PCR-HH: Plan All-Cause Readmissions	Index hospital stay (IHS) discharge date: January 1, 2019 – December 1, 2019	January 3, 2019 – December 31, 2019 (2 days through 30 days following IHS discharge date)	January 1, 2018 – December 31, 2019 (365 days prior to IHS discharge date through 30 days after the IHS discharge date) ^g
PQI92-HH: Prevention Quality Indicator (PQI) 92: Chronic Conditions Composite	January 1, 2019 – December 31, 2019	January 1, 2019 – December 31, 2019	None
Utilization Measures			
AIF-HH: Admission to an Institution from the Community	August 1, 2018–July 31, 2019	Institutional facility admission (IFA) date: August 1, 2018–July 31, 2019 Length of stay: August 1, 2018–December 31, 2019	August 1, 2018–July 31, 2019 (At least 30 days)
AMB-HH: Ambulatory Care: Emergency Department (ED) Visits	January 1, 2019–December 31, 2019	January 1, 2019–December 31, 2019	None
IU-HH: Inpatient Utilization	January 1, 2019–December 31, 2019	Inpatient discharge date: January 1, 2019–December 31, 2019 Total days: The sum of the length of stay for all discharges during the measurement year. Total days may include days incurred before January 1, 2019 provided the discharge date for the stay occurred during the measurement year.	None

^a For some measures, the measurement period for the numerator, denominator, or continuous enrollment period varies depending on a specified date for each enrollee (such as enrollee birthdates, prescription or treatment start dates, and discharge dates). For these measures, two ranges are shown. The first date range identifies the full range of possible dates that states will need to use to calculate the measure for all measure-eligible enrollees. The text in parentheses describes the measurement period that should be used for each eligible enrollee.

^b When reporting each measure to CMS, states should report the measurement period they used for the denominator in the “Start Date” and “End Date” fields. For many measures, this date range corresponds to calendar year 2019 (January 1, 2019–December 31, 2019). Some measures also require states to review utilization or enrollment prior to this period to identify the measure eligible population. For these measures, two date ranges are included in this table. The first date range should be used to populate the Start Date and End Date fields, while the second date range defines these prior review periods and should not be included in the Start Date and End Date fields. For example, the IET-HH measure instructs states to identify enrollees with index episode start dates (IESD) that started January 1, 2019 through November 13, 2019 (the first date range). However, states will also need to review an enrollee’s diagnosis history for 60 days prior to the date of the IESD to confirm that the patient had no claims/encounters with a diagnosis of AOD dependence (the second date range). States that followed the 2020 Health Home Core Set specifications should enter “January 2019” in the Start Date field and “November 2019” in the End Date field. States should note any deviations to any measurement period (numerator, denominator, continuous enrollment) in the “Deviations from Measurement Specifications” section.

^c No more than one gap in enrollment of up to 45 days during each year of the continuous enrollment period.

HEALTH HOME CORE SET MEASUREMENT PERIOD TABLE

^d Blood pressure reading must occur on or after the date of the second diagnosis of hypertension.

^e No more than one gap in enrollment of up to 45 days during the continuous enrollment period.

^f Applies to all rates: Alcohol abuse or dependence rate, Opioid abuse or dependence rate, Other drug abuse or dependence rate, and Total AOD abuse or dependence rate.

^g No more than one gap in enrollment of up to 45 days during the 365 days prior to the index discharge date and no gap during the 30 days following the index discharge date.
