

# July 2024 Medicaid and CHIP Enrollment Trends Snapshot

*Center for Medicaid  
and CHIP Services*

# Enrollment Snapshot

- To monitor states' progress after the end of the Medicaid continuous enrollment condition and states' return to regular eligibility operations, including conducting full renewals, this Enrollment Snapshot captures high level information on the most recently submitted month of Performance Indicator Enrollment Data<sup>1</sup> within the context of trends prior to the COVID-19 public health emergency (PHE), as well as trends prior to the end of the Medicaid continuous enrollment condition,<sup>2,3</sup> focusing on:
  - Total Medicaid and CHIP enrollment;
  - Medicaid enrollment;
  - CHIP enrollment;
  - Adult enrollment; and
  - Child enrollment.
- This analysis also captures high level information on the trend in the number of Medicaid and CHIP applications received by states.

<sup>1</sup> Performance Indicator Enrollment Data counts individuals receiving full-scope and comprehensive Medicaid and CHIP benefits.

<sup>2</sup> February 2020 serves as the baseline prior to the impacts of the COVID-19 pandemic and the enactment of the Families First Coronavirus Response Act (FFCRA) in March 2020. March 2023 serves as the baseline before states began disenrolling individuals from Medicaid coverage after the end of the Medicaid continuous enrollment condition. For more information, please visit <https://www.medicaid.gov/resources-for-states/coronavirus-disease-2019-covid-19/unwinding-and-returning-regular-operations-after-covid-19/index.html>.

<sup>3</sup> Section 6008 of FFCRA included a Medicaid continuous enrollment condition through March 31, 2023, and states that complied received a temporary federal medical assistance percentage (FMAP) increase.

# Key Findings

- In July 2024, **79,560,396** individuals were enrolled in Medicaid and CHIP, a decrease of **403,074** individuals (0.5%) from June 2024.<sup>1</sup>
  - **72,429,055** individuals were enrolled in Medicaid in July 2024, a decrease of **441,475** individuals (0.6%) from June 2024.
  - **7,131,341** individuals were enrolled in CHIP in July 2024, an increase of **38,401** individuals (0.5%) from June 2024.<sup>2</sup>
- As of July 2024, enrollment in Medicaid and CHIP has decreased by **14,455,287** individuals (15.4%) since March 2023, the final month of the Medicaid continuous enrollment condition under the Families First Coronavirus Response Act (FFCRA) and amended by the Consolidated Appropriations Act, 2023.<sup>3</sup>
  - Medicaid enrollment has decreased by **14,440,102** individuals (16.6%).
  - CHIP enrollment has decreased by **15,185** individuals (0.2%).
- Between February 2020 and March 2023, enrollment in Medicaid and CHIP increased by **23,109,188** individuals (32.6%) to **94,015,683**.
  - Medicaid enrollment increased by **22,819,861** individuals (35.6%).
  - CHIP enrollment increased by **289,327** individuals (4.2%).

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of September 10, 2024, with data through July 2024.

<sup>1</sup> Performance Indicator Enrollment Data counts individuals receiving full-scope and comprehensive Medicaid and CHIP benefits.

<sup>2</sup> The July 2024 increase in CHIP enrollment is primarily driven by Texas. Texas's CHIP enrollment increase in July 2024 is partially attributed to the state updating its reporting methodology.

<sup>3</sup> Families First Coronavirus Response Act, Pub. L. No. 116-127, Sec 6008, Temporary Increase of Medicaid FMAP. Note that Sec. 6008 of the FFCRA is amended by the Consolidated Appropriations Act, Pub. L. No. 117-328.

# Key Findings (continued)

- In July 2024, **2,197,414** applications for Medicaid and CHIP were submitted directly to states.<sup>1</sup>
  - The number of applications submitted directly to states was 8.5 percent higher in July 2024 compared to June 2024.
- In July 2024, **169,496** applications were transferred from the Federally Facilitated Marketplace (FFM) to states.<sup>2</sup>
  - The number of transferred applications was 2.0 percent lower in July 2024 compared to June 2024.

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data, preliminary data as of September 10, 2024, with data through July 2024.

<sup>1</sup> These counts include applications received by 50 states and the District of Columbia. For additional information, please see Figure 4.

<sup>2</sup> These counts include account transfer data from 33 states that use the federal healthcare.gov platform. For additional information, please see Figure 6.

