### Remarks

Instructions on Back
(f) The capital cost component of the prospective per diem rate is based on the actual facility cost, taken from the most recently desk reviewed and/or field audited cost reports, subject to an aggregate 85th percentile ceiling.

(g) Administrative, other support, and plant maintenance cost components are reimbursed at the statewide median value, based on data included in the most recently desk reviewed and/or field audited cost reports.

8. Calculation of Facility-Specific Per Diem Rate

(a) The per diem cost components are summed to obtain the total facility rate per day for each resident in the nursing facility as of a date specified by the Department of Health and Human Services.

(b) The rate determined in (a) above shall be reduced by a budget adjustment factor (BAF) equal to 22.08%.

(c) After the close of the state fiscal year, all monies remaining in the nursing facility account, after the budget adjustment factor is reconciled, are paid in the month of July to nursing facilities based on their pro rata share of total Medicaid fee for service nursing facility per diem expenditures. The balance remaining in the nursing facility account each state fiscal year is computed by subtracting the total expended Medicaid fee-for-service nursing facility per diem payments from the budget total in the account (i.e., class line 504).

For the state fiscal year ending June 30, 2022, the total computable budget amount allocated to class line 504 is $222,124,804.

9. Rate Limitation

(a) In no case may payment exceed the provider’s customary charges to the general public for such services or the Medicare upper limit of reimbursement.

(b) Payment shall be made at the lesser rate when an established rate is a condition to a certificate of need approval and that rate differs from the Medicaid rate established by the Department. When a rate limitation is applied as a condition of the certificate of need, a provider may, if aggrieved, appeal such limitation.
