Richard Charest, Secretary Executive Office of Health and Human Services State of Rhode Island Cranston, RI 02920

RE: Rhode Island State Plan Amendment Transition Number (TN) 25-0007

Dear Secretary Charest:

The Centers for Medicare & Medicaid Services (CMS) has reviewed the proposed Rhode Island state plan amendment (SPA) to Attachment 4.19-A TN 25-0007, which was submitted to CMS on March 26, 2025. This plan amendment makes technical changes to the cost-based reconciliation process and reporting requirements used to determine rates for psychiatric residential treatment facility (PRTF) services. It also transfers oversight authority for PRTFs from the Department of Children, Youth and Families to the state's Executive Office of Health and Human Services.

We reviewed your SPA submission for compliance with statutory requirements, including in sections 1902(a)(2), 1902(a)(13), 1902(a)(30), 1903 as it relates to the identification of an adequate source for the non-federal share of expenditures under the plan, as required by 1902(a)(2) of the Social Security Act and the applicable implementing Federal regulations.

Based upon the information provided by the state, we have approved the amendment with an effective date of February 13, 2025. We are enclosing the approved CMS-179 and a copy of the new state plan pages.

If you have any additional questions or need further assistance, please contact Novena James-Hailey at 617-565-1291 or via email at <a href="Movena.JamesHaiely@cms.hhs.gov">Novena.JamesHaiely@cms.hhs.gov</a>.

Sincerely,

Rory Howe

# STATE: RHODE ISLAND Psychiatric Residential Treatment Facilities

Except as otherwise noted in the State Plan, state-developed rates are the same for both governmental and private providers of Psychiatric Residential Treatment Facilities (PRTF).

Payment for Psychiatric Residential Treatment Facilities (PRTF) provided by state certified Providers will be paid on a cost basis as follows:

#### 1. Overview of Cost-Based Payment

Upon meeting the requirements of the *Psychiatric Residential Treatment Facilities (PRTF) Rhode Island Certification Standards*, and in subsequent years of operation by every January 15, the Provider shall prepare and submit to the state the cost report described herein that includes the anticipated costs for the forthcoming twelve (12) month period commencing the following June 30 (or the state's fiscal year). Upon approval by the Executive Office of Health and Human Services (EOHHS), the cost-based per diem rate will become initially effective upon the date EOHHS certifies a facility as meeting certification standards and then, subsequently, on July 1 following resubmission of an updated cost report. The per diem payment rate for a facility will be determined using cost reports, desk audits, and field office audits (when needed).

### 2. Cost Reports to be Submitted by Provider

- a. By January 15 annually: Provider submits to EOHHS a prospective cost report that documents the PRTF's anticipated prospective operating budget, including labor expenses, facility and other direct costs, and general and administrative costs; the cost report shall be submitted during initial certification of provider and annually thereafter.
- b. Annually within six (6) months of the end of the state fiscal year (June 30<sup>th</sup>): Provider submits to EOHHS a cost report that documents the same cost elements as the January cost report, and reports allowable expenses incurred and service utilization during the prior fiscal year. This report shall be supported by audited financial statements submitted to EOHHS.
- c. All cost reports will reflect Medicaid-attributable costs and service utilization throughout the year, less adjustments for unallowable costs. The cost report must be completed in accordance with generally accepted accounting principles (GAAP) and the Medicare Principals of Reimbursement and prepared on the accrual basis of accounting wherein both revenues and expenditures are recognized in the period when earned or incurred regardless of when actual cash payments are made. The cost report submission shall be certified by an authorized corporate officer or licensed professional. Cost reports shall be subject to desk and field audits.

TN: 25-0007 Supersedes TN: 21-0007

Approval Date: <u>June 12, 2025</u> Effective Date: February 13, 2025

#### STATE: RHODE ISLAND

- i. The desk audit is a review performed by an EOHHS staff member in which staff member evaluates the accuracy of the information in the cost reports and supporting documentation in accordance with an audit program.
- ii. If EOHHS suspects misappropriation of funds, fraud, or failure to adhere to the Medicare Principals of Reimbursement, EOHHS can conduct an onsite field audit to ensure the accuracy of the claims for reimbursement and consistency in reporting. EOHHS can conduct an on-site audit at any time if it needs to investigate concerns related to resident care.
- iii. Provider costs will not be considered in the calculation of the rate if the provider does not produce adequate documentation requested during a desk or field audit.

# 3. Allowable Cost Guidance

The federal Office of Management and Budget (OMB) "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Final Rule (Uniform Guidance) from December 26, 2013"; 2 CFR Part 200 (Omni Circular) provides guidance with regard to certain items of costs, including information as to whether certain types of indirect costs are allowable or unallowable.

