Approval date for demonstration	<i>12/14/2018.</i>
Approval period for SUD	<i>01/01/2019-12/31/2023</i>
Approval date for SUD, if different from above	<i>05/21/2019</i>
Implementation date of SUD, if different from above	<i>01/01/2019</i>

SUD (or if broader demonstration, then SUD - related) demonstration goals and objectives

New Mexico’s 1115 waiver application supports and focuses its SUD evaluation on the six goals developed by CMS:

1. Increased rates of identification, initiation and engagement in treatment for OUD and other SUDs;
2. Increased adherence to and retention in treatment for OUD and other SUD;
3. Reductions in overdose deaths, particularly those due to opioids;
4. Reduced utilization of emergency departments and inpatient hospital settings for OUD and other SUD treatment where the utilization is preventable or medically inappropriate through improved access to other continuum of care services;
5. Fewer readmissions to the same or higher level of care where readmission is preventable or medically inappropriate for OUD and other SUD; and
6. Improved access to care for physical health conditions among beneficiaries with OUD or other SUDs.

This implementation plan will describe services currently in place, and put forward our plans to implement new services, i.e. our gaps in service options. It is based upon American Society of Addiction Medicine (ASAM) levels of care for the continuum of care, and is organized by CMS’s SUD milestones:

1. Access to critical levels of care for OUD and other SUDs
2. Widespread use of evidence-based, SUD-specific patient placement criteria;
3. Use of nationally recognized, evidence-based, SUD program standards to set residential treatment provider qualifications;
4. Sufficient provider capacity at each level of care, including Medication Assisted Treatment (MAT);
5. Implementation of comprehensive treatment and prevention strategies to address opioid abuse and OUD; and
6. Improved care coordination and transitions between levels of care.

2. Executive Summary

The executive summary should be reported in the fillable box below. It is intended for summary-level information only. The recommended word count is 500 or less.

New Mexico has made significant advances in recent years in our services to both combat and treat OUD and SUD. We halted the increasing overdose trend from the highest rate among states to 13th. We must consider, however, that the upward trends of other states also impact this. However, New Mexico continues to be the top state in alcohol-related deaths and third in the nation for suicides. We still have much work to do.

New Mexico's continuum of SUD services and its implementation plan also includes:

- Treatment of co-occurring mental health conditions with a primary diagnosis of SUD;
- A focus on the integration of SUD screening in physical health provider locations;
- The introduction of behavioral health counselors in primary care agencies, and primary care practitioners in behavioral health agencies; and
- Interdisciplinary teaming with the Medicaid beneficiary and his/her natural supports to treat not only the person with the SUD, but also the family or natural support system.

Note on reporting changes: As part of the shift to using the newest instructions from CMS, New Mexico discovered that we have been reporting quarterly utilization with duplicated counts of clients, rather than the more correct unduplicated counts. This Q4 report includes **new unduplicated counts** for all 2020 quarters.

This metric had seen a steady upward trend, with the exception of the second quarter when services dropped due to the impact of the COVID public health emergency. The primary driver of the upward trend was the addition of SBIRT to the state’s Medicaid program, effective 1/1/19, followed by expanded outreach to providers and state-sponsored provider trainings around the state. In response to the public health emergency, HSD has allowed behavioral health providers to offer most behavioral health services using telehealth, telephonic and e-visit delivery systems to ensure safe access to health care. However, utilization in the fourth quarter represents a 5% increase since the beginning of the year. There were no active Partial Hospitalization Programs (PHP) in NM during the measurement period, so this metric applies only to Intensive Outpatient Program (IOP). The number of IOP programs in NM doubled during 2019, and while growth in utilization appears to have slowed during 2020 due to the pandemic, the year over year increase is driven by IOP providers who have worked particularly hard to ensure that patients can get care through phone and video which has increased compliance and participation. With the video ability, IOP is expanding to rural communities.</p> <p>QTR 4 - A total of 1,210 unique beneficiaries used intensive outpatient services for SUD during the measurement period. <p><input checked="" type="checkbox"/> The state reports the following metric trends, including all changes (+ or -) greater than 2 percent related to Milestone 1</p>	<p>The number of beneficiaries who used residential and/or inpatient services for SUD during the measurement period (QTR 4 DY2 2020) dropped by 13% between the third and fourth quarters of DY2, but showed an overall increase of 17% since the beginning of the year. The increase over the year reflects the successful transition of the first group of non-Medicaid adult residential treatment providers into Adult Accredited Residential Treatment Centers (AARTC) within the Medicaid system. The upward trend also includes a small but rising number of individuals accessing expanded coverage for SUD in Institutes of Mental Disease (IMD), added as part of Centennial Care 2.0 to provide a more robust continuum of care for people who need this highest level of care. During the pandemic the state has seen rising levels of urgent behavioral health needs; an increase in inpatient stays is a reflection of the combined effects of the public health emergency and the SUD crisis the state is experiencing.</p> <p>Lastly, the CMS instructions call for this measure to include only individuals with a primary SUD diagnosis. HSD is aware that many New Mexico providers are reluctant to use SUD as the primary diagnosis, particularly for younger clients. When we recalculated this metric allowing a SUD diagnosis in any of the first three diagnostic fields, utilization averaged 15% higher for the year.</p> <p>QTR 4 – An unduplicated total of 648 beneficiaries used residential and/or inpatient services for SUD during the measurement period. The provider network for withdrawal management services reports persistent difficulty retaining medical staff sufficient to maintain services, an unfortunately common challenge in NM. In response to the public health emergency, HSD has allowed behavioral health providers to offer most behavioral health services using telehealth, telephonic and e-visit delivery systems to ensure safe access to health care. Withdrawal management services are not all amenable to telehealth type delivery of care, and further, tracking withdrawal management services in New Mexico relies on providers to enter additional tracking codes that have no reimbursement attached. The increase in utilization despite these challenges is a measure of rising need for behavioral health services during the pandemic.</p> <p>QTR 4 - A total of 138 beneficiaries used withdrawal management services during the measurement period. 9.2 Other SUD-Related Metrics			
9.2.1 Metric Trends			

