and/or via telehealth, as appropriate. A state could phase in implementation of pre-release services based on the readiness of various participating facilities and/or systems.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|--|--|---|
| 5.1.1. Facility Readiness Assessment Completion Rate Percentage of participating correctional facilities that have completed a readiness assessment to provide prerelease services, including ensuring access for community health care providers and case managers. | Number of facilities with completed readiness assessments/total number of eligible facilities. | Readiness assessment reports from facilities. | Monitor facility readiness to deliver prerelease services effectively. Use findings to phase in implementation based on readiness and provide targeted support to less-prepared facilities. Identifies which facilities are ready to implement pre-release services and where gaps exist. Facilities not meeting readiness standards may require additional support, such as resource allocation or training, to facilitate access for pre-release services. |

5.2. Engagement, Coordination, and Communication Among Key Stakeholders: Develop a plan for organizational level engagement, coordination, and communication between the corrections systems, community supervision entities, health care providers and provider organizations, state Medicaid agencies, and supported employment and supported housing agencies or organizations.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|--|--|---|
| 5.2.1. Community Provider Access Rate in Correctional Facilities Percentage of participating facilities that have implemented policies allowing access to community health care providers (in person or via telehealth) for eligible beneficiaries while incarcerated. | community provider access/total number of eligible facilities. | Facility policies; access logs; telehealth system usage reports. | Track engagement and collaboration levels among key agencies. Identify gaps in participation and address barriers to improve coordination. Low access rates suggest barriers for providers entering facilities. Address logistical or policy barriers to improve provider access, which is essential |

5.2. Engagement, Coordination, and Communication Among Key Stakeholders: Develop a plan for organizational level engagement, coordination, and communication between the corrections systems, community supervision entities, health care providers and provider organizations, state Medicaid agencies, and supported employment and supported housing agencies or organizations.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|---|---|--|
| | | | for delivering pre-release services effectively. |
| 5.2.2. Cross-System Coordination Plan Implementation Rate Percentage of facilities and agencies (e.g., corrections, Department for Medicaid Services (DMS), community health providers, housing and employment agencies) with an active cross-system coordination and communication plan. | Number of facilities with implemented coordination plans/total number of eligible facilities and relevant agencies. | Signed agreements; documented coordination plans. | Helps identify gaps in cross-agency collaboration. If coordination rates are low, focus on establishing formal agreements and communication strategies among agencies to ensure all entities are engaged and aligned in supporting reentering individuals. |

5.3. Awareness and Education Among Key Stakeholders: Develop strategies to improve awareness and education about Medicaid coverage and health care access among various stakeholders, including individuals who are incarcerated, community supervision agencies, corrections institutions, health care providers, and relevant community organizations (including community organizations serving the reentering population).

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|-----------------------------------|-------------------|--|
| 5.3.1. Medicaid and Health Care Education | Number of sessions held per | Training and | Monitor the quantity, reach, and effectiveness |
| Sessions/Trainings Conducted | quarter (to help measure access | education | of training initiatives. |
| Number of educational sessions/trainings conducted to | to sessions). | session records; | Use participant feedback to refine training |
| increase awareness and understanding of Medicaid and | | attendance logs. | content and enhance partner understanding. |
| health care access among stakeholders, including | Number of stakeholders trained/ | | Tracks outreach and education efforts. Low |
| incarcerated individuals, corrections staff, and | total number of stakeholders | | session numbers may indicate the need for |
| community organizations. | identified for training. | | increased frequency or expansion of outreach to |
| | | | ensure all stakeholders are knowledgeable |
| | | | about Medicaid access and health services |
| | | | available to reentering individuals. |
| 5.3.2. Stakeholder Satisfaction with Cross-System | Number of stakeholders satisfied | | • Low satisfaction rates signal potential issues |
| Collaboration | or very satisfied/total number of | annual surveys of | in communication or process alignment. |
| Percentage of participating stakeholders (e.g., DMS, | stakeholders surveyed. | stakeholders. | Address feedback by refining collaboration |
| DOC, DJJ, Department for Community Based Services, | | | practices, communication channels, or role |
| Department for Behavioral Health, Developmental and | | | clarity to enhance stakeholder satisfaction |
| Intellectual Disabilities (DBHDID), community | | | and cooperation. |

5.3. Awareness and Education Among Key Stakeholders: Develop strategies to improve awareness and education about Medicaid coverage and health care access among various stakeholders, including individuals who are incarcerated, community supervision agencies, corrections institutions, health care providers, and relevant community organizations (including community organizations serving the reentering population).

