

## **SUPPORT Act Section 1003: Planning Grants for the Demonstration Project to Increase Substance Use Disorder Provider Capacity**

**State Medicaid Agency:** Indiana

**Key Focus Populations:** Adolescents and young adults between the ages of 12 and 21; pregnant, postpartum, prenatal women, and infants (including those with neonatal abstinence syndrome); and Medicare-Medicaid dual-eligibles

**Funding Amount:** \$2,760,638

**Program Areas of Focus<sup>1</sup>:** The information below summarizes the grantee's initial areas of focus through the planning grant awards, which are to:

- Conduct a gap/resource analysis of current mental health and substance use disorder (SUD) treatment needs of Indiana Health Coverage Program (IHCP)-enrolled individuals.
- Develop a provider network inventory and taxonomy of Medicaid-covered SUD treatment and recovery services.
- Provide a comprehensive assessment of care coordination capacity between primary care, obstetrics/gynecology, mental health, and SUD treatment and recovery providers.
- Develop concrete strategies to improve Indiana Health Care Programs provider recruitment, training, and technical support specific to SUD treatment and/or recovery services.
- Develop concrete strategies to address gaps in oversight and quality assurance activities and administrative barriers to provider participation in SUD prevention, treatment, and recovery service delivery.

---

<sup>1</sup> The purpose of the planning grants is to increase the capacity of Medicaid providers to deliver SUD treatment or recovery services through:

- An ongoing assessment of the substance use disorder treatment needs of the state;
- Recruitment, training, and technical assistance for Medicaid providers that offer substance use disorder treatment or recovery services; and
- Improved reimbursement for and expansion of the number or treatment capacity of Medicaid providers.