<p><input checked="" type="checkbox"/> The state reports the following metric trends, including all changes (+ or -) greater than 2 percent related to other SUD-related metrics</p>	<p>The total number of ED visits for SUD per 1,000 beneficiaries in the measurement period (QTR 4 DY2 2020) declined 13% between the third and fourth quarters of DY2, down from 13.9 per 1,000 to 12.1 per 1,000. Overall, utilization was driven down 16% from the start of the year.</p> <p>Since the start of Centennial Care 2.0 in 2019, the state has expanded access to both inpatient and outpatient SUD services. The volatility in this measure may reveal both the extent of the SUD crisis in New Mexico and the success of the state’s work to encourage use of telehealth for most behavioral health services. However, as with other measures, the trend for this metric cannot be fully understood without considering the COVID 19 context. The drop in the fourth quarter most likely reflects persistent concern and uncertainty among the state’s population regarding any hospital visits.</p> <p>The trend for this metric also reflects the state’s rising Medicaid enrollment, up over 70,000 during the course of 2020. Significant enrollment increases are a downward pressure on calculation of this metric.</p> <p>Note: The denominator, or total beneficiaries, is the unduplicated number of beneficiaries enrolled each quarter. The numerator is the total unduplicated number of inpatient discharges related to a SUD stay during the measurement period.</p> <p>QTR 4- Total number of inpatient stays per 1,000 beneficiaries in the measurement period. Denominator: 751,973 Numerator: 9,201 Stays/1,000: 12.13</p> <table border="1" data-bbox="909 1159 1341 1328"> <thead> <tr> <th colspan="4">Metric 23 DY2 (2020)</th> </tr> <tr> <th>Q1</th> <th>Q2</th> <th>Q3</th> <th>Q4</th> </tr> </thead> <tbody> <tr> <td>14.41</td> <td>13.2</td> <td>13.94</td> <td>12.13</td> </tr> <tr> <td></td> <td>-8%</td> <td>6%</td> <td>-13%</td> </tr> </tbody> </table>	Metric 23 DY2 (2020)				Q1	Q2	Q3	Q4	14.41	13.2	13.94	12.13		-8%	6%	-13%	<p>QTR-4 10/01/2020- 12/30/2020</p>	<p>Total number of ED visits for SUD per 1,000 beneficiaries in the measurement period.</p>

<p><input checked="" type="checkbox"/> The state reports the following metric trends, including all changes (+ or -) greater than 2 percent related to other SUD-related metrics</p>	<p>The total number of inpatient stays related to SUD per 1,000 beneficiaries in the measurement period (QTR 4 DY2 2020) decreased 16% between the third and fourth quarters of DY2, dropping from 7.5 per 1,000 to 5.5 per 1,000. Overall, utilization decreased by 12% from the start of the year.</p> <p>This trend of individuals accessing inpatient services partially mirrors metric 10 above; as part of Centennial Care 2.0, New Mexico expanded coverage for SUD in Institutes of Mental Disease (IMD) to provide a more robust continuum of care for people who need this highest level of care. During the pandemic the state has seen rising levels of urgent behavioral health needs. In this context, the fourth quarter drop is worrisome because despite rising need for care, the decline most likely reflects persistent concern and uncertainty among the state’s population regarding any inpatient care, as well as temporary COVID-related limits on client numbers and/or closures of some agencies and facilities.</p> <p>However, the trend for this metric also reflects the state’s rising Medicaid enrollment, up over 70,000 during the course of 2020. Significant enrollment increases are a downward pressure on calculation of this metric.</p> <p>Note: The denominator, or total beneficiaries, is the unduplicated number of beneficiaries enrolled each quarter. <input checked="" type="checkbox"/> If the SUD component is part of a broader demonstration, the state should provide an analysis of the SUD-related budget neutrality and an analysis of budget neutrality as a whole. Describe the current status of budget neutrality and an analysis of the budget neutrality to date.	<p>The expenditures of substance use disorder (SUD) are included in the historical program data that was used to develop the overall budget neutrality. The quarterly waiver budget monitoring continues to show that all Medicaid eligibility groups (MEG) remain in compliance with the budget neutrality conditions. The substance use disorder/institution for mental diseases (SUD/IMD), a subset, is subject to a hypothetical test for budget neutrality monitoring. As described in the STCs, this includes comparing the actual capitation PMPMs for SUD/IMD members to the expenditure caps defined for each demonstration year (DY). The SUD/IMD budget neutrality monitoring continues to show that SUD/IMD remains in compliance with the budget neutrality requirement.</p>	QTR 4 - 10/1/2020 – 12/31/2020	STC 100 -Hypothetical Test 3 for SUD/IMD