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|---|--------------|----------------|--|
| supervision agencies) reporting satisfaction with cross- system collaboration efforts. | | | Note, include "reasons for not satisfied" to survey to help understand underlying issues, barriers, objections, etc. |

5.4. Data Exchange Systems and Processes to Monitor Individuals' Health Care Needs: Develop systems or establish processes to monitor the health care needs and HRSN of individuals who are exiting carceral settings, as well as the services they received pre-release and the care received post-release. This includes identifying any anticipated data challenges and potential solutions, articulating the details of the data exchanges, and executing related data-sharing agreements to facilitate monitoring of the demonstration, as described below.

| Metric Details | Indicator(s) | Data Source(s) | Use of Metric to Monitor Progress & Improve Outcomes |
|--|---|---|---|
| 5.4.1. Health Care Needs and Service Tracking Rate Percentage of reentering individuals with documented records of health care needs, pre-release services received, and post-release care provided. | Number of individuals with completed care tracking records/total number of eligible individuals. | Case management records; health care provider reports; data- sharing systems. | Ensures comprehensive monitoring of care for reentering individuals. Incomplete tracking may indicate data-sharing or documentation issues; resolve these by improving data exchange protocols and addressing privacy or technological challenges. |
| 5.4.2. Data-Sharing Agreement Execution Rate Percentage of participating entities (e.g., corrections, Medicaid, health care providers) with executed datasharing agreements to support monitoring of health care needs, services provided, and outcomes post-release. | Number of entities with signed data-sharing agreements/total number of potential entities available for data sharing. | Data-sharing agreement records. Onboarding documentation. | Low execution rates point to delays in formalizing data exchange processes. Work with agencies to overcome legal, policy, or technological barriers to ensure seamless data exchange, which is critical for tracking health outcomes and service continuity. |

Qualitative Methods

The following qualitative methods or protocols provide a comprehensive approach to monitoring Kentucky's Reentry 1115 Demonstration milestones, complementing quantitative metrics with in-depth insights and partner feedback and giving contextual understanding to the quantitative metrics.

Note: The focus groups and briefing sessions with participants described below should be combined and conducted annually.

Milestone 1: Increasing coverage and ensuring continuity of coverage for incarcerated individuals

Qualitative Monitoring Methods:

1. Interviews with Facility Staff and Case Managers

- **Purpose:** To understand the challenges and successes in implementing Medicaid suspension strategies and providing application assistance, where needed.
- How to Use: Conduct semi-structured interviews with facility staff, case managers, and Medicaid application assistants to gather insights on their experiences, barriers encountered, and suggestions for improving the enrollment and renewal processes.

2. Focus Groups with Incarcerated Individuals

- Purpose: To capture the experiences and perceptions of individuals undergoing the Medicaid application or renewal process during incarceration.
- How to Use: Organize focus groups with incarcerated individuals to discuss their understanding of Medicaid coverage, the support they received, and any difficulties they faced in maintaining or obtaining coverage.

3. Partner Feedback Sessions

- Purpose: To gather input from key partners, including correctional administrators, DOC, DJJ, DMS, DBHDID, other state officials, and community partners, on the effectiveness of coverage continuity strategies.
- How to Use: Hold annual feedback sessions to review processes, share success stories, and discuss areas needing improvement. Use feedback to inform policy adjustments.

4. Case Studies of Successful Transitions

- Purpose: To document successful cases of continuity in Medicaid coverage from incarceration through reentry.
- How to Use: Develop case studies that highlight best practices and strategies, and identify systematic breakdowns used to maintain Medicaid coverage for individuals post-release. Use these case studies to inform training and guide other facilities.

Milestone 2: Covering and ensuring access to pre-release services

Qualitative Monitoring Methods:

1. Case Manager and Service Provider Interviews

- Purpose: To explore the effectiveness of pre-release service identification and delivery.
- **How to Use:** Conduct interviews with case managers and service providers to discuss the challenges of identifying eligible individuals, coordinating services, and ensuring access to the full benefit package.

2. Participant Journey Mapping

- Purpose: To understand the pre-release service experience from the participant's perspective.
- How to Use: Create journey maps by working with individuals receiving prerelease services to document their experiences, including touchpoints, challenges, and critical moments in accessing services.

3. Observational Studies of Service Delivery

- Purpose: To observe how pre-release services are delivered and identify potential areas for improvement.
- How to Use: Conduct observational studies within facilities to watch service delivery processes, noting interactions between staff and participants, service flow, and adherence to protocols.