Figure 1. National Medicaid and CHIP enrollment, February 2020 to July 2024, CMS Performance Indicator Data

	Medicaid and CHIP enrollment	Medicaid enrollment	CHIP enrollment
July 2024	79,560,396	72,429,055	7,131,341
June 2024	79,963,470	72,870,530	7,092,940
March 2023	94,015,683	86,869,157	7,146,526
February 2020	70,906,495	64,049,296	6,857,199

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of September 10, 2024, with data through July 2024.

**Note:** This analysis includes preliminary enrollment data from 50 states and the District of Columbia. The horizontal dotted lines on the graphs represent enrollment in February 2020, which serves as the baseline of enrollment prior to the impacts of the COVID-19 pandemic and the Families First Coronavirus Response Act (FFCRA) Medicaid continuous enrollment condition. The grey area on the line graphs represents the overall trend between February 2020 and August 2023, and is included to provide additional context to the annual trend from August 2023 to July 2024. The horizontal dashed lines on the graphs represent enrollment in March 2023, which serves as the baseline of enrollment prior to the end of FFCRA’s Medicaid continuous enrollment condition, after which states may initiate the disenrollment of individuals who have not had their Medicaid eligibility successfully renewed in the past 12 months. For additional information on Medicaid and CHIP enrollment from December 2019 to July 2024, please see Appendix A.

**Data Context:** The July 2024 increase in CHIP enrollment is primarily driven by Texas. Texas’s CHIP enrollment increase in July 2024 is partially attributed to the state updating its reporting methodology.

Figure 2. National adult and child enrollment in Medicaid and CHIP, February 2020 to July 2024, CMS Performance Indicator Data

	Adult Medicaid enrollment	Child Medicaid and CHIP enrollment	Child Medicaid enrollment	CHIP enrollment
July 2024	41,954,163	37,606,233	30,474,892	7,131,341
June 2024	42,269,192	37,694,278	30,601,338	7,092,940
March 2023	49,510,901	42,319,884	35,173,358	7,146,526
February 2020	34,132,212	35,166,011	28,308,812	6,857,199

