RURAL HEALTH TRANSFORMATION

# State Scorecards

Budget Period 1

The information in this report reflects State submitted information in the Year 1 RHTP Annual Report as of July 31, 2026 (reporting period: December 29, 2025 - July 31, 2026).

# State Scorecards

**Understanding the RHTP State Scorecards**
The Rural Health Transformation Program (RHTP) helps state governments strengthen rural healthcare access, quality, and outcomes by transforming rural health systems. These scorecards provide a point-in-time snapshot of each state's first-year implementation progress, state healthcare policy actions, and total RHTP funding to date. The information reflects state-submitted Year 1 RHTP Annual Report data as of July 31, 2026, covering reporting period December 29, 2025, through July 31, 2026).

**State Healthcare Policies:** "Policies Passed" includes qualifying state policies that were already in place before RHTP as well as policy commitments included in a state's RHTP application that has since been fulfilled. "Policies Remaining to be Passed" reflects policy commitments included in a state's application that had not yet fulfilled as of the reporting date. It does not include commitments that a state has formally abandoned.

**Presidential Fitness Test and Nutrition Continuing Medical Education for Physicians:** The two state policy actions are shown separated because they were not scored in Budget Period 1 under the RHTP Notice of Funding Opportunity (NOFO). Budget Period 2 is the first time that states' baseline status, commitments, and progress on these policy actions were included in scoring.

**Speed to Transform:** The speedometer provides a snapshot of each state's average implementation progress across its RHTP initiatives based on the number of checkpoints completed. States with average initiative progress below 17.5% are shown as "slow" (denoted with an arrow pointing left); states at or above 17.5% but below 27.5% are shown as "moderate" (denoted with an arrow pointing straight up); and states at or above 27.5% are shown as "fast" (denoted with an arrow pointing right). Across all states, average initiative progress ranged between 15% to 35% during Budget Period 1, with 17 states categorized as "fast", 23 as "moderate", and 10 as "slow". The Speed to Transform indicator reflects implementation progress during the first year of RHTP and should not be interpreted as a measure of a state's overall healthcare system or the health of its rural population.