4. Focus Groups with Participants Regarding Service Access

 Purpose: To gather feedback from participants regarding the accessibility and effectiveness of pre-release services.

 How to Use: Facilitate focus groups to discuss their experiences with accessing services, barriers they encountered, and suggestions for enhancing service availability and quality.

5. Community Provider Knowledge Assessments

- Purpose: To evaluate case managers' familiarity with and knowledge of community-based resources.
- **How to Use:** Use brief knowledge assessments with case managers to evaluate their readiness to connect individuals with community resources post-release.

Milestone 3: Promoting continuity of care post-release

Qualitative Monitoring Methods:

1. Person-Centered Care Plan Reviews

- Purpose: To evaluate the quality and comprehensiveness of care plans developed pre-release.
- How to Use: Conduct qualitative reviews of care plans with input from care managers, correctional and community-based health care providers, and participants to assess how well the plans address individual needs and continuity of care.

2. Participant Testimonials and Narratives

- Purpose: To capture personal stories about navigating health care post-release.
- How to Use: Collect narratives from participants detailing their experiences with accessing care, filling prescriptions, and managing their health needs postrelease. Use these stories to identify common challenges and areas for improvement.

3. Provider Focus Groups on Continuity of Care

- Purpose: To gather insights from health care providers on the effectiveness of continuity of care strategies.
- How to Use: Facilitate focus groups with providers involved in both pre-release and post-release care to discuss coordination efforts, hand-off processes, and barriers to seamless transitions.

4. Warm Hand-Off Process Evaluations

 Purpose: To assess the effectiveness of warm hand-offs between pre-release and post-release case managers.

 How to Use: Review warm hand-off processes through observations and feedback from both pre-release and post-release case managers. Identify strengths and areas needing enhancement to ensure effective transitions.

5. Case Conferences and Multidisciplinary Team Reviews

- Purpose: To discuss complex cases and ensure alignment between care plans and participant needs.
- How to Use: If possible, establish or utilize regular case conferences with multidisciplinary teams to review care plans, discuss barriers to care continuity, and collaboratively develop solutions for complex cases.

Milestone 4: Connecting to services available post-release

Qualitative Monitoring Methods:

1. Interviews with Participants on Service Connections

- Purpose: To understand participants' experiences connecting to post-release services.
- How to Use: Conduct in-depth interviews with participants to explore their access to housing, employment, and other support services. Identify barriers they faced and opportunities for improving service connections.

2. Case Manager Reflections and Feedback Sessions

- **Purpose:** To gather insights from case managers about their experiences supporting high-need individuals.
- How to Use: Hold reflection sessions with case managers to discuss the challenges they encounter in maintaining ongoing support, connecting individuals to services, and managing their workloads effectively.

3. Service Provider Partnership Reviews

- Purpose: To assess the quality of partnerships between correctional facilities, community-based providers, and case managers.
- How to Use: Use qualitative assessments and partnership review sessions to discuss how well these partnerships function in supporting reentry. Identify gaps in collaboration and develop strategies to strengthen partnerships.

4. Focus Groups on Service Navigation Challenges

Purpose: To explore common challenges in navigating post-release services.

 How to Use: Conduct focus groups with participants, case managers, and service providers to identify systemic barriers in service navigation and develop actionable recommendations for improvement.

5. Post-Release Service Coordination Audits

- Purpose: To review the coordination and implementation of services as outlined in care plans.
- How to Use: Conduct audits of post-release service coordination efforts by reviewing care plans, service logs, and participant feedback. Identify discrepancies between planned and actual service delivery.

6. Participant Satisfaction Surveys with Open-Ended Questions

- Purpose: To collect qualitative feedback on satisfaction with post-release services.
- How to Use: Distribute surveys that include open-ended questions to participants about their satisfaction with post-release support and their suggestions for improving services.

7. Peer Support Groups and Feedback

- Purpose: To use peer support groups as a platform for sharing experiences and gathering feedback on service access and quality.
- How to Use: Facilitate peer support groups where participants can discuss their reentry experiences, providing a forum for qualitative feedback on what works and what needs improvement.

Milestone 5: Ensuring cross-system collaboration

Qualitative Monitoring Methods:

1. Partner Interviews on Cross-System Collaboration

- Purpose: To gather insights from key partners about their experiences with cross-system collaboration.
- How to Use: Conduct interviews with representatives from corrections,
 Medicaid, community providers, and other involved entities to understand how well collaboration is functioning and identify areas for improvement.

2. Readiness Assessment Debriefs

 Purpose: To evaluate the findings from readiness assessments and discuss next steps.