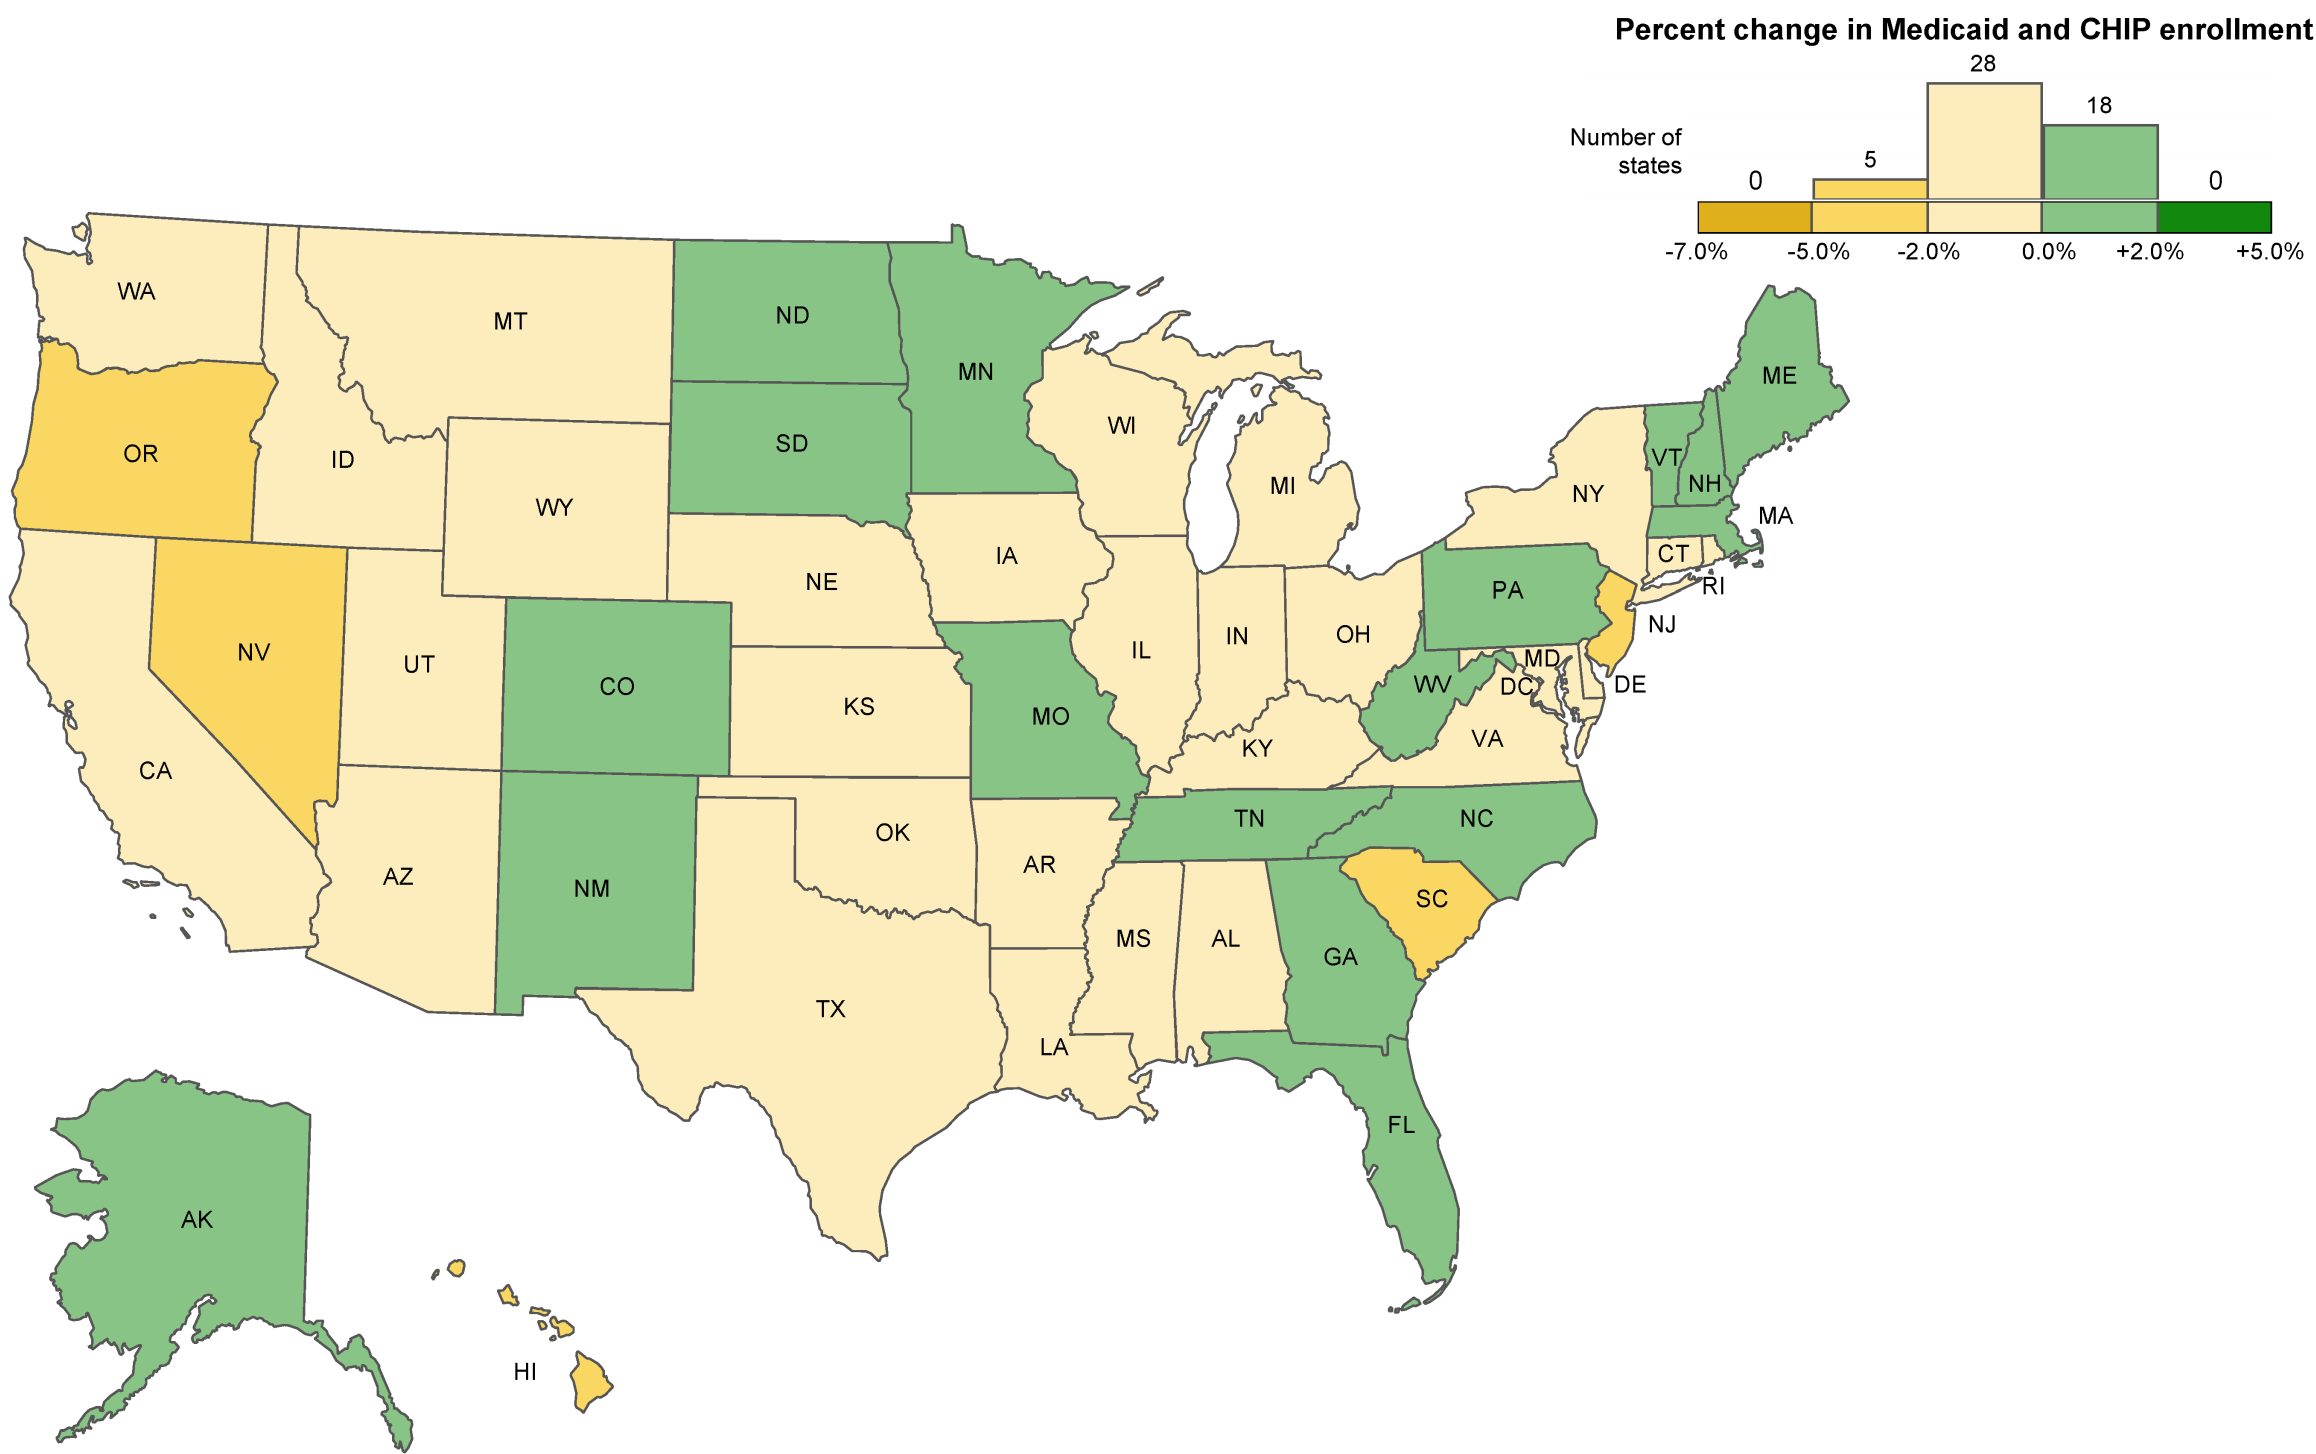

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of September 10, 2024, with data through July 2024.

