Voluntary Benefit Package Selection Assurances - Eligibility Group under Section 1902(a)(10)(A)(i)(VIII) of the Act

ABP2a

The state/territory has fully aligned its benefits in the Alternative Benefit Plan using Essential Health Benefits and subject to 1937 requirements with its Alternative Benefit Plan that is the state's approved Medicaid state plan that is not subject to 1937 requirements. Therefore the state/territory is deemed to have met the requirements for voluntary choice of benefit package for individuals exempt from mandatory participation in a section 1937 Alternative Benefit Plan.

Yes

Explain how the state has fully aligned its benefits in the Alternative Benefit Plan using Essential Health Benefits and subject to 1937 requirements with its Alternative Benefit Plan that is the state's approved Medicaid state plan that is not subject to 1937 requirements.

Nebraska has fully aligned the benefits in its Nebraska ABP with the approved Medicaid State Plan by using duplication and adding the remaining Medicaid covered services by including additional Section 1937 covered benefits. Benefits provided by the base benchmark plan that are not included in the Medicaid State Plan were substituted for State Plan benefits not provided in the base benchmark plan. The EHB category where substitution occurred meets the standard of actuarial equivalence.