 How to Use: Hold debrief sessions with Kentucky state agencies and relevant partners to review readiness assessment results, discuss challenges, and plan targeted actions to address identified gaps.

3. Cross-System Workshops and Simulation Exercises

- Purpose: To build collaborative skills and test cross-system coordination through practical exercises.
- How to Use: Organize workshops and simulation exercises that bring together partners from different systems to practice coordination scenarios, identify breakdowns, and improve collaborative responses.

4. Focus Groups on Partner Awareness and Education

- **Purpose:** To evaluate the effectiveness of awareness and education efforts among various partners.
- How to Use: Conduct focus groups with corrections staff, community providers, and other partners to gather feedback on educational materials and identify knowledge gaps.

5. Collaboration and Communication Audits

- Purpose: To assess the quality and frequency of communication between partners, where needed.
- How to Use: Conduct audits of communication logs, meeting minutes, and coordination records to evaluate how well information is shared and acted upon across systems.

6. Feedback Loops and Continuous Improvement Cycles

- Purpose: To create ongoing mechanisms for partner feedback and continuous improvement.
- **How to Use:** Establish regular feedback loops with partners, using their input to inform iterative improvements in collaboration strategies and processes.

7. Qualitative Case Studies on Cross-System Coordination

- Purpose: To document examples of successful cross-system collaboration and identify best practices.
- How to Use: Develop case studies that highlight effective coordination efforts, detailing the approaches used and the impact on service delivery and participant outcomes.

What follows are the planned metrics and reporting schedule for the SMI/SED monitoring protocol workbook (Part A)

Medicald Section 1115 SMINID Demonstrations Monitoring Protocol (Part A) - Planned metrics (Version 3.0)
State [Enter Sate Name]

Medicaid Section 1115 SMUSED Demonstrations Monitoring Protocol (Part A) - Reporting schedule (Version 3,0) State Kentucky Demonstration Name TEAM KENTUCKY

Instructions:

(1) In the reporting periods input table (Table 1), use the prompt in column A to enter the requested information in the corresponding row of column B. All monitoring r should use the format MM/DDYYYY with no spaces in the cell. The information entered in these cells will auto-populate the SMUSED demonstration reporting schedule to be accurately under-populated.

(2) Review the state's reporting schedule in the SMUSED demonstration reporting schedule table (Table 2). For each of the reporting categories listed in column F, select whether the state plans to report according to the standard reporting schedule. If a state's planned reporting does not match the standard reporting schedule for any quarte deviations in column I, "Explanation for deviations (if column H="Y")" and use column J, "Proposed deviation in measurement period from standard reporting schedule overwrite the standard schedule (column G). All other columns are locked for editing and should not be altered by the state.

*SMINSED demonstration start date: For monitoring purposes, CMS defines the start date of the demonstration as the effective date listed in the state's STCs at time of SMINSED demonstration approval. For example, if the state's STCs at the time of SMINSED demonstration approval note that the demonstration is effective January 1, 2020 to be the start date of the demonstration. Note that the effective date is considered to be the first day the state may be given a section in 115 demonstration. In many cases, the effective date is distinct from the approval adue of a demonstration, that is, in certain cases, CMS and approva a section in 115 demonstration with an effective date is a sint for three. For example, CMS many approve an excrember 15, 2020, which are effective date is distinct from the approval date of a demonstration, that is, in certain cases, CMS defines the start date in 115 demonstration with an effective date is distinct from the adjust and the date as state begins implementing in semantary in the demonstration start date in 115 demonstration with an effective date is distinct from the approval active. For example, CMS many approva and the demonstration approval note that the demonstration is effective date is distinct from the approval active. For example, if a state's build semantary in the date as the demonstration, that is, in certain cases, CMS defines the start date in 115 demonstration in 115 demonstration with an effective date in 115 demonstration in 115 demonstration with an effective date as different from the date as attack begins implementing in semantary and the demonstration approval active. For example, if a state's effective date is itself as January 15, 2020, the state should indicate "01/01/2020" as the start date in Table 1 of the "SMI-SED reporting schedule" the should approve and the start of the st

^b The auto-populated reporting schedule in Table 2 outlines the data the state is expected to report for each SMI/SED demonstration year and quarter. However, the state is not expected to begin reporting any metrics data until after protocol approval. The state should see Section B of the Monitoring Report Instructions for more information on retrospective reporting of data following protocol approval.