**Note:** This analysis includes preliminary enrollment data from 50 states and the District of Columbia. Arizona did not report the Adult Medicaid and Child Medicaid enrollment breakouts from February 2020 to April 2024. The horizontal dotted lines on the graphs represent enrollment in February 2020, which serves as the baseline of enrollment prior to the impacts of the COVID-19 pandemic and the Families First Coronavirus Response Act (FFCRA) Medicaid continuous enrollment condition. The grey area on the line graphs represents the overall trend between February 2020 and August 2023, and is included to provide additional context to the annual trend from August 2023 to July 2024. The horizontal dashed lines on the graphs represent enrollment in March 2023, which serves as the baseline of enrollment prior to the end of FFCRA’s Medicaid continuous enrollment condition, after which states may initiate the disenrollment of individuals who have not had their Medicaid eligibility successfully renewed in the past 12 months. For additional information on Medicaid and CHIP enrollment from December 2019 to July 2024, please see Appendix B.

**Data Context:** The July 2024 increase in CHIP enrollment is primarily driven by Texas. Texas’s CHIP enrollment increase in July 2024 is partially attributed to the state updating its reporting methodology.

Figure 3. Change in total Medicaid and CHIP enrollment, June 2024 to July 2024, CMS Performance Indicator Data

Nationally, total Medicaid and CHIP enrollment decreased by 0.5 percent from June 2024 to July 2024. In 17 states and the District of Columbia, total Medicaid and CHIP enrollment increased by less than 2 percent. In 28 states, total Medicaid and CHIP enrollment decreased by less than 2 percent. In 5 states, total Medicaid and CHIP enrollment decreased between 2 and 5 percent.

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of September 10, 2024, with data through July 2024.  
**Note:** This analysis includes preliminary enrollment data from 50 states and the District of Columbia. New Jersey's total Medicaid and CHIP enrollment is an overcount.

Figure 4. National Medicaid and CHIP applications submitted directly to states from January 2019 to July 2024, CMS Performance Indicator Data

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of September 10, 2024, with data through July 2024.

