Atlanta, Georgia 30334

Re: Georgia State Plan Amendment (SPA) 24-0008

Dear Executive Director Portman:

The Centers for Medicare & Medicaid Services (CMS) reviewed your Medicaid State Plan Amendment (SPA) submitted under transmittal number (TN) 24-0008. This SPA seeks to modify the reimbursement rates for community behavioral health services, add community health workers to the list of acceptable practitioners, and update the accreditation language.

We conducted our review of your submittal according to statutory requirements in Section 42 CFR 447.252. This letter informs you that Georgia's Medicaid SPA TN 24-0008 was approved on October 23, 2024, effective July 1, 2024.

Enclosed are copies of the approved Form CMS-179 and the approved SPA pages to be incorporated into the Georgia State Plan.

If you have any questions, please contact Etta Hawkins at (404) 562-7429 or via email at Etta.Hawkins@cms.hhs.gov.

James G. Scott, Director
Division of Program Operations

22. REMARKS
DCH requested the following pen and ink changes by email on 10-23-2024 for Box 8
4.19B pages are as follows:
Pages 1a-1 through 1a-9
Pages 1a-9a through 1a-26

Individual practitioners working within these provider agencies are required to meet all practitioner qualifications. Certifications/Registrations for certain practitioners are either provided by or through the State of Georgia or by nationally-recognized certification boards. Practitioners are grouped into levels consistent with specific credentials and in consideration of associated ranges of salaries as follows:

Level 1:	Physician, Psychiatrist
Level 2:	Licensed Practitioners of healthcare and behavioral health (highly trained and specialized [or specialty skilled] salary scale): Psychologists, Physician's Assistants, Nurse Practitioners, Clinical Nurse Specialists/PMHs, Pharmacists
Level 3:	Licensed/Certified Practitioners of healthcare and behavioral health (highly trained and skilled salary scale): Registered Nurse, Licensed Dietician, Licensed Professional Counselor (LPC), Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), Certified/Registered Addictions Counselor-II
Level 4:	Associate Licensed and other Certified Practitioner (significantly trained and skilled salary scale): Licensed Practical Nurse (LPN); Licensed Associate Professional Counselor (LAPC); Licensed Master's Social Worker (LMSW); Licensed Associate Marriage and Family Therapist (LAMFT); Certified/Registered Addictions Counselor, Certified Peer Specialist, Community Health Worker (certified by the state or completion of the same training requirements as a Trained Paraprofessional), Trained Paraprofessional (Completion of a minimum of 40 hours of the Standard Training Requirement for Paraprofessionals training and successful completion of all written exams and competency-based skills demonstrations), Counselor Supervisee/Trainee (under supervision in accordance with the GA Composite Board of Professional Counselors, Social Workers, and Marriage and Family Therapists or enrolled in a practicum with an accredited educational Master's degree program which provides dual supervision along with the enrolled agency's supervision), or Certified Psychiatric Rehabilitation Professional (CPRP) with Bachelor's degree or higher in the social sciences/helping professions
Level 5:	Non-Licensed, Non-degreed and Trained Paraprofessionals (moderately trained and skilled salary scale): Trained Paraprofessionals (Completion of a minimum of 40 hours of the Standard Training Requirement for Paraprofessionals training and successful completion of all written exams and competency-based skills demonstrations),

TN No. 24-0008
Supersedes
TN No. 17-002

Approval Date: 10/23/2024

Effective Date: 07/01/2024

	Certified/Registered Addiction Counselor (CAC-I or Registered Alcohol and Drug Technician), Certified Peer Specialist, Community Health Worker (certified by the state or completion of the same training requirements as a Trained Paraprofessional), Certified Psychiatric Rehabilitation Professional, and Qualified Medication Aide (certification as a nurse aide, completion of a state-approved medication aide training program, and registration with the state)
--	---

The state allows telemedicine strategies to promote access to services defined herein.

Limitations

Rehabilitation services do not include coverage for room nor board, and coverage will not be provided for services provided to individuals in an Institution for Mental Diseases (IMD) (see page 6c-7, e.). The covered services are available only to Medicaid eligible recipients with a written service plan. All treatment, rehabilitative, and prevention services are focused on the Medicaid eligible individual. Any consultation or treatment involving families or other persons is solely for the purpose of addressing the behavioral health needs of the Medicaid recipient.

