Pierre, South Dakota 57501-2291

Re: South Dakota 21-0005

Dear Ms. Gill:

We have reviewed the proposed amendment to Attachment 4.19-D of your Medicaid State plan submitted under transmittal number (TN) 21-0005. Effective for services on or after June 1, 2021, this amendment revises the qualifying criteria for traumatic brain injury or spinal cord injury add-on payment for individuals residing in a nursing facility. In addition, it allows flexibility for individuals to qualify for this add-on payment in circumstances where completing an actual rehabilitation program is not appropriate.

We conducted our review of your submittal according to the statutory requirements at sections 1902(a)(2), 1902(a)(13), 1902(a)(30) and 1903(a) of the Social Security Act and the implementing Federal regulations at 42 CFR 447 Subpart C. We are pleased to inform you that Medicaid State plan amendment TN 21-0005 is approved effective June 1, 2021. The CMS-179 and the amended plan page are attached.

If you have any questions, please contact Christine Storey at Christine.storey@cms.hhs.gov or (303) 844-7044.

Sincerely,

For
Rory Howe
Acting Director
# Transmittal and Notice of Approval of State Plan Material

**To:** Regional Administrator  
Regional Office of the Centers for Medicare & Medicaid Services  
Department of Health and Human Services

**5. Type of Plan Material (Check One):**

**23. Remarks:** State authorized P&I change to block 7 on 07/08/21. 7a should by FFY 2021 and 7b should be FFY 2022.
11. The Department may allow an add-on payment for the In-state care of recipients needing extraordinary care. This payment is designed to recognize and compensate providers for patients who require an inordinate amount of resources due to the intensive labor involved in their care that is not captured in the normal case mix reimbursement methodology. Such an add-on payment requires prior authorization. The individual requiring extraordinary care must be a South Dakota Medicaid recipient and must meet nursing facility level of care as defined in ARSD 67:45:01.

Extraordinary care recipients are:

a. Chronic Ventilator Dependent Individuals—Individuals who are ventilator dependent due to major complex medical disease or other accidents.

b. Chronic Wound Care Recipients—Individuals who need therapeutic dressings/treatments/equipment that are designed to actively manipulate the sound healing process.

c. Behaviorally Challenging Individuals—Individuals who meet the following criteria:

   1. Have a history of regular/recurrent, persistent disruptive behavior which is not easily altered. Behaviors which require increased resource use or nursing facility staff must exist, and

   2. Have an organic or psychiatric disorder of thought, mood, perception, orientation, memory, or social history which significantly affects behavior and is interfering with care and placement. Social history refers to convicted sexual offenders, inmates, or individuals who are otherwise challenging due to past behaviors.

Individuals receiving specialized rehabilitation services are excluded from this rate.

d. Traumatic Brain or Spinal Cord Injured—Individuals who have had an injury to the skull, brain, or spinal cord. The injury may produce a diminished or altered state of consciousness resulting in impairment in cognitive abilities or physical functioning, as well as behavioral and/or emotional functioning. The individual must have either 1) completed an acute rehabilitation program in another facility and be continuing the rehabilitation plan or, 2) if an individual does not qualify for an acute rehabilitation program, they must have a physiatry consultation documenting the ability and willingness to participate in and benefit from therapy. Documentation must also show that the individual is alert and able to follow simple directions, medically stable, and no longer needing acute level of care. If an individual already resides in a skilled nursing facility and is not able to receive a physiatry consultation (either face to face or virtual), a licensed therapist may also perform the assessment.

e. Individuals requiring total parenteral nutritional therapy—Individuals who meet the following criteria:

   1. Have an internal body organ or body function such as severe pathology of the alimentary tract which does not allow absorption of sufficient nutrients to maintain weight and strength commensurate with the individual’s general condition.

   2. Have a physician’s order or prescription for the therapy and medical documentation describing the diagnosis and the medical necessity for the therapy.

   3. The therapy is the only means the individual has to receive nutrition.