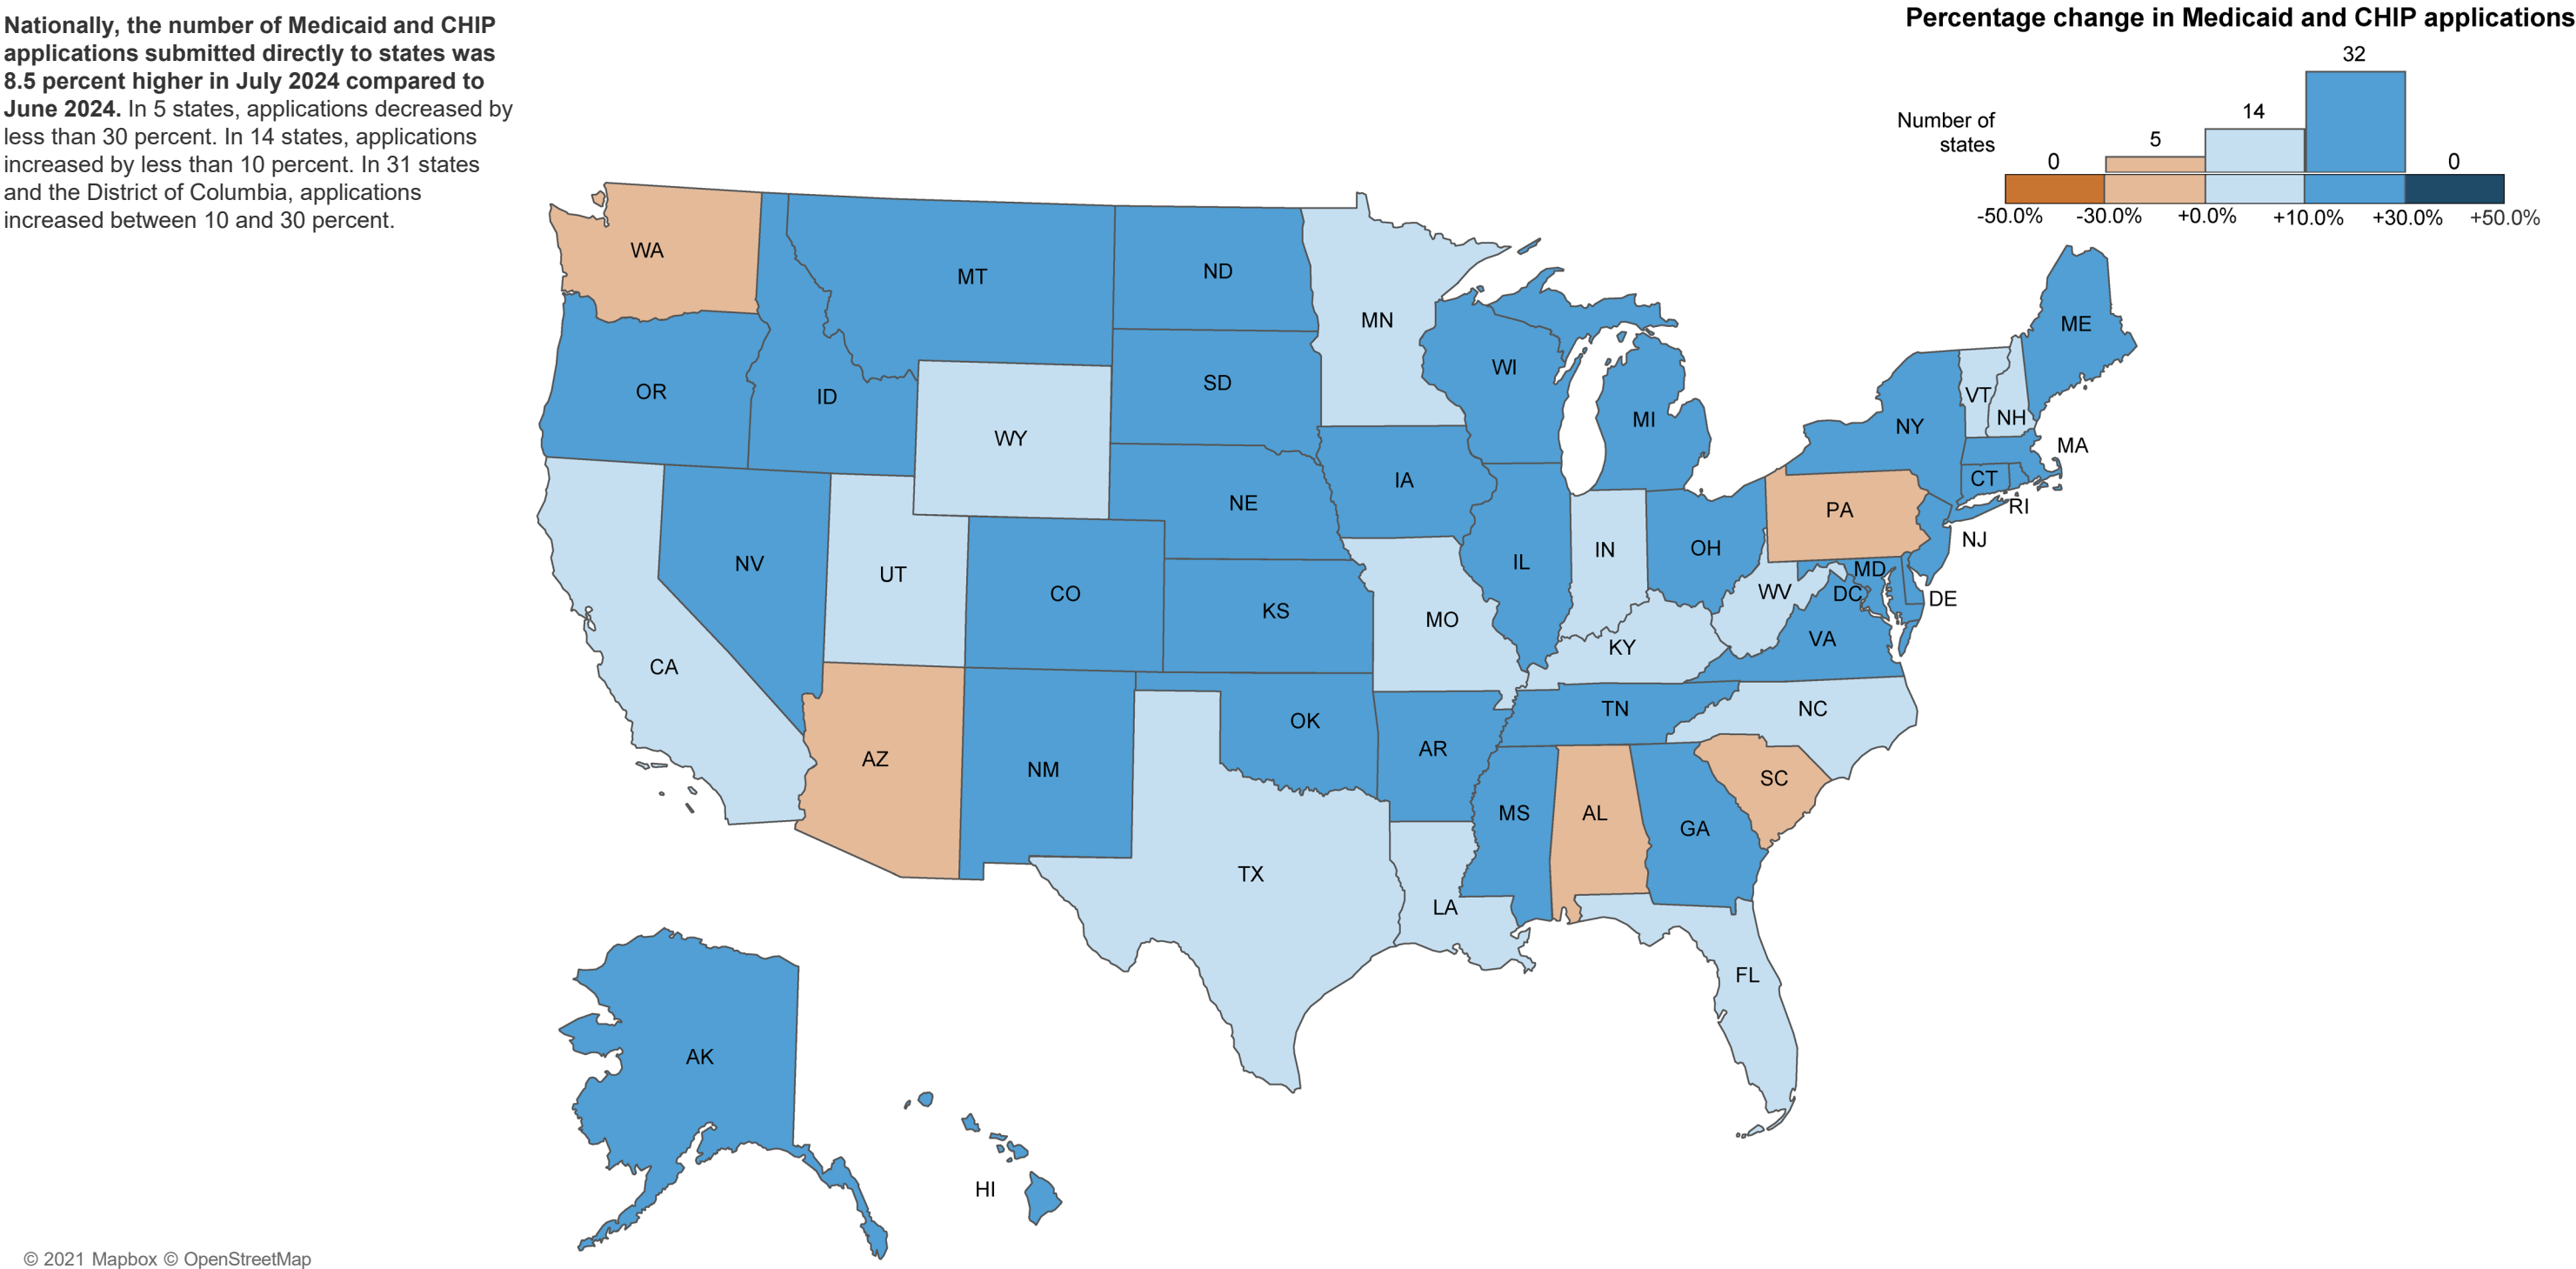

**Note:** Applications submitted directly to states include applications received by any state agency to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM are not included. This analysis includes preliminary data from 50 states and the District of Columbia. Fluctuations in state-reported Medicaid and CHIP applications may be observed throughout a given year as a result of open enrollment activities or other seasonal changes.

