RE: State Plan Amendment (SPA) TN 20-0027

Dear Secretary Sudders:

We have reviewed the proposed amendment to Attachment 4.19-A of your Medicaid State plan submitted under transmittal number (TN) 20-0027. Effective October 1, 2020, this amendment authorizes updates to the reimbursement methodology for acute inpatient hospital services, for fiscal year (FY) 2021.

We conducted our review of your submittal according to the statutory requirements at sections 1902(a)(2), 1902(a)(13), 1902(a)(30), 1923 and 1903(a) of the Social Security Act and the implementing Federal regulations at 42 CFR Part 447. This letter is to inform you that Massachusetts 20-0027 is approved effective October 1, 2020. The CMS-179 and approved plan pages are enclosed.

If you have any questions, please contact Novena James-Hailey at (617) 565-1291 or Novena.JamesHailey@cms.hhs.gov.

Sincerely,

[Redacted Signature]

For
Rory Howe
Acting Director

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

I. Introduction

A. Overview

This attachment describes methods used to determine rates of payment for acute inpatient hospital services for RY21.

1. Except as provided in subsection 2, and in subsection 6, below, the payment methodologies specified in this Attachment 4.19-A(1) apply to:
 - RY21 admissions at in-state Acute Hospitals beginning on or after October 1, 2020 through September 30, 2021, and
 - inpatient payments made to in-state Acute Hospitals on an administrative day, psychiatric or rehabilitation per diem basis for RY21 dates of service on or after October 1, 2020 through September 30, 2021.
2. In-state Critical Access Hospitals will be paid in accordance with the methods set forth in **Exhibit 1**, which is attached hereto and incorporated by reference into this Attachment, for inpatient admissions occurring in RY21 on or after October 1, 2020 through September 30, 2021.
3. The supplemental payment methodologies specified in **Section III.J** are effective in RY21 beginning October 1, 2020 through September 30, 2021.
4. The Pay-for-Performance payment methodologies specified in **Section III.K** are effective in RY21 beginning October 1, 2020 through September 30, 2021.
5. In-state Acute Hospitals are defined in **Section II**.
6. This **Section I.A.6** describes the payment methods to out-of-state acute hospitals for inpatient hospital services. Components of the out-of-state payment methods that are based on the in-state methods will simultaneously adjust effective with the 2nd RY21 Period (as defined in **Section II**) to reflect updates implemented effective with the 2nd RY21 Period to the in-state method, as applicable.

Except if **subsection 6(e)** applies, below, payment for out-of-state acute inpatient hospital services is as follows:

- (a) Payment Amount Per Discharge.
 - (i) Out-of-State APAD: Out-of-state acute hospitals are paid an adjudicated payment amount per discharge (“Out-of-State APAD”) for inpatient services; provided that the out-of-state APAD is not paid for inpatient services that are paid on a per diem basis under **subsections 6(b) or (c)** and that payment for certain APAD carve-out services (as described in **subsection 6(d)**, below) is governed by **subsection 6(d)**, and not this **subsection 6(a)**. The discharge-specific Out-of-State APAD is equal to the sum of the statewide operating standard per discharge and the statewide capital standard per discharge both as in effect for in-state

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

acute hospitals, multiplied by the MassHealth DRG Weight assigned to the discharge using information on the claim.

(ii) **Out-of-State Outlier Payment:** If the calculated cost of the discharge exceeds the discharge-specific outlier threshold, the out-of-state acute hospital is also paid an outlier payment for that discharge (“Out-of-State Outlier Payment”). The Out-of-State Outlier Payment is equal to the Marginal Cost Factor in effect for in-state acute hospitals multiplied by the difference between the calculated cost of the discharge and the discharge-specific outlier threshold.

- a. The “calculated cost of the discharge” equals the out-of-state acute hospital’s allowed charges for the discharge, multiplied by the applicable inpatient cost-to-charge ratio. For High MassHealth Volume Hospitals, the inpatient cost-to-charge ratio is hospital-specific. For all other out-of-state acute hospitals, the median in-state acute hospital inpatient cost-to-charge ratio in effect, based on MassHealth discharge volume, is used. An out-of-state acute hospital’s charges for any APAD carve-out services (as described in **subsection 6(d)**, below) will not be included in this calculation.
- b. The “discharge-specific outlier threshold” equals the sum of the hospital’s Out-of-State APAD corresponding to the discharge, and the Fixed Outlier Threshold in effect for in-state acute hospitals.

(b) **Out-of-State Transfer Per Diem:**

(i) Out-of-state acute hospitals are paid the out-of-state transfer per diem for inpatient services as calculated and capped as set forth in **subsection 6(b)(ii)** (“Out-of-State Transfer Per Diem”) in the following circumstances.

- a. If an out-of-state acute hospital transfers a MassHealth inpatient to another acute hospital, the transferring out-of-state acute hospital is paid the Out-of-State Transfer Per Diem for the period during which the Member was an inpatient at the transferring hospital.
- b. MassHealth will pay the Out-of-State Transfer Per Diem in such other additional circumstances as MassHealth determines in-state acute hospitals would be paid the in-state Transfer Per Diem, as applicable.

(ii) The out-of-state transfer per diem equals the sum of the hospital’s Out-of-State APAD plus, if applicable, any Out-of-State Outlier Payment, that would have otherwise applied for the period during which the transfer per diem is payable, as calculated by EOHHS, divided by the mean in-state acute hospital all payer length of stay for the applicable APR-DRG that is assigned. Total out-of-state transfer per diem payments for a given hospital stay are capped at the sum of the hospital’s Out-of-State APAD plus, if applicable, any Out-of-State Outlier Payment that would have otherwise applied for the transfer per diem period.

- (c) **Out-of-State Psychiatric Per Diem:** If an out-of-state acute hospital admits a MassHealth patient primarily for Behavioral Health Services, the out-of-state acute hospital will be paid an all-inclusive psychiatric per diem equal to the psychiatric per diem most recently in effect for in-state acute hospitals (“Out-of-State Psychiatric Per Diem”), and no other payment methods apply.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

(d) Payment for APAD Carve-Outs.

- (i) Long-Acting Reversible Contraception (LARC) devices: Out-of-state acute hospitals will be paid for LARC Devices (as defined in **Section II**) in accordance with Section 8.d. of Attachment 4.19-B of the State Plan if the LARC procedure occurs immediately post-labor and delivery during the same inpatient hospital labor and delivery stay for clinically appropriate members. No other payment methods apply to such devices.
- (ii) APAD Carve-Out Drugs: Out-of-state acute hospitals will be paid for APAD Carve-Out Drugs (as defined in **Section II**) in accordance with the payment method applicable to such drugs as in effect for in-state acute hospitals on the date of service.
- (e) For medical services payable by MassHealth that are not available in-state, an out-of-state acute hospital that is not a High MassHealth Volume Hospital will be paid the rate of payment established for the medical service under the other state's Medicaid program (or equivalent) or such other rate as MassHealth determines necessary to ensure member access to services.
- (f) For purposes of this **Section I.A.6**, a "High MassHealth Volume Hospital" is any out-of-state acute hospital provider that had at least 100 MassHealth discharges during the most recent federal fiscal year for which complete data is available.
- (g) The payment methods in this **Section I.A.6** are the same for private and governmental providers.

B. Non-Covered Services

The payment methods specified in this Attachment do not apply to the following Inpatient Hospital Services:

1. Behavioral Health Services for Members Enrolled with the Behavioral Health Contractor

MassHealth contracts with a Behavioral Health (BH) Contractor to provide Behavioral Health Services to Members enrolled with the BH Contractor. Hospitals are not entitled to, and may not claim for, any payment from EOHHS for any services that are BH Contractor-covered services or are otherwise payable by the BH Contractor.

2. MCO Services

MassHealth contracts with Managed Care Organizations (MCOs) to provide medical services, including Behavioral Health Services, to Members enrolled with the MCO. Hospitals are not entitled to any payment from EOHHS, and may not claim such reimbursement for any services provided to Members enrolled with an MCO that are MCO-covered services or are otherwise reimbursable by the MCO.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

3. Air Ambulance Services

In order to receive payment for air ambulance services, providers must have a separate contract with EOHHS for such services.

4. Non-Acute Units and Other Separately Licensed Units in Acute Hospitals

This Attachment shall not govern payment to Acute Hospitals for services provided to Members in separately licensed units within an Acute Hospital or in Non-Acute Units other than Rehabilitation Units (see **Section III.H** below).

5. Behavioral Health Diversionary Services

In order to receive reimbursement for Behavioral Health Diversionary Services, providers must have a separate contract with EOHHS for such services.

II. Definitions

The definitions set forth in the “**1st RY21 Period**” column, below, apply during the **1st RY21 Period** (as defined below). The definitions set forth in the “**2nd RY21 Period**” column, below, apply during the **2nd RY21 Period** (as defined below), unless (i) that column specifies that there is no change to the definition, or (ii) for purposes of the APAD, Outlier Payment, and Transfer Per Diem payment methodologies set forth in **Sections III.B through III.D**, below, the admission occurred in the 1st RY21 Period, in which case the definitions in the **1st RY21 Period** column continue to apply.

<u>Defined Term</u>	<u>Definition Applicable During 1st RY21 Period</u>	<u>Definition Applicable During 2nd RY21 Period</u>
1st RY21 Period	The “1 st RY21 Period” is the portion of RY21 from October 1, 2020 through October 31, 2020.	No change to definition.
2nd RY21 Period	The “2 nd RY21 Period” is the portion of RY21 from November 1, 2020 through September 30, 2021.	No change to definition.
Accountable Care Organization (ACO)	An entity that enters into a population-based payment model contract with EOHHS as an accountable care organization, where in the entity is held financially accountable for the cost and quality of care for an attributed or enrolled member population. ACOs include Accountable Care Partnership Plans (ACPPs), Primary Care ACOs, and MCO-Administered ACOs.	No change to definition.
Accountable Care Partnership Plan (ACPP)	A type of ACO with which the MassHealth agency contracts under its ACO program to provide, arrange for, and coordinate care and certain other medical services to members on a capitated basis and which is approved by the Massachusetts Division of Insurance as a health-maintenance organization (HMO), and which is organized primarily for the purpose of providing health care services.	No change to definition.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

<u>Defined Term</u>	<u>Definition Applicable During 1st RY21 Period</u>	<u>Definition Applicable During 2nd RY21 Period</u>
Actual Acquisition Cost	For purposes of Section III.I.2 , the Hospital’s “actual acquisition cost” of the Drug is the Hospital’s invoice price for the Drug, net of all on- or off- invoice reductions, discounts, rebates, charge backs and similar adjustments that the Hospital has or will receive from the drug manufacturer or other party for the Drug that was administered to the Member while the Member was admitted in the Hospital, including any efficacy-, outcome-, or performance-based guarantee (or similar arrangements), whether received pre- or post-payment.	No change to definition.
Acute Hospital	See Hospital.	No change to definition.
Adjudicated Payment Amount Per Discharge (APAD)	A Hospital-specific, DRG-specific all-inclusive facility payment for an acute inpatient hospitalization from admission through discharge, which is the complete fee-for-service payment for such acute hospitalization, excluding the additional payment of any Outlier Payment. The APAD is not paid for Administrative Days or for Inpatient Services that are paid on a Transfer Per Diem, Psychiatric Per Diem or Rehabilitation Per Diem basis under this Attachment. The APAD is also not payment for LARC Devices or for APAD Carve-Out Drugs, which may be paid separately as described in Section III.I . Calculation of the APAD is discussed in Section III.B (utilizing the 1 st RY21 Period methodology).	A Hospital-specific, DRG-specific all-inclusive facility payment for an acute inpatient hospitalization from admission through discharge, which is the complete fee-for-service payment for such acute hospitalization, excluding the additional payment of any Outlier Payment. The APAD is not paid for Administrative Days or for Inpatient Services that are paid on a Transfer Per Diem, Psychiatric Per Diem or Rehabilitation Per Diem basis under this Attachment. The APAD is also not payment for LARC Devices or for APAD Carve-Out Drugs, which may be paid separately as described in Section III.I . Calculation of the APAD is discussed in Section III.B (utilizing the 2 nd RY21 Period methodology).

State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

<u>Defined Term</u>	<u>Definition Applicable During 1st RY21 Period</u>	<u>Definition Applicable During 2nd RY21 Period</u>
Administrative Day (AD)	A day of inpatient hospitalization on which a Member's care needs can be provided in a setting other than an Acute Hospital, and on which the Member is clinically ready for discharge, but an appropriate institutional or non-institutional setting is not readily available.	No change to definition.
All Patient Refined– Diagnostic Related Group (APR-DRG or DRG)	The All Patient Refined Diagnosis Related Group and Severity of Illness (SOI) assigned using the 3M APR-DRG Grouper, version 36, unless otherwise specified.	No change to definition.
APAD Base Year	The hospital-specific base year for the Adjudicated Payment Amount per Discharge (APAD) is FY17, using FY17 Massachusetts Hospital cost reports as screened and updated as of July 24, 2018	No change to definition.
APAD Carve-Out Drugs	Drugs that are carved out of the APAD payment and separately paid pursuant to Section III.I.2 . APAD Carve-Out Drugs are identified on the MassHealth Acute Hospital Carve-Out Drugs List within the MassHealth Drug List.	No change to definition.
Average (or Mean) Length of Stay	The sum of non-psychiatric acute inpatient days for relevant discharges, divided by the number of discharges. Average Length of Stay is determined based on MassHealth discharges or all-payer discharges, as specified in this Attachment.	No change to definition.
Behavioral Health (BH) Contractor	The entity with which EOHHS contracts to provide, arrange for and coordinate Behavioral Health Services to enrolled Members on a capitated basis, and which meets the	No change to definition.

	definition of prepaid inpatient health plan at 42 C.F.R. § 438.2.	
Behavioral Health Diversionary Services	Mental health and substance use disorder services provided outside of the RFA and Contract as clinically appropriate alternatives to Behavioral Health Inpatient Services, to support an Enrollee returning to the community following a 24-hour acute placement, or to provide intensive support to maintain functioning in the community. There are two categories of Diversionary Services: those services which are provided in a 24-hour facility, and those services which are provided in a non-24-hour setting or facility.	No change to definition.
Behavioral Health Services (or Behavioral Health)	Services provided to Members who are being treated for psychiatric disorders or substance use disorders.	No change to definition.
Casemix Index	A measure of intensity of services provided by a Hospital to a group of patients, using the APR-DRG methodology, as specified in this Attachment. A Hospital's Casemix Index is calculated by dividing a Hospital's APR-DRG cumulative MassHealth or all-payer weights (using Massachusetts weights) by the Hospital's MassHealth or all-payer discharges. The weight for each APR-DRG is based on Massachusetts data.	No change to definition.
Center for Health Information and Analysis (CHIA)	The Center for Health Information and Analysis established under M.G.L. c. 12C.	No change to definition.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

<u>Defined Term</u>	<u>Definition Applicable During 1st RY21 Period</u>	<u>Definition Applicable During 2nd RY21 Period</u>
Community-based Physician	Any physician or physician group practice, excluding interns, residents, fellows, and house officers, who is not a Hospital-Based Physician. For purposes of this definition and related provisions, the term physician includes dentists, podiatrists, and osteopaths.	No change to definition.
Contract	See RFA and Contract.	No change to definition.
Critical Access Hospital (CAH)	An acute hospital that, prior to October 1, 2019, was designated by CMS as a Critical Access Hospital, and that continues to maintain that status.	An acute hospital that, prior to October 1, 2020, was designated by CMS as a Critical Access Hospital, and that continues to maintain that status.
DMH-Licensed Bed	A bed in a Hospital that is located in a unit licensed by the Massachusetts Department of Mental Health (DMH).	No change to definition.
Discharge-Specific Case Cost	The product of the Hospital's MassHealth allowed charges for a specific discharge and the Hospital's inpatient cost to charge ratio as calculated by EOHHS using the Hospital's FY18 Massachusetts Hospital cost report. For applicable discharges, a Hospital's charges corresponding to LARC Devices or APAD Carve-Out Drugs are excluded in calculating the Discharge-Specific Case Cost.	The product of the Hospital's MassHealth allowed charges for a specific discharge and the Hospital's inpatient cost to charge ratio as calculated by EOHHS using the Hospital's FY18 Massachusetts Hospital Cost Report. For applicable discharges, a Hospital's charges corresponding to LARC Devices or APAD Carve-Out Drugs are excluded in calculating the Discharge-Specific Case Cost.
Discharge-Specific Outlier Threshold	The sum of the APAD for a specific discharge (utilizing the methodology applicable to the 1 st RY21 Period), and the Fixed Outlier Threshold.	The sum of the APAD for a specific discharge (utilizing the methodology applicable to the 2 nd RY21 Period), and the Fixed Outlier Threshold.
Drugs	Drugs and biologics (including, e.g., cell and gene therapies), or any other similar substance containing one or	No change to definition.

