Dear Ms. Azar:  

We have reviewed Alabama State Plan Amendment (SPA) 19-0009 received in the Centers for Medicare & Medicaid Services (CMS) Atlanta Regional Operations Group on September 25, 2019. This SPA proposes to allow the Alabama Medicaid Agency to enter into value/outcome(s) based agreements with drug manufacturers for purposes of collecting additional supplemental drug rebates.  

Based on the information provided and consistent with the regulations at 42 CFR 430.20, we are pleased to inform you that SPA 19-0009 is approved with an effective date of July 1, 2019. A copy of the signed CMS-179 form, as well as the pages approved for incorporation into Alabama’s state plan will be forwarded by the Atlanta Regional Operations Group.  

If you have any questions regarding this request, please contact Justin Aplin at (410) 786-6901 or Justin.Aplin@cms.hhs.gov.  

Sincerely,  

/s/

a. Prescribed Drugs – Continued

(7) Auditing by Manufacturer
The state permits manufacturers to audit utilization data as stated in (6) above. Adjustments to rebates are made to the extent that information indicates that utilization was greater or less than previously specified.

(8) Prior Approval
The state provides for response by telephone or other communication devices, e.g., fax, within 24 hours of a request for prior approval and provides for the dispensing of at least a 72-hour supply of a covered outpatient prescription drug in an emergency situation.

(9) Supplemental Rebate Agreements
The state is in compliance with section 1927 of the Social Security Act. The state will cover drugs of federal rebate participating manufacturers. The state is in compliance with reporting requirements for utilization and restrictions to coverage. Pharmaceutical manufacturers can audit utilization data. The unit rebate amount is confidential and cannot be disclosed for purposes other than rebate invoicing and verification.

The state may negotiate brand and/or generic supplemental rebates and value/outcome(s)-based agreement in addition to the federal rebates provided for in Title XIX. Supplemental drug rebate agreements and value/outcome(s)-based agreement between the state and a pharmaceutical manufacturer will be separate from the federal rebates.

A supplemental drug rebate agreement between the state and a drug manufacturer for drugs provided to the Alabama Medicaid population, originally submitted to CMS on August 8, 2003, and an updated version submitted on December 1, 2015, entitled, “State of Alabama Supplemental Drug Rebate Contract,” has been authorized by CMS.

A value/outcome(s)-based model agreement between the state and a drug manufacturer for drugs provided to the Alabama Medicaid population, originally submitted to CMS on July 1, 2019, entitled, “State of Alabama Value/Outcome(s) Based Agreement,” has been authorized by CMS for use beginning July 1, 2019.

Supplemental rebates received by the state in excess of those required under the national drug rebate agreement will be shared with the federal government on the same percentage basis as applied under the national rebate agreement.

All drugs covered by the program, irrespective of a prior authorization agreement, will comply with the provisions of the national drug rebate agreement.

(10) Preferred Drug List
Pursuant to 42 U.S.C. section 1396r-8 the state is establishing a preferred drug list with prior authorization for drugs not included on the preferred drug list. Prior authorization will be provided with a 24-hour turn-around from receipt of request and a 72-hour supply of drugs in emergency situations as in accordance with provisions of section 1927(d)(5) of the Social Security Act.

Prior authorization will be established for certain drug classes or particular drugs in accordance with federal law.

All drugs covered by the program irrespective of a prior authorization requirement will comply with the provisions of the national drug rebate agreement.

The state will utilize the Drug Utilization Review board to assure that in addition to pricing consideration, preferred drugs are clinically appropriate.