Service utilization is managed through the use of prior authorizations which set maximum units within an authorization period. Authorization periods vary according to service and may range between one day to 12 months for individuals who experience long-term, intensive, and chronic illness. At the outset of services and again when the authorization period expires or maximum units have been reached, a request must be submitted to the URAC or NCQA-accredited Administrative Services Organization to justify provision of services based upon medical necessity of the service for the Medicaid recipient.

CBHRS do not include any of the following and FFP is not available for:

- a. room and board services;
- b. educational, vocational and job training services;
- c. habilitation services;
- d. services to inmates in public institutions as defined in 42 CFR §435.1010;
- e. services to individuals residing in institutions for mental diseases as described in 42 CFR§435.1010;
- f. recreational and social activities; and
- g. services that must be covered elsewhere in the state Medicaid plan.

POLICY AND METHODS FOR ESTABLISHING PAYMENT RATES FOR OTHER
TYPES OF CARE FOR SERVICES

C. Community Behavioral Health Rehabilitation Services

Effective for services provided on or after July 1, 2024, providers of Community Behavioral Health Rehabilitation Services (CBHRS) will be reimbursed at fee for service rates based on:

- The type of practitioner delivering the service
- Service costs (salaries, employee related expenses [ERE] and paid time off, program and administrative costs) to deliver the service
- Location of Service (in-clinic, out-of-clinic, and telehealth) – including productivity considerations related service delivery for specific services, and practitioner paid time off (PTO)

State-developed fee schedule rates are the same for both governmental and private providers of all community mental health services. The fee schedule and any annual/periodic adjustments to the fee schedule are published in provider correspondence and policy manuals available at:

<https://www.mmis.georgia.gov/portal/PubAccess.Provider%20Information/Provider%20Manuals/tabId/18/Default.aspx>.

For most CBHRS, a “minute-based” methodology is used. In other words, the service is reimbursed based on the number of minutes the service was provided to clients (most often delineated in intervals of 15 minutes). Two services – Intensive Customized Care Coordination (IC3) and Crisis Stabilization Unit (CSU) – are reimbursed using alternative time units. IC3 is reimbursed on a monthly basis, given that it is a high-fidelity wrap-around service with several ongoing components. As a facility-based service CSU is reimbursed on a per diem basis, consistent with many other facility-based services.

CBHRS are primarily billed and rated for reimbursement utilizing the most discreet procedure code. Some services and the associated treatment modalities, however, are more appropriately clinically correlated to the most comprehensive procedure code. Utilizing a comprehensive code in effect bundles a set of discreet codes. CBHRS that bundle a set of codes in this way are: Substance Abuse/Addictive Disease Intensive Outpatient Services, Crisis Stabilization Unit Services, and Assertive Community Treatment. As an example, the discreet codes representing each of the following services when billed independently including Behavioral Health Assessment & Service Plan Development, Diagnostic Assessment, Psychiatric Treatment, Nursing Assessment & Care, Community Support, Individual Outpatient Services, Group Outpatient Services, and Family Outpatient Services are combined to represent a program service such as Substance Abuse Intensive Outpatient Services and billed at an hourly rate under a single comprehensive code.

Detail on each of the factors involved in the CBHRS reimbursement methodology is described below (practitioner type, service costs (direct and indirect) and including location of service

delivery and productivity rates). The fee schedule for Community Behavioral Health Rehabilitation Services as reflected in the policy manual is grouped by service type to correspond with the section 3.1-A of the Georgia Medicaid Plan. In addition, provider qualifications are detailed in section 3.1-A.

1.1 Practitioner Type

Staffing roles used to deliver CBHRS are grouped into five practitioner levels. The selected practitioner levels group the staffing roles such that each level contains staffing roles that are comparable with respect to the required practitioner credentials and salaries the practitioners are paid. Salary data was derived from the May 2021 Occupational Employment and Wage Estimates for Georgia from the United States Department of Labor’s Bureau of Labor Statistics (BLS). The Practitioner Levels are classified below:

Level 1:	Physician, Psychiatrist
Level 2:	Licensed Practitioners of healthcare and behavioral health (highly trained and specialized [or specialty skilled] salary scale): Includes practitioners such as Psychologists, Physician’s Assistants, Nurse Practitioners, Clinical Nurse Specialists/PMHs, Pharmacists
Level 3:	Licensed/Certified Practitioners of healthcare and behavioral health (highly trained and skilled salary scale): Includes practitioners such as Registered Nurse, Licensed Dietician, Licensed Professional Counselor (LPC), Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), Certified/Registered Addictions Counselor-II
Level 4:	Associate Licensed and other Certified Practitioner (significantly trained and skilled salary scale): including Licensed Practical Nurse (LPN); Licensed Associate Professional Counselor (LAPC); Licensed Master’s Social Worker (LMSW); Licensed Associate Marriage and Family Therapist (LAMFT); Certified/Registered Addictions Counselor), Certified Peer Specialist, Community Health Worker, Trained Paraprofessional or Certified Psychiatric Rehabilitation Professional (CPRP) with Bachelor’s degree or higher in the social sciences/helping professions
Level 5:	Non-Licensed, Non-degreed and Trained Paraprofessionals (moderately trained and skilled salary scale): including practitioners such as Certified/Registered Addiction Counselor (CAC-I or Registered Alcohol and Drug Technician), Certified Peer Specialist, Community Health Worker, Certified Psychiatric Rehabilitation Professional, and Qualified Medication Aide

1.2 Service Costs

Rate development assumptions were derived from a number of sources, including industry standard data sources (e.g., BLS), and cost reports sent to and completed by a sample of CBHRS providers, which provided information related to staff wages, hours, and FTEs that support Medicaid FFS CBHRS service provision, as well as revenues and expenditures related to CBHRS. Specific sources of information used to inform each component of service costs are summarized below.

1.2.1. Practitioner Wages

For each of Georgia's five practitioner levels, an assumed wage was derived from the May 2021 Occupational Employment and Wage Estimates for Georgia (i.e., the most recent BLS data available at the time of rate development). Provider cost report data was also used as a benchmark to assess the reasonability of the BLS data and to inform the wage assumptions used. The salary assumption used to develop the rates was derived by comparing a range of salary statistics from BLS (e.g., mean, median, and 75th percentile) at each practitioner level to the salaries reported in the provider cost reports. The BLS 75th percentile wages were used for Levels 1, 2, 3 and 5 while the Mean BLS salary was used for Level 4. These levels were selected based on alignment between cost reports and the selected BLS statistic.

Given that any potential rate changes are unlikely to be implemented until at least State Fiscal Year 2024, a wage trend factor was developed to project wage assumptions to January 2024. The factor was based on the three most recent years of cost-of-living adjustments developed by the social security administration.¹

1.2.2. Employee Related Expenses

Examples of ERE components providers may incur include, but are not limited to:

- Health insurance,
- Employer taxes,
- Worker's compensation,
- Retirement benefits,
- Other employee benefits including short- or long-term disability, life insurance, etc.

It should be noted that PTO, sick time, and holidays offered to practitioners providing CBHRS are accounted for within productivity assumptions and not within ERE. The ERE value used for rate development was derived from multiple sources – the cost reports completed and submitted by CBHRS providers, as well as industry benchmarks for the various components of ERE.

ERE was applied to the rates as a percentage of the practitioner salary for each practitioner level. Given that Level 1 practitioners receive the highest salaries, the ERE percentage was lowest at this level (as several ERE components are paid as a fixed dollar amount and are not salary dependent). Thus, with each practitioner level between Level 1 and Level 5, the ERE

¹ Cost-Of-Living Adjustments. SSA.gov. Retrieved December 2022, from <https://www.ssa.gov/oact/cola/colaseries.html>

percentage increases. Different rates of ERE were used for different practitioner levels, increasing by 3% with each practitioner level (ranging from 30% for Level 1 practitioners, to 42% for Level 5 practitioners).

1.2.3. Program and Administrative Costs

Program costs are the costs that directly support the provision of CBHRS (excluding practitioner salaries and benefits). These costs include, but are not limited to:

- Program support staff salaries and benefits,
- Staff training costs,
- Supervision,
- Transportation costs (including staff mileage costs and vehicle costs),
- Telehealth costs,
- Office space costs,
- Liability/malpractice insurance,

The primary source used to inform program cost assumptions were the cost reports completed by the CBHRS providers. Within the provider cost reports, providers attributed a significant amount of program costs to supervision-related and program staff expenses. Thus, program costs are applied to the rate development in two separate ways: with a supervision and program staff component and an “other cost” component (reflecting non-supervision and program staff program costs). The supervision component was applied to practitioner hourly wages. The level of supervision required increases based on increasing practitioner level, and the assumed supervision factors ranged from 6% for Level 1 practitioners to 39% for Level 5 practitioners. The “other cost” program expense factor was assumed to be 8% for all practitioner levels and was applied to rates after the productivity adjustment was applied.