	more active ingredients in a specified form and strength. Each dosage form and strength is a separate Drug.	
Excluded Units	Non-Acute Units as defined in this section; any unit which has a separate license from the Hospital; psychiatric and substance use disorder units; and non-distinct observation units.	No change to definition.
Executive Office of Health and Human Services (EOHHS)	The single state agency that is responsible for the administration of the MassHealth program, pursuant to M.G.L. c. 118E and Titles XIX and XXI of the Social Security Act and other applicable laws and waivers.	No change to definition.
Fiscal Year (FY)	The time period of 12 months beginning on October 1 of any calendar year and ending on September 30 of the immediately following calendar year. This period coincides with the federal fiscal year (FFY). FY21 begins on October 1, 2020 and ends on September 30, 2021.	No change to definition.
Fixed Outlier Threshold	For the 1 st RY21 Period, the Fixed Outlier Threshold for purposes of calculating any Outlier Payment is \$38,000.00.	For the 2 nd RY21 Period, the Fixed Outlier Threshold for purposes of calculating any Outlier Payment is \$38,400.00.
Freestanding Pediatric Acute Hospital	A Hospital which limits admissions primarily to children and which qualifies as exempt from the Medicare prospective payment system regulations.	No change to definition.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

<u>Defined Term</u>	<u>Definition Applicable During 1st RY21 Period</u>	<u>Definition Applicable During 2nd RY21 Period</u>
Gross Patient Service Revenue	The total dollar amount of a Hospital's charges for services rendered in a Fiscal Year.	No change to definition.
High Medicaid Volume Freestanding Pediatric Acute Hospital	A Freestanding Pediatric Acute Hospital with more than 1,000 Medicaid discharges in FY12 for which a SPAD was paid, as determined by paid claims in MMIS as of May 11, 2013, and for which MassHealth was the primary payer.	No change to definition.
High Medicaid Volume Safety Net Hospital	An Acute Hospital which had a ratio of Medicaid inpatient days to total inpatient days that was greater than 45% in FY14 based on the Hospital's FY14 403 cost report.	No change to definition.
Hospital	Any health care facility which: <ul style="list-style-type: none"> a. operates under a hospital license issued by the Massachusetts Department of Public Health (DPH) pursuant to M.G.L. c. 111 § 51; b. is Medicare certified and participates in the Medicare program; and c. has more than fifty percent (50%) of its beds licensed as medical/surgical, intensive care, coronary care, burn, pediatric (Level I or II), pediatric intensive care (Level III), maternal (obstetrics) or neonatal intensive care (Level III) beds, as determined by DPH and currently utilizes more than fifty percent (50%) of its beds exclusively as such, as determined by EOHHS. 	No change to definition.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

<u>Defined Term</u>	<u>Definition Applicable During 1st RY21 Period</u>	<u>Definition Applicable During 2nd RY21 Period</u>
Hospital-Based Physician	Any physician, or physician group practice, excluding interns, residents, fellows, and house officers, who contracts with a Hospital to provide Inpatient Services to Members at a site for which the Hospital is otherwise eligible to receive payment under the RFA. For purposes of this definition and related provisions, the term physician includes dentists, podiatrists and osteopaths. Nurse practitioners, nurse midwives, physician assistants, and other allied health professionals are not Hospital-Based Physicians.	No change to definition.
Hospital Discharge Data (HDD)	Hospital discharge filings for FY17 provided and verified by each hospital, submitted to CHIA, and screened and updated by CHIA. HDD is used for determining casemix as part of the APAD rate development for purposes of Section III.B , as applicable to the 1 st RY21 Period.	Hospital discharge filings for FY17 provided and verified by each hospital, submitted to CHIA, and screened and updated by CHIA. HDD is used for determining casemix as part of the APAD rate development for purposes of Section III.B , as applicable to the 2 nd RY21 Period.
Inflation Factors for Administrative Days	An inflation factor that is a blend of the Centers for Medicare and Medicaid Services (CMS) market basket and the Massachusetts Consumer Price Index (CPI). Specifically, the CPI replaces the labor-related component of the CMS market basket to reflect conditions in the Massachusetts economy. The Inflation Factor for Administrative Days is as follows: <ul style="list-style-type: none"> • 1.937% reflects the price changes between RY16 and RY17. 	Not applicable

Wholesale Acquisition Cost (WAC)	The wholesale acquisition cost (WAC) of the Drug as published by First Data Bank or other national price compendium designated by EOHHS.	No change to definition.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

III. Payment for Inpatient Services

A. Overview

1. Except as otherwise provided in **subsections C through I** below, and in **Exhibit 1**, fee-for-service payments for Inpatient Services provided to MassHealth Members not enrolled in an MCO will be a Hospital-specific, DRG-specific Adjudicated Payment Amount per Discharge (APAD) (see **subsection B** below).

For qualifying discharges, Hospitals may also be paid an Outlier Payment in addition to the APAD, under the conditions set forth in, and calculated as described in, **subsection C**, below.

Payment separate from the APAD may also be made to Hospitals for LARC Devices and APAD Carve-Out Drugs, respectively, as described in **subsection I.1** and **I.2**, respectively.

2. **Subsections C through I** describe non-APAD fee-for-service payments, including, as applicable, Outlier Payments, and payment for Behavioral Health Services, transfer patients, Hospital-Based Physician services, Administrative Days, Rehabilitation Unit services in Acute Hospitals, LARC Devices and APAD Carve-Out Drugs. Payment for other unique circumstances is described in **subsection J**, and **Exhibit 1**. Pay-for-Performance payments are described in **subsection K**.
3. For Inpatient Services paid on a per diem basis, MassHealth pays the lesser of (i) the per diem rate, or (ii) 100% of the Hospital's actual charge submitted.

B. Calculation of the Adjudicated Payment Amount Per Discharge (APAD)

RY21 is bifurcated into the 1st RY21 Period and the 2nd RY21 Period for purposes of applying the APAD payment methodology. The APAD methodology is set forth in **Section III.B** below. The “**1st RY21 Period**” column applies to admissions occurring in the 1st RY21 Period, and incorporates applicable definitions in **Section II** that apply to the 1st RY21 Period. The “**2nd RY21 Period**” column applies to admissions occurring in the 2nd RY21 Period, and incorporates applicable definitions in **Section II** that apply to the 2nd RY21 Period.

D. Transfer Per Diem Payments

RY21 is bifurcated into the 1st RY21 Period and the 2nd RY21 Period for purposes of applying the Transfer Per Diem payment methodology. The Transfer Per Diem payment methodology is set forth in this **Section III.D**; provided that, (i) for admissions in the 1st RY21 Period, applicable definitions from **Section II** that apply to the 1st RY21 Period are incorporated; (ii) for admissions in the 2nd RY21 Period, applicable definitions from **Section II** that apply to the 2nd RY21 Period are incorporated; (iii) all references in this **Section III.D** to the APAD and Outlier Payment methodologies in **Sections III.B** and **III.C** shall refer to the methodology that applies to the specific admission (1st RY21 Period method for admissions in the 1st RY21 Period or 2nd RY21 Period method for admissions in the 2nd RY21 Period); and (iv) any other differences in the Transfer Per Diem methodology as between the 1st RY21 Period and the 2nd RY21 Period are as specified below.

Hospitals will be paid a Transfer Per Diem under the circumstances specified in this section. In general, total payments made on a Transfer Per Diem basis are capped at the Hospital's Total Transfer Payment Cap.

The Transfer Per Diem rate is case-specific and is calculated as set forth in **Section III.D.1**, below.

1. Transfer between Hospitals

In general, a Hospital that transfers a patient to another Acute Hospital will be paid at the Transfer Per Diem rate, up to the Transferring Hospital's Total Transfer Payment Cap.

In general, the Hospital that is receiving the patient will be paid (a) on a per discharge basis in accordance with the APAD, and, if applicable, Outlier Payment methodology(ies) specified in **Sections III.B** and **III.C**, above, if the patient is actually discharged from that

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

Hospital; or (b) on a Transfer Per Diem basis, capped at the Hospital’s Total Transfer Payment Cap, if the Hospital transfers the patient to another Acute Hospital or back to the Acute Hospital from which it received the patient.

The Transfer Per diem rate will equal the following. For admissions in the 1st RY21 Period, the “1st RY21 Period” column applies. For admissions in the 2nd RY21 Period, the “2nd RY21 Period” column applies.

1st RY21 Period (for admissions occurring in the 1st RY21 Period)	2nd RY21 Period (for admissions occurring in the 2nd RY21 Period)
The Transfer Per Diem rate equals the Transferring Hospital’s Total Case Payment amount, divided by the applicable DRG-specific mean all-payer length of stay from the APR-DRG Massachusetts-specific weight file applicable to the 1 st RY21 Period. For purposes of this calculation, the Total Case Payment amount is calculated utilizing the APAD, and if applicable, Outlier Payment methodology(ies) set forth in Section III.B. and III.C. , above, for the period for which the Transferring Hospital is being paid on a Transfer Per Diem basis pursuant to this Section III.D. Payment on a Transfer Per Diem basis will be capped at the Transferring Hospital’s Total Transfer Payment Cap.	The Transfer Per Diem rate equals the Transferring Hospital’s Total Case Payment amount, divided by the applicable DRG-specific mean all-payer length of stay from the APR-DRG Massachusetts-specific weight file applicable to the 2 nd RY21 Period. For purposes of this calculation, the Total Case Payment amount is calculated utilizing the APAD, and if applicable, Outlier Payment methodology(ies) set forth in Section III.B. and III.C. , above, for the period for which the Transferring Hospital is being paid on a Transfer Per Diem basis pursuant to this Section III.D. Payment on a Transfer Per Diem basis will be capped at the Transferring Hospital’s Total Transfer Payment Cap.

See **Table 3: Claim with Transfer (APAD only)** and **Table 4: Claim with Transfer (APAD and Outlier)**, respectively, below, for illustrative examples of the calculation of the Transfer Per Diem, Total Transfer Payment Cap, and corresponding Total Transfer Case Payment, that would apply to the case. These illustrative examples apply to all subsections of **Section III.D.**, and assume that the 2nd RY21 Period applies.

2. Transfers within a Hospital

Except as described below, a transfer within a Hospital is not considered a discharge. Consequently, in most cases a transfer between units within a Hospital will be paid on a Transfer Per Diem basis, capped at the Hospital's Total Transfer Payment Cap. This section outlines payment under some specific transfer circumstances.

a. Transfer to/from a Non-Acute, Skilled Nursing, or other Separately Licensed Unit within the Same Hospital

If a patient is transferred from an acute bed to a Non-Acute bed (except for a DMH-licensed bed or any separately licensed unit in the same Hospital), the transfer is considered a discharge. EOHHS will pay the Hospital's discharge-specific APAD for the portion of the stay that preceded the patient's discharge to any such unit.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

b. **MassHealth Payments for Newly Eligible Members, Members Who Change Enrollment from the PCC Plan, Primary Care ACO, or Fee-for-Service to an MCO (or vice versa) during a Hospital Stay, or in the Event of Exhaustion of (or eligibility for) Other Insurance**

When a patient becomes MassHealth-eligible (or loses MassHealth eligibility), after the date of admission and prior to the date of discharge, changes enrollment from the PCC Plan, a Primary Care ACO, or Fee-for-Service to an MCO (or vice versa) during the course of a Hospital stay, or exhausts other insurance benefits (or becomes eligible for other insurance benefits) after the date of admission and prior to the date of discharge, the MassHealth-covered portion of the acute stay will be paid at the Transfer Per Diem rate, capped at the Hospital's Total Transfer Payment Cap, or if the patient is at the Administrative Day level of care, at the applicable AD per diem rate, in accordance with **Section III.G.**

c. **Admissions Following Outpatient Surgery or Procedure**

If a patient who requires Inpatient Hospital Services is admitted following an outpatient surgery or procedure at the Hospital, the Hospital shall be paid at the Transfer Per Diem rate, capped at the Hospital's Total Transfer Payment Cap.

d. **Transfer between a DMH-licensed Bed and Any Other Bed within the Same Hospital**

Payment for a transfer between a DMH-licensed Bed and any other bed within a Hospital will vary depending on the circumstances involved, such as managed care status, whether the Hospital is part of the BH network, and the type of service provided. See also **subsection e**, below.

When a Member who is not enrolled with the BH Contractor transfers between a DMH-licensed Bed and a non-DMH-licensed Bed in the same Hospital during a single admission, except in the circumstances described in the last sentence of this paragraph, EOHHS will pay the Hospital at the Transfer Per Diem rate, capped at the Hospital's Total Transfer Payment Cap for the non-DMH-licensed bed portion of the stay, and on a Psychiatric Per Diem basis (see **Section III.E**, below) for the DMH-licensed bed portion of the stay. For the duration of the Governor's March 10, 2020, Declaration of a State of Emergency within the Commonwealth due to COVID-19, a Member transferred between a DMH-Licensed Bed and a non-DMH-Licensed Bed whose primary diagnosis while in the DMH-Licensed bed is not BH-related will not be considered a Transfer Patient.

If the Member is enrolled with the BH Contractor and the Hospital is in the BH Contractor's network, EOHHS will pay only for the non-DMH-licensed bed portion of the stay, and such payment will be at the Transfer Per Diem rate, capped at the Hospital's Total Transfer Payment Cap.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

e. **Change of BH Managed Care Status during a Behavioral Health Hospitalization**

When a Member is enrolled with the BH Contractor during a Behavioral Health admission and the Hospital is in the BH Contractor's network, the portion of the Hospital stay during which the Member is enrolled with the BH Contractor is payable by the BH Contractor. The portion of the Hospital stay during which the Member was not enrolled with the BH Contractor will be paid by EOHHS on a Psychiatric Per Diem basis (see Section III.E, below) for Behavioral Health Services in a DMH-licensed Bed, or at the Transfer Per Diem rate, capped at the Hospital's Total Transfer Payment Cap, for Behavioral Health Services in a non-DMH-licensed Bed.

E. Payments for Behavioral Health Services (Psychiatric Per Diem)

1. Overview

- a. Services provided to MassHealth Members in DMH-licensed Beds who are not enrolled with the BH Contractor or an MCO shall be paid on an all-inclusive Psychiatric Per Diem basis.
- b. The statewide standard Psychiatric Per Diem rate is the sum of the three Psychiatric Per Diem Base Year Operating Standards (see **subsection 2**) and the Psychiatric Per Diem Base Year Capital Standard (see **subsection 3**), adjusted for the current Rate Year (see **subsection 4**).
- c. The Psychiatric Per Diem Base Year is RY04. MassHealth utilizes the costs, statistics, and revenue reported in the 2004 -403 cost reports as screened and updated as of March 10, 2006.
- d. RY21 is bifurcated into the 1st RY21 Period and the 2nd RY21 Period for purposes of applying this Psychiatric Per Diem payment methodology. Differences in the methodology and the final per diem rate that applies to dates of services in the 1st RY21 Period and the 2nd RY21 Period, respectively, are identified in **Section III.E.4**, below. The methodology is otherwise the same for both periods.

2. Determination of the Psychiatric Per Diem Base Year Operating Standards

a. **Standard for Inpatient Psychiatric Overhead Costs**

The Standard for Inpatient Psychiatric Overhead Costs is the median of the inpatient psychiatric overhead costs per day for the array of Acute Hospitals providing mental health services in DMH-licensed beds. The median is determined based upon inpatient psychiatric days. The base year Standard for Inpatient Psychiatric Overhead Costs is \$363.28.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

b. Standard for Inpatient Psychiatric Direct Routine Costs

The Standard for Inpatient Psychiatric Direct Routine Costs is the median of the inpatient psychiatric direct routine costs per day (minus direct routine physician costs) for the array of Acute Hospitals providing mental health services in DMH-licensed beds. The median is determined based upon inpatient psychiatric days. The base year Standard for Inpatient Psychiatric Direct Routine Costs is \$325.13.

c. Standard for Inpatient Psychiatric Direct Ancillary Costs

The Standard for Inpatient Psychiatric Direct Ancillary Costs is the median of the inpatient psychiatric direct ancillary costs per day for the array of Acute Hospitals providing mental health services in DMH-licensed beds. The median is determined based upon inpatient psychiatric days. The base year Standard for Inpatient Psychiatric Direct Ancillary Costs is \$56.83.

3. Determination of the Psychiatric Per Diem Base Year Capital Standard

The Standard for Inpatient Psychiatric Capital Costs is the median of the inpatient psychiatric capital costs per day for the array of Acute Hospitals providing mental health services in DMH-licensed beds. The median is determined based upon inpatient psychiatric days. The base year Standard for Inpatient Psychiatric Capital Costs is \$30.73.