Additional details are available through the following link: <a href="https://www.federalregister.gov/documents/2013/12/26/2013-30465/uniform-administrative-requirements-cost-principles-and-audit-requirements-for-federal-awards">https://www.federalregister.gov/documents/2013/12/26/2013-30465/uniform-administrative-requirements-cost-principles-and-audit-requirements-for-federal-awards</a>

Common unallowable costs categories described in the Omni Circular include, but are not limited to, fundraising costs; investment management costs; donation/contributions made by the vendor; fines and/or penalties; costs of goods and/or services purchased for the personal use of provider employees or officers; amortization or expensing of current or prior capital losses other than depreciation; cost of goods and services that would be procured by self-dealing or related party transactions unless it is affirmatively shown that the costs of such is no greater than what the same would have cost when procured independently; lobbying and advocacy costs; and noncapital debt interest cost (capital debt interest and principal cost for an asset may be included if the provider does not include a use or depreciation allowance for such asset in its fee basis). General selling, marketing, promotion, and public relation costs are typically unallowable except to the extent that they are expected to be incurred solely because they are required for the provider to perform the scope of work proposed.

General and Administrative (G&A) costs are known as indirect costs. Indirect costs are those associated with operating and providing a service, but which are not easily or directly associated only with the particular service. Certain indirect costs may not be allowable for allocation to the PRTF rate. The PRTF provider shall list any indirect costs related to the PRTF service, and the provider shall describe the

TN: 25-0007 Supersedes TN: 21-0007

Approval Date: \_June 12, 2025 \_ Effective Date: February 13, 2025

# STATE: RHODE ISLAND

methodology used to allocate those costs to the service being proposed. Indirect cost allocation methodologies shall follow general accounting principles and shall be in accordance with the OMB Omni Circular described above.

# 4. Establishment of Initial Rates for First Year of Operation

For the first year of fiscal operation, rates will be established after a desk audit of the applicable cost report submitted by the provider.

Following the desk audit and optional field audit, the per diem rate will be determined by dividing the allowable annualized costs in the detailed budget request by the number of approved beds at the provider site and then dividing that value by the number of days in the fiscal year. For the purpose of determining the first year of fiscal operations per diem rates, a provider will not use a utilization rate for available beds of less than eighty-five percent (85%) unless a complete and proper justification, such as that evidenced by sustained historical data, is approved by EOHHS. A utilization rate below seventy-five percent (75%) will not be used at any time for the purpose of calculating a per diem rate, except during the first six (6) months of a PRTF's operation.

# 5. Annual Rate Redetermination

Annually on January 15, the provider shall submit a prospective cost report to EOHHS that contains the anticipated reasonable, allowable costs for operating the relevant PRTF site in the following state fiscal year (beginning on July 1). EOHHS will review the reasonable, allowable costs contained in the cost report and redetermine a new rate for PRTF services to be delivered by each certified site in the coming state fiscal year. In a manner similar to the determination of the initial payment rate, the per diem rate shall be redetermined by dividing the allowable annualized costs in the cost report by the number of approved beds at the site and then dividing that value by the number of days in the fiscal year. For the purpose of these calculations, a utilization rate for available beds of less than eighty-five percent (85%) will only be used if a complete and proper justification, such as sustained historical data that shows utilization below eighty-five percent (85%), has been provided to and approved by EOHHS. A utilization rate below seventy-five percent (75%) will not be used for the purpose of re-calculating a per diem rate.

The desk audit of the January cost report can be subject to an on-site audit. Anticipated costs will be disallowed for rate determination purposes if the provider does not meet allowability or reasonableness guidelines provided below. Within forty-five (45) days of acceptance of a cost report as complete by EOHHS, EOHHS shall issue an updated rate for PRTF services that shall become effective at the commencement of the subsequent state fiscal year beginning July 1.

# 6. Annual Cost Report and Reconciliation

Six (6) months after the end of the initial PRTF performance period (which is the State Fiscal Year July 1 - June 30) and each subsequent year thereafter, providers will submit a cost report that reflects Medicaid-attributable costs and service utilization throughout the year, less adjustments for unallowable costs previously detailed. This report shall be supported by audited financial statements submitted to EOHHS.

