Intensive Home Based Treatment

Service Description: Intensive home based treatment (IHBT) service is a comprehensive rehabilitative behavioral health service provided to a child/adolescent with serious emotional disturbance (SED) and their family, designed to treat mental health conditions that significantly impair functioning. IHBT may also be utilized for the treatment of children and adolescents that have co-occurring substance use or neurodevelopmental needs, when these needs co-occur with a mental health condition. IHBT is provided for the purpose of preventing out of home placement or facilitating a successful transition back home. IHBT integrates trauma-informed and resilience-focused assessment, crisis response, individual and family psychotherapy, service and resource coordination, and rehabilitative skill development with the goal of either preventing the out-of-home placement or facilitating a successful transition back to home. These intensive, time-limited behavioral health services are provided in the child/adolescent's natural environment with the purpose of stabilizing and improving their behavioral health functioning as documented using the Ohio specific child and adolescent needs and strengths (CANS) tool.

Provider Qualifications: IHBT is provided by an agency certified by the Ohio Department of Mental Health and Addiction Services (OhioMHAS). IHBT is provided by a team of practitioners operating within an agency sharing various responsibilities for the same child/adolescent and family. IHBT shall be provided by a team of practitioners who meet at least one of the following team compositions:

- A team comprised of two or more licensed practitioners operating in accordance with the scope of practice and supervisory requirements identified by the applicable licensing board.
- A hybrid team comprised of at least one licensed practitioner as described above; and
  - one qualified mental health specialist who holds a valid high school diploma or equivalent and has received training for or education in mental health and has demonstrated competencies in basic mental health skills; or
  - an OhioMHAS-certified peer supporter who demonstrates competency working with children or adolescents with SED and their families.

A qualified mental health specialist or certified peer supporter providing IHBT must be supervised by a licensed individual qualified to supervise the provision of IHBT within their scope of their practice.