- a. Each Hospital's base year psychiatric capital cost per day equals the base year psychiatric capital cost divided by the greater of: the actual base year psychiatric days or eighty-five percent (85%) of the base year maximum licensed psychiatric bed capacity, measured in days.
- b. Each Hospital's base year capital costs consist of the Hospital's actual Psychiatric Per Diem Base Year patient care capital requirement for historical depreciation for building and fixed equipment, reasonable interest expenses, amortization, leases, and rental of facilities. Any gains from the sale of property will be offset against the Hospital's capital expenses.

4. Adjustment to Base Year Standard

In calculating the final statewide standard Psychiatric Per Diem rate applicable to dates of service in RY21, the three Psychiatric Per Diem Base Year Operating Standards are updated between the Base Year and RY2007 using the Inflation Factors for Operating Costs (see Section II above). The Psychiatric Per Diem Base Year Capital Standard is updated between the Base Year and RY2007 using the Inflation Factors for Capital Costs (see Section II above).

The Inflation Factors for Operating Costs (see Section II above) between RY08 and RY10 and between RY12 and RY20 were then applied to the rate calculated above to determine the statewide standard Psychiatric Per Diem rate applicable to dates of service in RY21.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

The total adjustment to Base Year Costs from the Psychiatric Per Diem Base Year costs for the RY21 Period Psychiatric Per Diem is \$165.13. The statewide standard Psychiatric Per Diem rate applicable to dates of service in RY21 is \$941.10.

F. Physician Payment

1. For physician services provided by Hospital-Based Physicians to MassHealth patients, the Hospital will be paid for the professional component of Hospital-Based Physician services in accordance with Section 8.d. of Attachment 4.19-B of the State Plan.
2. Hospitals will be paid for Hospital-Based Physician services only if the Hospital-Based Physician took an active patient care role, as opposed to a supervisory role, in providing the Inpatient Service(s) on the billed date(s) of service.
3. Physician services provided by residents and interns are not reimbursable separately. The Hospital-Based Physician may not bill for any professional component of the service that is billed by the Hospital. Hospitals will only be reimbursed separately for professional fees for practitioners who are Hospital-Based Physicians as defined in **Section II**.
4. Hospitals shall not be paid for inpatient physician services provided by Community-Based Physicians.

G. Payments for Administrative Days

RY21 is bifurcated into the 1st RY21 Period and the 2nd RY21 Period for purposes of applying the payment methodology for Administrative Days. The methodology in the “1st RY21 Period” column of this **Section III.G**, below, applies to dates of service in the 1st RY21 Period and incorporates applicable definitions in **Section II** that apply to the 1st RY21 Period. The methodology in the “2nd RY21 Period” column applies to dates of service in the 2nd RY21 Period and incorporates applicable definitions in **Section II** that apply to the 2nd RY21 Period.

1st RY21 Period (for dates of service occurring in the 1st RY 21 Period)	2nd RY21 Period (for dates of service occurring in the 2nd RY 21 Period)
1. Payments for Administrative Days will be made on a per diem basis as described below. These per diem rates are all-inclusive and represent payment in full for all Administrative Days in all Acute Hospitals.	1. Payments for Administrative Days will be made on a per diem basis as described below. These per diem rates are all-inclusive and represent payment in full for all Administrative Days in all Acute Hospitals.
2. The AD rate is a base per diem payment and an ancillary add-on.	2. The AD rate is a base per diem payment and an ancillary add-on.
3. The base per diem payment is \$201.63, which represents the median nursing	3. The base per diem payment is \$219.14, which represents the median nursing

I. APAD Carve-Outs

1. Payment for LARC Device

A Hospital may be paid separate from the APAD for a LARC Device if the LARC procedure is performed immediately after labor and delivery during same inpatient hospital labor and delivery stay for clinically appropriate members. For qualifying discharge, Hospitals will be reimbursed for LARC Devices in accordance with Section 8.d. of Attachment 4.19-B of the State Plan.

2. Payment for APAD Carve-Out Drugs

RY21 is bifurcated into the 1st RY21 Period and the 2nd RY21 Period for purposes of determining payment for APAD Carve-Out Drugs. The methodology in the “1st RY21 Period” column of this **Section III.I.2**, below, applies to dates of service in the 1st RY21 Period and incorporates applicable definitions in **Section II** that apply to the 1st RY21 Period. The

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

methodology in the “2nd RY21 Period” column applies to dates of service in the 2nd RY21 Period and incorporates applicable definitions in **Section II** that apply to the 2nd RY21 Period.

1st RY21 Period (for dates of service occurring in the 1st RY21 Period)	2nd RY21 Period (for dates of service occurring in the 2nd RY21 Period)
Payment to Hospitals for APAD Carve-Out Drugs administered to Members during an inpatient admission will be the lowest of (1) the Hospital’s Actual Acquisition Cost of the Drug; (2) the Wholesale Acquisition Cost (WAC) of the Drug; and (3) if available, the Medicare Part B rate for the Drug, each as determined by EOHHS.	Payment to Hospitals for APAD Carve-Out Drugs administered to Members during an inpatient admission will be the Hospital’s Actual Acquisition Cost of the Drug.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

J. Payment for Unique Circumstances

1. High Public Payer Hospital Supplemental Payment

a. Eligibility

In order to qualify for the High Public Payer Hospital Supplemental Payment, a Hospital's FY19 public payer percentage, which is the ratio of the Hospital's FY19 Gross Patient Service Revenue from government payers and free care to the Hospital's FY19 Gross Patient Service Revenue ("FY19 Public Payer Percentage"), must exceed 63% ("High Public Payer Threshold"), as determined by EOHHS based on the Hospital's FY19 Massachusetts Hospital Cost Report.

b. Supplemental Payment Methodology

Subject to compliance with all applicable federal rules and payment limits, EOHHS will make a supplemental payment to each Hospital satisfying the eligibility criteria set forth in Section III.J.1.a (each an "Eligible Hospital" for purposes of this Section III.J.1).

"MCO" for purposes of this Section III.J.1 includes only "traditional" MCOs, and excludes ACPPs, Senior Care Organizations (SCOs), and One Care plans.

The inpatient portion of the supplemental payment amount for each Qualifying Hospital will be determined by apportioning a total of \$6.5 million to such Qualifying Hospitals on a pro-rata basis, as follows:

- First, EOHHS will calculate each Eligible Hospital's Weighted Discharge Volume by summing 60% of the Hospital's FY21 Accountable Care Partnership Plan (ACPP) and Primary Care ACO discharge volume, 20% of the Hospital's FY21 MCO discharge volume, and 20% of the Hospital's FY21 PCC Plan discharge volume;
- Second, EOHHS will calculate each Eligible Hospital's Pro-Rata Discharge Volume by dividing its Weighted Discharge Volume by the sum of all Eligible Hospitals' Weighted Discharge Volumes;
- Third, EOHHS will calculate each Eligible Hospital's HPP Ratio by:
 - Subtracting the 63% High Public Payer Threshold from that Hospital's FY19 Public Payer Percentage;
 - Multiplying that difference by 12%; and
 - Adding 2% to that product;
- Fourth, EOHHS will calculate each Eligible Hospital's Inpatient HPP Distribution Percentage by multiplying its Pro-Rata Discharge Volume by its HPP Ratio;

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

- Fifth, EOHHS will calculate each Eligible Hospital's Inpatient HPP Payment Factor by dividing its Inpatient HPP Distribution Percentage by the sum of all Inpatient HPP Distribution Percentages for all Eligible Hospitals; and
- Sixth, EOHHS will calculate the inpatient portion of each Eligible Hospital's supplemental payment by multiplying its Inpatient HPP Payment Factor by \$6.5 million.

For purposes of this calculation, FY21 ACPP, Primary Care ACO, MCO, and PCC Plan discharge volume refers to paid inpatient discharges from the Qualifying Hospital for MassHealth Members enrolled in an ACPP, a Primary Care ACO, an MCO, or the PCC Plan, as determined by EOHHS utilizing, for the ACPP and MCO discharges, ACPP and MCO encounter data submitted by each ACPP or MCO for FY21, respectively, and residing in the MassHealth Data Warehouse as of March 31, 2022, and for the PCC Plan and Primary Care ACO discharges, Medicaid paid claims data for FY21 residing in MMIS as of March 31, 2022 for which MassHealth is primary payer. Only MCO and ACPP encounter data and MMIS paid claims data pertaining to qualifying High Public Payer Hospitals (as specified in **Section III.J.1.a**) is considered in determining the pro rata share.

2. Essential MassHealth Hospitals

a. Eligibility

In order to qualify for payment as an Essential MassHealth Hospital, a Hospital must itself meet, or be within a system of Hospitals, any one of which meets, at least four of the following criteria, as determined by EOHHS, provided that all Hospitals within such system are owned or controlled, directly or indirectly, by a single entity that (i) was created by state legislation prior to 1999; and (ii) is mandated to pursue or further a public mission:

- (1) The Hospital is a non-state-owned public Acute Hospital.
- (2) The Hospital meets the current MassHealth definition of a non-profit teaching Hospital affiliated with a Commonwealth-owned medical school.
- (3) The Hospital has at least 7% of its total patient days as Medicaid days.
- (4) The Hospital is an acute care general Hospital located in Massachusetts which provides medical, surgical, emergency and obstetrical services.
- (5) The Hospital enters into a separate contract with EOHHS relating to payment as an Essential MassHealth Hospital.

Based on these criteria, Cambridge Health Alliance (CHA) and the UMass Memorial Health Care, Inc. Hospitals (UMass Hospitals) are the only Hospitals eligible for this payment.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

b. Supplemental Payment Methodology

Subject to compliance with all applicable federal rules and payment limits, including 42 CFR 447.271, EOHHS will make a supplemental payment to Essential MassHealth Hospitals. This payment is based on approval by EOHHS of the Hospital's accurately submitted and certified EOHHS Office of Medicaid Uniform Medicaid and Low Income Uncompensated Care Cost & Charge Report (UCCR) for the hospital fiscal year corresponding with the payment.

For the UMass Hospitals, the Federal Fiscal Year 2021 (FFY21) inpatient payment amount will be up to \$6,000 times the total number of inpatient days for admissions beginning during FFY21, not to exceed \$8.0 million.

For CHA, the Federal Fiscal Year inpatient payment amount will be the difference between the non-state-owned public hospital Upper Payment Limit (calculated on an annual basis) and other payments made under this Attachment, not to exceed \$7.5 million. Notwithstanding such maximum inpatient amount, EOHHS may make inpatient payments to CHA of up to an additional 10% of the CHA Total Maximum Essential Amount (as defined in this paragraph, below), subject to compliance with all applicable federal rules and payment limits, including 42 CFR 447.271, and satisfying all other conditions of this **Section III.J.2.b** as it applies to CHA, so long as the total inpatient and outpatient Essential MassHealth Hospital supplemental payment amounts to CHA for the Federal Fiscal Year under this paragraph and under **Section III.F.2** of Attachment 4.19-B(1) (TN-020-028) do not, in the aggregate, exceed the CHA Total Maximum Essential Amount. The CHA Total Maximum Essential Amount is \$25.0 million.

The 10% provisions referenced above in this section may be invoked if, upon reconciliation, an applicable outpatient hospital limit would be exceeded if CHA was paid its maximum FFY21 outpatient Essential MassHealth Hospital Supplemental Payment amount under **Section III.F.2** of Attachment 4.19-B(1) (TN-020-028), or if CHA has insufficient outpatient utilization or otherwise to support the payment of such maximum outpatient payment amount.

Essential MassHealth Hospital payments will be made after EOHHS' receipt of the hospital's certified UCCR, finalization of payment data and applicable payment amounts, and receipt of any necessary approvals, but no later than 1 year after receipt of the hospital's final reconciliation UCCR (which must be submitted by 45 days after the Hospital's Medicare 2552 Report for the payment year has been finalized by Medicare's Fiscal Intermediary).

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

3. High Medicaid Volume Freestanding Pediatric Acute Hospitals

a. Eligibility

Based on the definition of High Medicaid Volume Freestanding Pediatric Acute Hospital as defined in **Section II**, Boston Children's Hospital is the only Hospital eligible for this payment.

b. Supplemental Payment Methodology

Subject to compliance with all applicable federal rules and payment limits, EOHHS will make a supplemental payment to High Medicaid Volume Freestanding Pediatric Acute Hospitals to account for high Medicaid volume.

The supplemental payment amount is determined by EOHHS based on data filed by each qualifying Hospital in its financial and cost reports, and projected Medicaid volume for the hospital Federal Fiscal Year. The Federal Fiscal Year payment is based on Medicaid payment and cost data. The payment equals the variance between the Hospital's inpatient Medicaid payments and inpatient Medicaid costs, not to exceed \$3,850,000. High Medicaid Volume Freestanding Pediatric Acute Hospital payments will be made after finalization of payment data, applicable payment amounts, and obtaining any necessary approvals.

4. Acute Hospitals with High Medicaid Discharges

a. Eligibility

In order to qualify for payment as an Acute Hospital with High Medicaid Discharges, a Hospital must be an Acute Hospital that has more than 2.7% of the statewide share of Medicaid discharges, determined by dividing each Hospital's total Medicaid discharges as reported on the Hospital's Massachusetts Hospital Cost Report by the total statewide Medicaid discharges for all Hospitals.

b. Supplemental Payment Methodology

Subject to compliance with all applicable federal rules and payment limits, EOHHS will make a supplemental payment to Acute Hospitals that have higher Medicaid discharges when compared with other participating MassHealth Hospitals.

The payment amount is based on Medicaid payment, cost and charge data for the federal fiscal year. The payment equals the variance between the Hospital's inpatient Medicaid payment and inpatient Medicaid costs, not to exceed the Hospital's Health Safety Net Trust Fund-funded payment amount for the federal fiscal year. Interim payments to Acute Hospitals with High Medicaid Discharges will be reconciled within 12 months after final settlement of the applicable Health Safety Net year.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

5. High Public Payer Behavioral Health Service Supplemental Payment

a. Eligibility

In order to qualify for the High Public Payer Hospital Behavioral Health Supplemental Payment, an Acute Care Hospital must (1) qualify for a RY21 High Public Payer Supplemental Payment pursuant to Section III.J.1; (2) operate at least one DMH-Licensed Bed throughout RY21, and (3) have provided Inpatient Behavioral Health Services to MassHealth members in FY19.

b. Payment Methodology

- (1) Subject to compliance with all applicable federal rules and payment limits, EOHHS will make a supplemental payment to Hospitals that meet the qualifications described in **Section III.J.5.a**, in the aggregate amount of \$9.0 million, to support access to Inpatient Behavioral Health Services for MassHealth Members, with particular emphasis on supporting access to such services for child and adolescent Members, using the APAD payment methodology to develop a proxy that takes into account the various acuity levels such Members present. EOHHS will pay qualifying hospitals in accordance with the formula set forth in **Section III.J.5.b.(2)**, below.

- (2) Each qualifying Hospital receives an amount as calculated by the following methodology:

Step A. Calculate Hospital Specific Payment Amount based on Share of IP BH Days, weighted toward pediatric/adolescent days.

$$\left[\left[\left[\frac{\text{Hospital Specific IP Pedi Adol BH Days}}{\text{Total IP Pedi Adol BH Days for all Hospitals}} * 0.6 \right] + \left[\frac{\text{Hospital Specific IP Adult BH Days}}{\text{Total IP Adult BH Days for all Hospitals}} * 0.4 \right] \right] * \$9,000,000 \right] = A$$

Step B. Calculate Hospital Specific Relative Acuity Adjusted Proxy Payment Amount, determined by APAD grouper methodology.

$$\left[\frac{\text{Hospital specific relative acuity adjusted payment proxy}}{\text{Total relative acuity adjusted proxy payments}} * \$9,000,000 \right] = B$$

Step C. Blend Hospital Specific Payment Amount based on Share of IP BH Days and Hospital Specific Payment Amount based on Relative Acuity Complexity

$$\left[\left[\frac{A}{\$9,000,000} * 0.5 \right] + \left[\frac{B}{\$9,000,000} * 0.5 \right] \right] * \$9,000,000 = \text{Hospital Specific Supplemental Payment}$$

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

Glossary: As used in this **Section III.J.5**, the following terms shall have the meanings that follow:

“BH days” refers to the total number of days in which MassHealth Members (whether fee for service or enrolled in managed care or MBHP) received Inpatient Behavioral Health Services in FY19, using data residing in MMIS and/or the Data Warehouse as of March 31, 2020.

“Hospitals” refers to qualifying Hospitals that meet the requirements of **Section III.J.5.a**, above.

“Pedi Adol” is short for “pediatric and adolescent” and refers to MassHealth members under age 18.

“Adult” refers to MassHealth members age 18 and older.