AA# refers to the Annual Assessment of the Availability of Mental Health Services ("Annual Availability Assessment") and the SMI/SED DY in which the Annual Availability Assessment should be reported as of the month and day indicated in the state's annual monitoring report for SMI/SED DY in which the Annual Availability Assessment should be reported as of the month and day indicated in the state's approved monitoring protocol. If the state cannot submit its Annual Availability Assessment should be reported as of the month and day indicated in the state's approved monitoring reports, it should propose and describe a reporting deviation in Columns G and H.

TEAMKY Section 1115 Serious Mental Illness and Serious Emotional Disturbance Demonstrations Monitoring Protocol – Part B

Note: PRA Disclosure Statement to be added here

1. Title page for the state's serious mental illness and serious emotional disturbance (SMI/SED) demonstration or the SMI/SED component of the broader demonstration

This section collects information on the approval features of the state's section 1115 SMI/SED demonstration overall. The state completed this title page as part of its SMI/SED monitoring protocol. The state should complete this table using the corresponding information from its CMS-approved monitoring protocol and submit this as the title page of all monitoring reports. The content of this table should stay consistent over time. Definitions for certain rows are below the table.

| | • |
|--|---|
| Demonstration name | TEAMKY |
| Approval period for section 1115 demonstration | 12/12/2024 – 12/31/2029 |
| SMI/SED demonstration start date ^a | 01/01/2025 |
| Implementation date of SMI/SED demonstration, if different from SMI/SED demonstration start date ^b | 01/01/2026 |
| date ^b SMI/SED (or if broader demonstration, then SMI/SED-related) demonstration goals and objectives | Effective upon CMS' approval of the SMI/SED Implementation Protocol, as described in STC 116, beneficiaries will have access to, the full range of otherwise covered Medicaid services, including SMI treatment services. These SMI services will range in intensity from short-term acute care in inpatient settings for SMI, to ongoing chronic care for such conditions in cost-effective community-based settings. The state will work to improve care coordination and care for co-occurring physical and behavioral health conditions. The state must achieve a statewide average length of stay of no more than 30 days for beneficiaries receiving treatment in an IMD. The demonstration will allow Kentucky to sustain and improve access to mental health services while enhancing system delivery to offer more coordinated and comprehensive treatment for Medicaid beneficiaries with serious mental illness (SMI). Goal and Objectives include: Reduce utilization and lengths of stay in ED among Medicaid beneficiaries with SMI while awaiting mental health treatment in specialized settings; Reduce preventable readmissions to acute care hospitals and residential settings; Improve the availability of crisis stabilization services including services made available through call centers and mobile crisis teams, intensive outpatient services, as well as services provided during acute short-term stays in residential crisis stabilization programs, psychiatric hospitals, and residential treatment settings throughout the state; Improve access to community-based services to address the chronic mental health care needs of beneficiaries with SMI including through increased integration of primary and behavioral health care; and Improve care coordination, especially continuity of care in the community following episodes of acute care in hospitals and residential treatment facilities. |

| SMI/SED demonstration year and quarter | Kentucky will enter the SMI/SED demonstration year and quarter associated with the appropriate reporting period (e.g., SMI/SED DY1Q3 report) in alignment with the reporting schedule in the state's approved monitoring protocol. |
|--|--|
| Reporting period | Kentucky will enter calendar dates for the appropriate reporting period (i.e., for the quarter or year) (MM/DD/YYYY – MM/DD/YYYY) in alignment with the reporting schedule in the state's approved monitoring protocol. |

^a **SMI/SED demonstration start date:** For monitoring purposes, CMS defines the start date of the demonstration as the *effective date* listed in the state's STCs at time of SMI/SED demonstration approval. For example, if the state's STCs at the time of SMI/SED demonstration approval note that the SMI/SED demonstration is effective January 1, 2020 – December 31, 2025, the state should consider January 1, 2020 to be the start date of the SMI/SED demonstration. Note that the effective date is considered to be the first day the state may begin its SMI/SED demonstration. In many cases, the effective date is distinct from the approval date of a demonstration; that is, in certain cases, CMS may approve a section 1115 demonstration with an effective date that is in the future. For example, CMS may approve an extension request on December 15, 2020, with an effective date of January 1, 2021 for the new demonstration period. In many cases, the effective date also differs from the date a state begins implementing its demonstration.

2. Executive summary

The executive summary should be reported below. It is intended for summary-level information only. The recommended word count is 500 words or less.

Enter the executive summary text here.

^b **Implementation date of SMI/SED demonstration:** The date the state began claiming or will begin claiming federal financial participation for services provided to individuals in institutions for mental disease.