TN: 25-0007 Supersedes TN: 21-0007

TN: 21-0007 Approval Date: June 12, 2025 Effective Date: February 13, 2025

#### STATE: RHODE ISLAND

EOHHS shall review the actual costs incurred by the provider during the previous year. The total amount owed by the State will be compared to the total sum of interim payments made in aggregate to the facility in the corresponding fiscal year. If the revenue owed by the State to the facility is less than the sum of the interim payments, the provider shall return to the State (via a reconciliation payment) the amount that is equal to that difference. This return payment to the State must be made within 90 days of notification from EOHHS, unless contested by the provider as described below. If the payments made in aggregate to the facility in the corresponding year are less than the actual costs incurred by the provider during that year, then the state shall recoup via a reconciliation process the amount equal to the difference.

# 7. Reasonable Costs and Adequacy of Rates

Providers will be paid rates that are reasonable and adequate to meet costs that must be incurred by efficiently and economically operating the PRTF in order to provide services in conformance with state and federal laws, regulations, and quality and safety standards. Reasonable costs shall mean those costs of an individual provider for items, goods, and services which, when compared, will not exceed the costs of like items, goods, and services of comparable facilities in license and size. Reasonable costs include the ordinary, necessary, and proper costs of providing acceptable health care subject to the regulations and limits contained herein.

In addition, providers are expected to establish operating practices that assure that costs do not exceed what a prudent and cost-conscious buyer pays for a given item or service. If a cost appears higher, EOHHS can survey businesses offering similar products or cross reference with available cost information from nearby states for residential treatment-specific costs. If the reported costs exceed those levels and in the absence of proof that the situation was unavoidable, the excessive costs will not be included in a rate calculation.

#### 8. Record Retention and Penalties

Providers must maintain accurate, detailed, and original financial records to substantiate reported costs for a period of at least five years following the submission of required reports or until the final resolution of any appeal involving a rate for the period covered by the annual cost report, whichever occurs later, and in accordance with state and federal record retention regulations. Providers must maintain complete documentation of all of the financial transactions and census activity of the provider and affiliated entities including, but not limited to, the books, invoices, bank statements, canceled checks, payroll records, governmental filings, and any other records necessary to document the provider's claim for reimbursement. Providers must be able to document expenses relating to affiliated entities for which reimbursement is claimed whether or not they are related parties.

Providers will be subject to a penalty in the amount of up to fifteen percent (15%) of its payments if that provider fails to submit required information. EOHHS will notify the provider in advance of its intention to impose a penalty.

TN: 25-0007 Supersedes TN: 21-0007

Approval Date: June 12, 2025 Effective Date: February 13, 2025

#### STATE: RHODE ISLAND

If the program is no longer in operation, the facility shall retain the records and have available at EOHHS's request, in accordance with timeframes established through state and federal regulation.

# 9. Prospective Rate Adjustments

EOHHS may consider the granting of a prospective rate change during a performance year that reflects demonstrated cost increases in excess of the rate established previously. In order to qualify for a rate increase review, the provider must demonstrate increased cost attributable to one of the following:

- a. Demonstrated errors made during the rate determination process.
- b. Significant increases in operating costs resulting from the implementation of new or additional programs, services or staff if approved prior to implementation by EOHHS. A significant increase is defined as an increase of ten percent (10%) or more in operating costs, expected to be incurred for three (3) months or more during the performance year.
- c. Significant increases in operating costs resulting from capital renovations, expansion, or replacement required for compliance with fire safety codes and/or certification requirements as requested or required by EOHHS. Increased energy costs that the provider can demonstrate are a result of the provider having expended funds for heating, lighting, hot water, and similar costs associated with the consumption of energy provided by public utilities.
- d. Significant increases in workers' compensation and/or health insurance premiums which cannot be accommodated within the provider per diem rate, if the cost is justified.
- e. Significant, unanticipated increases in prevailing market wages for necessary staff positions.
- f. Other extraordinary circumstances that might substantially and materially increase costs of providing services.

Before a provider shall be permitted to file for a rate increase, increases in operating costs set forth in accordance with the above provisions must have been incurred for a period of not less than three (3) months in order to establish proof of the increase. Rate adjustments granted as a result of a request filed within one hundred twenty (120) days after the costs were first incurred shall be made effective retroactively to the date the costs were actually incurred provided, further, any adjustments granted as a result of requests filed more than one hundred twenty (120) days after the costs were first incurred will be effective on the first day of the month following the filling of the request.

# 10. Appeal of Rates Following Annual Redetermination or Prospective Rate Adjustment Request

A provider that is not in agreement with the final rate determination may, within fifteen (15) business days from the date of notification of a rate adjustment request decision, file a written appeal to the Medicaid Finance Unit via an email to OHHS.MedicaidFinance@ohhs.ri.gov. appeal. The Medicaid Director will provide the PRTF a written decision of the appeal within thirty (30) business days from the receipt of the appeal. Further appeal beyond the Medicaid Program shall be in accordance with the Administrative Procedures Act.