“Relative Acuity Adjusted Proxy Payment” refers to a relative acuity adjusted proxy payment calculated as follows. To develop a relative acuity adjusted proxy payment, EOHHS processed all Hospital IP BH claims (whether for fee for service members or members enrolled in managed care or MBHP) residing in MMIS and/or the Data Warehouse as of March 31, 2020, using the APAD methodology (used to price medical IP claims). The APAD methodology assigns relative acuity to each discharge and then multiplies the acuity by a base rate to establish an acuity adjusted proxy payment. EOHHS will then take the ratio of each qualifying hospital’s total average relative acuity adjusted proxy payment to the sum of all qualifying hospitals’ acuity adjusted proxy payments to establish each hospital’s pro rata share of such total payments.

“IP” refers to inpatient.

6. Specialized Pediatric Service Hospital Supplemental Payment

a. Eligibility

In order to qualify for the Specialized Pediatric Service Hospital Supplemental Payment, a Hospital must be a Specialized Pediatric Service Hospital, as defined in **Section II**. Based on these criteria, Boston Children's Hospital, Tufts Medical Center, and Massachusetts General Hospital are the only hospitals eligible for this payment.

b. Payment Methodology

Subject to compliance with all applicable federal rules and payment limits, EOHHS will make \$5.5 million in total aggregate supplemental payments to Specialized Pediatric Service Hospitals, with payment to each hospital based on its pro rata share of all Specialized Pediatric Service Hospitals’ acute inpatient discharges of Members meeting certain criteria, according to the methodology that follows.

EOHHS will first calculate each Specialized Pediatric Service Hospital’s pro rata share of all Specialized Pediatric Service Hospitals’ acute inpatient discharges of members under the age of 21 and enrolled in either an ACPP or a Primary Care ACO during the period from October 1,

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

2019 through September 30, 2020. EOHHS will then multiply that ratio by \$5.5 million to determine that Specialized Pediatric Service Hospital's supplemental payment.

7. High Medicaid Volume Safety Net Hospital Supplemental Payment

a. **Eligibility**

In order to qualify for this payment, a Hospital must be a High Medicaid Volume Safety Net Hospital as defined in **Section II**, and must enter into a separate payment agreement with EOHHS relating to payment as a High Medicaid Volume Safety Net Hospital. Based on these criteria, Boston Medical Center is the only hospital eligible for this payment.

b. **Payment Methodology**

Subject to compliance with all applicable federal rules and payment limits, including 42 CFR 447.271, EOHHS will make a supplemental payment to High Medicaid Volume Safety Net Hospitals to account for high Medicaid volume. The payment amount will be based on Medicaid payment and charge data for the federal fiscal year. The payment will be an amount up to the variance between the Hospital's FY21 MMIS-based inpatient hospital charges and its other inpatient hospital payments made under this Attachment for the applicable federal fiscal year, not to exceed \$15.0 million.

8. Infant and Pediatric Outlier Payment Adjustments

a. **Infant Outlier Payment Adjustment**

In accordance with 42 U.S.C. § 1396a(s), EOHHS will make an annual infant outlier payment adjustment to Acute Hospitals for inpatient services furnished to infants under one year of age involving exceptionally high costs or exceptionally long lengths of stay based on the prior year's claims data from the Medicaid Management Information System (MMIS).

i. **Eligibility**

In order to qualify for an infant outlier payment, a Hospital must provide services to infants less than one year of age, and must have one of the following during the Rate Year for individuals less than one year of age:

- An average Medicaid inpatient length of stay that equals or exceeds the statewide weighted average plus two standard deviations; or
- An average cost per inpatient Medicaid discharge that equals or exceeds the Hospital's average cost per Medicaid inpatient discharge plus two standard deviations for individuals of all ages.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

ii. Payment to Hospitals

Annually, each Hospital that qualifies for an infant outlier adjustment receives an equal portion of \$50,000. For example, if two Hospitals qualify for an outlier adjustment, then each Hospital receives \$25,000.

b. Pediatric Outlier Payment Adjustment

In accordance with 42 U.S.C. § 1396a(s), EOHHS will make an annual pediatric outlier payment adjustment to Acute Hospitals for inpatient services furnished to children greater than one year of age and less than six years of age involving exceptionally high costs or exceptionally long lengths of stay based on the prior year's discharge data from MMIS.

i. Eligibility

In order to qualify for a pediatric outlier payment, a Hospital must provide services to children greater than one year of age and less than six years of age, and must have one of the following during the Rate Year for individuals within this age range:

- An average Medicaid inpatient length of stay that equals or exceeds the statewide weighted average plus two standard deviations; or
- An average cost per inpatient Medicaid discharge that equals or exceeds the Hospital's average cost per Medicaid inpatient discharge plus two standard deviations for individuals of all ages.

ii. Payment to Hospitals

Annually, each Acute Hospital qualifying for a pediatric outlier adjustment will receive \$1,000.

9. Adult Inpatient BH Per Diem Supplemental Payment

a. Definitions

For purposes of this **Section III.J.9**, the following terms shall have the following meanings:

1. Adult – a Member aged 18 years or older
2. Adult Inpatient BH Bed-Days Baseline - the adjusted total CY19 Adult Inpatient BH Bed-Days, calculated in accordance with **Section III.J.9. b.2.c**.
3. Adult Inpatient BH Bed-Days Volume - the calculated number of the Hospital's Adult Inpatient BH Bed-Days for a particular period.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

4. Adult Inpatient BH Bed-Day – a day on which a Hospital provided Inpatient Behavioral Health Services to an Adult for which payment was made by MassHealth or a Managed Care Entity, as determined by EOHHS, provided, however, that days on which the Hospital provided Inpatient Behavioral Health Services to an Adult enrolled in SCO, One Care, or the Program of All-Inclusive Care for the Elderly (PACE) shall not constitute Adult Inpatient BH Bed-Days. Adult Inpatient BH Bed-Days shall include each day of utilization for each Adult to whom Inpatient Behavioral Health Services were rendered.
5. Managed Care Entity (MCE) – An MCO or the BH Contractor.
6. First RY21 Performance Period – the period beginning on November 1, 2020 and ending on April 30, 2021.
7. Second RY21 Performance Period – the period beginning on May 1, 2021 and ending on October 31, 2021.
8. RY21 Performance Period – either the First RY21 Performance Period or the Second RY21 Performance Period.

b. Eligibility Criteria

1. A Hospital is eligible for an Adult Inpatient BH Per Diem Supplemental Payment or Payments if its Adult Inpatient BH Bed-Days Volume for an RY21 Performance Period, calculated in accordance with **Section III.J.9.b.3**, exceeds its Adult Inpatient BH Bed-Days Baseline for that RY21 Performance Period, calculated in accordance with **Section III.J.9.b.2**. EOHHS shall determine a Hospital’s eligibility to receive payment pursuant to this Section.
2. EOHHS shall calculate a Hospital’s Adult Inpatient BH Bed-Days Baseline for an RY21 Performance Period as follows:
 - a. If the Hospital had at least one Adult Inpatient BH Bed-Day during each calendar month in CY2019, EOHHS will determine the Hospital’s Adult Inpatient BH Bed-Days Volume during Calendar Year 2019 (“CY19 Adult Inpatient BH Bed-Days”) by summing all of the Hospital’s Adult Inpatient BH Bed-Days during CY19, determined based on CY2019 fee-for-service MMIS paid claims and encounter data submitted to EOHHS by Managed Care Entities as of September 11, 2020.
 - b. If the Hospital had zero Adult Inpatient BH Bed-Days during at least one calendar month in CY2019, EOHHS will calculate the Hospital’s CY19 Adult Inpatient BH Bed-Days as follows:
 - i. If the Hospital had zero Adult Inpatient BH Bed-Days during at least one calendar month in the second half of CY19 (July to December), EOHHS will determine the Hospital’s CY19 Adult Inpatient BH Bed-Days by summing all of the Hospital’s Adult Inpatient BH Bed-Days during CY19, determined

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

based on CY2019 fee-for-service MMIS paid claims and encounter data submitted to EOHHS by Managed Care Entities as of September 11, 2020.

- ii. If a Hospital not described in **section III.J.9.b.2.b.i** had zero Adult Inpatient BH Bed-Days during at least one calendar month in the first half of CY19 (January to June), EOHHS will determine the Hospital's Adult Inpatient BH Bed-Days Volume during the second half of Calendar Year 2019 by summing all of the Hospital's Adult Inpatient BH Bed-Days during the second half of CY19, determined based on CY2019 fee-for-service MMIS paid claims and encounter data submitted to EOHHS by Managed Care Entities as of September 11, 2020. The Hospital's CY19 Adult Inpatient BH Bed-Days shall equal 200% of the Hospital's Adult Inpatient BH Bed-Days Volume during the second half of CY19.
 - c. EOHHS will multiply the Hospital's CY19 Adult Inpatient BH Bed-Days (as calculated pursuant to **Section III.J.9.b.2.a, III.J.9.b.2.b.i, or III.J.9.b.2.b.ii**) by 90%, resulting in the Hospital's Adult Inpatient BH Bed-Days Baseline.
 - d. The Hospital's Adult Inpatient BH Bed-Days Baseline for an RY21 Performance Period shall equal 50% of the amount calculated in **Section III.J.9.b.2.c**.
3. A Hospital's Adult Inpatient BH Bed-Days Volume during an RY21 Performance Period shall be calculated as follows:
- a. The Hospital's Adult Inpatient BH Bed-Days Volume for an RY21 Performance Period shall equal the sum of the Hospital's Inpatient BH Bed-Days during that RY21 Performance Period.
 - b. EOHHS will determine the Hospital's Adult Inpatient BH Bed-Days Volume for the First RY21 Performance Period utilizing RY21 fee-for-service MMIS paid claims and encounter data submitted to EOHHS by Managed Care Entities by October 31, 2021.
 - c. EOHHS will determine the Hospital's Adult Inpatient BH Bed-Days Volume for the Second RY21 Performance Period utilizing RY21 fee-for-service MMIS paid claims and encounter data submitted to EOHHS by Managed Care Entities by April 30, 2022.

c. Payment Methodology

Subject to compliance with all applicable federal rules and payment limits, for each Hospital eligible for an Adult Inpatient BH Per Diem Supplemental Payment for an RY21 Performance Period in accordance with **Section III.J.9.b**, the Hospital's payment shall equal \$250 multiplied by the number of days by which the Hospital's Adult Inpatient BH Bed-Days Volume for the RY21 Performance Period, calculated in accordance with **Section III.J.9.b.3**, exceeds the Hospital's Adult Inpatient BH Bed-Days Baseline for that RY21 Performance Period, calculated in accordance with **Section III.J.9.b.2**.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

10. Pediatric Inpatient BH Per Diem Supplemental Payment

a. Definitions

For purposes of this **Section III.J.10**, the following terms shall have the following meanings:

1. Pediatric – a Member under 18 years of age.
2. Pediatric Inpatient BH Bed-Days Baseline - the adjusted CY19 Pediatric Inpatient BH Bed-Days for a given performance period, calculated in accordance with **Section III.J.10.b.2**.
3. Pediatric Inpatient BH Bed-Days Volume - Pediatric inpatient BH bed-days utilization equal to the Hospital’s Pediatric Inpatient BH Bed-Days for a particular period.
4. Pediatric Inpatient BH Bed-Day – a day on which a Hospital provided Inpatient Behavioral Health Services to a Pediatric Member for which payment was made by MassHealth or a Managed Care Entity, as determined by EOHHS. Pediatric Inpatient BH Bed-Days shall include each day of utilization for each Pediatric Member to whom Inpatient Behavioral Health Services were rendered.
5. Managed Care Entity (MCE) – An MCO or the BH Contractor.
6. First RY21 Performance Period – the period beginning on November 1, 2020 and ending on April 30, 2021.
7. Second RY21 Performance Period – the period beginning on May 1, 2021 and ending on October 31, 2021.
8. RY21 Performance Period – either the First RY21 Performance Period or the Second RY21 Performance Period.

b. Eligibility Criteria

1. A Hospital is eligible for a Pediatric Inpatient BH Per Diem Supplemental Payment or Payments if its Pediatric Inpatient BH Bed-Days Volume for an RY21 Performance Period, calculated in accordance with **Section III.J.10.b.3**, exceeds its Pediatric Inpatient BH Bed-Days Baseline for that RY21 Performance Period, calculated in accordance with **Section III.J.10.b.2**. EOHHS shall determine a Hospital’s eligibility to receive payment pursuant to this **Section III.J.10.b**.
2. EOHHS shall calculate a Hospital’s Pediatric Inpatient BH Bed-Days Baseline for an RY21 Performance Period as follows:
 - a. If the Hospital had at least one Pediatric Inpatient BH Bed-Day during each calendar month in CY2019, EOHHS will determine the Hospital’s Pediatric Inpatient BH Bed-Days Volume during Calendar Year 2019 (“CY19 Pediatric Inpatient BH Bed-Days”)

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

by summing all of the Hospital's Pediatric Inpatient BH Bed-Days during CY19, determined based on CY2019 fee-for-service MMIS paid claims and encounter data submitted to EOHHS by Managed Care Entities as of September 11, 2020.

- b. If the Hospital had zero Pediatric Inpatient BH Bed-Days during at least one calendar month in CY2019, EOHHS will calculate the Hospital's CY19 Pediatric Inpatient BH Bed-Days Volume as follows:
 - i. If the Hospital had zero Pediatric Inpatient BH Bed-Days during at least one calendar month in the second half of CY19 (July to December), EOHHS will determine the Hospital's Pediatric Inpatient BH Bed-Days Volume during Calendar Year 2019 ("CY19 Pediatric Inpatient BH Bed-Days"), by summing all of the Hospital's Pediatric Inpatient BH Bed-Days during CY19, determined based on CY2019 fee-for-service MMIS paid claims and encounter data submitted to EOHHS by Managed Care Entities as of September 11, 2020.
 - ii. If a Hospital not described in **section III.J.10.b.2.b.i** had zero Pediatric Inpatient BH Bed-Days during at least one calendar month in the first half of CY19 (January to June), EOHHS will determine the Hospital's Pediatric Inpatient BH Bed-Days Volume during the second half of Calendar Year 2019, by summing all of the Hospital's Pediatric Inpatient BH Bed-Days during the second half of CY19, determined based on CY2019 fee-for-service MMIS paid claims and encounter data submitted to EOHHS by Managed Care Entities as of September 11, 2020. The Hospital's CY19 Pediatric Inpatient BH Bed-Days shall equal 200% of the Hospital's Pediatric Inpatient BH Bed-Days Volume during the second half of CY19.
 - c. EOHHS will multiply the Hospital's CY19 Pediatric Inpatient BH Bed-Days (as calculated pursuant to **Section III.J.10.b.2.a, III.J.10.b.2.b.i, or III.J.10.b.2.b.ii**) by 80%, resulting in the Hospital's Pediatric Inpatient BH Bed-Days Baseline.
 - d. The Hospital's Pediatric Inpatient BH Bed-Days Baseline for the First RY21 Performance Period shall equal 52.5% of the amount calculated in **Section III.J.10.b.2.c**.
 - e. The Hospital's Pediatric Inpatient BH Bed-Days Baseline for the Second RY21 Performance Period shall equal 47.5% of the amount calculated in **Section III.J.10.b.2.c**.
3. A Hospital's Pediatric Inpatient BH Bed-Days Volume during an RY21 Performance Period shall be calculated as follows:
 - a. The Hospital's Pediatric Inpatient BH Bed-Days Volume for an RY21 Performance Period shall equal the sum of the Hospital's Pediatric Inpatient BH Bed-Days during that RY21 Performance Period.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

- b. EOHHS will determine the Hospital's Pediatric Inpatient BH Bed-Days Volume for the first RY21 Performance Period utilizing RY21 fee-for-service MMIS paid claims and managed care encounter data submitted to EOHHS by Managed Care Entities by October 31, 2021.
- c. EOHHS will determine the Hospital's Pediatric Inpatient BH Bed-Days Volume for the Second RY21 Performance Period utilizing RY21 fee-for-service MMIS paid claims and managed care encounter data submitted to EOHHS by Managed Care Entities by April 30, 2022.

c. Methodology

Subject to compliance with all applicable federal rules and payment limits, for each Hospital eligible for a Pediatric Inpatient BH Per Diem Supplemental Payment for an RY21 Performance Period in accordance with **Section III.J.10.b**, the Hospital's payment shall equal \$300 multiplied by the number of days by which the Hospital's Pediatric Inpatient BH Bed-Days Volume for an RY21 Performance Period, calculated in accordance with **Section III.J.10.b.3**, exceeds the Hospital's Pediatric Inpatient BH Bed-Days Baseline for that RY21 Performance Period, calculated in accordance with **Section III.J.10.b.2**.

K. Pay-for-Performance (P4P) Payment

Pay-for-Performance (P4P) is MassHealth's method for quality scoring and converting quality scores to P4P payments contingent upon Hospital adherence to quality standards and achievement of performance thresholds and benchmarks. P4P incentive payments will be based on pay-for-performance (see **Sections III.K.1.c** and **III.K.2.c**, below).