In contrast to program costs, administrative costs generally include overhead costs that do not directly support the provision of services. These costs include, but are not limited to:

- Administrative support and management staff salaries and benefits,
- Software costs,
- Telephone/internet costs,
- Electronic health record costs,
- Office supply costs,
- Marketing costs,
- Professional fees,

Based on cost report responses, administrative expense values used for rate development were 7% for practitioner Level 1 and 15% for Levels 2-5. A lower administrative expense assumption was chosen for Level 1 given that salaries at this level are significantly higher than salaries at other levels (thereby avoiding having a disproportionate amount of administrative expenditures attributed to Level 1 practitioners). Within the rate development, the administrative expense assumption is applied as a percentage of the total rate.

It should be noted that CBHRS FFP is not available for:

- a. room and board services;
- b. educational, vocational and job training services;
- c. habilitation services;
- d. services to inmates in public institutions as defined in 42 CFR §435.1010;
- e. services to individuals residing in institutions for mental diseases as described in 42 CFR§435.1010 (except in situations in which an individual in an IMD for psychiatric treatment and stabilization needs transition and planning support from a CBHRS-enrolled provider prior to the planned and documented discharge);
- f. recreational and social activities; or
- g. services that must be covered elsewhere in the state Medicaid plan.

1.3. Location of Service and Productivity Factors

Given that each practitioner level has different service delivery responsibilities, the productivity assumptions differ by practitioner level. Similarly, since productivity can differ based on where the service was delivered, additional productivity adjustments were made by service delivery location (in clinic, out of clinic, telehealth). Productivity was adjusted further on a service-specific basis, considering that some services require that practitioners spend more time on non-billable activities to appropriately deliver the service. Finally, productivity for all services, practitioner levels, and locations of service were adjusted for practitioner PTO time.

The following productivity assumptions were used for the baseline productivity assumptions for in-clinic service delivery:

- Practitioner Level 1: 70% productivity was assumed given that practitioners in this category perform services where they are able to spend more time billing and less time completing administrative activities, as they may rely on other team members for those responsibilities. As such, the Level 1 productivity was assumed to be higher than the productivity for the other practitioner levels.
- Practitioner Levels 2, 4, and 5: 65% productivity was assumed for these levels. This is consistent with the productivity rates reported in the provider cost reports for these practitioner levels.
- Practitioner Level 3: 60% productivity was assumed. The lower assumed productivity for these practitioners relative to other levels is due to the higher supervision expectation. Specifically, Level 3 practitioners spend more time supervising other practitioners that is not directly billable for the supervising practitioner.

In addition to baseline in-clinic productivity, there were adjustments for service delivery setting. The adjustments are described below:

- Out of Clinic: a 10% productivity reduction is applied to account for additional time spent traveling for services delivered out of clinic

Telehealth: Productivity levels for telehealth service delivery are assumed to While practitioners spend some amount of time on non-billable activities for all services, there are

certain services for which the amount of non-billable time is higher given service-specific activities and requirements. Thus, after applying the practitioner level and setting specific productivity adjustments described above, some productivity adjustments were applied for specific services. A summary service-specific of adjustments includes:

- Assertive Community Treatment: ACT is a service that requires an extensive amount of time spent in group meetings, documenting, traveling to clients and performing other high-fidelity services. Due to the extra challenges of this service, a 10% reduction to the baseline in clinic and out of clinic productivity was used.
- Programmatic and Group Services: programmatic services such as Intensive Family Intervention, Substance Abuse Intensive Outpatient Program, and Psychosocial Rehabilitation Programs received a 5% reduction from baseline in clinic and out of clinic rates to account for additional non-billable time associated with providing programmatic services. In addition, group services such as Group Outpatient and Peer Support Group also received a 5% reduction from baseline productivity to account for additional non-billable time associated with coordination and delivery of group services.
- Medication Administration: Medication Administration and Opioid services received a 10% increase to in-clinic productivity rates and 5% increase to out of clinic productivity rates due to the historical administration of these services being more efficient compared with other services.

Productivity was further adjusted to account for some practitioners receiving PTO. A PTO assumption of 30 total annual PTO days (including vacation, sick time, and holidays) was used for rate development, based on CBHRS providers' responses to the cost reports. Applying this assumption reduces the effective proportion of billable time by approximately 12%.