**Data Context:** Tennessee did not report applications data in January and February 2019. Maine did not report applications data in June 2020. Kansas did not report applications data from January 2019 to April 2023. In the February 2024 Enrollment Snapshot, New York corrected its historic applications data from June 2017 to September 2023. This data update altered the historic national applications data depicted in these reports, as the data presented in reports from February 2024 onward are significantly lower than those previously reported. For this reason, the applications data presented in this report are not comparable to data in reports published before February 2024. Arizona updated its reporting methodology to exclude duplicate applications in April 2024; applications data from March 2024 and prior months are not comparable to applications data for April 2024 and later months.

Figure 5. Change in Medicaid and CHIP applications submitted directly to states, June 2024 to July 2024, CMS Performance Indicator Data

Nationally, the number of Medicaid and CHIP applications submitted directly to states was **8.5 percent higher in July 2024 compared to June 2024**. In 5 states, applications decreased by less than 30 percent. In 14 states, applications increased by less than 10 percent. In 31 states and the District of Columbia, applications increased between 10 and 30 percent.

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of September 10, 2024, with data through July 2024.  
**Note:** Applications submitted directly to states include applications received by any state agency to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM are not included. This analysis includes preliminary data from 50 states and the District of Columbia.

Figure 6. Comparison of Medicaid and CHIP enrollment with the number of applications received, February 2020 to July 2024, CMS Performance Indicator Data

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of September 10, 2024, with data through July 2024.

**Note:** Applications submitted directly to states include applications received by any state agency to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM to states include the total number of accounts electronically transferred from the FFM to states for Medicaid or CHIP. This analysis includes preliminary enrollment and applications data from 50 states and the District of Columbia, and account transfer data from 33 states that use the federal healthcare.gov platform. The grey area on the graphs represents the overall trend between February 2020 and August 2023, and is included to provide context to the annual trend from August 2023 to July 2024.

**Data Context:** Maine did not report applications data in June 2020. Kansas did not report applications data from February 2020 to April 2023. In the February 2024 Enrollment Snapshot, New York corrected its historic applications data from June 2017 to September 2023. This data update altered the historic national applications data depicted in these reports, as the data presented in reports from February 2024 onward are significantly lower than those previously reported. For this reason, the applications data presented in this report are not comparable to data in reports published before February 2024. Arizona updated its reporting methodology to exclude duplicate applications in April 2024; applications data from March 2024 and prior months are not comparable to applications data for April 2024 and later months.

**Source:** Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of September 10, 2024, with data through July 2024.

**Note:** This table summarizes adult and child enrollment in Medicaid and CHIP since December 2019. This table is provided as a supplement to Figure 2, and includes preliminary enrollment data from 50 states and the District of Columbia. Arizona did not report the Adult Medicaid and Child Medicaid enrollment breakouts from February 2020 to April 2024.

# Background

- This is a Center for Medicaid & CHIP Services (CMCS) Medicaid and CHIP Coverage Learning Collaborative (MAC LC) project that monitors Medicaid and Children's Health Insurance Program (CHIP) enrollment trends, primarily using the Centers for Medicare and Medicaid Services (CMS) Performance Indicator Data.
- The MAC LC is a CMCS project that provides a forum for facilitated discussion and learning across CMS and states, with the goal of implementing and improving the programs, tools, and systems needed to ensure high-performing state health insurance programs. The MAC LC has enabled CMS to more effectively identify issues and also monitor and improve program performance.
- This snapshot is a companion to the July 2024 Medicaid & CHIP Application, Eligibility, and Enrollment Data posted on [Medicaid.gov](https://www.Medicaid.gov).
- The Enrollment Trends project primarily relies on Performance Indicator Data. All states—including the District of Columbia—provide data each month about their Medicaid and CHIP eligibility and enrollment activity. These data reflect a range of indicators related to key application, eligibility, and enrollment processes within the state Medicaid and CHIP agency. The complete data set is available on [Data.Medicaid.gov](https://Data.Medicaid.gov).