A Hospital will qualify to earn P4P payments if it meets data accuracy and completeness requirements, including data validation requirements where applicable, and achieves performance thresholds for the P4P measures listed below. Each measure is evaluated using the methods outlined below to produce measure rates or values which result in performance scores that are converted into incentive payments.

The P4P program applies to inpatient services for MassHealth Members where Medicaid is the primary payer. In general, payment calculations are based on a combination of performance scores, which utilize all-Medicaid payer data for certain measures and all payer data for other measures, and the number of eligible discharges, which includes only individuals enrolled in the Primary Care Clinician (PCC) Plan or a Primary Care ACO, and members with fee-for-service coverage.

RY21 is bifurcated into the 1st RY21 Period and the 2nd RY21 Period for purposes of applying the P4P payment methodology. The methodology in Section III.K.1 applies to dates of service in the 1st RY21 Period and incorporates applicable definitions in **Section II** that apply to the 1st RY21 Period. The methodology in Section III.K.2 applies to dates of service in the 2nd RY21 Period and incorporates applicable definitions in **Section II** that apply to the 2nd RY21 Period. The 1st RY20 Period methodology is the same methodology that applied during the 2nd RY20 Period (effective November 1, 2019) under approved SPA TN-019-027, as modified by approved SPA TN 020-013.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

1. 1st RY20 Period

a. Performance Measures

Quality performance goals and measures focus on areas where improvement is likely to have the most impact on the health outcomes for this Member population. The specific hospital quality performance measures for which the 1st RY21 Period P4P incentive payments will be based are identified in the following **Table K-1**, which displays (a) each Quality Measure Category (five in total) and (b) the inpatient measure(s), identified by Measure ID# and Measure name, that correspond to each Quality Measure Category.

Table K-1 – 1st RY21 Period Hospital Quality Performance Measures

Quality Measure Category	Measure ID#	Measure Name
Perinatal	MAT-4	Cesarean Birth, NTSV
Perinatal	NEWB-1	Exclusive breast milk feeding
Care Coordination	CCM-1	Reconciled medication list received by discharged patient
Care Coordination	CCM-2	Transition record with specified data elements received by discharge patient
Care Coordination	CCM-3	Timely transmission of transition record within 48 hours at discharge
Health Disparity	HD-2	Health Disparities Composite
Safety Outcome	PSI-90	Patient Safety and Adverse Events Composite
Safety Outcome	HAI-1	Central Line-Associated Bloodstream Infection (CLABSI)
Safety Outcome	HAI-2	Catheter-Associated Urinary Tract Infection (CAUTI)
Safety Outcome	HAI-3	Methicillin-Resistant Staphylococcus Aureus bacteremia (MRSA)
Safety Outcome	HAI-4	Clostridium Difficile Infection (CDI)
Safety Outcome	HAI-5	Surgical Site Infections: Colon and abdominal hysterectomy surgeries (SSI)
Patient Experience and Engagement	HCAHPS	Hospital Consumer Assessment of Healthcare Provider Systems Survey (HCAHPS) This measure includes 7 survey dimensions: 1) nurse communication, 2) doctor communication, 3) responsiveness of hospital staff, 4) communication about medicines, 5) discharge information, 6) overall rating and 7) three item care transition.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

b. Data Accuracy and Completeness Requirement

i. Perinatal, Care Coordination, and Health Disparity Quality Measure Categories

The measures that comprise the Perinatal Quality Measure Category and the Care Coordination Quality Measure Category (MAT-4, NEWB-1, CCM-1, CCM-2 and CCM-3) are the only individual process measures for the 1st RY21 Period P4P program. Hospitals collect and report all Medicaid payer data on the clinical process measures to EOHHS.

In order to ensure the accuracy and reliability of the submitted data, all reported clinical process measures are subject to data validation requirements. The submitted electronic data must meet a minimum reliability standard. The minimum reliability standard is defined as an 80 percent match for data elements. In the 1st RY21 Period, Hospitals are considered to have “passed” validation if the overall agreement rate of 80 percent has been met, based on the first three quarters of CY2019 data (Q1-2019, Q2-2019, and Q3-2019) required for performance evaluation.

The composite measure (HD-2) that comprises the Health Disparity Quality Measure Category will be comprised of aggregate data from the five individual process measures identified above. Hospitals must ensure that all quality measures data that they collect include Race and Hispanic Indicator codes and allowable values.

ii. Safety Outcomes Measure Category

The Safety Outcomes Measure Category consists of two components:

Component 1: Patient Safety and Adverse Events Composite Measure (PSI-90) -- The PSI-90 composite measure consists of ten (10) Agency for Healthcare Research and Quality (AHRQ) quality indicators (PSI-3, PSI-6, PSI-8, PSI-9, PSI-10, PSI-11, PSI-12, PSI-13, PSI-14 and PSI-15) that represent potentially preventable complications and adverse events. This measure is claims-based and will be collected by EOHHS on all Medicaid payer data from MMIS and the MassHealth Data Warehouse. Data accuracy and completeness requirements apply.

Component 2: Healthcare-Associated Infections (HAI) Measures -- The five HAI measures listed in **Table K-1**, are reported by Hospitals to the National Healthcare Safety Network (NHSN) registry surveillance tracking system maintained by the Centers for Disease Control and Prevention (CDC). EOHHS will access the relevant information for these measures, which are based on all payer data, for each Hospital from the NHSN system for the relevant period. EOHHS will rely on data accuracy and completeness of the data as accessed from this system.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

iii. Patient Experience and Engagement Measure Category

The Patient Experience and Engagement Measure Category includes a modified Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) measure comprised of seven (7) national survey-based dimensions (see **Table K-1**, above) developed by AHRQ for CMS. Survey results are collected and submitted by Hospitals to CMS. EOHHS will collect the relevant archived data results for each Hospital, which are based on all payer data, from the CMS Hospital Compare website. EOHHS will rely on data accuracy and completeness of the data as set forth on the CMS Hospital Compare website.

c. Payment Methodology

P4P incentive payments will be based on pay-for-performance, and are available with respect to each **P4P Category** listed in **Table K-2** (see Section **III.K.1.c.ii.a**, below). The term “P4P Category” or “P4P Categories” will refer to the P4P Category(s) listed in such Table K-2.

Formula: Incentive payments for each P4P Category are calculated by multiplying:

- the Hospital's eligible Medicaid discharges for the P4P Category, by
- the P4P Category per Discharge Amount, by
- the Total Performance Score for the P4P Category.

Incentive payments will be made as lump sum payments to eligible Hospitals, after finalization of the performance measure data and applicable payment amounts. EOHHS expects to make incentive payments during the 4th quarter of calendar year 2021 (October through December 2021).

i. Eligible Medicaid Discharges

For purposes of this **Section III.K.1.c.i**, “FY19 MMIS Discharge Data” refers to Hospital discharge data from MMIS paid claims for FY19 PCC Plan, Primary Care ACO and Fee-for-Service discharges, only, for which MassHealth is the primary payer.

Eligible Medicaid discharges are used to determine the volume of a Hospital's discharges that are included in the 1st RY21 Period Pay-for-Performance payment calculations. The volume of eligible Medicaid discharges is determined as follows utilizing FY19 MMIS Discharge Data as the data source:

- a. **Obstetric/Neonate Clinical Process Measure Subcategory and Care Coordination Clinical Process Measure Subcategory.** For the Perinatal and Care Coordination Quality Measure Categories, the eligible Medicaid discharges will be determined based on the number of Hospital discharges in the FY19 MMIS Discharge Data that meet the specific ICD requirements corresponding to the individual clinical process measures in that P4P Category. For certain individual clinical process measures (MAT-4 and NEWB-1), the ICD requirements are published in the *Joint*

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

Commission National Quality Measures (available at <https://manual.jointcommission.org/bin/view/Manual/WebHome>). Specifications for the care coordination (CCM-1, CCM-2 and CCM-3) measures are available on the MassHealth Quality Exchange website at www.mass.gov/masshealth/massqex.

- b. **Health Disparities Composite Measure (HD-2).** For the Health Disparities Quality Measure Category, the eligible Medicaid discharges will be determined based on the total number of “unique discharges” for the underlying individual clinical process measures considered as a whole, so that each unique discharge is only counted once. A unique discharge is a single paid claim from the FY19 MMIS Discharge Data for a Hospital discharge that meets the ICD population requirement for one or more of the underlying individual process measures (MAT-4, NEWB-1, CCM-1, CCM-2 and CCM-3), and that meets the criteria for the HD-2 composite measure calculation.
- c. **Safety Outcomes Measure.** For the Safety Outcomes Quality Measure Category, the eligible Medicaid discharges will be determined based on the total number of Hospital discharges in the FY19 MMIS Discharge Data that meet the medical and surgical All Payer Refined Diagnosis Related Group (APR-DRG) codes associated with the specified AHRQ clinical measure specification manuals.
- d. **Patient Experience and Engagement Measure:** For the Patient Experience and Engagement Measure (HCAHPS) Quality Measure Category, the eligible Medicaid discharges will be determined based on the total number of Hospital discharges in the FY19 MMIS Discharge Data that meet the specified medical, surgical, vaginal deliveries, and cesarean All Payer Refined Diagnosis Related Group (APR-DRG) service line categories associated with the MS-DRG crosswalk specified in HCAHPS Quality Assurance Manual.

ii. P4P Category per Discharge Amount

The P4P Category per Discharge Amount for each P4P Category will be determined by dividing the **maximum allocated amount** for the P4P Category by the **statewide eligible Medicaid discharges** for that P4P Category.

a. Maximum Allocated Amount

Collective for the 2nd RY20 Period and the 1st RY21 Period, P4P incentive payments will cumulatively total no more than the maximum amount allotted for each P4P Category in the following table:

Table K-2: P4P Categories & Maximum Allocated Amounts

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

P4P Category	Maximum Allocated Amount
Obstetric/Neonate Clinical Process Measure Subcategory (MAT-4 and NEWB-1)	\$ 5,500,000
Care Coordination Clinical Process Measure Subcategory (CCM-1, CCM-2, and CCM-3)	\$ 9,000,000
Health Disparities Composite Measure (HD-2)	\$ 1,500,000
Safety Outcomes Measure (PSI-90 and HAI)	\$ 4,500,000
Patient Experience and Engagement Measure (HCAHPS)	\$ 4,500,000
TOTAL	\$25,000,000

b. Statewide Eligible Medicaid Discharges

The statewide eligible Medicaid discharges for each P4P Category, are the sum of all eligible Medicaid discharges (see **Section III.K.1.c.i.**, above) across all Hospitals for that category.

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

iii. Total Performance Score

a. Obstetric/Neonatal Clinical Process Measure Subcategory (MAT-4 and NEWB-1) and Care Coordination Clinical Process Measure Subcategory (CCM-1, CCM-2 and CCM-3)

The Total Performance Score for the individual process measures that, collectively, comprise the Perinatal Quality Measure Category and the Care Coordination Measure Category is a percentage of **quality points** earned out of the total possible points, as reflected in the following formula:

$$(\text{Total Awarded Quality Points} / \text{Total Possible Points}) \times 100\% = \text{Total Performance Score.}$$

For each individual process measure, the quality points earned are calculated using the higher of the **attainment** or the **improvement points** earned. Those quality points earned for each individual process measure are summed to yield the total awarded quality points for each Quality Measure Category.

Quality points are earned for the individual process measures based on each Hospital's performance during the Comparative Measurement Period relative to the attainment threshold (the median performance of all Hospitals in the Baseline Measurement Period) and the benchmark (the mean of the top decile of all Hospitals in the Baseline Measurement Period).

The **Comparative Measurement Period** and the **Baseline Measurement Period** for the individual process measures are as follows:

	Comparative Measurement Period	Baseline Measurement Period
Individual Process Measures	<p>The Comparative Measurement Period will vary by hospital, depending on whether the hospital elects to report data for the fourth quarter of calendar year 2019:</p> <ul style="list-style-type: none"> • For hospitals that elect not to report data for the fourth 	July 1, 2018 to December 31, 2018

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

	<p>quarter of calendar year 2019, the Comparative Measurement Period shall be the first three quarters of calendar year 2019.</p> <ul style="list-style-type: none"> • For hospitals that elect to report data for the fourth quarter of calendar year 2019, the Comparative Measurement Period shall be calendar year 2019 	
--	--	--

Performance benchmarks for the individual process measures are calculated based on Hospital data reported to MassHealth.

If the Hospital failed validation for a measure in the previous reporting year, data from that period is considered invalid for use in calculating year over year performance. Therefore, the Hospital would not be eligible for improvement points. However, it may be eligible for attainment points in the current reporting year based on calculation of the current reporting year's data reported for the measure if it passed validation in the current year and if the hospital has passed validation and established a baseline rate for the measure in a prior year.

i. Attainment Points

A Hospital can earn points for attainment based on relative placement between the attainment threshold and benchmark, as follows:

- if a Hospital's score for a measure is equal to or less than the attainment threshold, it will receive zero points for attainment,
- if a Hospital's score for a measure is greater than the attainment threshold but below the benchmark, it will receive 1-9 points for attainment, and

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

- if a Hospital’s score for a measure is greater than or equal to the benchmark, it will receive the maximum 10 points for attainment.

ii. Improvement Points

The Hospital can earn points for improvement based on how much its performance score on the measure has improved from the Baseline Measurement Period as follows:

- if a Hospital’s score for a measure is less than or equal to its score for the Baseline Measurement Period, it will receive zero (0) points for improvement.
- if a Hospital’s score for a measure is greater than its score for the Baseline Measurement Period, it will receive 0-9 points for improvement.

iii. Example

The following is an example pay-for-performance calculation for the Perinatal Quality Measure Category, provided for illustrative purposes only.

Example for P4P Category: Perinatal Quality Measure Subcategory

<i>Statewide calculations</i>	
Maximum allocated amount	\$5,500,000
Statewide eligible Medicaid discharges	13,551
P4P Category per Discharge Amount	$\$5,500,000/13,551 = \406
<i>Hospital-specific calculations</i>	
Hospital's awarded quality points for the P4P Category (sum of the measure-specific attainment or improvement points corresponding to the P4P Category)	32
Maximum possible P4P Category quality points	40
Total Performance Score for P4P Category	$(32 \text{ points} / 40 \text{ points}) \times 100\% = 80\%$
Eligible Medicaid discharges	500
Hospital-specific total incentive payment for the P4P Category	$500 \times \\$406 \times 80\% = \\$162,400$

b. Health Disparities Composite Measure (HD-2)

For each Hospital, the Health Disparities Composite Measure (HD-2) is comprised of aggregate data from the five individual process measures (i.e., MAT-4, NEWB-1, CCM-1, CCM-2 and CCM-3) on which the Hospital reports. The Hospital’s composite measure compares the Hospital’s performance among race/ethnicity groups and all

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

groups combined, and is converted to a disparity composite value. The composite measure and disparity composite value are calculated only for Hospitals that report on more than one racial group in their electronic data files.

i. Performance Assessment

Performance for the Health Disparities Composite Measure (HD-2) will be assessed using the following methodology.

1. Decile Rank Method. Disparity composite values are calculated for Hospitals that meet the measure calculation criteria. Performance will be assessed using a method that determines the Hospital’s rank, relative to other Hospitals, based on the decile ranking system.

2. Disparity Composite Value Ranking. All Hospital disparity composite values are rounded to six decimal places. All composite values are then divided into ten equal groups and ranked from highest to lowest so approximately the same number of Hospitals falls in each decile group.

3. Target Attainment Threshold. The target attainment threshold represents the minimum level of performance that must be achieved to earn incentive payments. The target attainment is defined as the boundary for a disparity composite value that falls above the 2nd decile group, as shown in the “Decile Performance Thresholds” table below.

4. Conversion Factor. Each decile group is assigned a weighted conversion factor associated with the decile threshold, as shown in the table below:

Decile Group Thresholds

Decile Group Threshold	Conversion Factor
10th decile (Top decile)	1.0
9th decile	.90
8th decile	.80
7th decile	.70
6th decile	.60
5th decile	.50
4th decile	.40
3rd decile (Target attainment threshold)	.30
2nd decile (Lower decile)	(zero)
1st decile (Lower decile)	(zero)

To meet the target attainment threshold, the Hospital’s disparity composite BGV value must be above the upper boundary of the 2nd decile. Disparity composite

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

BGV values that are not above the upper boundary of the 2nd decile (i.e., fall into the 1st or 2nd decile) are assigned a conversion factor of zero. All disparity composite values that fall within the same given decile group are assigned the same conversion factor.

- ii. Total Performance Score for Health Disparities Composite Measure (HD-2).