1.4 Program-Specific Costs

1.4.1. Intensive Customized Care Coordination (IC3) Rate Development

Intensive Customized Care Coordination is a high fidelity wrap around service that has several components and requirements (e.g., multiple services being delivered on the same day, fidelity requirements, a requirement that an approved EHR technology is used). Given the unique nature of Intensive Customized Care Coordination, an IC3-specific cost report was sent to IC3 Providers to capture the costs of delivering this service.

Intensive Customized Care Coordination rate development inputs were derived based on the cost to deliver Intensive Customized Care Coordination services, and many of these components – staff wages, ERE, program support costs, and administrative costs – are the same as the components that were used in the development of the minute-based rates. The Intensive Customized Care Coordination rate build-up differs because *monthly* costs are calculated and are then adjusted for caseload using assumed member to staff ratios. This caseload adjustment is applied in place of the productivity factor used for the minute-based rates, given that as a monthly service productivity can be measured by the ratio of Intensive Customized Care Coordination staff members to the number of IC3 members seen per

month. The IC3 rate development assumes the service is fully staffed and uses the staffing ratios prescribed in the CBHRS provider manual² to make the necessary caseload adjustments. The provider manual staffing ratio was consistent with the staffing ratios reported in the Intensive Customized Care Coordination supplemental cost reports received from providers.

IC3 service delivery uses two unique staffing roles – care coordinators and certified peer specialist, parent (CPS-P) – which were mapped into Georgia’s practitioner levels 4 and 5, respectively. Thus, the assumed salaries for these roles match the Level 4 and Level 5 salary and ERE assumptions used for the minute-based rates. Care coordinator and CPS-P supervisor salaries were also built into the rates, and these supervisor roles were both mapped into Georgia’s practitioner Level 3.

To develop target IC3 rates, salary and ERE expenses were calculated using the same practitioner level salary, salary trend, and ERE assumptions as for the minute-based rates, except that these costs were calculated on a monthly basis. Practitioner level salaries were then adjusted by a member-per-staff ratio to create a case load-adjusted monthly cost. Finally, program support and administrative costs assumptions were applied, resulting in the target IC3 rate.

1.4.2. CSU Rate Development

Compared to other CBHRS, Crisis Stabilization Unit (CSU) services are unique in that they are facility-based and represent an intensive level of care, and as such reimbursement is performed on a per diem basis. Given the unique nature of CSU, a CSU-specific cost report was sent to CSU Providers to capture the costs of delivering this service. It is noted in the provider manual that “CSUs with 16 beds or less may bill services to GAMMIS for Medicaid FFS recipients,” and thus the CSU rate development described here is intended to be specific to CSUs which meet this requirement.³

CSUs, being a facility-based service, are staffed with several clinical staff members, but also other staff members not used for most other CBHRS. Examples of staffing roles unique to CSUs include pharmacists, health services managers, security guards, and transporters. Given the unique nature of CSU staffing, rates were derived based on an assumed staffing model, which in turn assumes a CSU is fully staffed to support 16 beds. Staff wage assumptions for these CSU-specific roles come from BLS. Average FTE and ERE assumptions for each CSU staffing role were derived from the results of the supplemental CSU cost reports, and staff wages were trended using the same wage trend assumptions used for the minute-based rates. A total annual salary and benefits cost was calculated across all staffing roles and was divided by 365 to create a daily salary and benefits cost (given the per diem rate structure).

² The specified caseload (members per practitioner) for care coordinators, Certified Peer Specialist-Parents, and supervisors, respectively are as follows: 10, 30, and 6.

³ Georgia Department of Behavioral Health and Developmental Disabilities. (2022, June 1). Provider Manual for Community Behavioral Health Providers. Community Provider Manuals. Retrieved August 15, 2022, from <https://dbhdd.georgia.gov/be-connected/community-provider-manuals>

In order to calculate cost per bed, an average occupied bed count must be assumed. Based on CSU supplemental cost report responses related to CSU occupancy, an average occupied bed count of 13 was assumed for rate development. Thus, total salary cost per day was divided by 13 beds, resulting in the total salary cost per day, per bed. Finally, program support and administrative costs were applied to salary costs to arrive at the target CSU rate.

Administrative and program cost assumptions were derived from provider responses to the CSU supplemental cost report.

