Form CMS-179 (07/92) Instructions on Back
To meet the goals of beneficiary choice, financial stability of the program and administrative ease, no more than three (3) and no less than two (2) CCOs are awarded a contract to administer a care coordination program. The program is statewide with both voluntary and mandatory enrollment depending on the beneficiary’s category of eligibility. Medicaid beneficiaries excluded from the program regardless of the category of eligibility are listed in B.5.

CCOs are defined as organizations that meet the requirements for participation as a contractor in the Mississippi Coordinated Access Network (MississippiCAN) program and that manage the purchase and provision of health care services to MississippiCAN enrollees.

Contracted CCOs are selected through a competitive process in compliance with applicable state and federal rules, regulations, and law.

CCOs are required to:

- Demonstrate information systems are in place to meet all of the operating and reporting requirements of the program, including the collection of third party liability payments;
- Operate both member and provider call centers. The member call center must be available to members twenty-four (24) hours a day, seven (7) days a week. The provider call center must operate during normal providers’ business hours;
- Process claims in compliance with established minimum standards for financial and administrative accuracy and timeliness of processing with standards being no less than current Medicaid fee-for-service standards;
- Submit complete encounter data that meets federal requirements and allows DOM to monitor the program. CCOs that do not meet standards will be penalized.

CCOs are required to provide a comprehensive package of services that include, at a minimum, the current Mississippi Medicaid benefits. CCOs are required to:

- Participate as partners with providers and beneficiaries to arrange delivery of quality, cost-effective health care services, with medical homes and comprehensive care management programs to improve health outcomes.
- Ensure annual wellness physical exams to establish a baseline, to measure change and to coordinate care appropriately by developing a health and wellness plan with interventions identified to improve outcomes.