A Hospital's Total Performance Score for the Health Disparities Composite (HD-2) Measure P4P Category is the assigned conversion factor as shown in the Decile Group Thresholds table, above, multiplied by 100%. Performance scores are calculated only for Hospitals that meet the measure calculation criteria and validation requirements, using only the Hospital's reported data for either the first three quarters of calendar year 2019, or all four quarters of calendar year 2019, depending upon whether the Hospital elects to report data for the fourth quarter of calendar year 2019.

c. Safety Outcomes Measure (PSI-90 and HAI)

For the Safety Outcomes Measure, each Hospital will be evaluated using both the Hospital's PSI-90 composite value and the Hospital's standard infection ratio (SIR) output values for each of the five HAI measures, as applicable.

Component 1: The PSI-90 composite value is calculated as a weighted average of the risk-adjusted and reliability adjusted rates for the ten AHRQ quality indicators, combined, for the Hospital. The relevant evaluation period is discharges in the 24 month period from October 1, 2016 through September 30, 2018. If a Hospital has fewer than 3 eligible discharges for the ten indicators combined, a PSI-90 composite value will not be calculated.

Component 2 -- For each of the five HAI measures, EOHHS will obtain the Hospital's SIR output value for each measure, as calculated by the CDC, from the NHSN system. The relevant evaluation period is the 24 month period of January 1, 2017 through December 31, 2018. The Hospital will not have a SIR output value for an HAI measure(s) if the CDC was unable to calculate a SIR output value for the Hospital for that HAI measure based on its criteria.

(A) Winsorization Method

Each Hospital's performance will be assessed in comparison to all eligible Hospital's values for the PSI-90 composite and each of the HAI measures using a Winsorization method, which transforms each Hospital's measure values into a standardized score. The Winsorization method evaluates performance using the defined period(s) only and does not use comparison year data.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

1. A Winsorized measure result is obtained by creating a continuous rank distribution of all eligible Hospitals' measure values, and truncating the outliers to determine the relative position of where each measure value falls in the distribution. This Winsorization process is performed separately for the PSI-90 composite measure and for each of SIR output value for the HAI measures.
 - i. If the Hospital's measure value falls between the minimum and the 5th percentile, then the Hospital's Winsorized measure result is equal to the measure value that corresponds to the 5th percentile.
 - ii. If the Hospital's measure value falls between the 95th percentile and the maximum, then the Hospital's Winsorized measure result is equal to the measure value that corresponds to the 95th percentile.
 - iii. If the Hospital's measure value falls between the 5th and 95th percentiles, then the Hospital's Winsorized measure result is equal to the Hospital's measure value.
2. A Winsor Z-score will be calculated for each Hospital for each measure; it is the difference between a Hospital's Winsorized measure result from #1 above and the mean of the Winsorized measure results across all eligible hospitals, which difference is divided by the standard deviation of the Winsorized measure results from all eligible Hospitals' data.
3. The Hospital's **Overall Safety Outcomes Measure score** is calculated as the equally weighted average of the PSI-90 composite measure z-score and each HAI measure that has a z-score, using the methods described below.
 - i. Equal Measure Weights Method. The assigned weights that will apply to each safety measure z-score under the equal measure weights method are shown in the table that follows:

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

Safety Outcome Equal Measure Weights

Number of HAI measures with a z-score	Weight applied to PSI-90	Weight applied to each HAI measure
0 (zero)	100.0	Not applicable
1	50.0	50.0
2	33.3	33.3
3	25.0	25.0
4	20.0	20.0
5	16.7	16.7
Any number (1 through 5)	Not applicable; no PSI-90 z-score	100.0 equally divided

As shown in this table, the equal measure weights method assigns the same weight to the PSI-90 and to each of the five HAI measures for which the Hospital has a z-score. Following are examples. If the Hospital has a z-score for PSI-90 and for only one HAI measure, then the weight of 50 would be assigned to each measure z-score. If the Hospital has a z-score for PSI-90 and for three HAI measures, then the weight of 25 would be assigned to each measure z-score. If a Hospital has no PSI-90 z-score and one or more HAI measure z-scores, then the weight of 100 is equally divided among the HAI measure z-scores. If the Hospital has only one PSI-90 z-score and no HAI measure z-score, then a weight of 100 is given to the PSI-90 measure z-score. If the Hospital has no z-scores for any of the safety outcome measures listed in **Table K-1**, then it will not receive a safety outcome measure overall z-score.

- ii. Safety Outcomes Measure Category Overall z-score: The Hospital's Safety Outcome Measure Category overall z-score (Z) is calculated as the equally weighted average of all measure z-scores, as indicated by the following formula:

$$(PSI90\ z\ score + \sum_{i=1}^{Number\ of\ HAI} HAI\ z\ Score_i) / (Number\ of\ HAI + Number\ of\ PSI\ 90)$$

The overall z-score is calculated as the sum of the PSI-90 z-score and each of the HAI z-scores, divided by the number of all available HAI z-scores plus PSI-90 z-scores. The overall z-score is rounded to six decimal places.

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

(B) Setting Performance Thresholds

The Hospital's Overall Safety Outcomes Measure score will be assessed using the methods described below.

1. *Interquartile Rank Method.* Performance will be assessed using a method that determines the Hospital's rank with respect to its Overall Safety Outcomes Measure score, relative to other Hospitals, and divides the ranked results into four approximately equal quartile groups. The Hospitals' Overall Safety Outcomes Measure scores are rounded to six decimal places and ranked highest (worse) to lowest (best) in performance.
2. *Minimum Attainment Threshold.* The minimum attainment threshold represents the minimum level of performance that must be attained to earn incentive payments. To meet the minimum attainment threshold, the Hospital's overall Safety Outcomes Measure Category z-score must be above the upper boundary of the 1st quartile (i.e., fall into the 2nd, 3rd, or 4th quartile).
3. *Conversion Factor.* Each quartile group is assigned a conversion factor as shown in the table below:

Quartile Group Thresholds

Quartile Group Threshold	Conversion Factor
4th Quartile (Lower z-scores)	1.0
3rd Quartile	.75
2nd Quartile (Minimum attainment threshold)	.50
1st Quartile (Higher z-scores)	(zero)

All Overall Safety Outcome Measure scores that fall within the same quartile group are assigned the same conversion factor.

(C) Total Performance Score for Safety Outcomes Measure (PSI-90 and HAI).

A Hospital's Total Performance Score for the Safety Outcomes Measure (PSI-90 and HAI) P4P Category is the assigned conversion factor as shown in the Quartile Group Thresholds table, above, multiplied by 100%.

d. Patient Experience and Engagement Measure (HCAHPS)

EOHHS will obtain the Hospitals' archived HCAHPS measure "top box" results corresponding to the relevant periods directly from the CMS Hospital Compare Website for each of the seven survey dimensions in the Patient Engagement and Experience

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

Measure (HCAHPS) category. The “top box” results reflect the percentage of a Hospital's patients who chose the most positive (top box) response to a survey item, as adjusted and calculated by CMS. If CMS was not able to calculate results for a Hospital due to insufficient volume of completed surveys, the Hospital will not receive performance scores or incentive payments for this P4P Category.

The **Total Performance Score** for the Patient Experience and Engagement (HCAHPS) Measure P4P Category is a percentage of **quality points** awarded out of the total possible points for the P4P Category, based on the following formula:

$$(\text{Total Awarded Quality Points} / \text{Total Possible Points}) \times 100\% = \text{Total Performance Score.}$$

The quality points awarded for each survey dimension in the HCAHPS measure is the higher of the **attainment** or the **improvement points** earned for that dimension. The quality points awarded for the seven survey dimensions, as applicable, are then summed together to determine the total awarded quality points for the P4P Category.

Quality points are awarded for the seven survey dimensions based on each Hospital's performance during the Comparison Year Period relative to the attainment threshold (the median performance of all Hospitals in the Prior Year Period) and the benchmark (the mean of the top decile of all Hospitals in the Prior Year Period).

The **Comparison Year Period** and the **Prior Year Period** are as follows:

	Comparison Year Period	Prior Year Period
Patient Experience and Engagement (HCAHPS) Measure	CY 2018	CY 2017

All attainment and improvement points earned on each survey dimension will be calculated using the same formulas for calculating attainment points and improvement points as described in **Sections III.K.1.c.iii.a.i** and **III.K.1.c.iii.a.ii**. For these calculations, the “Baseline Measurement Period” refers instead to the “Prior Year Period” referenced above.

Attainment and benchmark performance thresholds on the HCAHPS survey dimensions are calculated using HCAHPS state-level data obtained from the CMS Hospital Compare website corresponding to the Prior Year Period for this measure.

Attainment and improvement points cannot be calculated and, if applicable, awarded to a Hospital unless it has previously established a baseline rate for each survey dimension, based on evidence from data files downloaded by EOHHS from the CMS Hospital Compare website.

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

2. 2nd RY21 Period

a. **Performance Measures**

Quality performance goals and measures focus on areas where improvement is likely to have most impact on the health outcomes for this Member population. The specific hospital quality performance measures for which the 2nd RY21 Period P4P incentive payments will be based are identified in the following **Table K-3**, which displays (a) each Quality Measure Category (five in total) and (b) the inpatient measure(s), identified by Measure ID# and Measure name, that correspond to each Quality Measure Category.

Table K-3 – 2nd RY21 Period Hospital Quality Performance Measures

Quality Measure Category	Measure ID#	Measure Name
Perinatal	MAT-4	Cesarean Birth, NTSV
Perinatal	NEWB-1	Exclusive breast milk feeding
Care Coordination	CCM-1	Reconciled medication list received by discharged patient
Care Coordination	CCM-2	Transition record with specified data elements received by discharge patient
Care Coordination	CCM-3	Timely transmission of transition record within 48 hours at discharge
Health Disparity	HD-2	Health Disparity Composite
Safety Outcome	PSI-90	Patient Safety and Adverse Events Composite
Safety Outcome	HAI-1	Central Line-Associated Bloodstream Infection (CLABSI)
Safety Outcome	HAI-2	Catheter-Associated Urinary Tract Infection (CAUTI)
Safety Outcome	HAI-3	Methicillin-Resistant Staphylococcus Aureus bacteremia (MRSA)
Safety Outcome	HAI-4	Clostridium Difficile Infection (CDI)
Safety Outcome	HAI-5	Surgical Site Infections: Colon and abdominal hysterectomy surgeries (SSI)
Patient Experience and Engagement	HCAHPS	Hospital Consumer Assessment of Healthcare Provider Systems Survey (HCAHPS) This measure includes 7 survey dimensions: 1) nurse communication, 2) doctor communication, 3) responsiveness of hospital staff, 4) communication about medicines, 5) discharge information, 6) overall rating and 7) three item care transition.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

b. Data Accuracy and Completeness Requirement

i. Perinatal, Care Coordination, and Health Disparity Quality Measure Categories

The measures that comprise the Perinatal Quality Measure Category and the Care Coordination Quality Measure Category (MAT-4, NEWB-1, CCM-1, CCM-2 and CCM-3) are the only individual process measures for the 2nd RY21 Period P4P program. Hospitals collect and report all Medicaid payer data on the clinical process measures to EOHHS.

In order to ensure the accuracy and reliability of the submitted data, all reported clinical process measures are subject to data validation requirements. The submitted electronic data must meet a minimum reliability standard. The minimum reliability standard is defined as an 80 percent match for data elements. In the 2nd RY21 Period, Hospitals are considered to have “passed” validation if the overall agreement rate of 80 percent has been met, based on data from the third and fourth quarters of CY2020 (Q3-2020 and Q4-2020) required for performance evaluation.

The composite measure (HD-2) that comprises the Health Disparity Quality Measure Category will be comprised of aggregate data from the five individual process measures identified above. Hospitals must ensure that all quality measures data that they collect include Race and Hispanic Indicator codes and allowable values.

ii. Safety Outcomes Measure Category

The Safety Outcomes Measure Category consists of two components:

Component 1: Patient Safety and Adverse Events Composite Measure (PSI-90) -- The PSI-90 composite measure consists of ten (10) Agency for Healthcare Research and Quality (AHRQ) quality indicators (PSI-3, PSI-6, PSI-8, PSI-9, PSI-10, PSI-11, PSI-12, PSI-13, PSI-14 and PSI-15) that represent potentially preventable complications and adverse events. This measure is claims-based and will be collected by EOHHS on all Medicaid payer data from MMIS and the MassHealth Data Warehouse. Data accuracy and completeness requirements apply.

Component 2: Healthcare-Associated Infections (HAI) Measures -- The five HAI measures listed in **Table K-3**, are reported by Hospitals to the National Healthcare Safety Network (NHSN) registry surveillance tracking system maintained by the Centers for Disease Control and Prevention (CDC). EOHHS will access the relevant information for these measures, which are based on all payer data, for each Hospital from the NHSN system for the relevant period. EOHHS will rely on data accuracy and completeness of the data as accessed from this system.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

iii. Patient Experience and Engagement Measure Category

The Patient Experience and Engagement Measure Category includes a modified Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) measure comprised of seven (7) national survey-based dimensions (see **Table K-3**, above) developed by AHRQ for CMS. Survey results are collected and submitted by Hospitals to CMS. EOHHS will collect the relevant archived data results for each Hospital, which are based on all payer data, from the CMS Hospital Compare website. EOHHS will rely on data accuracy and completeness of the data as set forth on the CMS Hospital Compare website.

c. Payment Methodology

P4P incentive payments will be based on pay-for-performance, and are available with respect to each **P4P Category** listed in **Table K-4** (see Section **III.K.2.c.ii.a**, below). The term “P4P Category” or “P4P Categories” will refer to the P4P Category(s) listed in such Table K-4.

Formula: Incentive payments for each P4P Category are calculated by multiplying:

- the Hospital's eligible Medicaid discharges for the P4P Category, by
- the P4P Category per Discharge Amount, by
- the Total Performance Score for the P4P Category.

Incentive payments will be made as lump sum payments to eligible Hospitals, after finalization of the performance measure data and applicable payment amounts. EOHHS expects to make incentive payments during the 4th quarter of calendar year 2022 (October through December 2022).

i. Eligible Medicaid Discharges

For purposes of this **Section III.K.2.c.i**, “FY20 MMIS Discharge Data” refers to Hospital discharge data from MMIS paid claims for FY20 PCC Plan, Primary Care ACO and Fee-for-Service discharges, only, for which MassHealth is the primary payer.

Eligible Medicaid discharges are used to determine the volume of a Hospital's discharges that are included in the 2nd RY21 Period Pay-for-Performance payment calculations. The volume of eligible Medicaid discharges is determined as follows utilizing FY20 MMIS Discharge Data as the data source:

- a. **Obstetric/Neonate Clinical Process Measure Subcategory and Care Coordination Clinical Process Measure Subcategory.** For the Perinatal and Care Coordination Quality Measure Categories, the eligible Medicaid discharges will be determined based on the number of Hospital discharges in the FY20 MMIS Discharge Data that meet the specific ICD requirements corresponding to the individual clinical process measures in that P4P Category. For certain individual clinical process measures (MAT-4 and NEWB-1), the ICD requirements are published in the *Joint*

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

Commission National Quality Measures (available at <https://manual.jointcommission.org/bin/view/Manual/WebHome>).

Specifications for the care coordination (CCM-1, CCM-2 and CCM-3) measures are available on the MassHealth Quality Exchange website at www.mass.gov/masshealth/massqex.

- b. **Health Disparity Composite Measure (HD-2).** For the Health Disparity Quality Measure Category, the eligible Medicaid discharges will be determined based on the total number of “unique discharges” for the underlying individual clinical process measures considered as a whole, so that each unique discharge is only counted once. A unique discharge is a single paid claim from the FY20 MMIS Discharge Data for a Hospital discharge that meets the ICD population requirement for one or more of the underlying individual process measures (MAT-4, NEWB-1, CCM-1, CCM-2 and CCM-3), and that meets the criteria for the HD-2 composite measure calculation.
- c. **Safety Outcomes Measure.** For the Safety Outcomes Quality Measure Category, the eligible Medicaid discharges will be determined based on the total number of Hospital discharges in the FY20 MMIS Discharge Data that meet the medical and surgical All Payer Refined Diagnosis Related Group (APR-DRG) codes associated with the specified AHRQ clinical measure specification manuals.
- d. **Patient Experience and Engagement Measure:** For the Patient Experience and Engagement Measure (HCAHPS) Quality Measure Category, the eligible Medicaid discharges will be determined based on the total number of Hospital discharges in the FY20 MMIS Discharge Data that meet the specified medical, surgical, vaginal deliveries, and cesarean All Payer Refined Diagnosis Related Group (APR-DRG) service line categories associated with the MS-DRG crosswalk specified in HCAHPS Quality Assurance Manual.

ii. P4P Category per Discharge Amount

The P4P Category per Discharge Amount for each P4P Category will be determined by dividing the **maximum allocated amount** for the P4P Category by the **statewide eligible Medicaid discharges** for that P4P Category.

a. Maximum Allocated Amount

For the 2nd RY21 Period, P4P incentive payments will cumulatively total no more than the maximum amount allotted for each P4P Category in the following table:

Table K-4: P4P Categories & Maximum Allocated Amounts

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

P4P Category	Maximum Allocated Amount
Obstetric/Neonate Clinical Process Measure Subcategory (MAT-4 and NEWB-1)	\$ 5,500,000
Care Coordination Clinical Process Measure Subcategory (CCM-1, CCM-2, and CCM-3)	\$ 8,500,000
Health Disparity Composite Measure (HD-2)	\$ 2,000,000
Safety Outcomes Measure (PSI-90 and HAI)	\$ 4,500,000
Patient Experience and Engagement Measure (HCAHPS)	\$ 4,500,000
TOTAL	\$25,000,000

b. Statewide Eligible Medicaid Discharges

The statewide eligible Medicaid discharges for each P4P Category, are the sum of all eligible Medicaid discharges (see **Section III.K.2.c.i**, above) across all Hospitals for that category.