1.4.3. Assertive Community Treatment

Assertive Community Treatment is a multi-practitioner team model based on national evidence-based practice and fidelity. Assertive Community Treatment (ACT) – has a minute-based rate, but its rate is calculated by blending rates across practitioner levels to create a non-tiered rate (a single rate for each of the five practitioner levels). Administrative costs were developed using reported amounts in the cost reports and discussions with DBHDD/DCH, which was compared to industry standards. The total blended rate is calculated using a weighted average of each practitioner's 15-minute rate and their respective utilization percentage based on the published standard for the minimum staffing pattern.

Additionally, Assertive Community Treatment is a service that requires an extensive amount of time spent in group meetings, documenting, traveling to clients and performing other high-fidelity service elements. Due to the extra challenges of this service, a 10% reduction to the baseline in clinic and out of clinic productivity was used.

1.4.4. Community Living Supports

With respect to Community Living Supports (CLS), there are four intensity levels of service delivery. No rate includes any room and/or board. Rates use the detail stated earlier in this document specific to Practitioner Costs and Service Costs as a base and then are calculated on the assumptions below to create units for each level:

- **CLS Level I** is intensive and provides 24/7/365 awake staff support generally in a licensed community-living setting (in no case exceeding 16 beds). In order to directly support the individual, there will be a minimum of five hours weekly of skills training, community integration activities, and/or personal services provided to the person if indicated on the individual supports plan. This skills training is provided by one or more Community Living Supports specialists who may be practitioner Level 3, 4 or 5.
- **CLS Level II** is intensive and provides 24/7/365 staff support generally in a licensed community-living setting (in no case exceeding 16 beds). In order to directly support the individual, there will be a minimum of five hours weekly of skills training, community integration activities, and/or personal services provided to the person if indicated on the individual supports plan. This skills training is provided by one or more Community Living Supports specialists who may be practitioner Level 3, 4 or 5.

- **CLS Level III** is semi-independent support which provides 36 hours per week staff support generally in a licensed community-living setting (in no case exceeding 16 beds). In order to directly support the individual, there will be a minimum of three hours per week of skills training, community integration activities, and/or personal services provided to the person if indicated on the individual supports plan. This skills training is provided by one or more Community Living Supports specialists who may be practitioner Level 4 or 5.
- **CLS IV** is support to provide a minimum of one face-to-face contact and an average of 10 15-minute units per week of skills training, community integration activities, and/or personal services provided to the person as indicated on the individual supports plan. A Community Living Supports specialist is a practitioner Level 5 operating on 65% productivity and is on call and available to individuals 24/7/365

1.5 Service Codes and Rate Table:

1.5.1 Service Code Modifiers Key:

- GT = Via interactive audio and video telecommunication systems
- HA = Child/Adolescent Program
- HQ = Group Setting
- HR = Family/Couple with client present
- HS = Family/Couple without client present
- HT = Multidisciplinary team
- TG = Complex Level of Care
- TF = Intermediate Level of Care
- TN = Rural Service Area
- U1 = Practitioner Level 1 (see below for description of all practitioner levels)
- U2 = Practitioner Level 2
- U3 = Practitioner Level 3
- U4 = Practitioner Level 4
- U5 = Practitioner Level 5
- U6 = In-Clinic
- U7 = Out-of-Clinic
- UK = Collateral Contact

1.5.2. Code and Rate Table:

Description	Procedure Code	Unit	New Proposed Rate
Service Area = Behavioral Health Assessment			
<i>Mental Health Assessment by a non-physician</i>			
Practitioner Level 2, In-Clinic	H0031 U2 U6	15 minutes	\$ 53.06
Practitioner Level 3, In-Clinic	H0031 U3 U6	15 minutes	\$ 36.24
Practitioner Level 4, In-Clinic	H0031 U4 U6	15 minutes	\$ 25.61

T.N. No.: 24-0008
 Supersedes
 T.N. No.: 11-0007

Approval Date: October 23, 2024

Effective Date: July 1, 2024

D. Graduate Medical Education Payments for Community Service Boards

Community Service Boards (CSBs) with Graduate Medical Education (GME) programs that are accredited by the Accreditation Council for Graduate Medical Education (ACGME) will be eligible to receive GME supplemental payments. The annual amount of each eligible CSB's GME payments will be calculated as follows:

- (1) Determine the Percentage of the CSB Claims Attributable to Medicaid in the previous fiscal year.
- (2) Multiply the percentage of the CSB claims attributable to Medicaid by the total GME annual expenses for the current fiscal year.
- (3) Divide the last four state fiscal years average CSB annual Medicaid claim count into the GME expenses reimbursable by Medicaid.
- (4) This amount is the per claim GME add-on amount.