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

iii. Total Performance Score

a. Obstetric/Neonatal Clinical Process Measure Subcategory (MAT-4 and NEWB-1) and Care Coordination Clinical Process Measure Subcategory (CCM-1, CCM-2 and CCM-3)

The Total Performance Score for the individual process measures that, collectively, comprise the Perinatal Quality Measure Category and the Care Coordination Measure Category is a percentage of **quality points** earned out of the total possible points, as reflected in the following formula:

$$(\text{Total Awarded Quality Points} / \text{Total Possible Points}) \times 100\% = \text{Total Performance Score.}$$

For each individual process measure, the quality points earned are calculated using the higher of the **attainment** or the **improvement points** earned. Those quality points earned for each individual process measure are summed to yield the total awarded quality points for each Quality Measure Category.

Quality points are earned for the individual process measures based on each Hospital's performance during the Comparative Measurement Period relative to the attainment threshold (the median performance of all Hospitals in the Baseline Measurement Period) and the benchmark (the mean of the top decile of all Hospitals in the Baseline Measurement Period).

The **Comparative Measurement Period** and the **Baseline Measurement Period** for the individual process measures are as follows:

	Comparative Measurement Period	Baseline Measurement Period
Individual Process Measures	July 1, 2020 – December 31, 2020	The Baseline Measurement Period will vary by hospital, depending on whether the hospital elects to report data for the fourth quarter of calendar year 2019: <ul style="list-style-type: none"> • For hospitals that elect not to report data

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

	<p>for the fourth quarter of calendar year 2019, the Baseline Measurement Period shall be the first three quarters of calendar year 2019.</p> <p>For hospitals that elect to report data for the fourth quarter of calendar year 2019, the Baseline Measurement Period shall be calendar year 2019</p>
--	--

Performance benchmarks for the individual process measures are calculated based on Hospital data reported to MassHealth.

If the Hospital failed validation for a measure in the previous reporting year, data from that period is considered invalid for use in calculating year over year performance. Therefore, the Hospital would not be eligible for improvement points. However, it may be eligible for attainment points in the current reporting year based on calculation of the current reporting year's data reported for the measure if it passed validation in the current year and if the hospital has passed validation and established a baseline rate for the measure in a prior year.

i. Attainment Points

A Hospital can earn points for attainment based on relative placement between the attainment threshold and benchmark, as follows:

- if a Hospital's score for a measure is equal to or less than the attainment threshold, it will receive zero points for attainment,
- if a Hospital's score for a measure is greater than the attainment threshold but below the benchmark, it will receive 1-9 points for attainment, and
- if a Hospital's score for a measure is greater than or equal to the benchmark, it will receive the maximum 10 points for attainment.

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

ii. Improvement Points

The Hospital can earn points for improvement based on how much its performance score on the measure has improved from the Baseline Measurement Period as follows:

- if a Hospital’s score for a measure is less than or equal to its score for the Baseline Measurement Period, it will receive zero (0) points for improvement.
- if a Hospital’s score for a measure is greater than its score for the Baseline Measurement Period, it will receive 0-9 points for improvement.

iii. Example

The following is an example pay-for-performance calculation for the Perinatal Quality Measure Category, provided for illustrative purposes only.

Example for P4P Category: Perinatal Quality Measure Subcategory

<i>Statewide calculations</i>	
Maximum allocated amount	\$5,500,000
Statewide eligible Medicaid discharges	13,551
P4P Category per Discharge Amount	$\$5,500,000/13,551 = \406
<i>Hospital-specific calculations</i>	
Hospital's awarded quality points for the P4P Category (sum of the measure-specific attainment or improvement points corresponding to the P4P Category)	32
Maximum possible P4P Category quality points	40
Total Performance Score for P4P Category	$(32 \text{ points} / 40 \text{ points}) \times 100\% = 80\%$
Eligible Medicaid discharges	500
Hospital-specific total incentive payment for the P4P Category	$500 \times \\$406 \times 80\% = \\$162,400$

b. Health Disparity Composite Measure (HD-2)

For each Hospital, the Health Disparity Composite Measure (HD-2) is comprised of aggregate data from the five individual process measures (i.e., MAT-4, NEWB-1, CCM-1, CCM-2 and CCM-3) on which the Hospital reports. The Hospital’s composite measure compares the Hospital’s performance among race/ethnicity groups and all groups combined, and is converted to a disparity composite value. The composite measure and disparity composite value are calculated only for Hospitals that report on more than one racial group in their electronic data files.

**State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services**

i. Performance Assessment

Performance for the Health Disparity Composite Measure (HD-2) will be assessed using the following methodology.

1. Decile Rank Method. Disparity composite values are calculated for Hospitals that meet the measure calculation criteria. Performance will be assessed using a method that determines the Hospital’s rank, relative to other Hospitals, based on the decile ranking system.

2. Disparity Composite Value Ranking. All Hospital disparity composite values are rounded to six decimal places. All composite values are then divided into ten equal groups and ranked from highest to lowest so approximately the same number of Hospitals falls in each decile group.

3. Target Attainment Threshold. The target attainment threshold represents the minimum level of performance that must be achieved to earn incentive payments. The target attainment is defined as the boundary for a disparity composite value that falls above the 2nd decile group, as shown in the “Decile Performance Thresholds” table below.

4. Conversion Factor. Each decile group is assigned a weighted conversion factor associated with the decile threshold, as shown in the table below:

Decile Group Thresholds

Decile Group Threshold	Conversion Factor
10th decile (Top decile)	1.0
9th decile	.90
8th decile	.80
7th decile	.70
6th decile	.60
5th decile	.50
4th decile	.40
3rd decile (Target attainment threshold)	.30
2nd decile (Lower decile)	(zero)
1st decile (Lower decile)	(zero)

To meet the target attainment threshold, the Hospital’s disparity composite BGV value must be above the upper boundary of the 2nd decile. Disparity composite BGV values that are not above the upper boundary of the 2nd decile (i.e., fall into the 1st or 2nd decile) are assigned a conversion factor of zero. All disparity

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

composite values that fall within the same given decile group are assigned the same conversion factor.

- ii. Total Performance Score for Health Disparity Composite Measure (HD-2).

A Hospital's Total Performance Score for the Health Disparity Composite (HD-2) Measure P4P Category is the assigned conversion factor as shown in the Decile Group Thresholds table, above, multiplied by 100%. Performance scores are calculated only for Hospitals that meet the measure calculation criteria and validation requirements, using only the Hospital's reported data for the third and fourth quarters of the calendar year 2020 discharge period (July 1, 2020 – December 31, 2020).

c. Safety Outcomes Measure (PSI-90 and HAI)

For the Safety Outcomes Measure, each Hospital will be evaluated using both the Hospital's PSI-90 composite value and the Hospital's standard infection ratio (SIR) output values for each of the five HAI measures, as applicable.

Component 1: The PSI-90 composite value is calculated as a weighted average of the risk-adjusted and reliability adjusted rates for the ten AHRQ quality indicators, combined, for the Hospital. The relevant evaluation period is discharges in the 24 month period from October 1, 2017 through September 30, 2019. If a Hospital has fewer than 3 eligible discharges for the ten indicators combined, a PSI-90 composite value will not be calculated.

Component 2 -- For each of the five HAI measures, EOHHS will obtain the Hospital's SIR output value for each measure, as calculated by the CDC, from the NHSN system. The relevant evaluation period is the 24 month period of January 1, 2018 through December 31, 2019. The Hospital will not have a SIR output value for an HAI measure(s) if the CDC was unable to calculate a SIR output value for the Hospital for that HAI measure based on its criteria.

(A) Winsorization Method

Each Hospital's performance will be assessed in comparison to all eligible Hospital's values for the PSI-90 composite and each of the HAI measures using a Winsorization method, which transforms each Hospital's measure values into a standardized score. The Winsorization method evaluates performance using the defined period(s) only and does not use comparison year data.

1. A Winsorized measure result is obtained by creating a continuous rank distribution of all eligible Hospitals' measure values, and truncating the outliers to determine the relative position of where each measure value falls in the

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

distribution. This Winsorization process is performed separately for the PSI-90 composite measure and for each of SIR output value for the HAI measures.

- i. If the Hospital's measure value falls between the minimum and the 5th percentile, then the Hospital's Winsorized measure result is equal to the measure value that corresponds to the 5th percentile.
 - ii. If the Hospital's measure value falls between the 95th percentile and the maximum, then the Hospital's Winsorized measure result is equal to the measure value that corresponds to the 95th percentile.
 - iii. If the Hospital's measure value falls between the 5th and 95th percentiles, then the Hospital's Winsorized measure result is equal to the Hospital's measure value.
2. A Winsor Z-score will be calculated for each Hospital for each measure; it is the difference between a Hospital's Winsorized measure result from #1 above and the mean of the Winsorized measure results across all eligible hospitals, which difference is divided by the standard deviation of the Winsorized measure results from all eligible Hospitals' data.
 3. The Hospital's **Overall Safety Outcomes Measure score** is calculated as the equally weighted average of the PSI-90 composite measure z-score and each HAI measure that has a z-score, using the methods described below.
 - i. Equal Measure Weights Method. The assigned weights that will apply to each safety measure z-score under the equal measure weights method are shown in the table that follows:

Safety Outcome Equal Measure Weights

Number of HAI measures with a z-score	Weight applied to PSI-90	Weight applied to each HAI measure
0 (zero)	100.0	Not applicable
1	50.0	50.0
2	33.3	33.3
3	25.0	25.0
4	20.0	20.0
5	16.7	16.7
Any number (1 through 5)	Not applicable; no PSI-90 z-score	100.0 equally divided

As shown in this table, the equal measure weights method assigns the same weight to the PSI-90 and to each of the five HAI measures for which the Hospital

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

has a z-score. Following are examples. If the Hospital has a z-score for PSI-90 and for only one HAI measure, then the weight of 50 would be assigned to each measure z-score. If the Hospital has a z-score for PSI-90 and for three HAI measures, then the weight of 25 would be assigned to each measure z-score. If a Hospital has no PSI-90 z-score and one or more HAI measure z-scores, then the weight of 100 is equally divided among the HAI measure z-scores. If the Hospital has only one PSI-90 z-score and no HAI measure z-score, then a weight of 100 is given to the PSI-90 measure z-score. If the Hospital has no z-scores for any of the safety outcome measures listed in **Table K-3**, then it will not receive a safety outcome measure overall z-score.

- ii. Safety Outcomes Measure Category Overall z-score: The Hospital's Safety Outcome Measure Category overall z-score (Z) is calculated as the equally weighted average of all measure z-scores, as indicated by the following formula:

$$(PSI90\ z\ score + \sum_{i=1}^{Number\ of\ HAI} HAI\ z\ Score_i) / (Number\ of\ HAI + Number\ of\ PSI\ 90)$$

The overall z-score is calculated as the sum of the PSI-90 z-score and each of the HAI z-scores, divided by the number of all available HAI z-scores plus PSI-90 z-scores. The overall z-score is rounded to six decimal places.

(B) Setting Performance Thresholds

The Hospital's Overall Safety Outcomes Measure score will be assessed using the methods described below.

1. *Interquartile Rank Method.* Performance will be assessed using a method that determines the Hospital's rank with respect to its Overall Safety Outcomes Measure score, relative to other Hospitals, and divides the ranked results into four approximately equal quartile groups. The Hospitals' Overall Safety Outcomes Measure scores are rounded to six decimal places and ranked highest (worse) to lowest (best) in performance.
2. *Minimum Attainment Threshold.* The minimum attainment threshold represents the minimum level of performance that must be attained to earn incentive payments. To meet the minimum attainment threshold, the Hospital's overall Safety Outcomes Measure Category z-score must be above the upper boundary of the 1st quartile (i.e., fall into the 2nd, 3rd, or 4th quartile).

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

3. *Conversion Factor.* Each quartile group is assigned a conversion factor as shown in the table below:

Quartile Group Thresholds

Quartile Group Threshold	Conversion Factor
4th Quartile (Lower z-scores)	1.0
3rd Quartile	.75
2nd Quartile (Minimum attainment threshold)	.50
1st Quartile (Higher z-scores)	(zero)

All Overall Safety Outcome Measure scores that fall within the same quartile group are assigned the same conversion factor.

- (C) Total Performance Score for Safety Outcomes Measure (PSI-90 and HAI).

A Hospital's Total Performance Score for the Safety Outcomes Measure (PSI-90 and HAI) P4P Category is the assigned conversion factor as shown in the Quartile Group Thresholds table, above, multiplied by 100%.

d. Patient Experience and Engagement Measure (HCAHPS)

EOHHS will obtain the Hospitals' archived HCAHPS measure "top box" results corresponding to the relevant periods directly from the CMS Hospital Compare Website for each of the seven survey dimensions in the Patient Engagement and Experience Measure (HCAHPS) category that are posted in rounded integer format. The "top box" results reflect the percentage of a Hospital's patients who chose the most positive (top box) response to a survey item, as adjusted and calculated by CMS. If CMS was not able to calculate results for a Hospital due to insufficient volume of completed surveys, the Hospital will not receive performance scores or incentive payments for this P4P Category.

The **Total Performance Score** for the Patient Experience and Engagement (HCAHPS) Measure P4P Category is a percentage of **quality points** awarded out of the total possible points for the P4P Category, based on the following formula:

$$(\text{Total Awarded Quality Points} / \text{Total Possible Points}) \times 100\% = \text{Total Performance Score.}$$

The quality points awarded for each survey dimension in the HCAHPS measure is the higher of the **attainment** or the **improvement points** earned for that dimension. The

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

quality points awarded for the seven survey dimensions, as applicable, are then summed together to determine the total awarded quality points for the P4P Category.

Quality points are awarded for the seven survey dimensions based on each Hospital's performance during the Comparison Year Period relative to the attainment threshold (the median performance of all Hospitals in the Prior Year Period) and the benchmark (the mean of the top decile of all Hospitals in the Prior Year Period).

The **Comparison Year Period** and the **Prior Year Period** are as follows:

	Comparison Year Period	Prior Year Period
Patient Experience and Engagement (HCAHPS) Measure	CY 2019	CY 2018

All attainment and improvement points earned on each survey dimension will be calculated using the same formulas for calculating attainment points and improvement points as described in **Sections III.K.2.c.iii.a.i** and **III.K.2.c.iii.a.ii**. For these calculations, the “Baseline Measurement Period” refers instead to the “Prior Year Period” referenced above.

Attainment and benchmark performance thresholds on the HCAHPS survey dimensions are calculated using HCAHPS state-level data obtained from the CMS Hospital Compare website corresponding to the Prior Year Period for this measure.

Attainment and improvement points cannot be calculated and, if applicable, awarded to a Hospital unless it has previously established a baseline rate for each survey dimension, based on evidence from data files downloaded by EOHHS from the CMS Hospital Compare website.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

IV. [Reserved]

V. [Reserved]

VI. Other Provisions

A. **Federal Limits**

If any portion of the reimbursement methodology is not approved by CMS or is in excess of applicable federal limits, EOHHS may recoup or offset against future payments, any payment made to a Hospital in excess of the approved methodology. Any such recovery shall be proportionately allocated among affected Hospitals.

B. **Future Rate Years**

Adjustments may be made each Rate Year to update rates and shall be made in accordance with the Hospital RFA and Contract in effect on that date.

C. [Reserved]

D. **New Hospitals/Hospital Change of Ownership**

For any newly participating Hospital, or any Hospital which is party to a merger, sale of assets, or other transaction involving the identity, licensure, ownership or operation of the Hospital during the effective period of the state plan, EOHHS, in its sole discretion, shall determine, on a case-by-case basis (1) whether the Hospital qualifies for payment under the state plan, and, if so, (2) the appropriate rates of payment. Such rates of payment shall be determined in accordance with the provisions of the state plan to the extent EOHHS deems possible. EOHHS's determination shall be based on the totality of the circumstances. Any such rate may, in EOHHS's sole discretion, affect computation of the statewide average or statewide standard payment amount and/or any efficiency standard.

E. **Data Sources**

When groupers used in the calculation of the APAD and per diem rates are changed and modernized, it may be necessary to adjust the base payment rate so that overall payment levels are not affected solely by the grouper change. This aspect of "budget neutrality" has been a feature of the Medicare Diagnosis-Related Group (DRG) program since its inception. EOHHS reserves the right to update to a new grouper.

If data sources specified in this Attachment are not available, or if other factors do not permit precise conformity with the provisions of this Attachment, EOHHS shall select such substitute data sources or other methodology(ies) that EOHHS deems appropriate in determining Hospitals' rates.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

VII. Provider Preventable Conditions

<u>Citation</u>	<u>Payment Adjustment for Provider Preventable Conditions</u>
42 CFR 447,434,438 and 1902(a) (4), 1902 (a) (6) and 1903	The Medicaid agency meets the requirements of 42 CFR Part 447, Subpart A, and sections 1902 (a) (4), 1902 (a) (6) and 1903 with respect to non-payment for provider-preventable conditions.

Health Care-Acquired Conditions

The State identifies the following Health-Care Acquired Conditions for non-payment under Attachment 4.19-A(1), (Acute Inpatient Hospital Services) under this State plan.

- Hospital Acquired Conditions as identified by Medicare other than Deep Vein Thrombosis (DVT)/ Pulmonary Embolism (PE) following total knee replacement or hip replacement surgery in pediatric and obstetric patients.

Other Provider-Preventable Conditions

The State identifies the following Other Provider-Preventable Conditions for non-payment under Attachment 4.19-A(1), (Acute Inpatient Hospital Services) under this State plan.

- Wrong surgical or other invasive procedure performed on a patient; surgical or other invasive procedure performed on the wrong body part; surgical or other invasive procedure performed on the wrong patient.
- Additional Other Provider-Preventable Conditions identified below.
 1. Intraoperative or immediately postoperative / post procedure death in a ASA class 1 patient
 2. Patient death or serious injury associated with the use of contaminated drugs, devices or biologics provided by the healthcare setting.
 3. Patient death or serious injury associated with the use or function of a device in patient care, in which the device is used or functions other than as intended.
 4. Patient death or serious injury associated with patient elopement (disappearance)
 5. Patient suicide, attempted suicide, or self-harm resulting in serious injury, while being cared for in a healthcare setting.
 6. Patient death or serious injury associated with a medication error (e.g., errors involving the wrong drug, wrong dose, wrong patient, wrong time, wrong rate, wrong preparation or wrong route of administration)

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

7. Maternal death or serious injury associated with labor or delivery in a low-risk pregnancy while being cared for in a healthcare setting.
8. Death or serious injury of a neonate associated with labor and delivery in a low-risk delivery.
9. Unstageable pressure ulcer acquired after admission / presentation in a healthcare setting.
10. Patient death or serious injury resulting from the irretrievable loss of an irreplaceable biological specimen,
11. Patient death or serious injury resulting from failure to follow up or communicate laboratory, pathology, or radiology test results.
12. Death or serious injury of a patient or staff associated with the introduction of a metallic object into the MRI area.
13. Patient death or serious injury associated with the use of physical restraints or bedrails while being cared for in a health care setting.
14. Death or serious injury of a patient or staff member resulting from a physical assault (i.e., battery) that occurs within or on the grounds of a healthcare setting.

No reduction in payment for a provider preventable condition will be imposed on a provider when the condition defined as a PPC for a particular patient existed prior to the initiation of treatment for that patient by that provider.

Reduction in provider payment may be limited to the extent that the following apply: (i) the identified provider preventable conditions would otherwise result in an increase in payment; (ii) the State can reasonably isolate for nonpayment the portion of the payment directly related to treatment for, and related to, the provider preventable condition.

A State plan must ensure that nonpayment for provider-preventable conditions does not prevent access to services for Medicaid beneficiaries.

Payment Method:

EOHHS will pay hospitals in accordance with the requirements of 42 CFR Part 447, Subpart A, and sections 1902(a)(4), 1902(a)(6) and 1903 with respect to non-payment for provider-preventable conditions.

Provider preventable conditions (“PPCs”) are defined as those conditions that are identified as Health Care-Acquired Conditions (“HCACs”) and Other Provider-Preventable Conditions (“OPPCs”) listed above. The OPPCs include the three National Coverage Determinations (the “NCDs”) and the Additional Other Provider Preventable Conditions (“Additional OPPCs”) that are listed above.

When a Hospital reports a PPC that the Hospital indicates was not present on admission, MassHealth will reduce payments to the Hospital as follows:

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

1. APAD, Outlier Payment, and Transfer per diem payments:
 - a. MassHealth will not pay the APAD, Outlier Payment, or Transfer per diem payment if the Hospital reports that only PPC-related services were delivered during the inpatient admission, and will exclude all reported PPC-related costs/services when determining future year payment rates that are calculated using a data source that would otherwise include the PPC.
 - b. MassHealth will pay the APAD, Outlier Payment, or Transfer per diem payment, in each case as adjusted to exclude PPC-related costs or services, if the Hospital reports that non-PPC related services were also delivered during the inpatient admission, and will exclude all reported PPC-related costs/services when determining future year payment rates that are calculated using a data source that would otherwise include the PPC.

2. Psychiatric, Rehabilitation, or Administrative Day Per Diem payments:
 - a. MassHealth will not pay the per diem if the Hospital reports that only PPC-related services were delivered on that day, and will exclude all reported PPC-related costs/services when determining future year payment rates that are calculated using a data source that would otherwise include the PPC.
 - b. MassHealth will pay the per diem if the Hospital reports that non-PPC related services were also delivered on that day, but will exclude all reported PPC-related costs/services when determining future year payment rates that are calculated using a data source that would otherwise include the PPC.

3. Inpatient Hospital payments for Hospital-Based Physician Services: MassHealth will not pay for inpatient Hospital-based physician services reported as PPC-related services.

4. Follow-up Care in Same Hospital: If a hospital reports that it provided follow-up inpatient hospital services that were solely the result of a previous PPC (inpatient or outpatient) that occurred while the member was being cared for at a facility covered under the same hospital license, MassHealth will not pay for the reported follow-up services. If the Hospital reports that non-PPC-related services were provided during the follow-up stay, payment will be made, but adjusted in the case of APAD, Outlier payment, or Transfer per diem payments to exclude the PPC-related costs or services, and MassHealth will exclude all reported PPC-related costs/services when determining future year payment rates that are calculated using a data source that would otherwise include the PPC.

The federal non-payment provision also applies to third-party liability and crossover payments by MassHealth.

Charges for service, including co-payments or deductibles, deemed non-billable to MassHealth are not billable to the member.

In the event that individual cases are identified throughout the PPC implementation period, the Commonwealth shall adjust reimbursement according to the methodology above.

State Plan Under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

VIII. Serious Reportable Events

The non-payment provisions set forth in this Section VIII apply to the following serious reportable events (SREs):

1. Discharge or release of a patient/resident of any age, who is unable to make decisions, to other than an authorized person
2. Any incident in which systems designated for oxygen or other gas to be delivered to a patient contains no gas, the wrong gas or are contaminated by toxic substances
3. Any instance of care ordered by or provided by someone impersonating a physician, nurse, pharmacist, or other licensed health care provider.
4. Abduction of a patient/resident of any age.
5. Sexual abuse/assault on a patient or staff member within or on the grounds of the healthcare setting.

Hospitals are prohibited from charging or seeking payment from MassHealth or the Member for Hospital and Hospital-Based Physician services that are made necessary by, or are provided as a result of, a serious reportable event occurring on premises covered under the Hospital license that was preventable and unambiguously the result of a system failure, as described in DPH regulations at 105 CMR 130.332 as in effect on the date of service. Non-reimbursable Hospital and Hospital-Based Physician services include:

1. All services provided during the inpatient admission during which a preventable SRE occurred; and
2. All services provided during readmissions and follow-up outpatient visits as a result of a non-billable SRE provided:
 - a. at a facility under the same license as the Hospital at which a non-billable SRE occurred; or
 - b. on the premises of a separately licensed hospital with common ownership or a common corporate parent of the Hospital at which a non-billable SRE occurred.
3. Charges for services, including co-payments or deductibles, deemed non-billable to MassHealth are not billable to the Member.

The non-payment provision also applies to third-party liability and crossover payments by MassHealth.

A Hospital not involved in the occurrence of a preventable SRE that also does not meet the criteria in number 2 above, and that provides inpatient or outpatient services to a patient who previously incurred an SRE may bill MassHealth for all medically necessary Hospital and Hospital-Based Physician services provided to the patient following a preventable SRE.

State Plan under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services
Exhibit 1: RY21 Payment Method for Critical Access Hospitals Effective
October 1, 2020 through September 30, 2021

EXHIBIT 1

Rate Year 2021 Payment Method Applicable to Critical Access Hospitals
Effective October 1, 2020 through September 30, 2021

Section I. Overview

The payment methods set forth in this **Exhibit 1** apply to Critical Access Hospitals for RY21 (October 1, 2020 through September 30, 2021).

Section II. Payment Method - General

EOHHS will pay Critical Access Hospitals an amount equal to 101 percent of the Hospital's allowable costs as determined by EOHHS utilizing the Medicare cost-based reimbursement methodology for the hospital's state plan services in RY21 (October 1, 2020 through September 30, 2021), as more fully described below. Interim payments will be made to Critical Access Hospitals based on the rates and methods set forth in this **Exhibit 1**, which payments are provisional in nature and subject to the completion of a cost review and settlement for the time period beginning October 1, 2020 through September 30, 2021, as described in **Section II(B)** of this **Exhibit 1**, below. Subject to this **Exhibit 1**, **Attachment 4.19-A(1)** otherwise applies to Critical Access Hospitals. If a Hospital loses its designation as a Critical Access Hospital, the payment methods for such hospital shall revert to the standard acute hospital rate methodologies, and payments may be adjusted accordingly. Reversion to any such rate methodologies shall not affect the payment rates to other participating acute hospitals for the applicable rate year.

(A) Payment for Inpatient Services

For inpatient admissions occurring in RY21, Critical Access Hospitals (CAHs) will be paid for Inpatient Services in accordance with **Attachment 4.19-A(1)** with the following changes.

Critical Access Hospitals will be paid an Adjudicated Payment Amount per Discharge (APAD) for those Inpatient Services for which all other in-state acute hospitals are paid an APAD.

Notwithstanding **Section III.B** of **Attachment 4.19-A(1)**, for inpatient admissions occurring in the 1st RY21 Period, the APAD for each Critical Access Hospital is calculated, as follows, utilizing FY18 cost and discharge data:

- (1) EOHHS calculated a cost per discharge for inpatient services for each Critical Access Hospital, which was determined by dividing the amount reported on worksheet E-3, part VII, column 1, line 21, of the Hospital's FY18 CMS-2552-10 cost report, by the Hospital's number of FY18 Medicaid (MassHealth) discharges. The Hospital's Medicaid (MassHealth) discharge volume was derived from FY18 paid claims data residing in MMIS as of March 21, 2019, for which MassHealth is the primary payer.

State Plan under Title XIX of the Social Security Act

State: Massachusetts

Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services

Exhibit 1: RY21 Payment Method for Critical Access Hospitals Effective

October 1, 2020 through September 30, 2021

- (2) EOHHS then multiplied the cost per discharge amount by the Inflation Factors for Operating Costs between RY18 and RY20, resulting in the inflation-adjusted 1st RY20 Period cost per discharge for each Critical Access Hospital.
- (3) EOHHS then divided each Critical Access Hospital's 1st RY21 Period inflation-adjusted cost per discharge, as determined above, by each Hospital's FY18 inpatient casemix index (CMI), as determined by EOHHS.
- (4) That result is the 1st RY21 Period CAH-Specific Total Standard Rate per Discharge. This is an all-inclusive rate that replaces the APAD Base Payment used in the APAD calculations for all other Hospitals for admissions in the 1st RY21 Period.
- (5) The Critical Access Hospital's APAD for a specific discharge is then determined by multiplying the 1st RY21 Period CAH-Specific Total Standard Rate per Discharge by the applicable 1st RY21 Period discharge-specific MassHealth DRG Weight.

Notwithstanding **Section III.B** of **Attachment 4.19-A(1)**, for inpatient admissions occurring in the 2nd RY21 Period, the APAD for each Critical Access Hospital is calculated, as follows, utilizing FY19 cost and discharge data:

- (1) EOHHS calculated a cost per discharge for inpatient services for each Critical Access Hospital, which was determined by dividing the amount reported on worksheet E-3, part VII, column 1, line 21, of the Hospital's FY19 CMS-2552-10 cost report, by the Hospital's number of FY19 Medicaid (MassHealth) discharges. The Hospital's Medicaid (MassHealth) discharge volume was derived from FY19 paid claims data residing in MMIS as of May 24, 2020, for which MassHealth is the primary payer.
- (2) EOHHS then multiplied the cost per discharge amount by the Inflation Factors for Operating Costs between RY19 and RY21, resulting in the inflation-adjusted 2nd RY21 Period cost per discharge for each Critical Access Hospital.
- (3) EOHHS then divided each Critical Access Hospital's 2nd RY21 Period inflation-adjusted cost per discharge, as determined above, by each Hospital's FY19 inpatient casemix index (CMI), as determined by EOHHS.
- (4) That result is the 2nd RY21 Period CAH-Specific Total Standard Rate per Discharge. This is an all-inclusive rate that replaces the APAD Base Payment used in the APAD calculations for all other Hospitals for admissions in the 2nd RY21 Period.
- (5) The Critical Access Hospital's APAD for a specific discharge is then determined by multiplying the 2nd RY21 Period CAH-Specific Total Standard Rate per Discharge by the applicable 2nd RY21 Period discharge-specific MassHealth DRG Weight.

The following is an illustrative example of the calculation of the Total Case Payment for a CAH's standard APAD claim that does not also qualify for an Outlier Payment. This example assumes the 2nd RY21 Period applies.

State Plan under Title XIX of the Social Security Act
State: Massachusetts
Methods Used to Determine Rates of Payment for Acute Inpatient Hospital Services
Exhibit 1: RY21 Payment Method for Critical Access Hospitals Effective
October 1, 2020 through September 30, 2021

Table 5: Critical Access Hospital Interim APAD claim - 2nd RY21 Period			
(Values are for demonstration purposes only)			
Hospital:	Sample Critical Access Hospital		
DRG:	203, Chest Pain. Severity of Illness (SOI) = 2.		
Line	Description	Value	Calculation or Source
1	2nd RY21 Period CAH-Specific Total Standard Rate per Discharge	\$16,006 52	Exhibit 1 to Attachment 4.19-A(1)
2	MassHealth DRG Weight	0.3547	Determined based on claim information
3	Total Case Payment = Adjudicated Payment Amount per Discharge (Interim APAD)	\$5,677 51	Line 1 * Line 2

Outlier Payments and Transfer Per Diem rates for Critical Access Hospitals are calculated and paid as described in **Sections III.C and III.D of Attachment 4.19-A(1)**, respectively, except that the APAD used for purposes of those calculations is the CAH's APAD as calculated as set forth in **Section II.A of Exhibit 1**, above, utilizing the appropriate methodology that applies to the admission (1st RY21 Period or 2nd RY21 Period, as applicable).

(B) Post RY20 Cost Review and Settlement

EOHHS will perform a post-Rate Year 2021 review to determine whether the Critical Access Hospital received aggregate interim payments in an amount equal to 101% of allowable costs utilizing the Medicare cost-based reimbursement methodology for the hospital's state plan services for FY21 as such amount is determined by EOHHS ("101% of allowable costs"). EOHHS will utilize the Critical Access Hospital's FY21 CMS-2552-10 cost reports (including completed Medicaid (Title XIX) data worksheets) and such other information that EOHHS determines is necessary, to perform this post RY21 review. "Aggregate interim payments" for this purpose shall include all state plan payments to the hospital for FY21, but excluding, if applicable, any state plan payments to a Critical Access Hospital under Section III.K of Attachment 4.19-A(1), and any supplemental payments made to a Critical Access Hospital based on its status as a qualifying Hospital as defined in Section III.J.1 of Attachment 4.19-A(1).

If the Critical Access Hospital was paid less than 101% of allowable costs, EOHHS will pay the Critical Access Hospital the difference between 101% of allowable costs and the aggregate interim payments. If the Critical Access Hospital was paid more than 101% of allowable costs, the Critical Access Hospital shall pay to EOHHS, or EOHHS may recoup or offset against future payments, the amount that equals the difference between the aggregate interim payments and 101% of allowable costs.

This post Rate Year 2021 review and settlement will take place within twelve (12) months after EOHHS has obtained all accurate and complete data needed to perform the review and settlement calculation. EOHHS estimates that it will have accurate and complete data by September 30, 2022. Assuming this date, the settlement will be complete by September 30, 2023.
